

EYATH SA - Basic financial figures 9MONTH period 2020

EYATH S.A. announces the main financial figures for the 3rd quarter and the nine-month period in 2020, along with further developments in its activity, following the decision 2503/18-11-2020 of the Hellenic Capital Market Commission, which was communicated to issuers of securities admitted to trading on the regulated market of the Athens Stock Exchange, with a view to valid and timely information to the investment public on the formation of fundamental economic aggregates due to the impact of the COVID – 19 pandemic.

(All amounts in thousands of €)

The turnover of the Company stood to € 19,143 thousand during the 3rd quarter of 2020 and € 53,607 thousand during the 9month period in 2020 against € 18,888 thousand and € 54,510 thousand during the respective periods in 2019, showing an increase of 1.35% and a decrease of 1.66% respectively. The fluctuation of the turnover is mainly due to the implementation of the new pricing policy (from 01/05/2019), which implies a reduction of the price for lower consumption scales (affecting the majority of consumers) and the increase for higher ones, so as to reduce the waste of natural resources, as well as the unexpected outbreak of the coronavirus pandemic in early 2020 and its rapid spread in the very next period on a global scale, which led to immediate preventive measures, but also measures to limit the further spread of the virus.

The cost of sales was € 10,695 thousand in the 3rd quarter of 2020 and € 32,105 thousand in the 9month period in 2020 compared to € 10,367 thousand and € 31,295 thousand during the corresponding periods in 2019, showing an increase of 3.17% and 2.59% respectively. The increase in the cost of sales is mainly due to increased tariffs and reduced discounts in electricity bills, that affected particularly the water supply network operations, the pumping stations and the biological treatment plants.

As a result, gross profit stood at € 8,448 thousand in the 3rd quarter of 2020 and €21,502 thousand in the 9month period in 2020 compared to € 8,521 thousand and € 23,215 thousand for the corresponding periods in 2019, showing a decrease of 0.86% and 7.38% respectively.

Other operating incomes stood at € 643 thousand in the 3rd quarter of 2020 and € 1,751 thousand in the 9month period in 2020 compared to € 1,356 thousand and € 1,827 thousand during the corresponding periods in 2019, showing a decrease of 52.58% and 4.16% respectively. The decrease in the 3rd quarter is due to the reversal of the sewage sludge removal provision of a total value of € 1,189 thousand, whose transfer was completed in September 2019, while the significantly smaller reduction over a nine-month horizon is due to the pricing and the fact that a provision was formed with respect to the financial scope of the work, that was carried out until September 2020, in the

context of the framework agreement entitled "Cleaning and maintenance of the rainwater network in the Wider Thessaloniki Area".

Operating expenses stood at € 2,640 thousand in the 3rd quarter of 2020 and € 8,522 thousand in the 9month period in 2020 compared to €1,853 thousand and € 7,446 thousand during the corresponding periods in 2019, showing an increase of 42.47% and 14.45% respectively. The increase is mainly due to payroll costs and the recruitment of staff on a temporary, fixed-term, employment contract base.

Other operating expenses stood at € 347 thousand in the 3rd quarter of 2020 and € 1,547 thousand in the 9month period in 2020 compared to € 34 thousand and € 239 thousand during the corresponding periods in 2019, showing an increase of 930.49% and 548.07% respectively. This increase is mainly due to a court order with retroactive effect, to pay a once-off allowance to company's employees as well as the formation of provisions on sewage sludge removal from the previous period.

Due to the above events, the Company's Pre-Tax Profits amounted to € 6,251 thousand in the 3rd quarter of 2020 and € 13,601 thousand during the 9month period in 2020 compared to € 8,226 thousand and € 18,251 thousand during the respective periods in 2019, showing a decrease of 24.01% and 25.48% respectively.

Earnings Before Taxes, Interest and Depreciation (**EBITDA**) stood at € 7,670 thousand in the 3rd quarter of 2020 and € 17,856 thousand during the 9month period in 2020, compared to € 9,617 thousand and € 22,240 thousand during the respective periods in 2019, showing a decrease of 20.24% and 19.71% respectively.

Finally, the Company's cash and cash equivalents stood at € 74,026 thousand in the 9month period in 2020 compared to € 77,497 thousand during the corresponding period, showing a decrease of 4.48%, due to the increased dividend for the financial year 2019.

The financial data of **EYATH S.A.**, following a series of estimates and analyses during the reporting period, show a limited variation, without significant effects of the health crisis, on the company's business activities and liquidity. Nevertheless, the administration continues to monitor developments closely so that it can respond directly to the demands of the domestic and global environment, based on important safeguards, such as its significant amount of assets and the global absence of borrowing.

In addition, and following **EYATH S.A.**'s initial decision to address the health crisis, emphasizing on the protection of its employees and its consumers, the company adheres to the instructions of the National Public Health Organization (E.O.D.Y.) and implements the relevant legislative acts on matters concerning the pandemic, adopting immediately all measures (molecular test for the personnel, weekly disinfections of the premises, remote or by appointment services for the public, distance working for the staff, etc.) for the protection and safety of employees and consumers. As part of its corporate and social responsibility, **EYATH S.A.** donated to the University Hospital AHEPA, specialized anesthetic equipment for the intubation of COVID-19 patients and financially supported the interdisciplinary team of the Aristotle University of Thessaloniki (AUTH), which conducts

analyses on sewage samples, for the monitoring of the virus genome in the city's sewage in order to determine the virus' spread.
