1) The breakdown by investment policy is based on the type of assets in which the investment funds primarily invest, usually on the basis of a stated strategy (e.g. if the fund invests primarily in shares and other equity it is allocated to the "equity funds" category). Funds investing in both equity and bonds, without any prevalent policy for either, are allocated to the "mixed funds" category. If a fund cannot be classified as an equity, bond, mixed or real estate fund, it is included in the residual "other funds" category.
