**1H 2009 IFRS FINANCIAL RESULTS** 

> PRESENTED BY: CEO – Mr. E. MYTILINEOS

These preliminary materials and any accompanying oral presentation (together, the "Materials") have been prepared by Mytilineos Holdings SA (the "Company") and are intended solely for the information of the Recipient. The Materials are in draft form and the analyses and conclusions contained in the Materials are preliminary in nature and subject to further investigation and analysis. **The Materials are not intended to provide any definitive advice or opinion of any kind and the Materials should not be relied on for any purpose**. The Materials may not be reproduced, in whole or in part, nor summarised, excerpted from, quoted or otherwise publicly referred to, nor discussed with or disclosed to anyone else without the prior written consent of the Company.

The Company has not verified any of the information provided to it for the purpose of preparing the Materials and no representation or warranty, express or implied, is made and no responsibility is or will be accepted by the Company as to or in relation to the accuracy, reliability or completeness of any such information. The conclusions contained in the Materials constitute the Company's preliminary views as of the date of the Materials and are based solely on the information received by it up to the date hereof. The information included in this document may be subject to change and the Company has no obligation to update any information given in this report. The Recipient will be solely responsible for conducting its own assessment of the information set out in the Materials and for the underlying business decision to effect any transaction recommended by, or arising out of, the Materials. The Company has not had made an independent evaluation or appraisal of the shares, assets or liabilities (contingent or otherwise) of the Company .

All projections and forecasts in the Materials are preliminary illustrative exercises using the assumptions described herein, which assumptions may or may not prove to be correct. The actual outcome may be materially affected by changes in economic and other circumstances which cannot be foreseen. No representation or warranty is made that any estimate contained herein will be achieved.

### **IH 2009 Results Highlights**

- **Gamma** Summary Financial Results
- Business Units Performance
- **Q&A**

**1H 2009 RESULTS HIGHLIGHTS** 

- Turnover: € 328 m Vs € 490 m Last Year.
- EBITDA: € 48 m Vs € 56 m Last Year.
- Net Debt: € 347 m.
- ► Equity: € 826 m.
- **EBITDA margin: 14.5% Vs 11.4% Last Year.**

#### **METKA GROUP**

- Turnover: € 102 m Vs € 212 m Last Year.
- EBITDA: € 15.1 m Vs € 38.7 m Last Year.
- Earnings after Tax & Minorities: € 8.1 m Vs € 23.0 m Last Year.
- Net Debt: € -46m.
- Current Backlog: € 1.4 bn.
- Sustainable high margins for an EPC Contractor (EBITDA Margin 14.9%).

### HOLDINGS **MYTILINEOS**

### **1H 2009 RESULTS HIGHLIGHTS**

	Market/ Environment	Results
M&M	<ul> <li>Weak market environment for base metals although improved during the 2<sup>nd</sup> Quarter of 2009.</li> <li>Lower input costs (Oil, Freights, Raw Materials).</li> <li>Stronger dollar vs euro.</li> </ul>	<ul> <li>Efficient hedging strategy helped the Group to preserve profitability &amp; cash flows and significantly improve its operating margin.</li> <li>Lower Revenues on the back of production cuts and the suspension of Sometra activity.</li> </ul>
EPC	<ul> <li>Slowdown in the progress of Energy Investments for circumstantial and other reasons related to the global economic downturn and the credit crunch.</li> <li>Long term drivers such as the need to reduce carbon emissions, aging installed base and the industrialization of emerging economies remain intact.</li> </ul>	<ul> <li>&gt; Weak 1<sup>ST</sup> Half results reported due to delays and the time lag on the execution of new projects.</li> <li>&gt; Historically high Backlog (€1.4 bn) - Visibility – Strong financial position.</li> <li>&gt; Resilient EBITDA margin 14.9% (the highest in its peer) despite the absence of defense projects.</li> </ul>
ENERGY	<ul> <li>Reduced power demand in the Greek market around 5-6% this year, mainly due to lower industrial consumption.</li> <li>Lignite will remain a cornerstone, though its share will decrease. New capacity additions will be in CCGTs.</li> </ul>	<ul> <li>The CHP plant has already started operations since April 2009.</li> <li>CCGT 444MW in Viotia in advanced construction phase.</li> <li>CCGT 437MW in Korinthos (JV together with MOTOR OIL) currently in</li> </ul>

**Financial Performance** 

#### Key Drivers:

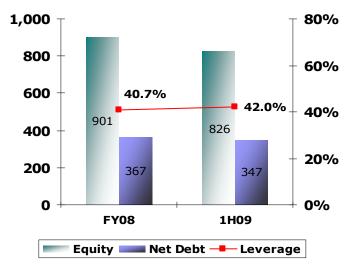

- Metal and Currency hedges support top line and profitability.
- > Improved EBITDA margin (+311bp).
- > Lower Input Costs.
- Stronger dollar.
- Sales down 33% y-o-y on the back of lower Metka Sales, AL production cuts and the suspension of the Zn & Pb activity.
- Significant Contribution from the Energy Sector is expected to commence during 2<sup>nd</sup> Half 2009.

Financial Performance

#### Key Drivers:

 $\succ$ 

 $\geq$ 

 $\geq$ 

 $\geq$ 

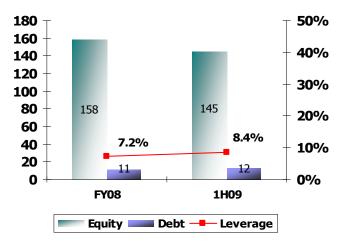

- Lower Sales mainly due to the time lag on the execution of new projects. KORINTHOS POWER & OMV PETROM projects are expected to contribute significantly in 2<sup>nd</sup> Half financial results.
- Backlog execution is expected to accelerate significantly from 3<sup>rd</sup> Quarter 09 onwards.
  - Reduced, but still high margins for an EPC Contractor (EBITDA Margin 14.9%) despite the expansion abroad and the absence of defense projects.
  - Strong Backlog: Currently € 1.4 bn.
  - Net Cash Position of € 46m.
  - 4 main projects under execution during 2009.

### EUR / USD AVG 1H: 1.33 1.65 1.60 1.55 Hedged €/\$ parity for 2009 : 1.50 1.45 1.40 1.35 1.30 1.25 1.20 Jul-08 Sep-08 Dec-08 Mar-09 Jun-09 **BRENT \$** 150 AVG 1H: (\$52 130 110 90 70 50 30

EUR/USD:
 €/\$:The average €/\$ parity during 1<sup>st</sup> Half 2009 settled at 1.33 comparing to 1.53 last year. After the rapid strengthening of the USD that started during the summer of 2008, the trend is again in favor of the Euro with the parity returning to the 1.42 level, well above the Group's hedged level of 1.33.
 Quantitative easing policies applied by both the Fed and the ECB coupled with China's alleged intention to limit their USD exposure are expected to be the main factors driving

the Eurodollar parity in the coming future.

- CRUDE OIL: Price: Average price during 1<sup>st</sup> Half 2009 settled at \$52 vs \$109 last year. After the sharp decline of the 2<sup>nd</sup> half of 2008, it took only some months for Brent to retain the \$70 per barrel level.
- Demand: Actual demand conditions remain poor however future demand prospects seem brighter.
- Supply: The magnitude and the speed of OPEC production cuts proved to be a decisive factor for the rapid recovery of Oil prices during the 2<sup>nd</sup> Quarter of the year.
- Oil inventories seem to enter a phase of reduction in the overall stock overhang. In the US, inventories peaked during April but until mid June they have already significantly contracted from 92mb to 65.5mb.

Jul-08

#### ALUMINIUM

- The average Aluminum price has settled at \$1,423 down 49.8% y-o-y and well below the Group's hedged price level.
- During the 2<sup>nd</sup> Quarter AL prices recorded a significant recovery and the premiums benefited on the back of low availability of scrap and a lot of LME stocks being tied up in financial agreements.
- Inventory Level: Production cuts seem still not enough to prevent total reported stocks from rising at 4.4 Mt at the end of the 1<sup>st</sup> Half. Stocks have continued to rise around the globe albeit at a slower pace than previously.
- Supply: Global surplus at the 2<sup>nd</sup> Quarter of 2009 has narrowed at 0.7 Mt. Total world supply is down 10.6% y-o-y however cutback announcements from producers have slowed considerably after March 2009 and some capacity restarting has already taken place.
- <u>Demand</u>: Consumption outside China remains weak with leading indicators pointing towards stabilization in Europe and the USA.

#### **GROUP - BUSINESS UNIT PERFORMANCE**

	Fundamentals	Prospects
Greece	<ul> <li>Tight supply – demand balance expected to continue despite new CCGT projects.</li> <li>Majority of existing capacity is old and inefficient.</li> </ul>	<ul> <li>PPC Megalopolis 800MW CCGT – (lowest bidder).</li> <li>EPC for continuation of Endesa Hellas' investment program: 400MW IPP plant in Volos.</li> </ul>
South-East & Central Europe, Turkey	<ul> <li>EU membership and convergence impose obligations for plant upgrades and/or closures.</li> <li>Years of under-investment.</li> <li>Government support and relatively high level of acceptance for nuclear.</li> </ul>	<ul> <li>SEE: 11,000 MW new capacity needed up to 2020. Rehabilitation of 11,500 MW of existing generation - €4.8bn**</li> <li>Turkey: major investments in gas and indigenous coal plants.</li> </ul>
Middle East	<ul> <li>Emphasis on mega-projects in the Gulf, several affected by global financial crisis.</li> <li>Gas for power generation becoming scarce – increased need for fuel efficiency.</li> <li>Environmental issues moving higher on the agenda.</li> </ul>	<ul> <li>Further opportunity in Syria</li> <li>Possibilities for conversion of open cycle plants to combined cycle across the Middle East.</li> <li>Numerous large Integrated Water &amp; Power Plant (IWPP) projects in the Gulf.</li> </ul>
Developing Countries	<ul> <li>Despite global economic slow-down there is continued power demand growth in developing countries.</li> <li>Power shortages common.</li> <li>Massive need for energy infrastructure investments, often on fast-track basis.</li> </ul>	<ul> <li>Pakistan: multiple IPP projects under development.</li> </ul>

#### Strong Backlog – Visibility – International Profile

- > PPC: 417 MW in Aliveri, Natural Gas Fired combined cycle. Alstom sub supplier for the main equipment. Contract value of €219 m.
- ► ENDESA HELLAS : 430 MW in Ag. Nikolaos, Natural Gas Fired combined cycle. GE sub supplier for the main equipment. Contract value of €232 m.
- > OMV PETROM: 860 MW in Romania, Natural Gas Fired combined cycle. 50-50 Consortium with GE. Contract value of €210 m.
- > PEEGT: 700 MW in Syria, Natural Gas Fired combined cycle. METKA leader of Consortium with Ansaldo. Contract value of €650 m.
- KORINTHOS POWER: 437 MW in Ag. Theodoroi, Natural Gas Fired combined cycle. GE sub supplier for the main equipment. Contract value of €285 m.

	Key Characteristics and Trends	Future Outlook
Demand	Consumption has grown with a yearly average of 3,7% in the decade 1998-2008, peaking during the summer (strong air cooling penetration in the commercial and residential sectors).	The low demand scenario of HTSO predicts a 2,5% yearly growth rate in demand up to 2012. However, the economic slump could keep the growth rate for 2009-2010 around zero.
Supply	<ul> <li>The percentage of domestic lignite in generation, in the interconnected System, is around 56-60%, and Greece has reserves for another 50 years.</li> <li>Gas's share is rising, 25,4% in 2007 and 26% in 2008, as most planned recent investments have been in CCGTs. Greece is importing gas (DEPA), mainly from Russia and Turkey via pipeline and LNG from Algeria and occasionally from the spot market.</li> <li>Wind only accounts for 3 percent of the mix, but Greece relies on important wind and solar potential and strong incentives estimated at more than 6 GW.</li> <li>Greece is not self-sufficient as it relies on imports between 7 and 11 percent of its consumption.</li> </ul>	<ul> <li>&gt; Lignite will remain a cornerstone, though its share will decrease.</li> <li>&gt; All the new conventional capacity up to 2012, at least, will be in CCGTs and perhaps some hundreds MW of OCGTs.</li> <li>&gt; Renewable generation is also set to rise as a very favorable framework has been put into place. Feed-in tariff for the energy and up to 40% subsidy for construction of wind and solar parks.</li> <li>&gt; Imports rise even though Bulgaria has closed two nuclear units. New nuclear capacity in Romania, high prices in Greece and new interconnection lines in region will keep that trend.</li> </ul>
Market Equilibrium	Remaining capacity (UCTE definitions) is positive throughout the year, and higher than 5% of net generating capacity but remaining margin is negative in July-August period.	Remaining capacity will be decreased in the next couple of years with few new capacity coming online.
Competitive Dynamics	> PPC is the incumbent with >99% market share in retail and around 95% in the wholesale market. Currently, there are 3 independent units in the market but PPC has overtaken the operation of Heron's 147 MW OCGT. PPC experiences difficulties in implementing its investment plan.	<ul> <li>PPC is looking for strategic partners to finance new commissioning plan.</li> <li>Private players might concentrate.</li> </ul>
	Foreign players have entered the market since 2006, teaming up with local (non-operator) investors (Endesa-Mytilineos, Edison-ELPE,). Mytilineos has replaced Iberdrola in the the joint venture with Motor-Oil. GDF-Suez will cooperate with the Greek company Terna.	21 Source: Endesa Hellas.

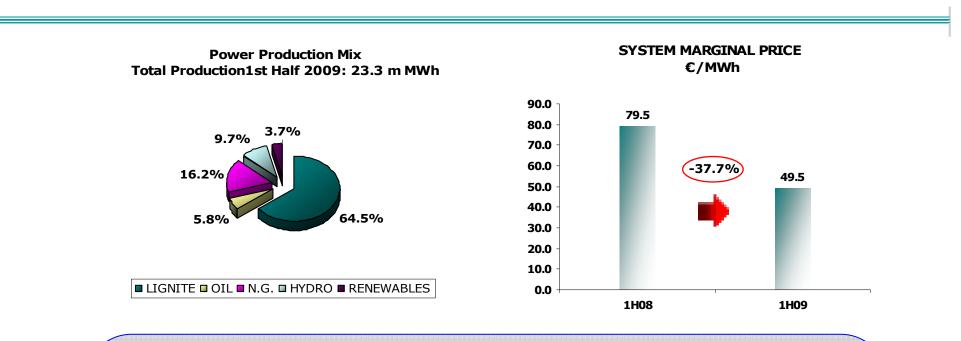

### **The Greek Electricity Market**

### Energy Market – Developments in 2009

- > Total Power production during 1H 2009: 23.3 m MWh (down 5.1% y-o-y).
- > Imports Exports balance amounted 2.5 m MWh (down 11.05% y-o-y).
- > Hydro production was up 53.44% when on the contrary Natural Gas production decreased by 46.23% y-o-y.
- > Total demand is decreased by 5.71% mainly due to lower demand from the high voltage customers (-20%).

**ENERGY - RECENT DEVELOPMENTS** 

#### **COGEN RESUMES OPERATION**

- > The CHP plant is expected to be in full commercial operation during summer 2009.
- The CHP plant offers energy saving of more than 10%, will reduce oil consumption by 160 thousand tonnes and reduce Greece's GHG emissions by 1.25 million tonnes annually. The overall efficiency rate of the CHP plant reach the level of 78%.
- Additionally, the operation of the new plant contributes to the reduction of System Marginal Price and covers partially the supply deficit substituting the expensive imports as well as the expensive back up units.
- Finally the CHP plant strengthens the southern part of Greece's electricity system, reducing the risk of a summer blackout.
