

### **Announcement regarding internet comments**

AVAX Group, listed on the Athens Stock Exchange since 1994, has always promoted transparency and avoided stock market "games". Internet reports regarding its stock being called a "bubble", as well as the appraisal of its stock by internationally renowned houses, do not touch upon us. On the contrary, they are typical of their posters. After all, another comment about a "bubble" was used at the end of 2022, in a similarly "credible" post of the same website, with the AVAX share price standing at 0.77 euros.

AVAX Group will continue to respond, as necessary, to all posts involving risk of misinformation.
