

## **INTRASOFT's PERSEUS™ product in new digital transformation project in Uganda**

**Luxembourg, July 2, 2019** - **INTRASOFT International**, the global ICT company, has been awarded the implementation of the Uganda's National Social Security Fund (NSSF) new Pension Administration system.

The delivered solution features at its core PERSEUS™, INTRASOFT's domain-specific COTS (commercial off-the-shelf) product for Social Security and Pension Institutions, designed using state-of-the-art, open architecture technology. PERSEUS™ distills more than 20 years of INTRASOFT's experience in designing and implementing Social Security Systems, wrapped into a future-proof, highly configurable product. It is holistically designed to meet the unique public sector business needs, as well as to provide the flexibility and adaptability needed to accommodate features such as multi-fund structures and generation of unlimited and complex insurance schemes, specific to the social security sector.

The powerful PERSEUS™ business rules and product generation components accelerate the creation of new revenues, pensions & benefits, products and services, while managing and adapting to the evolution of business needs over the years.

PERSEUS™ embedded Business Process Modelling Engine defines and orchestrates business processes, and thus ensures process standardization, real-time active monitoring, productivity and performance management. It is a product that enables multi-channel digital interaction and extraordinary user-experience with all possible stakeholders (users, employers, insured community, external partners), while enhancing direct communication, improving the quality of the provided services and eliminating the need for physical presence of employers and members at Institutional locations.

PERSEUS™ will be configured to support the core business areas of Uganda's NSSF, such as registration of the social security actors via various channels, revenues management, pensions and benefits management, compliance and inspections.

**Mr. Alexandros Manos, Managing Director** of **INTRASOFT International** commented: "Our recent success in Uganda further strengthens our leadership in IT for the Social Security domain, while it also validates our strategic decision a few years back to invest in the development of PERSEUS™. It is another win in the East Africa region and we look forward to further building our partnership with existing customers, as well as extending the benefits of our cutting edge products and market leading services to the wider region."
