

COMPANY PROFILE

Public Power Corporation S.A.

Public Power Corporation S.A.-Hellas
Energy for everyone

Within the environment of a liberalized energy market, PPC is operating as a fully vertically integrated company covering the whole spectrum of activities in the electricity field. Also, PPC constitutes one of the major industrial companies in terms of fixed assets.

PPC S.A. was founded in 1950 aiming at the electricity generation, transmission and distribution in the entire Greek territory. In December 2001, PPC's shares were listed on the Athens Stock Exchange. In parallel, GDRs were admitted on the London Stock Exchange.

Today, PPC is the largest Corporation for power generation and supply in Greece, with more than 7.4 million customers. It includes wide infrastructure in installations of lignite mines, power generation, transmission and distribution.

By the end of 2012, the Corporation acquired the 68% of the installed capacity of Power Plants in Greece, and its generation potential comprises lignite-fired, natural gas-fired and oil-fired Power Plants as well as Hydroelectric and Renewable Energy Sources Plants.

PPC is the 100% owner of the two subsidiaries founded with the separation of the Transmission and Distribution Sectors: ADMIE S.A. and HEDNO S.A.

ADMIE S.A. is responsible for the management, operation, development and

maintenance of the Hellenic Electricity Transmission System and its Interconnections, while HEDNO S.A. undertakes the management, development, operation and maintenance of the Hellenic Electricity Distribution Network.

This corporate scheme assures PPC Group with greater flexibility, better provision of services to customers and wider financial efficiency. At the same time, it provides equal access opportunities to the users of Transmission and Distribution Networks.
