

# COMPANY PROFILE

## Nestor Advisors

Nestor Advisors is an international corporate governance consultancy based in London. We assist boards and their committees to achieve their objectives through better organisation. This involves delineating the board's and management's areas of decision making, establishing a more productive balance between the board's strategic and control-oriented responsibilities, and improving the effectiveness of board committees and board deliberations in response to changing regulatory expectations and competitor practices.

Our clients include some of the largest companies and financial institutions in EMEA, Asia and Latin America. We are consulted on governance issues by policymakers and standard-setters, including the UK Parliamentary Committee on Banking Standards, the European Commission, the Basel Committee on Banking Supervision, the UK Financial Services Authority, the European Bank for Reconstruction and Development (EBRD) and the International Finance Corporation (IFC).

We work with family-owned, private equity-backed and listed companies in a number of sectors as well as with not-for-profit organisations.

Our services are exclusively focused on corporate governance and include board evaluations, comprehensive corporate governance assessments, board development and training, development of governance policies and delegation of authorities, multi-entity group governance reviews and risk governance assessments.
