New distinction for Space Hellas, Microsoft Advanced Specialization «Windows Server and SQL Server Migration to Azure»

Space Hellas, a leading Cloud solutions provider, Microsoft Gold Partner Greece, Cyprus and Malta, is pleased to announce the achievement of the latest important distinction, Microsoft Advanced Specialization "Windows Server and SQL Server Migration to Azure".

This is the second high level certification the company acquires from Microsoft, immediately after the achievement of Advanced Specialization "Linux and Open Source Databases Migration to Microsoft Azure". These two certifications place Space Hellas among the few Microsoft partners worldwide. Space Hellas, enhancing its expertise in Microsoft Azure transition technologies for Windows, SQL Server, Linux kai Open Source Databases, now covers almost all of its customers workloads.

Socrates Costicoglou, IT Applications and R&D Director of Space Hellas emphasizes: *This second distinction makes Space Hellas the top Microsoft partner that our customers can trust to migrate their infrastructure to the Cloud, whether they run Windows and / or Linux, use SQL Server or Open Source Databases. It is an important achievement that we owe to the high expertise of our team and the trust of our customers. We encourage our customers to take advantage of the unique benefits of these certifications, as part of the Advanced Migration Program, funded by Microsofts' own transition services.*

Konstantinos Kattirtzis, Partner Development Lead of Microsoft Greece, Cyprus and Malta, stated in this regard: *Microsoft Advanced Specialization for Windows and SQL Server Migration to Azure is a validation of Space Hellas's deep knowledge and specialization, as evidenced by its extensive experience in helping its clients to successfully transfer Windows Server & SQL Server workloads to Azure. This specialization, in conjunction with Microsoft Advanced Specialization for Linux kai Open Source Databases Migration to Azure, offers one more strategic advantage to the company, while preserving and simplifying the transition of businesses to Microsoft's limitless potential.*
