WEBSITE WHERE THE COMPANIES AND CONSOLIDATED FINANCIAL STATEMENTS ARE AVAILABLE

We hereby certify that this interim condensed financial report was approved by the Board of Directors of «J&P-AVAX S.A.» on 27/8/2010 and published by means of submission to the Athens Stock Exchange and the Hellenic Capital Markets Commission, as well as their upload to the corporate website (www.jp-avax.gr).

It is noted that the financial statements published in the Press aim to provide their readers with a financial overview but do not fully illustrate the financial circumstances of the Company and the Group, in accordance with the International Accounting Standards. It is also noted that some items in the financial statements published in the Press have been aggregated and reclassified to facilitate their ease of use.

STATEMENTS OF MEMBERS OF THE BOARD OF DIRECTORS

(in accordance with article 5, paragraph 2 of Law 3556/2007)

In our capacity as executive members of the Board of Directors of J&P-AVAX SA (the «Company»), and according to the best of our knowledge, we,

1. Kouvaras Constantinos, Deputy President and Executive Director
2. Mitzalis Constantinos, Managing Director,
3. Joannou Christos, Executive Director

declare the following:

- the financial statements for the period from 01.01.2010 to 30.06.2010, prepared under the International Financial Reporting Standards currently in effect, give a true view of the assets, liabilities, equity and financial results of the Company, as well as the businesses included in the consolidation of the Group,
- the semi-annual Report of the Board of Directors of the Company gives a true view of the evolution, the performance and the stance of the Company, as well as the businesses included in the consolidation of the Group, including an overview of the main risks and uncertainties they face.

REPORT OF THE BOARD OF DIRECTORS

FOR THE PERIOD FROM 01.01.2010 TO 30.06.2010

(in accordance with article 5 of Law 3556/2007, as well as articles 3 & 4 of Decision #7/448/11.10.2007 of Greece's Capital Markets Commission)

Dear Shareholders,

despite Greece's adverse macroeconomic environment and deteriorating business conditions, the group of companies controlled by J&P-AVAX S.A. (the «Company») remained vibrant in the first half of 2010 and achieved considerable profitability, which however is lagging our year-earlier performance.

The Group's work-in-hand remains high, amounting to €2.2 billion including both signed and pending projects. This works backlog guarantees the uninterrupted continuation of our business for a long time while also remaining profitable, as a result of management's strategic targeting of projects and activities which create long-term value and reasonable risk.

The Group continues to pursue projects, particularly outside Greece, placing more emphasis on concession than in the past as the supply of new projects -be it public, private, PPP or concession based- within Greece has stopped for quite some time due to the overall uncertainty for the direction and the length of the economic crisis. In any case, it is generally accepted that the return of the construction market to normalcy and thereafter to a growth path will take a long time.

Group Financial Results for the First Half of 2010

Consolidated turnover reached €391.4 million versus €459.7 million in the year-earlier period, posting a 14.9% drop which is in line with the projections stated by management during the June 2010 Annual General Meeting. Construction towards concession projects at Group level (carried out by both J&P-AVAX and its subsidiaries) is accelerating, but at the same time other works carried out by J&P-AVAX are nearing completion and private building construction activity registers a considerable drop.

Net earnings after tax and minorities in the first half of 2010 fell 45.3% to €10.6 million relative to year-ago €19.3 million. Second quarter profitability was severely affected by the extraordinary "social responsibility" tax imposed by Law 3845/2010 on 2009 net earnings, amounting to €1.27 million at Group level and €0.56 million at company level.

Group gross margin remained high, and in fact widened to 12.4% in the first half of 2010 versus 8.5% a year earlier, mainly due to increased contribution of concession-based, energy-related and marine works outside Greece, which offer superior returns.

Administrative expenses eased to €17.8 million in the first half of 2010 from €18.2 million in 2009, in contrast with sales expenses which grew to €4.5 million versus €2.7 million a year earlier as the Group intensifies its efforts to add new public and concession-based projects in tenders, primarily in international markets.

Income from associates fell by 39.1% to €9.8 million in the first half of 2010 versus €16.0 million in the year-earlier period, mostly due to reduced profitability from road concessions on the back of lower traffic.

Financial expenses for the Group amounted to €12.1 million, registering a marginal drop relative to the first half of 2009, including a €1.4 million loss from financial instruments. The net borrowing cost in the first half of 2010 is lower than the year-earlier period, despite net debt remaining at broadly similar levels, just over €400 million. It should be noted that the Group borrowing mix has shifted during the first half of 2010 following the issue of a bond loan to finance concessions.

Borrowing remains high due to continuing investments in concessions and specialised equipment, mostly aimed at boosting the Group's marine works capacity. Group debt is expected to start de-escalating from 2012 onwards, when dividends from concessions start flowing in, most notably from the Athens Ring Road.

As a result of Group investments in concessions, participations rose by €10.6 million during the first half of 2010.

Group equity amounted to €333.6 million at the end of the first half of 2010 compared with €274.7 million at the end of 2009, while short-term liabilities shrank by €90 million over the same period. During the first half, short-term assets fell by €48.9 million while long-term liabilities for the Group widened by €37.9 million.

Receivables from construction contracts grew to €269.5 million at the end of the first half of 2010 from €248.0 million at the end of 2009, due to persisting delays in invoicing of public works.

It should be noted however that despite adverse economic conditions, the Group managed to collect receivables from invoiced works during the first half of 2010, thereby the relative item for receivables from clients in the balance sheet fell to €245.0 million from €294.7 at the end of 2009.

The Group's financial results for the first half of 2010 are broken down by business segment as follows:

<i>amounts in euro</i>	Construction	Concessions	Real Estate & Other Activities	Total
Total Turnover by Division	382,656,630		14,876,397	397,533,027
Intra-Group	-5,921,350		-166,456	-6,087,806
Net Sales	376,735,280		14,709,941	391,445,221
Gross Profit	47,473,969		1,064,506	48,538,474
Other Net Income (Expenses)	-3,609,452		531,168	-3,078,284
Goodwill Impairment Cost		-2,940,000		-2,940,000

Tax	-6,011,209	-1,005,107	-7,016,316
Net Profit	345,595	10,567,670	10,913,265
Depreciation	5,926,940	6,993,776	12,920,716

Important Events during the First Half of 2010 & their Impact on Financial Results

The following are the most important events concerning the group during the first half of 2010, and up to the compilation of this report:

- Official commencement of the Group's strategic co-operation with SORGENIA Spa in the Greek energy sector through VOLTERRA SA (formerly ARGESTIS SA), a company owned 50:50 by the two partners. VOLTERRA SA targets energy production mostly from Renewable Energy Sources, along with energy trading and retail operations in Greece, aiming to become a core market participant, capitalising on the know-how of the 2 partners in construction of power plants, production, trading and marketing of electricity. VOLTERRA is already licenced by Greece's authorities for the supply of 300MW of electric power over a 25-year period with a time extension option, and expects to commence power trading operations by end-2010.
- The Company issued a syndicated bond loan amounting to €265 million with a maturity of up to 8.5 years with a group of financial institutions, with Bank of Cyprus being the Lead Arranger, EFG Eurobank the Co-Arranger, and participation by Emporiki Bank, Alpha Bank and Piraeus Bank. Part of the loan will be used to refinance outstanding bond loans, mostly used for financing participation in concessions, while the remainder of the funds will meet the Company's capital needs in coming years for investments in concession projects.
- Works started towards the construction, development and operation of Limassol Marina, in which J&P-AVAX SA and its subsidiary ATHENA SA participate with an aggregate 31% stake, while also controlling an aggregate 55% share in the construction joint venture. The project is worth a total of €360 million and will create a modern marina with a birth capacity of 1,000 vessels of various sizes along with the development of a 50,000 sq.m. land zone with houses and apartments, commercial stores and a cultural centre.
- An extraordinary tax charge introduced by Law 3845/2010 on 2009 net earnings amounted to €1.27 million at Group level and at €0.56 million on a parent company level, and was recorded in second quarter results

New project take-up over the first half of 2010 was limited, mostly concerning small projects which do not qualify for corporate announcements.

With the exception of the extraordinary tax charge which has been recorded in first-half results, the afore-mentioned events are not expected to have a significant impact on second-half results given their long-term and strategic nature.

Main Risks & Uncertainties for the Second Half of 2010

The dramatic deterioration of the international financial environment in the last couple of years has cut back on business expectations in Greece for 2010 and coming years. The adverse business environment for the Group is characterised by uncertainty over a series of external factors and

continuing fluctuations in the demand for new projects, offered prices, interest rates, labour and input cost inflation, exchange rates and payment terms.

To decide its strategy and deal with issues concerning the day-to-day operation of the business, Group management needs to factor in with realism a number of sources of potential risk and uncertainty for the Group's operations, the most important being the following:

- Input Prices: Several materials used by the Group are internationally-priced commodities, including cement, metal rebars and fuel, which are fluctuating widely in recent years.
 - The Group is centrally purchasing supplies for all its subsidiaries to secure economies of scale. In several cases it pre-orders large quantities of supplies to lock in their purchase price and escape future price shifts. The easing in commodity prices since mid-2008 due to the economic crisis is supporting profit margins, but there is no certainty commodity prices will remain at current levels in coming quarters,
- Financial Risk: The Group is financing its operations with working capital and requires performance bonds be issued by banking institutions to participate in public project tenders and guarantee their proper execution. Interest rates on outstanding debt depend on international financial conditions, while the cost of issuing performance bonds is also affected by prevalent liquidity conditions in the economy. Following the sharp increase in lending rates and banks' reservations in financing businesses in the last months of 2008 and early 2009, overall financial risk has been rationalised on the back of central bank interventions which drove base interest rates to particularly low levels,
 - The Group maintains a positive business relationship with the Greek and international banking system, thereby securing the best possible terms. Despite receiving several offers from banks to enter contracts for derivative products, it has so far refrained from interest rate hedging, Interest rates have retreated to lower than pre-crisis levels, despite the considerable rise in interest rate spreads, As a result, total interest rates charged on the Group are lower than year-earlier levels.
- Exchange Risks: The Group executes large projects in international markets, but only a small part of those transactions are denominated in currencies other than euro.
 - In most cases of operations outside the eurozone, the group makes sure its receivables in foreign currency are matched with payables in the same currency, effectively hedging the largest part of its exchange risk. Management is however in the process of evaluating its options for an all-inclusive deal at a Group level for hedging currency risk for payments and receipts in currencies other than euro.
- Liquidity Risk: Even during economic booms there are cases of clients not meeting the terms agreed upon in project contracts,
 - To protect its cash flow management from liquidity risks, the Group maintains ample credit lines and cash. At mid-2010 the Group's net debt is considerably lower than its

credit limits. As regards the accounting treatment of doubtful receipts, the Group follows a policy of provisioning for receivables from private projects which has tax ramifications. The provisions booked in the accounts are adequate for receivables from the private sector, given that the risk of default in payments by the Greek State on public projects is negligible, despite continuing delays in actual payments.

Management cannot remove the afore-mentioned risks and uncertainties, but spares no effort in minimising the risk associated with business decisions. To that direction, and in addition to the measures outlined above, the Company:

- purchases additional insurance in international projects, over and above the Group's policy of extensive insurance in all projects in progress
- has strong partners in Greece and abroad to mitigate business risks and maximise expected returns
- probes new markets through small projects only, to minimise the negative impact of any miscalculation and adverse business conditions,
- does not make transactions in derivative products and other financial instruments which are not linked to its core business, nor does it attempt to speculate on the course of capital markets,

Projections & Prospects for the Second Half of 2010

First half results allow for reserved optimism on financial performance for rest of the year as some of the projects added since last year are gradually being started, while at the same time concession-related projects, offering wider profit margins, are on the rise as a percentage of overall business.

Bank debt is not expected to ease below first-half levels, and this is expected to continue until 2012, due to growing working capital needs for new projects as well as equity participations for concession projects. Debt levels will start easing in 2012 when dividends from the Group's concession portfolio will begin to flow in.

At EBIT level, construction profit margins in the second half of 2010 are expected to narrow regarding public and private works, but will remain at satisfactory levels as far as concession-related works are concerned.

Important Transactions Between the Company and Related Parties

The most important transactions of the Company over the 01.01.2010-30.06.2010 period with related parties, as per IAS 24, pertain to transactions with subsidiaries (as defined in article 42 of Law 2190/1920), are as follows:

FINANCIAL INFORMATION INTERIM REVIEW REPORT
To the Shareholders of «**J&P - AVAX S.A.**»

Introduction

We have reviewed the accompanying condensed separate and consolidated statement of financial position of «**J&P - AVAX S.A.**» («the Company»), and its subsidiaries (the «Group») as of June 30, 2010 and the related condensed separate and consolidated statements of income and comprehensive income, changes in equity and cash flows for the six-month period then ended, as well as the selected explanatory notes that comprise the interim financial information, which is an integral part of the six-month financial report as required by article 5 of L. 3556/2007. Management is responsible for the preparation and presentation of this interim financial information in accordance with International Financial Reporting Standards as adopted by the European Union and applies to interim financial information (International Accounting Standard “IAS” 34). Our responsibility is to express a conclusion on this interim condensed financial information, based on our review.

Scope of Review

We conducted our review in accordance with the International Standard on Review Engagements 2410 «Review of Interim Financial Information performed by the Independent Auditor of the Entity». A review of interim financial information consists of making inquiries, mainly of persons responsible for accounting and financial matters and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with the International Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Consequently, with the present document we do not express an audit opinion.

Conclusion

Based on our review, nothing has come to our attention that causes us to believe that the accompanying interim financial information is not prepared, in all material respects, in accordance with IAS 34.

Report on Other Legal and Regulatory Requirements

Our review has not detected any inconsistency or discrepancy of other information of the six-month financial report, as required by article 5 of L.3556/2007, with the accompanying financial information.

J&P – AVAX SA

Company # 14303/06/B/86/26 in the Register of Societes Anonymes
16 Amarousiou-Halandriou Street, Marousi 151 21, Greece

The Company's share capital increase, paid in cash and restricted to a specific group of legal entities and private investors, all former major shareholders and senior managers of ATHENA SA which was acquired, carried out following approval by the Extraordinary Shareholders' Meeting held on 23.08.2007 and decision # K2-15019/18.10.2007 by Greece's Development Ministry, amounted to €33.856.860. The capital increase resulted in the issue of 4,454,850 common registered shares with a par value of €0.58 each at a price of €7.60 each, which were listed on the Athens Stock Exchange on 02.11.2007. The Company's Board of Directors certified on 21.09.2007 the funds were paid in by those eligible for the capital increase.

In June 2009 a proposal by the Company's Board of Directors got shareholder approval at the 24.06.2009 Annual General Meeting for the amendment of the investment plan financed by proceeds of the capital increase due to delays in the financial closure and project maturity of concession deals included in the investment plan. Those delays are primarily linked to the slower pace of governments and banks in closing major financial deals amidst the international crisis in the last two years. The reallocation of funds was aimed at giving priority to concession projects closer to construction phase and financing additional concessions.

Following the amendment of the investment plan decided in June 2009, the funds raised through the capital increase were allocated until 30.06.2010 as follows:

TIME SCHEDULE OF USE OF FUNDS FROM CAPITAL INCREASE (FOLLOWING THE AMENDMENT OF THE ALLOCATION OF FUNDS, DECIDED IN JUNE 2009)									
<i>amounts in €</i>	Capital Raised	Funds Used						Total Funds Used till 30.06.2010	Balance of Funds for Use
		<i>Jul-Dec 2007</i>	<i>Jan-June 2008</i>	<i>Juy-Dec 2008</i>	<i>Jan-June 2009</i>	<i>Juy-Dec 2009</i>	<i>Jan-June 2010</i>		
Equity Contribution to the "Maliakos-Kleidi" concession project	1,625,000	0	1,625,000	0	0	0	0	1,625,000	0
Equity Contribution to the "Elefsina-Corinth-Patras-Pyrgos-Tsakona" concession project	12,672,644	0	0	4,500,000	0	8,172,644	0	12,672,644	0
Equity Contribution to the "Canoe-Kayak Olympic Complex" concession project	625,000	625,000	0	0	0	0	0	625,000	0
Equity Contribution to the "Queen Alia International Airport" concession project	3,026,860	0	0	29,867	0	2,996,993	0	3,026,860	0
Equity Contribution to	3,432,695	0	0	0	0	1,020,.500	2,412,195	3,432,695	0

the "Limasol Marina" concession project									
Equity Contribution to new and current concession projects	12,474,661	0	0	0	850,000	310,699	2,709,142	3,869,841	8,604,820
Total	33,856,860	625,000	1,625,000	4,529,867	850,000	12,500,837	5,121,337	25,252,041	8,604,820

Notes:

1. The Company's share capital increase was only partially completed following the participation of 17 investors out of a total of 19 eligible investors, who contributed a total amount of €33,856,860 versus the initially approved amount of €41,040,000, resulting in the issue of 4,454,850 new shares versus the initially approved issue of 5,400,000 common registered shares.
2. The share issue did not result in relevant expenses, because the funds were deposited by eligible investors in a bank account and there was no need to issue an information memorandum for the share offer and the listing of the new shares, as provided by Law 3401/2005 on "Information memorandum for the public offer of securities and listing on stock exchange", given that::
 - the offer was restricted to less than 100 non-institutional investors [article 3, paragraph 2(b), Law 3401/2005]
 - the number of shares issued accounted for less than 10% of the Company's outstanding shares, listed on the Athens Stock Exchange [article 4, paragraph 2(a), Law 3401/2005]
3. According to the Report of the Company's Board of Directors to the Shareholders issued in view of the Extraordinary Shareholders' Meeting held on 23.08.2007, the funds raised through the capital increase will be used over a two-year period, starting at the time of the capital increase (September 2007).
4. The Annual General Meeting of the Company's shareholders held on 24.06.2009 approved the Board of Directors' proposal dated 22.06.2009 for the amendment of the allocation of the funds raised in September 2007.
5. The balance of funds amounting to €8.6 million is temporarily used to reduce Company bank debt and related financial expenses given the prevailing high interest environment, until all financial negotiations are concluded and equity contributions towards the concession projects outlined in the table above are deemed payable.

Notes and accounting policies

A. ABOUT THE COMPANY

A.1 General Information about the Company and the Group

J&P-AVAX S.A. was listed on the Athens Stock Exchange's Main Market in 1994 (then incorporated as AVAX S.A.) and is based in Marousi, in the Attica prefecture. It boasts substantial expertise spanning the entire spectrum of construction activities (infrastructure projects, civil engineering, BOTs, precast works, real estate etc) both in Greece and abroad.

In 2002, former AVAX S.A. merged with its subsidiaries J&P (Hellas) S.A. and ETEK S.A. and was renamed into J&P-AVAX S.A, whereas another 100% subsidiary unit, namely ETETH S.A., merged with its own subsidiary AIXMI S.A. The new business entities which evolved out of these mergers made use of Law 2940/2001 on contractors' certification for public works. The Group's leading company J&P-AVAX S.A. was awarded a 7th-class public works certificate, which is the highest class available, whereas ETETH S.A. acquired a 6th-class certificate and PROET S.A. entered the new public works certification registry with a 3rd-class certificate, which was upgraded to 4th-class towards the end of 2005. In the year 2007 J&P Avax SA acquired the subsidiary Athena SA which is consolidated in the financial statements of 30/06/07 for the first time.

A.2 Activities

Group strategy is structured around four main pillars:

- **Concessions**
 - Intense presence in concession project tenders, to maintain a substantial backlog of projects and secure long-term revenue streams
 - Strengthening the project finance business unit and expanding our network of specialized external business partners (design consultants, financial and insurance advisors, legal firms) to enhance the Group's effectiveness in bidding for concession projects and maximize the return from their operation by means of financial risk management
- **Business Activities**
 - Development along the lines of major international construction groups, diversifying revenue through expansion into related business areas, eg environmental projects, facility maintenance & management, waste management, maintenance of large infrastructure projects, and management of large facilities constructed towards the Athens 2004 Olympic Games
 - Pursuit of synergies of various business activities on Group level
- **Real Estate**
 - Selective investment in quality projects offering high aesthetics and status, focused mainly on the residential and vacation housing sectors, as well as in select commercial and real estate projects
 - Advisory services and development of new markets and products, such as retirement villages
- **Other Activities**
 - Participation in BOT infrastructure projects for the reconstruction of neighboring counties and regions (Eastern & SE Europe, Middle East, North Africa) in collaboration with J&P Overseas and other international partners with long local presence and expertise
 - Promotion of the use of precast technology

B. FINANCIAL REPORTING STANDARDS

J&P-AVAX S.A.'s consolidated accounts for the period running from January 1st, 2010 to June 30th, 2010 are prepared in accordance with the 'historic cost' principle, inclusive of adjustments in various items on both sides of the balance sheet, as well as on the 'going-concern' principle and conform to the International Financial Reporting Standards (IFRS) issued by the International Accounting Standards Board (IASB) and the interpretations issued by IASB's International Financial Reporting Interpretation Committee (IFRIC) which have been adopted by the European Union.

IASB has issued a series of standards referred to as «IFRS Stable Platform 2005». The Group applies the IFRS Stable Platform 2005 since January 1, 2005 which includes the following standards:

I.A.S. 1	Presentation of Financial Statements
I.A.S. 2	Inventories
I.A.S. 7	Cash Flow Statements
I.A.S. 8	Accounting Policies, Changes in Accounting Estimates and Errors
I.A.S. 10	Events after the Balance Sheet Day
I.A.S. 11	Construction Contracts
I.A.S. 12	Income Taxes
I.A.S. 14	Segment Reporting
I.A.S. 16	Property, Plant and Equipment
I.A.S. 17	Leases
I.A.S. 18	Revenue
I.A.S. 19	Employee Benefits
I.A.S. 20	Accounting for Government Grants and Disclosure of Government Assistance
I.A.S. 21	The Effects of Changes in Foreign Exchange Rates
I.A.S. 23	Borrowing Costs
I.A.S. 24	Related Party Disclosures
I.A.S. 26	Accounting and Reporting by Retirement Benefit Plans
I.A.S. 27	Consolidated and Separate Financial Statements
I.A.S. 28	Investments in Associates
I.A.S. 31	Interests in Joint Ventures
I.A.S. 32	Financial Instruments: Disclosure and Presentation
I.A.S. 33	Earnings per Share
I.A.S. 34	Interim Financial Reporting
I.A.S. 36	Impairment of Assets
I.A.S. 37	Provisions, Contingent Liabilities and Contingent Assets
I.A.S. 38	Intangible Assets
I.A.S. 39	Financial Instruments: Recognition and Measurement
I.A.S. 40	Investment Property
I.F.R.S. 1	First-Time Adoption of International Financial Reporting Standards
I.F.R.S. 3	Business Combinations
I.F.R.S. 5	Non-Current Assets Held for Sale and Discontinued Operations
I.F.R.S. 7	Financial Instruments: Disclosures
I.F.R.S. 8	Operating segments

The policies referred to hereafter are applied consistently to all time periods covered in the accounts.

Preparing Financial Statements under IFRS requires the use of estimates and opinions while applying Company accounting methods. Any important assumptions made by Company management in applying those accounting methods have been noted when deemed necessary.

C. BASIC ACCOUNTING PRINCIPLES

The Group consistently applies the following accounting principles in preparing the attached Financial Statements:

C.1. Business Combinations (I.F.R.S. 3)

Investments in Subsidiaries: All companies managed and controlled, either directly or indirectly, by another company (parent) through ownership of a majority share in the voting rights of the company in which the investment has been made. Subsidiaries are fully consolidated (full consolidation) with the purchase method starting on the date on which their control is assumed, and are excluded from consolidation as soon as their control is relinquished.

Acquisitions of subsidiaries by the Group are entered according to the purchase method. Subsidiary acquisition cost is the fair value of all assets transferred, of all shares issued and all liabilities at the acquisition date, plus any costs directly related to the transaction. The specific assets, liabilities and contingent liabilities acquired through a business combination are accounted for at their fair values irrespective of the percentage of participation. The acquisition cost in excess of the fair value of the acquired net assets is entered as goodwill. Should the total acquisition cost fall short of the fair value of the acquired net assets, the difference is directly entered in the Income Statement.

In particular, business combinations carried out prior to the Group's transition to IFRS (January 1, 2004), Group management has opted for the exemption provided for by IFRS 1, thereby not applying the purchase method retrospectively. In other words, it chose not to apply IFRS 3 or IAS 22 on company mergers with a retrospective effect. The accounting value of goodwill on the balance sheet drawn on the transition date is calculated according to previously accepted accounting principles. According to IAS 36, on impairment of assets and in line with the policies followed by J&P-AVAX S.A.'s parent company, goodwill is charged against shareholders' funds.

Intragroup sales, balances and un-realised profits from transactions among Group companies are omitted. Losses among Group companies (un-realised on a Group level) are also eliminated, except when the transaction provides evidence of impairment of the transferred asset. The accounting principles of subsidiaries have been amended for uniformity purposes relative to those adopted by the Group.

Investments in Associates: All companies which the Group may influence significantly but do not qualify for subsidiary or Joint Venture status. The Group's assumptions call for ownership between 20% and 50% of a company's voting rights to have significant influence on it. Investments in associates are initially entered in the Company's books at cost and subsequently consolidated using the equity method.

The Group's share into the profit or loss of associates following the acquisition is recognised into the Income Statement, whereas the share into changes in capital reserves following the acquisition is recognised into the reserves. Accumulated changes affect the book value of investments in associates. When the Group's participation into the financial loss of an associate is equal to or exceeds its participation in the associate, inclusive of provisions for bad debts, the Group does not recognise any further losses, except when covering liabilities or making payments on behalf of the associate, or taking other actions as part of its shareholder relationship.

Unrealised profits from transactions between the Group and its associates are omitted according to the participation of the group into those associates. Unrealised gains are omitted, unless the transactions suggest impairment of the transferred assets. Accounting principles of associates have been amended for uniformity purposes relative to those adopted by the Group.

Intragroup balances and transactions, along with Group profits arising from intragroup transactions which have yet to be concluded on a Group level, are eliminated in the consolidated Financial Statements.

Investments in Joint Ventures: Joint Venture types:

- 1) Joint Ventures with assets under joint control
- 2) Joint Ventures with activities under joint control

Those joint ventures do not concern the set up of a company, a partnership or other entity which is separate to the joint venture parties.

Separate accounting book-keeping and financial reporting is not required for the joint venture.

Therefore, joint ventures maintain tax records and prepare financial reports merely for fiscal purposes.

Assets, liabilities, income and expenses are recognised in the financial reports of the joint venture parties.

3) joint venture as an entity under joint control, in which a company, a partnership or another entity is set up

Joint ventures of this type keep their own accounting books, prepare financial reports and are subject to the following consolidation methods according to the degree of control and influence by the Group. More specifically:

- a) participation in joint ventures with joint control
- b) participation in joint ventures with significant influence
- c) participation in joint ventures without significant influence (there may be scope for significant influence, but the joint venture partner chooses not to use it)

In case (a), the proportionate consolidation method is applied, ie joint ventures' balance sheets and Income Statements are consolidated either on a line-by-line basis.

In case (b), the equity method is applied, the investment being treated as an associate.

In case (c), the investment is booked at acquisition cost.

Group Structure: J&P-AVAX Group fully consolidates the following subsidiaries:

Company	% of J&P-AVAX's SA participation	Fiscal Years not tax audited
J&P-AVAX, Athens	Parent	2009
ETETH S.A., Salonica	100%	2005-2009
ELVIEX Ltd, Ioannina	60%	2007-2009
PROET S.A., Athens	100%	2007-2009
J&P Development, Athens	100%	2007-2009
J&p TASK (3T), Athens	100%	2003-2009
S.C."ISTRIA DEVELOPMENTS" S.R., Romania	98%	2005-2009
CONCURRENT, Romania	95%	2005-2009
SC BUPRA DEVELOPMENT SRL, Romania	99,93%	2005-2009
SOPRA AD, Bulgaria	99,9%	2005-2009
J&P-AVAX IKTEO, Athens	70%	2006-2009
SC FAETHON DEVELOPMENTS SRL, Romania	100%	2006-2009
ATHENA SA, Athens	80.54%	2008-2009
ANEMA S.A., Athens	100%	2007-2009
FERRA E.E., Athens	100%	2007-2009
SY-PRO S.A., Larissa	60%	2007-2009
E-CONSTRUCTION S.A., Athens	100%	2007-2009
TERRA FIRMA, Athens	100%	2008-2009
J&P AVAX CONCESSIONS S.A. (ex. EVIA REAL ESTATE), Athens	99.967%	2008-2009
MARINA FALIROU S.A., Athens	58,00%	2009
J&P AVAX POLSKA, Poland	100%	2009
JPA TRIKALA, Athens	100%	-
JPA KORINTHOU, Athens	100%	-

It should be noted that J&P-AVAX reduced its equity participation in VOLTERRA SA (formerly named ARGESTIS SA) from 100% to 50% by means of partially exercising its right to VOLTERRA's capital

increase. Italy's SORGENIA SpA covered the balance of VOLTERRA's capital increase, thereby controlling a 50% equity stake.

VOLTERRA SA was therefore consolidated in the 30.06.2010 accounts using the equity method, rather than as a subsidiary.

Moreover, J&P-AVAX transferred its 100% equity stake in ILIOFANEIA SA to VOLTERRA SA, and was therefore not consolidated in the 30.06.2010 accounts as a subsidiary.

Furthermore, in the consolidated financial statements of J&P Avax SA the following subsidiaries of Athena SA are included using the fully consolidation method:

Company	% of Athena's SA participation	Fiscal Years not tax audited
ATHENA LIBYA, Libya	65%	2008-2009
ATHENA CONCESSIONS S.A., Athens	99%	2008-2009
ARCAT SA, Egaleo Attiki	100%	2007-2009
ARCAT North Greece – V. PROIOS SA, Thessaloniki	60%	2007-2009
ERGONET SA, Athens	51%	2007-2009
ATHENA ROMANIA SRL, Romania	100%	-

The Group consolidates the following associates using the equity method:

5N S.A., Athens	45.00%
Athens Car Parks S.A., Athens	20.00%
Attica Diodia S.A., Athens	30.84%
Attiki Odos S.A., Athens	30.83%
POLISPARK S.A., Athens	20.00%
3G, Athens	50.00%
STACY INVESTMENTS Sp.zo.o. Warsaw Poland	50.00%
CAR PARK N.SMIRNI, Athens	20.00%
LEISURE PARKS S.A.(KANOE-KAYAK), Athens	25.00%
LEISURE PARKS OPERATIONS, Athens	25.00%
CYCLADES ENERGY CENTER, Athens	45.00%
SC ORIOL REAL ESTATES, Romania	50.00%
SALONIKA PARK, Athens	24.32%
AEGEAN MOTORWAY S.A., Larissa	21,25%
GEFYRA OPERATION S.A., Athens	21,5436%
GEFYRA S.A., Athens	20,5289%
PIRAEUS ST.NICOLAS CAR PARK S.A., Athens	15.00%
METROPOLITAN ATHENS PARK S.A., Athens	20.00%
VOLTERRA S.A. (ex ARGESTIS S.A.), Athens	50,00%
STARWARE ENTERPRISES LTD, Athens	50.00%

The Group and the Company sold part of their shareholding in OLYMPIA ODOS SA and OLYMPIA ODOS OPERATION SA, reducing the stake at a Group level to 21% and 19.1% respectively. Following the sale of the participation, the Group does not have significant influence on those companies and is therefore not consolidating them using the equity method.

Furthermore, in the consolidated financial statements of J&P Avax SA the following associates of Athena SA are included using the equity method:

Company	% of Athena's SA participation
---------	--------------------------------

LEFKADAS MARINE PORT SA, Greece	26.64%
VAKON SA, Greece	25.00%
VIOENERGEIA S.A., Greece	45.00%
ATHENA MICHANIKI OE, Greece	50.00%
ATHENA EMIRATES LLC, United Arab Emirates	49.00%
NEW UNDERGROUND CAR STATION OLP S.A., Greece	30.00%
SC ECO S.A., Romania	24.41%

The following are the joint ventures in which the group participates and are consolidated proportionately:

Proportionate consolidation by 100% (complete consolidation)

1. J/V J&P - AVAX S.A. - ETETH S.A., Athens (SMAEK)	100.00%
2. J/V J&P - AVAX S.A. – ETETH S.A., Athens (Suburban Railway)	100.00%

The Proportionate consolidation by 100% has the same results with the complete consolidation
Proportionate consolidation

3. J/V J&P-AVAX S.A. - "J/V IMPREGILO SpA -J&P-AVAX S.A.- EMPEDOS S.A.", Athens	66.50%
4. J/V AKTOR S.A. - J&P - AVAX S.A. - ALTE S.A. - ATTIKAT S.A. - ETETH S.A. - PANTECHNIKI S.A. - EMPEDOS S.A., Athens	30.84%
5. J/V J&P-AVAXS.A. - EKTER A.E - KORONIS S.A., Athens	36.00%

C.2a. Property, Plant & Equipment, Investment Property (I.A.S. 16)

Group management selected the **basic method of valuation of operating fixed assets** inclusive of operating property, according to IAS 16 (at acquisition cost, reduced by accumulated depreciation and accumulated impairment charges), following the initial entry of tangible fixed assets on transition date to I.A.S. (01/01/2004).

However, in 2008 the Management decided to adopt the **revaluation model** for the land and buildings category of assets

Revaluation Model

Upon recognition as an asset, a fixed asset whose fair value may be estimated reliably may be revalued, to reflect the fair value at recognition date less any subsequent accumulated impairment of value.

The fair value of land and buildings is usually appraised by auditor-valuators. The fair value of equipment and fixtures is usually their acquisition price.

When tangible fixed assets are revalued, the entire class of similar assets should be revalued.

When the book value of a fixed asset increases as a result of revaluation, the increase is credited directly into the Equity as a Revaluation Surplus.

Increases in value due to revaluation will be recognised through the Income Statement to the extent it reverses an earlier impairment of the same asset, charged in the Income Statement.

Should the book value of an asset be reduced as a result of a revaluation, the decrease in value should be charged in the Income Statement. If a revaluation surplus for that asset exists in Equity, the decrease will be charged directly into Equity up to the value of that surplus. Revaluation surpluses in Equity are transferred to Retained Earnings as soon as the fixed assets are sold or derecognized. Tax effects on the revaluation of tangible fixed assets are recognised and disclosed according to IAS 12 Income Tax.

The initial implementation of a tangible fixed asset revaluation policy is treated as a revaluation according to IAS 16, not IAS 8.

While applying I.A.S. 36 (on Impairment of Assets), on each reference date Group management effectively estimates whether its asset base shows signs of impairment, comparing the residual value for each asset against its book value.

Subsequent expenditure on fixed assets already appearing on the Company's books are added to that asset's book value only if they increase its future economic benefits. All expenditure (maintenance, survey etc.) for assets not increasing their future economic benefits are realised as expenses in the financial period incurred.

Expenditures incurred for a major repair or survey of a fixed asset are realised as expenses in the financial period in which they are incurred, except when increasing the future economic benefits of the fixed asset, in which case they are added to the book value of the asset.

Depreciation of tangible fixed assets (excluding land which is not depreciated) is calculated on a straight-line basis according to their useful lives. The main depreciation rates are as follows:

Operating Property (buildings)	3%
Investment Property	3%
Machinery	5.3% - 20%
Vehicles	7.5% - 20%
Other equipment	15% - 20%

Residual values and useful lives of tangible fixed assets are subject to revision on balance sheet date. When the book value of fixed tangibles exceeds their recoverable value, the difference (impairment loss) is directly charged as an expense item in the Income Statement.

When disposing of tangible fixed assets, the difference between the revenue from the sale and the book value of the assets is realised as profit or loss in the Income Statement.

Own-produced fixed tangibles constitute an addition to the acquisition cost of the assets in the form of direct cost of personnel participating in their production (including related employer's social security contributions), cost of materials and other general expenses.

C.2b. Investment Property (IAS 40)

J&P Avax group applies IAS 40 for the property regarded as an investment, using the alternative method of valuation, which is the cost model.

Regarding **investment property**, management chose the **alternative method of valuation at acquisition cost (reduced by accumulated depreciation and accumulated impairment charges) according to IAS 16**, following the initial entry of tangible fixed assets on transition date to I.A.S. (01/01/2004).

During 2007 J&P Avax group decided to change the accounting policy, regarding the valuation of investment property, and specifically to apply the fair value model instead of the cost model. The Management adopts the opinion that the accounting policy of the fair value model for the investment property valuation provides more credible and relevant information because it is based on up-dated values.

According to IAS 8 "Accounting Policies, Changes in Accounting Estimates and Errors", paragraph 52, the retrospective application of a new accounting policy requires the distinction of the information that:

- a) Indicate the prevailing facts at the transaction dates.
- b) Would be available when the financial statements of these previous periods were approved to be published.

For certain estimations (e.g. fair value estimation not based on an observable price or observable inputs) the distinction of the information is not possible.

When the retrospective application, or the retrospective restatement would require significant estimation, for which the separation of the information is not feasible, then the retrospective application of the new accounting policy is not feasible too.

The Management examined the prospect to recognize both cases of the change in accounting policy. They deduced that the change could not be accounted retrospectively. Therefore, the accounting policy will be applied on a future basis beginning from 2007.

C.3. Intangible Assets (I.A.S. 38)

These expenses should be amortised during the financial period in which they are incurred. Only expenses meeting the criteria of I.A.S. 38.18 are capitalized, such as expenses for computer software and licences. Long-term expenses not meeting the criteria of I.A.S. 38.18 are written off in applying IFRS. Intangible assets include software licences.

C.4. Impairment of Assets (I.A.S. 36)

i) Goodwill

Goodwill represents the additional price paid by the Group for the acquisition of new subsidiaries, joint ventures, and associates. It arises from the comparison of the price paid for the acquisition of a new company with the proportion of the group share to the fair value of the net assets, during the acquisition date. The arisen goodwill from the acquisition of the new subsidiaries and joint ventures is recognized to intangible assets. Every year impairment test for the goodwill is conducted, which decreases the original amount as it is recognized in the balance sheet. During the calculation of profit or loss arisen from participation disposal, the relevant (if any) goodwill is taken under consideration of the disposed company.

For an easier processing of impairment tests, goodwill is allocated to Cash Generating Units (CGU's). The CGU is the smallest identifiable unit of assets which creates independent cash flows and represents the level at which the Group collects and presents the financial data for reasons of internal information. The impairment for the goodwill, is determined from the calculation of the recoverable amount of the CGU's with which the goodwill is connected. Impairment loss which is related with goodwill cannot be reversed in future periods. The Group conducts the annual test for goodwill impairment at 31 December of each accounting period.

In case that the fair value of net assets of a company during the acquisition date is higher than the price paid for the acquisition, negative goodwill is recognized (income), which goes directly in the Income Statement.

I.A.S. 36 applies for the impairment of subsidiaries acquisition or I.A.S. 39 for participation to associates, and other participating interest companies.

ii) Other Assets

Assets with an infinite useful life are not depreciated and are subject to annual review for impairment, whenever events take place showing their book value is not recoverable. Assets being depreciated are subject to review of their value impairment when there are indications that their book value shall not be recovered.

Net Selling Price (NSP) is the amount obtainable from the sale of an asset in an arm's length transaction between knowledgeable willing parties, less the costs of disposal. Value in use is the present value of estimated future cash flows expected to arise from the continuing use of an asset and from its disposal at the end of its useful life. At each balance sheet date, management assess whether there is an indication of impairment as required by I.A.S. 36, requiring that the book value of assets does not exceed their recoverable amount. Recoverable amount is the highest between Net Selling Price and Value in Use.

This evaluation also takes into account all available information, either from internal or external sources. Impairment review is applied on all assets except for inventories, construction contracts, deferred tax receivables, financial assets falling under I.A.S. 39, investment property and non-current assets classified as being held for disposal.

Impairment losses are charged in the Income Statement.

C.5. Inventories (I.A.S. 2)

On Balance Sheet date, inventories are valued at the lowest between cost and Net Realisable Value (NRV). NRV is the estimated selling price in the ordinary course of business, less the estimated cost of completion and the estimated costs necessary to make the sale. Inventory cost does not include financial expenses.

C.6. Financial Instruments: Recognition and Measurement (I.A.S. 39)

The standard outlines the principles for recognition and measurement of financial instruments, financial liabilities and certain contracts for purchase or sale of non financial instruments. The financial instruments of the Group are classified in the following categories according to the substance of the contract and the purpose for which they were purchased. Purchases and sales of investments are recognised on trade date, which is the date on which the Group commits itself in purchasing or selling the asset. Investments are initially recognized at fair value plus related transaction expenses, with the exception of transaction expenses for assets which are recognized at fair value and through the income statement. Investments are written off when the right to the related cash flows expires or is transferred and the Group has in substance transferred all risks and rewards relating to ownership.

i) Financial assets/liabilities valued at fair value through the income statement

These comprise financial assets/liabilities that satisfy any of the following conditions:

- Financial assets/liabilities held for trading purposes (including derivatives, except those designated and effective hedging instruments, those acquired or created for the purpose of sale or repurchase, and those that are part of a portfolio of designated financial instruments).
- Upon initial recognition, it is designated by the company as an instrument valued at fair value, with any changes recognised through the Income Statement.

Realised and unrealised profits or losses arising from changes in the fair value of financial assets valued at their fair value with changes in the income statement, are recognized in the income statement at the period in which they result.

ii) Loans and receivables

They include non-derivative financial assets with fixed or predefined payments which are not traded in active markets. This category (loans and receivables) does not include:

- receivables from advances for the purchase of goods or services,
- receivables relating to tax transactions, which have been legislatively imposed by the state,
- any receivable not covered by a contract giving the company the right to receive cash or other financial fixed assets.

Loans and receivables are initially recognised at their fair value and then measured at net book cost based upon the real interest rate method.

iii) Investments held to maturity

These include non derivative financial assets with fixed or defined payments and specific maturity and which the Group intends and has the ability to hold till maturity. Assets of this category are initially recognised at fair value and then measured at net book cost based upon the real interest rate method.

iv) Financial assets available for sale

These include non derivative financial assets either designated in this category or not included in any of the previous ones.

Financial assets available for sale are valued at fair value and the relevant profit or loss is recorded in an equity reserve until such assets are sold or characterized as impaired.

During the sale, or when they are characterized as impaired, the profit or loss is transferred to the income statement. Impairment losses that have been recorded to the income statement cannot be reversed through the income statement.

The fair values of financial assets traded in an active market, are defined by the current ask prices. For non-traded instruments, fair values are defined with the use of valuation techniques such as analysis of recent transactions, comparative items that are traded and discounted cash flows. Securities not traded in an active market that have been classified in the category "financial assets available for sale", whose fair value cannot be determined with credibility, are valued at their acquisition cost. At each balance sheet date the Group assesses whether there are objective indications that lead to the conclusion that financial assets have been impaired. For company shares classified as financial assets available for sale, such an indication is a significant or extended decline in the fair value compared to the acquisition cost. If impairment is established, the accumulated loss in equity, which is the difference between acquisition cost and fair value, is transferred to the results.

C.7. Financial Instruments: Presentation (IAS 32)

The principles in this Standard complement the principles for recognising and measuring financial assets and financial liabilities in IAS 39 Financial Instruments: Recognition and Measurement.

This Standard is concerned with the classification of financial instruments into financial assets, financial liabilities and equity instruments, as well as the classification of related interest, dividends, losses and gains, and the circumstances in which financial assets and financial liabilities should be offset.

A *financial instrument* is any contract that simultaneously gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity.

A *financial asset* is any asset that is:

- (a) cash
- (b) an equity instrument of another entity
- (c) a contractual right:
 - (i) to receive cash or another financial asset from another entity; or
 - (ii) to exchange financial assets or financial liabilities with another entity under conditions that are potentially favourable to the entity; or
- (d) a contract that will or may be settled in the entity's own equity instruments and is:
 - (i) a non-derivative for which the entity is or may be obliged to receive a variable number of the entity's own equity instruments; or

(ii) a derivative that will or may be settled other than by the exchange of a fixed amount of cash or another financial asset for a fixed number of the entity's own equity instruments. For this purpose the entity's own equity instruments do not include instruments that are themselves contracts for the future receipt or delivery of the entity's own equity instruments.

A *financial liability* is any liability that is:

(a) a contractual obligation:

(i) to deliver cash or another financial asset to another entity; or
(ii) to exchange financial assets or financial liabilities with another entity under conditions that are potentially unfavourable to the entity; or

(b) a contract that will or may be settled in the entity's own equity instruments and is:

(i) a non-derivative for which the entity is or may be obliged to deliver a variable number of the entity's own equity instruments; or
(ii) a derivative that will or may be settled other than by the exchange of a fixed amount of cash or another financial asset for a fixed number of the entity's own equity instruments. For this purpose the entity's own equity instruments do not include instruments that are themselves contracts for the future receipt or delivery of the entity's own equity instruments.

An *equity instrument* is any contract that evidences a residual interest in the assets of an entity after deducting all of its liabilities.

Fair Value is the amount for which an asset could be exchanged for or a liability be settled with between two parties acting on their own will and in full knowledge of market conditions, as part of a transaction carried out on a pure commercial basis.

C.8. Financial Instruments: Disclosures (IFRS 7)

IFRS 7 refers to all risks arising from all financial instruments, except those instruments specifically excluded (e.g. interests in subsidiaries, associates and joint ventures, etc.). The objective of the disclosures is to provide an overview of the Group's use of financial instruments and its exposure to risks they create. The extent of the disclosure required depends on the extent of the Company's use of financial instruments and its exposure to risk. The Group and Company apply IFRS 7 from January 1st, 2007.

C.9. Provisions (I.A.S. 37)

Provisions are recognized when the Group faces legal or substantiated liabilities resulting from past events, their settlement may result in an outflow of resources and the amount of the liability can be reliably estimated. Provisions are reviewed on Balance Sheet date and adjusted to reflect the present value of the expense estimated for settling the liability. Contingent liabilities are not recognized in the financial statements but nevertheless are disclosed in the accompanying notes, except when the probability of an outflow of resources is minimal. Contingent assets are not recognized in the financial statements, but are disclosed in the notes, provided an inflow of economic benefits is probable.

C.10. Government Grants (I.A.S. 20)

The Group recognizes government grants (subsidies) only when there is reasonable assurance that:

- a) the enterprise will comply with any conditions attached to the grants,
- b) the grant is likely to be received.

Subsidies are entered in the company's books at their fair value and recognized on a consistent basis as revenue, in accordance with the principle of matching the receipts of subsidies with the related expenses.

Subsidies on assets are included in long-term liabilities as deferred income and recognized on a consistent basis as revenues over the expected useful life of the assets.

C.11. The effects of changes in Foreign Exchange Rates (I.A.S. 21)

The financial statements of all Group companies are prepared using the currency of the economic area which the Group mainly operates in (operating currency). Consolidated financial reports are denominated in euros, the operating and presentation currency of the parent Company and its subsidiaries.

Transactions in foreign currency are converted in the operating currency according to the going foreign exchange rates on the date on which transactions take place.

Profit and losses from foreign exchange differences arising from settlement of transactions in foreign currency during the financial reporting period and the conversion of monetary items denominated in foreign currency according to the going exchange rates on balance sheet date are recognised in the Income Statement. Foreign exchange adjustments for non-monetary items valued at fair value are considered part of the fair value and are therefore treated as differences in fair value.

C.12. Equity Capital (I.A.S. 33)

Expenses incurred due to the issue of new shares appear below the deduction of related income tax, reducing the net proceeds from the issue. Expenses incurred due to the issue of new shares to finance the acquisition of another company are included in the target company's total acquisition cost.

C.13. Dividends (I.A.S. 18)

Payments of dividends to parent company shareholders are recognized as a liability in the consolidated financial statements on the date on which the General Assembly of the Shareholders grants its approval on the distribution of the dividend.

C.14. Income Taxes & Deferred Tax (I.A.S. 12)

Income tax expenses appearing in the Income Statement include both tax for the period and deferred tax, which correspond to tax charges or tax returns arising from benefits realized within the reporting period in question but booked by the tax authorities in earlier or later reporting periods. Income tax is recognized in the Income Statement for the reporting period, except for tax relating to transactions directly charged against shareholders' funds; in that case, income tax is similarly charged directly against shareholders' funds.

Current income tax includes short-term liabilities and/or receivables from the tax authorities related to payable tax on the taxable income of the reporting period, as well as any additional income tax from earlier reporting periods.

Current tax is calculated according to the tax rates and fiscal legislation applied on each reporting period involved, based on the taxable income for the year. All changes in short-term tax items listed on either side of the balance sheet are recognized as part of the tax expense in the Income Statement.

Deferred income tax is calculated by means of the liability arising from the temporary difference between book value and the tax base of asset and liabilities. No deferred income tax is entered when arising from the initial recognition of assets or liabilities in a transaction, excluding corporate mergers, which did not affect the reported or taxable profit / loss at that time.

Deferred tax income and liabilities are valued according to the tax rates expected to apply in the reporting period in which the receipt or payment will be settled, taking into account the tax rates (and fiscal laws) introduced or in effect until the reporting date. The tax rate in effect on the day following the reporting date is used whenever the timing of reversal of temporary differences cannot be accurately determined.

Deferred tax receivables are recognized to the extent in which taxable profits will arise in the future while making use of the temporary difference which gives rise to the deferred tax receivable.

Deferred income tax is recognized for the temporary differences arising from investments in subsidiaries and affiliates, excluding those cases where de-recognition of temporary differences is controlled by the Group and temporary differences are not expected to be derecognized in the foreseeable future.

Most changes in deferred tax receivables or liabilities are recognised as tax expenses in the Income Statement. Only changes in assets or liabilities affecting temporary differences (e.g. asset revaluations) which are recognized directly against the Group's shareholders' funds do result in changes in deferred tax receivables or liabilities being charged against the relevant revaluation reserve.

C.15. Personnel Benefits (I.A.S. 19)

Short-term benefits:

Short-term benefits to personnel (excluding termination benefits) in money and in kind are recognized as an expense when deemed payable. Portions of the benefit yet unpaid are classified as a liability, whereas if the amount already paid exceeds the benefit then the company recognizes the excess amount as an asset (prepaid expenses) only to the extent to which the prepayment will result in a reduction in future payments or to a fund return.

Retirement benefits:

Benefits at retirement from service include a defined contribution plan as well as a defined benefit plan.

Defined Contribution Plan:

According to the plan, the company's legal liability is limited to the amount agreed for contribution to the institution (social security fund) managing employer contributions and handing out benefits (pensions, medical plans etc).

The accrued cost of defined contribution plans is classified as an expense in the corresponding financial reporting period.

Defined Benefit Plan:

The Company has legal liability for personnel benefits due to lay-offs ahead of retirement date or benefits upon retirement from service, in accordance with pertinent legislation.

The Projected Unit Credit Method is used to calculate the present value of defined benefit obligations, the related current cost of services and the cost of services rendered which is the accrued services method, according to which benefits are paid at the financial periods in which the retirement benefit liability is founded. Liabilities arise while employees provide services qualifying for retirement benefits.

The Projected Unit Credit Method therefore requires that benefits are paid in both the current reporting period (to calculate the current cost of services) and in the current and past reporting periods (to calculate the present value of defined benefit obligations).

Despite the fact that remaining in service with the Company is a prerequisite for receiving benefits (ie benefits cannot be taken for granted by employees), liabilities are calculated using actuarial methods as follows:

Demographic Assumptions: Personnel Turnover (Staff Resignations / Staff Lay-offs), and

Financial Assumptions: discount rate, future salary levels (calculated using government bond yield of equal maturities) and estimated future changes in state benefits affecting payable benefits.

C.16. Revenue Recognition (I.A.S. 18)

Revenues include the fair value of works, sales of goods and services, net of VAT, discounts and returns. IntraGroup revenues are completely eliminated. Recognition of revenues is done as follows:

Construction Contracts:

Revenues from projects towards signed contracts are entered in the reporting period in which the works were carried out, based on their stage of completion

Sale of Goods:

Sale of goods are recognized when the Group makes actual delivery of the goods to their buyers who in turn formally accept them, rendering their price secure for receipt.

Provision of services:

Revenues from provision of services are entered in the reporting period in which the services were rendered, according to the stage of completion of the services.

C.17. Leases (I.A.S. 17)

Financial leases are all leases on fixed assets which transfer onto the Group all risks and benefits in relation to those assets' ownership, irrespective of the eventual transfer of ownership of the assets.

These leases are capitalized at the start of the lease using the lowest price between the fair value of the fixed asset and the present value of the minimum lease. All leases comprise a liability and a financial expense, securing a fixed interest rate for the balance of the financial liability. Liabilities arising from leases, net of financial expenses, are entered as liabilities in the balance sheet. The portion of financial expenses arising from financial leases is recognized in the Income Statement throughout the term of the lease. Fixed assets acquired via financial leases are depreciated over the lowest term between their useful life and their lease term.

Lease agreements in which the lessee transfers the right of usage of an asset for a fixed time period but not the risks and rewards of the asset's ownership, are classified as operating leases. Payments for operating leases (net of any discounts offered by the lessor) are recognized in the Income Statement proportionately over the term of the lease.

Fixed assets leased as lessor through operating leases are included as tangible assets in the balance sheet and depreciated over their expected useful lives using the same procedure as other fully-owned tangibles. Proceeds from leases (net of any discounts offered to the lessee) are recognized on a straight-line basis over the lease term. The Group does not lease fixed assets using the financial lease method.

C.18. Construction Contracts (I.A.S. 11)

Construction contracts refer to the construction of assets or a group of related assets on behalf of clients according to terms laid out in relevant contract agreements, their construction usually spanning more than one reporting period.

Expenses arising from the contract are recognized at the time they are incurred.

If the profitability of a construction contract cannot be reliably estimated, and especially when the project is at an early stage of completion, revenues are recognized to the extent that construction costs may be recovered, and construction costs must be recognized in the income statement of the reporting period in which they came about. Therefore, the level of revenues recognized from those construction contracts must be set accordingly to yield zero profitability for the project.

If the profitability of a construction contract may be reliably estimated, revenues and expenses arising from that contract are recognized during the term of the contract as revenue and expense, respectively. The Group uses the percentage of completion method to set the revenue and expense to be recognized over each reporting period. The stage of completion is calculated on the basis of the construction cost realized until reporting date in relation to the total estimated cost of each project.

If total costs from a construction contract are likely to exceed the relevant total revenues, the expected loss is recognised immediately in the income statement as an expense item.

In calculating the cost realised during a reporting period, expenses linked to future works arising from a construction contract are excluded and entered in the accounts as work-in-progress. Total realised costs and profit / loss recognised on each contract are compared to the invoiced works till the end of the reporting period.

If realised expenses, plus net realised profit and less any realised losses, exceed the invoiced works then the difference is entered as a receivable from clients (Construction Contracts). If invoiced works

exceed realised expenses, plus net realised profits and less realised losses, the balance is entered as a liability to contract clients.

Contract Grouping:

The initial contract for a project, along with any additional works and extensions to the contract, are treated as a single project because new contracts for additions and extensions pertain to works on the same project and their value is related to the value of the initial contract.

A group of projects is treated as a single project if their negotiation is done jointly or the relevant contracts are linked with each other and constitute parts of a broader project with a total profit margin, or each contract is carried out simultaneously or in a certain order.

Project Revenues: Revenues from projects include the following:

- Initial contract value, plus any revisions of the initial contract, extensions and additions
- Claims
- Incentive payments, e.g. for early delivery

Claims and incentive payments are taken into account to the extent that they may be realised with a strong likelihood and be accurately defined and calculated.

Project Cost: The cost of projects includes the following:

- Costs directly related to a project
- Costs attributed to a particular project and can be allocated to the same project
- Other costs billed to a specific client, according to the terms of the contract

The second case includes all general construction expenses. Those expenses are regularly allocated using reasonable and consistent methodologies and allocation practices, across all similar expense items.

General Construction Expenses include costs such as clerical work on staff payroll, and financial expenses related to the projects.

Expenses not allocated or classified to a specific project include sale expenses, R&D expenses, general administrative expenses and depreciation of idle equipment, which are not employed in that project.

C.19. Debt and receivables (I.A.S. 23)

Debt and receivables include non-derivative financial assets with fixed or otherwise predefined payments, which are not traded on active markets. They exclude

- a) receivables from prepayments on goods or services,
- b) receivables related to legislation-induced transactions in taxes,
- c) any other items not provided for by contracts offering the Company the right to receive payment of cash or other financial assets.

Debt and receivables are included in current assets, with the exception of those expiring over 12 months after reporting date which are entered as non-current assets.

On every Balance Sheet date, the Group evaluates the existence of objective indications of impairment of its financial assets.

Debt and receivables are recognized at their non-depreciated cost using the real interest rate method. Losses are directly and fully charged against the reporting period's income statement.

Each receivable item of substantial value is evaluated individually for impairment, whereas lower-valued items may be jointly evaluated. When jointly evaluated, lower-valued receivables should be grouped according to their credit risk rating (i.e. the items should be classified according to their risk profile).

Should the value impairment loss be eliminated according to some objective indications in subsequent reporting periods, it should be derecognized and immediately charged in the income statement. The value of derecognition should not result in a non-depreciated cost which is in excess of the value of the receivable at the date of derecognition, provided there was no impairment loss.

C.20. Borrowing Cost (I.A.S. 23)

Borrowing cost refers to interest charged on debt, as well as other expenses incurred by the company in securing that debt.

Included in borrowing costs are:

- Interest expenses on short-term and long-term bank loans, as well as overdraft interest charges
- Amortisation of par discount arising from bond loan issues
- Amortisation of additional expenses incurred in securing a loan
- Financial expenses from financial leases, as defined in I.A.S. 17
- Foreign exchange adjustments, to the extent that they constitute a financial expense

Borrowing costs that can be allocated directly in acquisition, construction or production of an asset which fulfils the requirements should be capitalized.

C.21. Segment reporting (I.A.S. 14)

Business segments are groups of asset items and activities producing products and services which are subject to different risks and returns of the assets and activities of other business segments. Geographic segments are the areas in which the offered products and services differ to those offered in other areas in terms of the risks and return they are subject to.

Every contract being filled by the Group is unique in terms of technical specifications, differentiating it to a small or large extent from other contracts. The projects carried out by the company mainly differ from each other in terms of the intended use by the end-client, nevertheless without differentiating themselves in terms of business risk and return. The Group provides business segment report.

C.22. Related Party Disclosures (I.A.S. 24)

Related party disclosures are governed by I.A.S. 24 and refer to transactions between a company reporting its financial statements and other related parties. Its application is compulsory for reporting periods starting after 1/1/2005. The main issue is the economic substance of transactions, as opposed to their legal form.

A company is considered a related party to a reporting company if:

- a) It is directly or indirectly via intermediaries in control, or controlled by or under joint control of the reporting company
- b) It controls an equity stake in the reporting company which grants substantial control, or joint control of the reporting company
- c) It is an associate, as defined in IAS 28
- d) It is a joint venture, as defined in IAS 31
- e) It is a key member of the top management team (Board of Directors) of the reporting company or its parent firm
- f) It is closely related family-wise to any person matching the first and fourth case noted above
- g) It is a company controlled (or under joint control or under substantial influence) by a person matching the fourth and fifth case noted above
- h) It has an employee defined benefit plan in place, where those eligible for receiving the benefits are either the reporting company or the employees of the reporting company

Related party transaction is any transfer of resources, services or liabilities between related parties, irrespective of the payment of a price in return.

D. RISK MANAGEMENT

The operation of the J&P-AVAX Group of companies and the broader business environment present a number of risks which need be dealt with by the Company's management, weighing with realism the relevant cost against the likely impact of those risks.

D.1 Financial Risk

The Group's operations require working capital and performance bonds by banks to guarantee our participation in tenders for projects and subsequently our performance in those projects. The interest rate levied on the Company's bank debt is largely dependent on the European Central Bank's interest rate policy, while the fees charged for issuing the performance bonds are generally considered low due

to the Company's large volume of banking business, its excellent creditworthiness and intense competition within the banking sector.

The Company's Finance Department works closely with local and international financial institutions to plan our debt requirements and the volume of performance bonds needed to support projects in progress or in tender process with the lowest possible financial cost.

The Group continuously monitors its needs for derivative interest rate hedging instruments. All short-term debt is taken with variable interest rates while bond loans carry an option to convert their rate into fixed. (see note 26b)

D.2 Foreign Exchange Risk

The Group's international business is on an uptrend, hence it is exposed to growing currency risk. The conversion of the Cypriot Pound into euro eliminated the Group's currency risk for that cross-rate given its large work-in-hand in Cyprus.

In Europe, the Group is active in Poland where it bills and receives cash in euro (the projects being funded by the European Union) and about 60% of its expenses are charged and paid in euro. To hedge its risk in expenses denominated in PLN, the Company maintains low levels of debt in PLN as working capital, the bulk of debt being denominated in euro. In Romania the Group is active through its subsidiary ATHENA SA for construction works, and through J&P Development for real estate projects. Real estate property is valued and transactions are done using euro, hence the Group faces no currency risk. (see note 9c)

D.3 Input Risk

Several of the raw materials used by the Group are internationally-priced commodities, such as cement, metal grids and fuel. Price volatility in those input materials is eased to some extent as a result of particularities in their supply in Greece, while the Group also purchases raw materials and other inputs centrally to take advantage of economies of scale in quoted prices by suppliers.

D.4 Liquidity Risk

The likelihood of failure to meet its obligations against its clients presents a risk to the Group because this eventuality could challenge the Financial Division's planning for cash liquidity.

Despite the substantial diversification of projects to a large number of clients, both in Greece and abroad, the Group's revenues largely source from the Greek State, other public-sector entities and international state organizations enjoying financial backing by the European Union. In this light, the risk of failure to collect receivables on signed contracts is considered very low, despite occasional delays in collecting payments from even the most reliable clients, such as the Greek State. The Group faces increased credit risk on private projects, which are on the rise relative to the overall level of business. The Group makes a provision on contingent liabilities relating to private projects. The credit risk is monitored by a computer application which analyses the aging breakdown of the receivables. The Group also maintains high credit lines with the banking system to cope with liquidity issues which might arise.

E. NEW STANDARDS, INTERPRETATIONS AND AMENDMENTS TO PUBLISHED STANDARDS

IASB and IFRIC have published a series of new financial reporting standards and interpretations which are mandatory. The estimation of the Group's and the Company's management regarding the impact of those new standards and interpretations is as follows:

IFRS 3 - "Business Combinations" (Revised) and IAS 27, "Consolidated and Separate Financial Statements" (Amended)

(effective for annual periods beginning on or after 1 July 2009.)

A revised version of IFRS 3 Business Combinations and an amended version of IAS 27 Consolidated and Separate Financial Statements were issued by IASB on January 10, 2008. The revised IFRS 3 introduces a number of changes in the accounting for business combinations which will impact the amount of goodwill recognised, the reported results in the period that an acquisition occurs, and future reported results. Such changes include the expensing of acquisition-related costs and recognising subsequent changes in fair value of contingent consideration in the profit or loss (rather than by adjusting goodwill).

The amended IAS 27 requires that a change in ownership interest of a subsidiary is accounted for as an equity transaction. Therefore such a change will have no impact on goodwill, nor will it give rise to a gain or loss. Furthermore the amended standard changes the accounting for losses incurred by the subsidiary as well as the loss of control of a subsidiary. The changes introduced by IFRS 3 (Revised) and IAS 27 (Amendment) must be applied prospectively and will affect future acquisitions and transactions with minority interests. The Group has adapted these changes since January 1st, 2010.

IAS 1, "Presentation of Financial Statements" (Revised)

(effective for annual periods beginning on or after 1 January 2009.)

IAS 1 has been revised to enhance the usefulness of information presented in the financial statements. Of the main revisions are the requirement that the statement of changes in equity includes only transactions with shareholders; the introduction of a new statement of comprehensive income that combines all items of income and expense recognised in profit or loss together with "other comprehensive income"; and the requirement to present restatements of financial statements or retrospective application of a new accounting policy as at the beginning of the earliest comparative period, i.e. a third column on the balance sheet. The Group will make the necessary changes to the presentation of its financial statements in 2009. The Group made the necessary changes to the presentation of its current financial statements and elected to present the comprehensive income in a separate statement.

Amendments to IAS 32 "Financial Instruments: Presentation" and IAS 1 "Presentation of financial statements"

(applicable to accounting periods starting on or after 1 January 2009)

The amendments for Financial Instruments pertain to entities that have issued puttable financial instruments and are applicable on annual accounting periods starting on or after 1 January 2009. The amendment to IAS 32 requires that specific puttable financial instruments, instruments or components of instruments imposing an obligation on an entity upon their liquidation, should be classified as equity, provided some conditions are met. The amendment to IAS 1 requires disclosure of information on the puttable instruments classified as equity. These amendments will not affect the income statement of the Group and the Company.

IAS 32 - Classification on Rights Issues (Amended)

The amendment is effective for annual periods beginning on or after 1 February 2010. This amendment relates to the rights issues offered for a fixed amount of foreign currency which were treated as derivative liabilities by the existing standard. The amendment states that if certain criteria are met, these should be classified as equity regardless of the currency in which the exercise price is denominated.

IAS 39 - "Financial Instruments: Recognition and Measurement" and IFRS 7 - "Financial Instruments: Disclosures; Reclassification of Financial Assets"

(effective for annual periods beginning on or after 1 July 2009)

The amended standard requires additional disclosures about fair value measurement and liquidity risk. Fair value measurements related to items recorded at fair value are to be disclosed by the source of inputs, using a three-level hierarchy, by class, for all financial instruments recognized at fair value. In addition, a reconciliation between the beginning and ending balance for level 3 fair value measurements is now required, as well as significant transfers between the levels in the fair value hierarchy. The amendments also clarify the requirements for liquidity risk disclosures with respect to derivative transactions and assets used for liquidity management.

The amendment clarifies that an entity is permitted to designate a portion of the fair value changes or cash flow variability of a financial instrument as hedged item. This also covers the designation of inflation as a hedged risk or portion in particular situations.

IAS 23 - "Borrowing Costs" (Revised)

(effective for annual periods beginning on or after 1 January 2009.)

The benchmark treatment in the existing standard of expensing all borrowing costs to the income statement is eliminated in the case of qualifying assets. All borrowing costs that are directly attributable to the acquisition or construction of a qualifying asset must be capitalised. A qualifying asset is an asset that necessarily takes a substantial period of time to get ready for its intended use or sale. The Group/Company has already the allowed alternative treatment of IAS 23 and allocates borrowing costs in the accounts that satisfied the prerequisites and it is not expected that this amendment will affect the financial statements.

IFRIC 9 - Financial Instruments – Phase 1 financial assets, classification and measurement

The new standard is effective for annual periods beginning on or after 1 January 2013. Phase 1 of this new IFRS introduces new requirements for classifying and measuring financial assets. Early adoption is permitted. This standard has not yet been endorsed by the EU.

IFRS 2 Group Cash-settled Share-based Payment Transactions

IFRS 2 Group Cash-settled Share-based Payment Transactions (Amended)

The amendment is effective for annual periods beginning on or after 1 January 2010.

This amendment clarifies the accounting for group cash-settled share-based payment transactions and how such transactions should be arranged in the individual financial statements of the subsidiary. This interpretation has not yet been endorsed by the EU.

IFRIC 11 – Group and Treasury Share Transactions

(effective for financial years beginning on or after 01.03.2007)

IFRIC 11 provides instructions about whether the allowance agreements that are dependent on the price of shares, should be recognised in the financial statements as cash payments or as payments with participation titles. This is a significant distinction as major differences arise in the accounting treatments. For example, cash payments are recognized at the fair value in each balance sheet date. On the contrary, in case of payment with participation titles the fair value is valued at the date of the allowance and is recognized in the period where the service was rendered.

IFRIC 12 – Service Concession Arrangements

(effective for financial years beginning on or after 01.01.2008)

IFRIC 12 outlines the approach of entities providing public services through concession agreements to the application of existing IFRSs in accounting for the obligations and rights assumed through those concession agreements. According to IFRIC 12, those entities should not account for the infrastructure as property, plant and equipment, but should recognise a financial asset and / or an intangible asset. The Group and the Company are in the process of evaluating the effect of IFRIC 12 on its future financial statements.

IFRIC 14 - Prepayments of a Minimum Funding Requirement

The amendment is effective for annual periods beginning on or after 1 January 2011. The purpose of this amendment was to permit entities to recognize as an asset some voluntary prepayments for minimum funding contributions. This Earlier application is permitted and must be applied retrospectively. This amendment has not yet been endorsed by the EU.

IFRIC 15 - "Agreements for the Construction of Real Estate"

(effective for financial years beginning on or after 1 January 2009)

IFRIC 15 provides guidance on two issues:

- If the building construction agreements concern the scope of IAS 11 or IAS 18
- When the income from the building construction should be recognized. This IFRIC is applied during the accounting recognition of income, as well as the related expenses, in the books of the Company that has undertaken the construction agreement, whether the construction is completed directly by the Company or through subcontractors. The contracts in the scope of IFRIC 15 are the building construction agreements. Furthermore, these agreements may include the deliverance of goods or services. IFRIC 15 is applied for the Group on 2009.

IFRIC 16 - "Hedges of a Net Investment in a foreign operation"

(effective for financial years beginning on or after 1 October 2008)

IFRIC 16 clarifies three main issues, namely:

- A presentation currency does not create an exposure to which an entity may apply hedge accounting. Consequently, a parent entity may designate as a hedged risk only the foreign exchange differences arising from a difference between its own functional currency and that of its foreign operation.
- Hedging instrument(s) may be held by any entity or entities within the group.
- While IAS 39, 'Financial Instruments: Recognition and Measurement', must be applied to determine the amount that needs to be reclassified to profit or loss from the foreign currency translation reserve in respect of the hedging instrument, IAS 21 'The Effects of Changes in Foreign Exchange Rates' must be applied in respect of the hedged item.

IFRIC 17 - "Distributions of Non-cash Assets to Owners" (effective for annual periods beginning on or after 1 July, 2009.)

IFRIC 17 clarifies the following issues, namely:

- a dividend payable should be recognised when the dividend is appropriately authorised and is no longer at the discretion of the entity;
- an entity should measure the dividend payable at the fair value of the net assets to be distributed;
- an entity should recognise the difference between the dividend paid and the carrying amount of the net assets distributed in profit or loss; and
- an entity to provide additional disclosures if the net assets being held for distribution to owners meet the definition of a discontinued operation.

IFRIC 17 applies to pro rata distributions of non-cash assets except for common control transactions.

IAS 24 - Related Party Disclosures (Revised)

The revision is effective for annual periods beginning on or after 1 January 2011. This revision relates to the judgment which is required so as to assess whether a government and entities known to the reporting entity to be under the control of that government are considered a single customer. In assessing this, the reporting entity shall consider the extent of economic integration between those entities. Early application is permitted and adoption shall be applied retrospectively. This interpretation has not yet been endorsed by the EU.

IFRS 1 - Additional Exemptions for First-time Adopters (Amended)

The amendment is effective for annual periods beginning on or after 1 July 2010. This interpretation has not yet been endorsed by the EU. In April 2009 the IASB issued its second omnibus of amendments to its standards, primarily with a view to removing inconsistencies and clarifying wording. The effective dates of the improvements are various and the earliest is for the financial year beginning 1 July 2009. This annual improvements project has not yet been endorsed by the EU.

IFRIC 19 – Extinguishing financial liabilities with equity instruments

(effective for financial years beginning on or after 01.07.2010)

IFRIC 19 outlines the accounting treatment in cases of renegotiation of the terms of a financial liability between an entity and its creditor, whereby the creditor agrees to accept the entity's shares or other equity instruments to settle the financial liability fully or partially. This IFRIC clarifies the fact that the entity's equity instruments issued to a creditor constitute part of the consideration according to IAS 39, paragraph 41, hence the financial liability is not recognised and the equity instruments are treated as the payment to extinguish the financial liability. The European Union has yet to adopt this amendment.

1. Segment Reporting

(a) Primary reporting format - business segments

The Group is active in 3 main business segments:

- Construction
- Concessions
- Other activities (Real estate development and other activities)

The figures per business segments for the period ended 30 June 2010 are as follows:

	Construction	Concessions	Real Estate and other activities	Total
Total gross sales per segment	382.656.630	-	14.876.397	397.533.027
Inter-segment sales	<u>(5.921.350)</u>	<u>-</u>	<u>(166.456)</u>	<u>(6.087.806)</u>
Net Sales	376.735.280	-	14.709.941	391.445.221
Operating Results	47.473.969	-	1.064.506	48.538.474
Other net operating income/(expenses)	(3.609.452)	-	531.168	(3.078.284)
Impairment of goodwill	-	(2.940.000)	-	(2.940.000)
Administrative expenses / Selling & Marketing expenses	(13.858.539)	(5.518.272)	(2.921.656)	(22.298.467)
Income/(Losses) from Investments in Associates	<u>(1.474)</u>	<u>10.173.239</u>	<u>(413.882)</u>	<u>9.757.883</u>
Profit from operations	30.004.504	1.714.967	(1.739.864)	29.979.607
Losses of financial instruments				(1.355.827)
Net financial income / (loss)				<u>(10.694.200)</u>
Profit before tax				17.929.580
Tax				<u>(7.016.316)</u>
Profit after tax				10.913.265
Depreciation	<u>11.866.203</u>	<u>192.462</u>	<u>862.051</u>	<u>12.920.716</u>

The figures per business segments for the period ended 30 June 2009 are as follows:

	Construction	Concessions	Real Estate and other activities	Total
Total gross sales per segment	450.008.448	-	12.682.032	462.690.480
Inter-segment sales	<u>(2.615.727)</u>	<u>-</u>	<u>(342.569)</u>	<u>(2.958.296)</u>
Net Sales	447.392.721	-	12.339.463	459.732.184
Operating Results	37.279.008	-	2.026.592	39.305.600

The account of «Other Debtors» includes the following other debtors of subsidiary ATHENA S.A :

a) The amount of €16,470 thousand pertains to a claim against the shareholders of TECHNIKI ENOSI SA, which was absorbed by ATHENA SA at an earlier time, and was ordered by decision #21/2005 of the Court of Arbitration on 10.06.2005. Following the issue of that decision, the shareholders of TECHNIKI ENOSI SA appealed to the Athens Court of Appeal against decision #21/2005 on grounds of non-existence, and the appeal was presented to court on 19.01.2006. The Athens Court of Appeal issued decision #2471/2006 which dismissed the appeal submitted by the shareholders of TECHNIKI ENOSI SA and ratified decision #21/2005 of the Court of Arbitration.

A new appeal was placed and presented as case #31 on 15.10.2007 to Section A1 of the Supreme Court, which dismissed the appeal with its #1334/2008 decision. A 2nd degree Court of Athens also dismissed with its decision #985/2007 a separate appeal submitted on 15.02.2006 by the shareholders of TECHNIKI ENOSI SA against decision #21/2005 of the Court of Arbitration. A third appeal was filed against the arbitration decision. To secure its claim, the Company foreclosed every asset of the shareholders who guaranteed their balance sheet of TECHNIKI ENOSI SA at the time of its absorption by ATHENA SA, up to a value of €21,900 thousand.

The Company is in the process of execution of its claim against all property items of the shareholders of TECHNIKI ENOSI SA.

On 29.09.2008, the Protopapas family filed appeal #2155 against Arbitration Decree # 21/2005, which was appealed to the Athens Court of Appeal on 07.04.2009, which was dismissed with the #6879/2009 decision of the Athens Court of Appeal.

b) The amount of €4,376 thousand pertains to a claim against the shareholders of METTEM SA, which was absorbed by ATHENA SA at an earlier time, as part of their liabilities as guarantors. To secure those claims, a first-degree Court of Athens ruled with decision #7945/10.10.2003 the foreclosure of all mobile assets and property to a maximum value of €8,000 thousand. On 27.02.2008, a suit for financial compensation was debated to a different Court of Athens with 4335/2008 against those shareholders and the decision was fully in favour of ATHENA SA. The shareholders of METTEM S.A submitted an appeal against that decision.

In the event of a positive outcome of this litigation case for the Company, management intends to proceed immediately with the impounding of all assets (valuables, property, securities, or in custody of third parties) of the shareholders, whether they have been foreclosed or not. The Company estimates the value of the approved claims may be fully recovered.

c) Provision for impairment amounting to € 7.757.748,67

8. Share Capital

	GROUP		COMPANY

	516.514.471	509.667.558	344.797.203	325.242.387

On 19/05/2010, the Company signed the contract for the issue of a syndicated bond loan amounting to €265 million with a maturity of up to 8.5 years with a group of financial institutions, with Bank of Cyprus being the Lead Arranger. Other deal participants are EFG Eurobank as Co-Arranger, and Emporiki Bank, Alpha Bank and Piraeus Bank.

The purpose of the bond loan is the financing of the Company's capital needs in coming years for investments in concession projects, while part of the loan, which amounts to €140 mil., will be used to refinance outstanding bond loans, also used mostly for financing participation in concessions.

NOTES TO THE ACCOUNTS												
<p>1. The accounting policies applied in preparing these Financial Statements are consistent with those applied for the Financial Statements at 31.12.2009.</p> <p>2. Not tax audited fiscal years for the Company and the companies of the Group are analysed in note C1 of the Annual Financial Report.</p> <p>3. There are no important provisions for litigation or under arbitration claims. The estimated amount for the fiscal years not audited as of 30.06.2010 is € 800 thousand for the Group and € 100 thousand for the Company. Other provisions that are made as of 30.06.2010 amount to € 3.550 thousand for the Group and € 1.146 thousand for the Company.</p> <p>4. The companies of the Group with their relevant addresses, the percentages that the Group participates in their share capital, as well as the consolidation method used in the financial statements of the fiscal period of 1/1-30/6/2010, are mentioned analytically in note C1 of the Interim Condensed Financial Reporting.</p> <p>5. The number of employees at Group level is 3.080 persons (instead of 3.110 on 30/6/2009) and at Company's level is 2.362 (instead of 2.234 on 30/6/2009).</p> <p>6. Joint Ventures for projects completed and in process of dissolution are not consolidated due to minor materiality effect in the Group Financial Statements. The financial results of these Joint Ventures are recorded in the Group financial statements through Equity consolidation method.</p> <p>7. Earnings per share are calculated using the weighted average number of shares for the period.</p> <p>8. The proportional consolidation of Joint Ventures by 100% is effectively the same as full consolidation.</p> <p>9. The Board of Directors approved the above financial statements on August 27, 2010.</p> <p>10. Minor differences in sums are due to rounding.</p> <p>11. Due to completion of the projects and minor materiality, the Joint Ventures referred to in note C1 of the annual financial statements of 30/06/2010 are consolidated in the Group financial statements with the Equity method, having been previously consolidated proportionately.</p> <p>12. Capital expenditure excluding acquisitions for the fiscal period of 1/1-30/6/2010 amounted to: Group € 7.0 m and Company € 1.5 m.</p> <p>13. There are no Pledges on the Company's assets.</p> <p>14. It should be noted that J&P AVAX reduced its equity participation in VOLTERA SA (formerly named ARGESTIS SA) from 100% to 50% by means of partially exercising its rights to VOLTERA SA's capital increase. VOLTERA SA was therefore consolidated in the 30.06.2010 using the equity method rather than subsidiary. Moreover, J&P-AVAX transferred its 100% equity stake in ILIOFANIA SA to VOLTERA SA, and was therefore not consolidated in the 30.06.2010 accounts as a subsidiary. In the consolidated financial statements of 30.06.2010 STARWARE ENTERPRISES LTD is included with the equity method.</p> <p>15. Some figures of the previous period have been restated (note 14) in the financial statements (reclassification of intangible assets). The reclassification has no effect on equity, profit after tax, and the other comprehensive income.</p> <p>16. On 20/5/2010 J&P AVAX has signed the issue of a common loan bond with a group of financial institutions amount € 265 m.</p> <p>17. The Group and the Company sold part of their shareholding in OLYMPIA ODDS SA and OLYMPIA ODDS OPERATION SA, reducing the stake at a Group level from 21% to 19.1% respectively. Following the sale of the participation, the Group does not have significant influence on those companies and is therefore not consolidated them using the equity method.</p> <p>18. In accordance with law No 3845/2010, a special tax is imposed on Greek companies with profits over 100 thousand for fiscal year 2009. The provision for the tax liability is € 1.27m for the Group and € 0.56 m for the Company.</p> <p>19. The after tax other comprehensive income for the Group and the Company are as follows:</p>
