21. The changes below apply In case of co-owner accounts, and for file types 13, 19, 57, 58, 72, 73, 29, 52 και 53:

For unrestricted securities

a) A record of type 11 (individual account data) will follow each record of type 2 (co-owner information). The field "Quantity" will have a zero value.

b) The fields below will have a zero value (0) in the case of the aggregate record of type 11, corresponding to co-owner accounts:

- Internal Numbering
- Interest Amount (gross) / Dividend Amount
- Tax Amount
- Special Tax Rate

For securities with restrictions (pledge etc.)

In case of pledge the above (a & b) will apply, with an additional record of type 09, following the aggregate record of type 11. In cases of multiple pledges the records will be repeated per lender.

## 2.5 Conversion files

### 2.5.1 Formation of conversion files addressing to ATHEXCSD

The issuers create the files with the written form described below which they send to ATHEXCSD with magnetic mean. The data contained within the magnetic files are classified into the following types of records:

Type of records	Recording
0 (zero)	Header Record of sending file
1 (one)	Investor record
2 (two)	Co beneficiaries record
3 (three)	Quantity record
4 (four)	Contract of burden (pledge, usufruct)
5 (five)	Analysis of burden contract
6 (six)	Error report

The description of the exchanged files and the analytical description of the record files, follow.

The types of files sent by the issuer to ATHEXCSD are

- The conversion file with which are sent the data of the shareholders, and the quantities they possessed. The quantities could be according to depositing or according to the shareholders list (for nominal securities) or burden (pledge, usufruct) could exist on them. The file includes the following records :

0 (zero)	Header Record of addressing file
1 (one)	Investors record
2 (two)	Co beneficiaries record
3 (three)	Quantity of securities record

The data could be sent partially with marked consecutive addressing number.

- The file of “burden contracts” which contains the data of the burden contracts (pledge, usufruct) which are available on behalf of the issuer and the terms based on standardized form. It includes records:

0 (zero)	Header Record of addressing file
4 (four)	Burden contracts (pledge, usufruct)
5 (five)	Analysis of burden contracts (terms of contracts)

Since it is possible a pledge contract to concern securities of more than one issuer, in any case it is checked whether the contract has entered. That way the files could be addressed repeatedly without effecting the operation of DSS.

- The “legalization” files which addressed only for nominal securities, in the end in order to legalize the shareholders for quantities that had entered from the conversion file according to the shareholders list. It includes records:

0 (zero)	Header Record of the addressed file
1 (one)	Investors record
3 (three)	Quantity of securities record

The data could be sent partially with marked consecutive addressing number.

### **2.5.2 Formation of files by ATHEXCSD for addressing to the issuers**

From ATHEXCSD are addressed to the issuers with magnetic means the following files arising during the procession of conversion.

- “Error” files. It is produced if errors confirmed while conduction the checking of one conversion, contract or legalization file. It includes records

0 (zero)	Header Record of the addressing file
6 (six)	Reporting error record

- “Accepted control” file, which is produce after the successful termination of checking. It contains the records that were addressed with file from the issuer and it is produce if no error detected in the whole file. It includes records

0 (zero)	Header Record of the addressing file
1 (one)	Investors record
2 (two)	Co beneficiaries record
3 (three)	Quantity of securities record
4 (four)	Burden contract (pledge, usufruct)
5 (five)	Analysis of burden contracts (terms of contracts)

In every checked file are included only the record types that needed into the checking file.
