INTRALOT Group CEO Antonios Kerastaris noted:

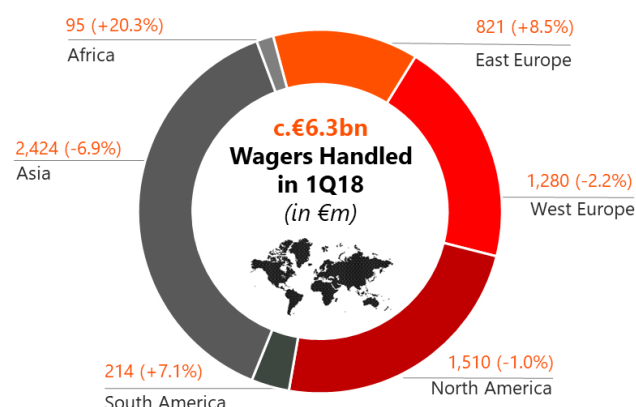

“The 2018 Q1 results show stronger sales and continuing growth in developed markets, reflecting increasingly successful market development efforts along with an upgrade of our offering with next generation products and services for Lotteries digital transformation. Emphasis remains on growth in markets such as the United States where the recent lift of the federal ban on sports betting creates tremendous business opportunities from the rise of a potential USD 20bn market in annual GGR terms, on top of great prospects in new flagship projects such as the Illinois State Lottery.”

OVERVIEW OF RESULTS

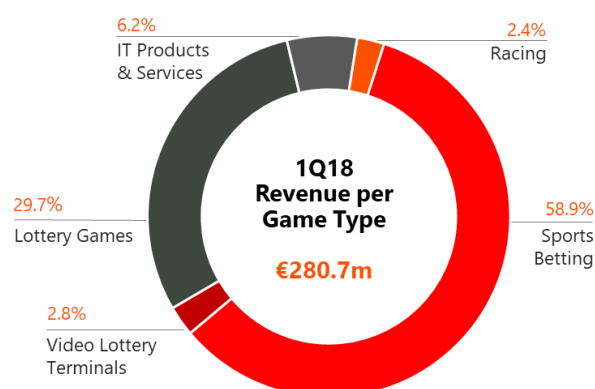

WAGERS HANDLED

During the three-month period ended March 31st, 2018, INTRALOT systems handled €6.3b of worldwide wagers (from continuing operations), a 2.0% y-o-y decrease. Africa's wagers increased by 20.3%, East Europe's by 8.5%, and South America's by 7.1%; while Asia's decreased by 6.9%, West Europe's by 2.2%, and North America's by 1.0%.

REVENUE

- Reported consolidated revenues increased by 4.3% compared to 1Q17, leading to total revenues for the three-month period ended March 31st, 2018, of €280.7m.
- Sports Betting was the largest contributor to our top line, comprising 58.9% of our revenues (posting double digit revenue growth, +11.9% year over year), followed by Lottery Games contributing 29.7% to Group turnover. Technology contracts accounted for 6.2% and VLTs represented 2.8% of Group turnover while Racing constituted the 2.4% of total revenues of 1Q18.
- Reported consolidated revenues for the three-month period are up by €11.7m year over year. The main factors that drove top line performance per Business Activity are:
 - €+7.7m (+4.1%) from our **Licensed Operations (B2C)** activity line with the increase attributed mainly to higher revenues in:
 - **Poland** with additional revenues of €7.9m due to the growth of the interactive Sport Betting channel (following market regulation) and the introduction of Virtual Games in 2Q17.
 - **Bulgaria** (€+6.1m), mainly due to the growth in Virtual Sports fueled in part by the increased payout.
 - **Azerbaijan** (€+1.7m), driven by the Sports Betting revenue growth (both retail and online)
 - in part offset by the impact of the suspended license in **Cyprus** in 4Q 2017 (€-4.8m)
 - and the lower recorded revenues, in Euro terms, from our **Argentinean** licensed operations (€-1.2m). In local currency, 1Q18 results posted a c.+34.0% year over year increase (higher compared to the 2015-2017 CAGR of c.27.0% in part also due to higher payout in 1Q18 vs. FY2017 and FY2016), heavily affected though by the local currency fluctuations (c.45.0% devaluation against the Euro versus a year ago) which is also the main driver for the worsening performance in Euro terms in the three-month period

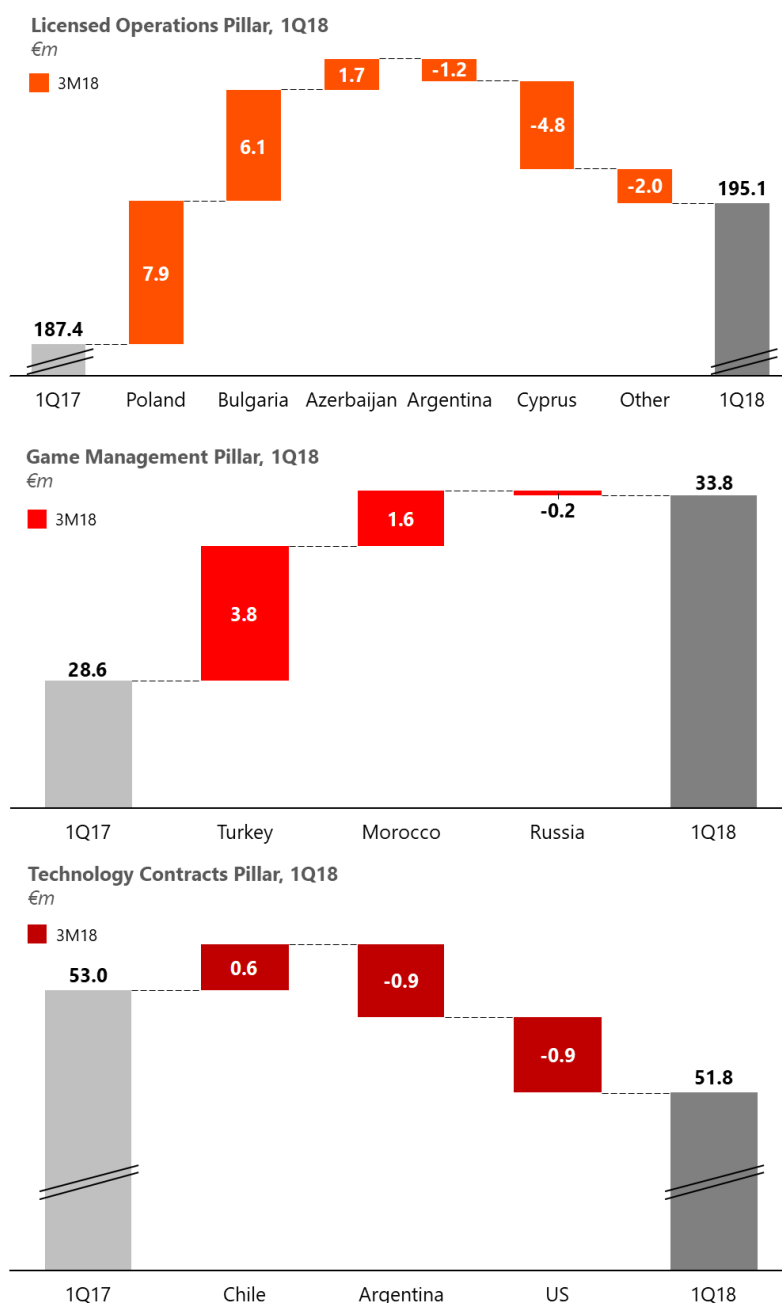

- €+5.2m (+18.2%) from our **Management (B2B/ B2G)** contracts activity line with the increase driven mainly by:

- **Turkey's** (€+3.8m) revenue increase attributed both to the growth of the Sport Betting Market year over year (c.+26% in local currency) as well as due to the shift towards Online Sports Betting (close to 60% market share vs. slightly below 50% a year ago). The benefit of the Sports Betting market expansion and mix change has been partially offset by the devaluation of the local currency (c.19.0% devaluation against the Euro versus a year ago)
- **Morocco's** (€+1.6m) Sports Betting sales uplift attributed to the enhanced product offering

- €-1.2m (-2.3%) from our **Technology and Support Services (B2B/ B2G)** activity line with the decrease attributed mainly to:

- **US** operations worse performance (€-0.9m) in Euro terms. In local currency base our US operations recorded double digit growth compared to 1Q17 (c.+11.0%) driven by the numerical segment stronger performance, which has been fully offset though by the adverse USD movement (c.15.0% devaluation against the Euro versus a year ago). The double digit growth has also been supported by the Idaho contract renewal on better terms.
- **Argentina's** lower recorded sales in Euro terms (€-0.9m) as a result of the significantly adverse FX movement. In local currency, 1Q18 results posted a c.+26.0% year over year increase (lower compared to the 2015-2017 CAGR of c.32.0%), heavily affected though by the local currency fluctuations (c.45.0% devaluation against the Euro versus a year ago)
- partially offset by the maturing **Chilean** contract (€+0.6m) that went live in early 1Q17

- **Constant currency basis:** In 1Q18, revenues—net of the negative FX impact of €22.4m—reached €303.0m (+12.7% y-o-y).

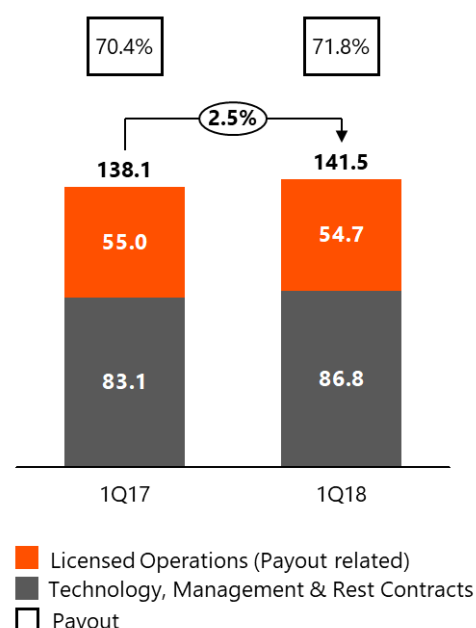

GROSS GAMING REVENUE & Payout

- Gross Gaming Revenue (GGR) from continuing operations increased by 2.5% (€+3.4m to €141.5m) year over year driven by:

- The increase of the non-payout related GGR (+4.5% y-o-y or €3.7m) mainly due to the increase in our Management Contracts activity line revenue (+18.2% y-o-y or €+5.2m), partially offset by the softer top line performance of our Technology and Support Services activities (-2.3% y-o-y or €-1.2m)
- and the marginal decrease in our payout related GGR (-0.5% y-o-y or €-0.3m), which despite showcasing top line growth (+4.3% y-o-y on wagers²), this came at an increased average Payout resulting overall in a slight decrease in GGR from payout related revenue. In 1Q18 the average Payout Ratio was up by 1.4pps vs. 1Q17 (71.8% vs. 70.4%) primarily due to increasing revenue contribution of countries with above average Payout (e.g. Bulgaria & Poland) as well as due to an increasing payout trend across most operations vs. LY. The Payout Ratio in 1Q18 has benefited from the suspended license in **Cyprus** in 4Q 2017.

Gross Gaming Revenue & Payout, 1Q18
€m, %

EBITDA & EBITDA MARGINS³

- EBITDA**, from continuing operations, developed to €42.6m in 1Q18, posting an increase of 1.9% (€+0.8m) compared to the 1Q17 results.
- The main 1Q18 EBITDA growth drivers, besides the improved 1Q18 GGR, is:
 - the improvement in the **Taxes & Agent Fees** margin (+1.3% over GGR) as a result of the product mix change (B2B/ B2G contracts increasing contribution vs. B2C contracts) as well as the improvement of the Taxes & Agent Fees margin in each of the two categories. The B2C contracts Taxes & Agent Fees margin improvement is mainly driven by the suspension of the license in Cyprus, while that of the B2B/ B2G segment is driven by a more favorable sales mix in the retail Sports Betting segment in Turkey
 - the improvement in the **Rest of Cost of Sales** margin (+1.1% over GGR) driven mainly by the improvement in the margin of the B2B/ B2G contracts following direct cost optimization in our US operations
 - partially offset by the decrease in the **OPEX** margin mainly driven by the deterioration of the respective B2B/ B2G OPEX margin as a result of the increasing marketing expenses in Turkey related to our Online Sport Betting activity

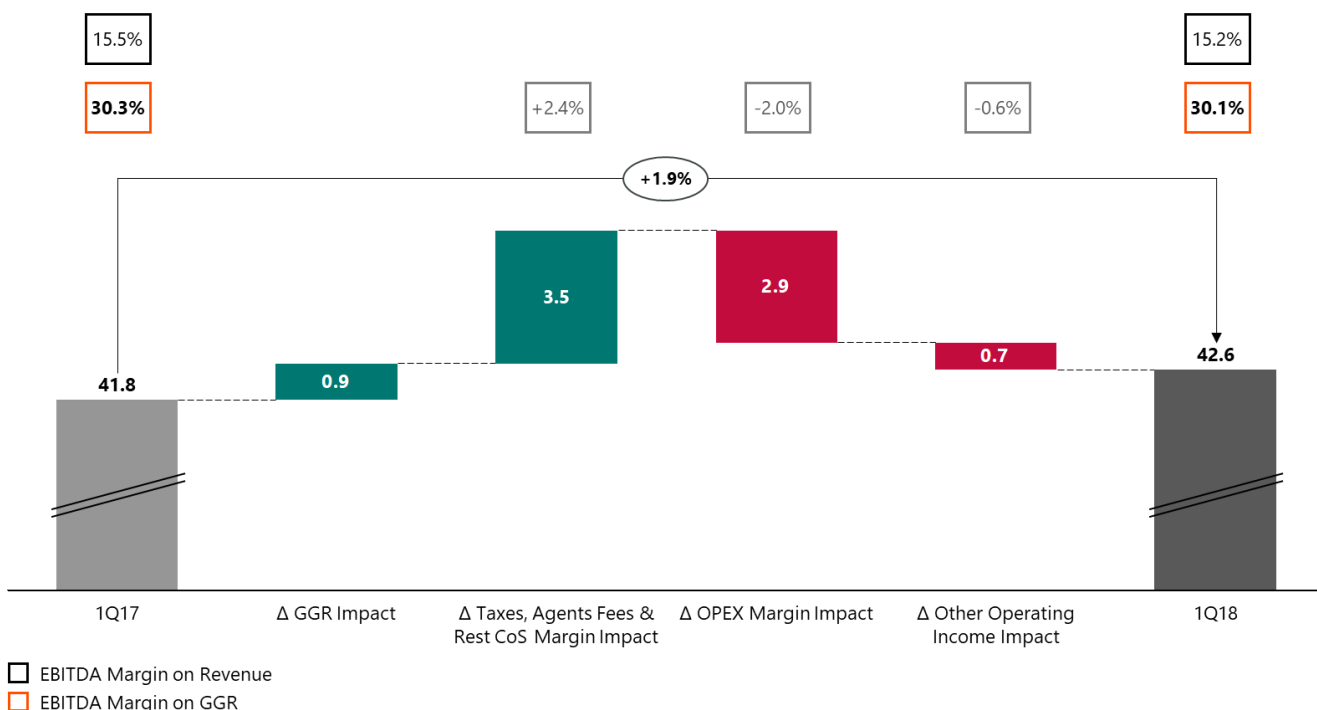

² Licensed Operations Revenue include also a small portion of non-Payout related revenue, i.e. value added services, which totaled €1,2 million and €1,5 million for 1Q18 and 1Q17 respectively

³ Analysis in the EBITDA section excludes Depreciation & Amortization

- the decrease in the **Other operating income** in 1Q18, which totaled €3.5m compared to €4.2m in 1Q17, mainly driven by less equipment lease income in Ohio and Idaho (following the recent contract renewals) coupled with the adverse USD movement against the Euro. The other operating income shortfall, in local currency, has been more than recouped from the increased revenue in both contracts.

EBITDA & EBITDA Margins, 1Q18

€m

- On a yearly basis, **EBITDA margin** on sales, has been impacted negatively by worsening margins (on sales) across both contract segments, i.e. B2B/ B2G and B2C, decreasing to 15.2% compared to 15.5% in 1Q17.
- **LTM EBITDA** developed to €172.3m posting a slight increase vs. FY17.
- **Constant currency basis:** In 1Q18, EBITDA, net of the negative FX impact of €5.8m, reached €48.4m (+15.6% y-o-y).

EBT / NIATMI

- **EBT** in 1Q18 totaled €13.2m compared to €13.9m in 1Q17. The positive EBITDA change y-o-y described above (€+0.8m) coupled with the lower D&A for the period (favorable impact: €+1.0m vs. 1Q17), the higher income from participations/investments (€+0.5m), and the better results derived from the equity method consolidation of associates (€+0.4m vs. 1Q17) was fully counterbalanced by the significantly worse FX effect of outstanding balances transaction (impact: €-3.5m vs. 1Q17).
- **Constant currency basis:** In 1Q18 **EBT**, adjusted for the FX impact, reached €20.8m from €13.1m in 1Q17.

- **NIATMI from continuing operations** in 1Q18 concluded at €-6.0m compared to €-6.1m in 1Q17, while **NIATMI from total operations** in 1Q17 was further benefited by the PAT contribution of the prior period's discontinued operations (€+0.7m) and concluded at €-5.4m, while in 1Q18 there were no discontinued entities.
- **Constant currency basis: NIATMI (total operations)** in 1Q18, on a constant currency basis, reached €-0.9m from €-6.0m in 1Q17.

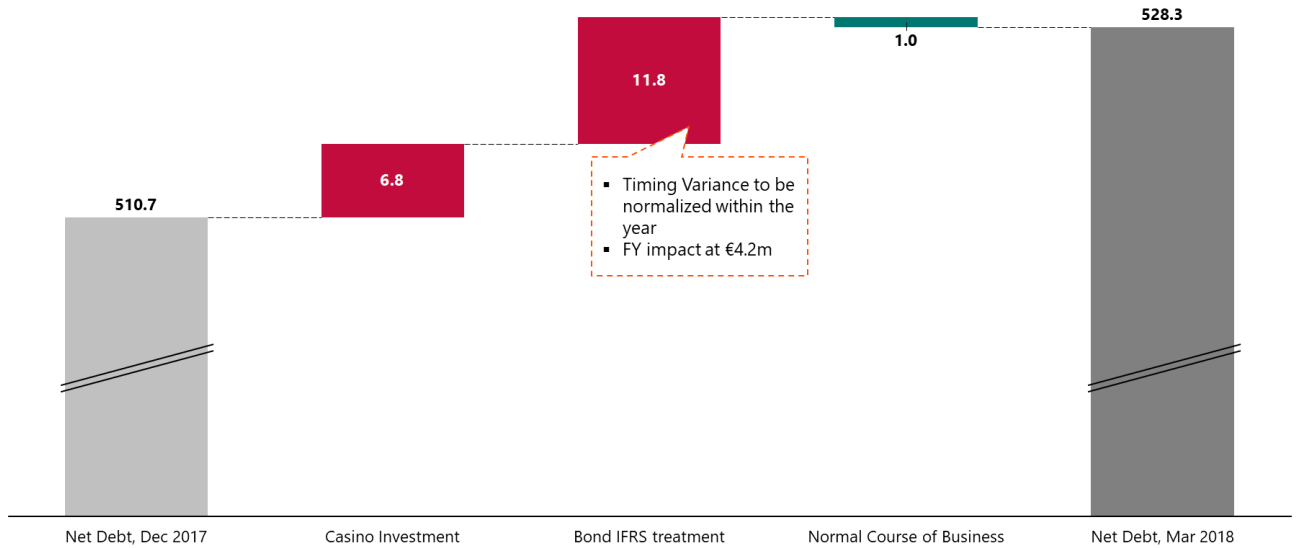

CASH-FLOW

- **Operating Cash-flow** posted a decrease in 1Q18 at €35.9m vs. €39.2m in 1Q17. Excluding the operating cash-flow contribution of our discontinued operations (Jamaica, Russia, and Slovakia) in 1Q17 (€+4.5m), the cash-flow from operating activities improved by €1.2m (€35.9m vs. €34.7) driven by the better EBITDA performance and the less taxes.
- **Adjusted Free Cash Flow**⁴ in 1Q18 developed to €-5.9m compared to €10.2m a year ago. The decrease is mainly the result of the timing variance of the bond coupons payment schedule (following the refinancing that took place in 3Q17 resulting in coupon payments across Q1 and Q3 vs. a coupon payment every Quarter previously), the front-loaded dividend payments to Inteltek's shareholders in 1Q18 (compared to last year), and the higher dividends distributed to Bilyoner's shareholders vs. a year ago.
- **Net Capex** in 1Q18 was €14.2m compared to €24.6m in 1Q17 significantly lower given the €11.7m spent in the prior period towards the strategic partnership with AMELCO. Headline Capex items in 1Q18 include €5.1m towards R&D, €4.1m in the US mainly towards the Illinois new contract, Ohio contract renewal, and New Hampshire's "Keno" service launch. All other net additions amount to €5.0m for 1Q18. Maintenance CAPEX for 1Q18 stood at €5.9m, or 40.0% of the overall capital expenditure in 1Q18 (€14.8m), compared to €4.7m in 1Q17 (excluding discontinued operations in Jamaica, Slovakia & Russia).
- **Cash and cash equivalents** at the end of the 1Q18 period decreased by €14.7m vs. December 31st 2017; Main contributors to this movement are the €-6.8m investment towards an indirect stake in "Hellenic Casino Parnitha S.A." (7.65%), the dividend distribution to minorities (€-15.5m), the bond coupons payment of €-21.2m, which were partially offset by a loan uptake of €+15.0m, and the cash generated in the normal course of business.

⁴ Calculated as EBITDA – Maintenance CAPEX – Cash Taxes – Net Cash Finance Charges (excluding refinancing charges) – Net Dividends Paid; all finance metrics exclude the impact of discontinued operations

- **Net Debt**, as of March 31st, 2018, stood at €528.3m, up €17.6m compared to December 31st 2017 as a result of our investment towards the indirect stake in “Hellenic Casino Parnitha S.A.”

Net Debt Movement, 1Q18
€m

(€-6.8m), Bond IFRS treatment (€-11.8m timing variance, to be normalized within the year; FY impact at €4.2m) and the cash generated in the normal course of business.

- As of March 31st, 2018, the Company didn't hold any of its bonds. We have in the past engaged in repurchases of our debt and may do so again in the future subject to market conditions.

INTRALOT Parent Company results

- **Revenues** for the period increased by 2.8% to €14.5m. The sales increase is primarily driven by the **higher** equipment sales related to our facilities management contract in Peru in 1Q18 vs. 1Q17.
- **EBITDA** decreased to €0.1m from €0.9m in 1Q17. The EBITDA variance is mainly the result of the negative OPEX variance y-o-y due to a doubtful debt provision for intragroup balances (€-1.3m) recorded in the 1Q18.
- **Earnings after Taxes** (EAT) at €0.0m from €4.8m in 1Q17.
- **LTM EBITDA** figure remained relatively stable, excluding the impact of the intragroup doubtful debt provision.
