G. Availability of Financial Statements	140

# A. Representation of the Members of the Board of Directors (according to article 4 par. 2 of L.3556/2007)

#### The

- a. Evangelos Mytilineos, Chairman of the Board of Directors and Chief Executive Officer
- b. Ioannis Mytilineos, Vice Chairman of the Board of Directors
- c. George Kontouzoglou, Member of the Board of Directors

#### **CERTIFY**

- **a.** the enclosed financial statements of "MYTILINEOS HOLDINGS S.A." for the period of 1.1.2010 to 31.12.2010, drawn up in accordance with the applicable accounting standards, reflect in a true manner the assets and liabilities, equity and results of "MYTILINEOS HOLDINGS S.A.", as well as of the businesses included in Group consolidation, taken as a whole and
- **b.** as far as we know, the enclosed report of the Board of Directors reflects in a true manner the development, performance and financial position of "MYTILINEOS HOLDINGS S.A.", and of the businesses included in Group consolidation, taken as a whole, including the description of the principal risks and uncertainties.

#### Maroussi, 22 March 2011

#### The designees

Evangelos Mytilineos	Ioannis Mytilineos	George Kontouzoglou
Chairman of the Board of Directors	Vice - Chairman of the	Member of the Board
and Chief Executive Officer	Board of Directors	of Directors

#### **B. Independent Auditor's Report**

To the Shareholders of MYTILINEOS HOLDINGS S.A

#### **Report on the Financial Statements**

We have audited the accompanying financial statements of MYTILINEOS HOLDINGS SA. ("the Company") as well as the consolidated Financial Statements of the Company and its subsidiaries, which comprise of the individual and consolidated Statement of Financial Position as at December 31, 2010, and the Income Statement and Statement of Comprehensive Income, changes in equity and cash flows for the year then ended and a summary of significant accounting policies and other explanatory information.

#### Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these individual and consolidated financial statements in accordance with International Financial Reporting Standards as adopted by European Union, and for such internal control as management determines is necessary to enable the preparation of individual and consolidated financial statements that are free from material misstatement, whether due to fraud or error.

#### Auditor's Responsibility

Our responsibility is to express an opinion on these individual and consolidated financial statements based on our audit. We conducted our audit in accordance with International Standards on Auditing. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance about whether the individual and consolidated financial statements are free from material misstatement. An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the individual and consolidated financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the individual and consolidated financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the individual and consolidated financial statements in order to design audit procedures that are appropriate in the circumstances but not for the purpose of expressing an opinion on the effectiveness of the company's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the individual and consolidated financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

#### **Opinion**

In our opinion, the individual and consolidated financial statements present fairly, in all material respects, the financial position of the Company and its subsidiaries as at December 31, 2010, and the financial performance and the cash flows of the Company and its subsidiaries for the year then ended in accordance with International Financial Reporting Standards that have been adopted by the European Union.

#### Report on Other Legal and Regulatory Requirements

- a) The Director's Report includes a statement of Corporate Governance, which comprises the information as defined by paragraph 3d of article 43a, of Codified Law 2190/1920.
- b) We confirm that the information given in the Director's Report is consistent with the accompanying separate and consolidated financial statements and complete in the context of the requirements of articles 43a, 108 and 37 of Codified Law 2190/1920.

#### C. Annual Board of Directors Management Report

#### **Board of Directors Annual Management Report**

This report summarizes financial information for the Group and the Company "MYTILINEOS HOLDINGS S.A." for the period ended 31 December 2010, significant events during that period and their effect on the interim financial statements. It also presents the main risks and uncertainties that the Group companies may face till the end of the year and significant related party transactions.

The report was prepared according to the provisions of L.2190/1920, L. 3556/2007 and the resolution 7/448/11.10.2007 of the Board of the Hellenic Capital Committee.

#### I. General Review 2010

The year 2010 saw the continuation of the recovery of the global economy, marked by the strong economic growth rates posted by the emerging economies and by the correction in the stronger western economies.

Despite the success of state interventions, which managed to bring the global economy back on a positive course, the consequences of the financial crisis which broke out in 2008 persisted, manifesting themselves during 2010 in the form of concerns as to the capability of the weaker South European economies to service the huge debts accumulated in their State balance sheets. Interest rates for Greek government borrowing continued to rise and very soon made the country's access to the capital markets practically impossible. Greece and –in late 2010– Ireland were forced to apply for the financial assistance provided by the EU, in collaboration with the International Monetary Fund and the European Central Bank. The Greek economy embarked on a strenuous effort to restore its fiscal balance, while at the same time entering in deep recession which for 2010 stands at nearly 4.5%.

The conditions of economic asphyxiation brought about by the weakening domestic demand presented a major challenge for all companies operating in Greece. Relying on its strong export orientation, the Group managed to remain on a growth course while also posting increased profits.

The developments in each one of the Group's business activity sectors are discussed in detail below.

#### **Metallurgy and Mining Sector**

During 2010, the sector of metals remained firmly on the rising course it had entered in March 2009.

More in particular, after a relatively weak first semester, which was primarily due to the strengthening of the US Dollar against the Euro, the prices for aluminium rose steadily, with the average price posting an annual growth of 30% compared to 2009.

The improvement in the mortgage and vehicle markets in the developed economies and the sustained high growth rates in China, drove total consumption up by 19.8% on an annual basis. At the same time, the attractive base lending rates, which were kept low in the USA and in Europe, continued to make long-term financial contracts for reserves attractive, a situation that resulted in a lack of adequate supply in the spot market and in premiums being kept at particularly high levels.

Total supply rose by 11.5%, driven by the increase in production capacity in the Middle East. In the last quarter of 2010 China posted a significant reduction in production, as a result of the restrictions imposed on electrical power consumption and of the ambitious targets for the reduction of CO2 emissions.

These trends are expected to continue into 2011, as the sector's fundamentals remain strong and consumption –especially in the emerging markets– is forecasted to grow at two-digit rates. Finally, the developments in terms of the production on offer, together with parameters such as interest rate and inflation levels, the evolution of the US Dollar against other currencies and the cost of energy, will continue to play a crucial part in shaping prices globally.

#### **EPC Sector (Construction)**

Despite the adverse conditions throughout last year, 2009 has been a year of success and challenges for the Company and the Group. The Group through its subsidiary METKA is the leading and most specialized EPC Constructor in Greece. The Management's strategic choices bear already fruits, securing the strong presence of METKA at the local market and at the same time developing its international operations, aiming at a balanced model of activity and development.

In 2009 METKA GROUP under the negative economic environment had to deal extensions in the procedure of agreements and to sign new contracts and also delays on completion for others which was not under its control. Despite the above mentioned, and expanded in competitive markets abroad with a historic record value of pending construction contracts amounting to 2bil. €. the Company manage to proceed on the construction and to bring positive results.

#### **Energy Sector**

During the financial year 2010, MYTILINEOS HOLDINGS S.A., in the framework of its broader investment planning in the energy sector, made a series of business moves aimed at further strengthening its position. More specifically:

On 17.03.2010, after relevant negotiations, MYTILINEOS HOLDINGS S.A. and ENDESA S.A. reached an agreement for the acquisition of 50.01% of the share capital held by ENDESA S.A. in the joint company ENDESA HELLAS PRODUCTION AND TRADE OF ELECTRICAL POWER S.A.

The total price for the acquisition of 50.01% of ENDESA HELLAS amounts to €140 million and is being settled in instalments scheduled until 1 July 2012. At the same time, ENEL GREEN POWER acquired one wind farm and three hydropower plants with a total installed capacity of around 14 MW, which belonged to the ENDESA HELLAS portfolio, for a price of €20 million. Upon completion of the above procedure, MYTILINEOS HOLDINGS S.A. has become the sole shareholder of ENDESA HELLAS, with 100% of the company's share capital in its possession.

The above development, which was later followed by the establishment of PROTERGIA S.A., confirms the commitment of MYTILINEOS HOLDINGS S.A. to its overall business planning in the energy sector, and is one more step towards the creation of the largest private energy producer in Greece, with a portfolio comprising 1.2 GW from thermal stations in trial operation and/or under construction, coupled with RES projects representing a total installed capacity of 42 MW in operation and 1.4 GW in various stages of development.

Finally, in March 2010 the Ministry for the Environment, Energy & Climate Change approved the Code of the National Natural Gas System (NNGS), which lays down the rules that govern access to the national pipeline system of all suppliers and/or consumers of natural gas wishing to cover their needs by selecting a third-party domestic or foreign supplier. This development allowed MYTILINEOS HOLDINGS S.A. to proceed, jointly with MOTOR OIL CORINTH REFINERIES S.A., to the establishment of the company "M and M Natural Gas S.A.", which will be active in the supply and trading of natural gas (liquefied or non-liquefied). The operation of M & M S.A. provides MYTILINEOS HOLDINGS S.A. with flexibility in choosing its natural gas supplier to meet the supply needs of its gas fired thermal power stations, thus allowing further improvements to be made in terms of operating costs.

The effect on the Group's Sales, EBITDA and net profitability for 2010, comparing to last year is presented bellow:

#### A. SALES

Amounts in mil. €	Variance Analysis
Turnover 2009	661,8
Effect from:	
Organic \$/€ eff.	8,4
Volumes	-5,1
Premia & Prices	11,9
LME	-18,6
Other	-0,8
Energy	5,2
Zn-Pb discontinued operation	0,0
Zn-Pb commercial activity	-9,9
EPC	295,4
LNG Trading	53,1
Turnover 2010	1.001,4

#### **B. EBITDA**

Amounts in mil. €	Variance Analysis
EBITDA 2009	118,9
Effect from:	
Organic \$/€ eff.	8,1
For.Curr.Transl.	0,6
Fuel Oil	-6,9
Volumes	17,5
Freight & Logistics	-1,7
Premia & Prices	11,9
Opex & R/M	-9,0
LME	-18,6
EPC	47,2
EPC one off	32,4
Electricity	-4,1
CC	-1,0
Steel	-0,5
Energy Sector	-0,7
Zn-Pb discontinued operation	0,0
Zn-Pb commercial activity	-1,3
EBITDA 2010	192,7

#### **C. Net Profit after minorities**

Amounts in mil. €	Variance Analysis
Net Profit after Minorities 2009	13,73
Effect from:	
Operating Results (EBIT)	81,0
One - off Financial results	0,0
Net Financials	3,0
Share in Associates Results	10,4
Minorities	-23,3
Discontinued Operations	-7,6
Taxes	-16,5
Net Profit after Minorities 2010	60,8

The Group's policy is to monitor its performance on a month to month basis thus tracking on time and effectively the deviations from its goals and undertaking necessary actions. The group evaluates its financial performance using the following generally accepted Key Performance Indicators (KPI's).

- **-EBITDA (Earnings Before Interest, Taxes, Depreciation & Amortization):** The Group defines "EBITDA" as Operating results before depreciation, amortization, financial and investment results and before the effects of any special factors such as:
- a) the share in the EBITDA of associates when these are active in one of the Group's reported Business Sector and
- b) the effects of eliminations of any profit or loss from transactions of the Group with subsidiaries and associates when these are active in one of the Group's reported Business Segments.
- -ROCE (Return On Capital Employed): this ratio divides EBIT with the total Capital Employed if the Group which is the sum of Equity, Total of Bank Loans and Long Term Provisions.
- ROE (Return On Equity): this ratio divides Earning After Tax(EAT) with the Group's Shareholders' Equity.
- **EVA (Economic Value Added):** this figure is calculated by multiplying the difference of ROCE and Cost of Capital with the Capital Employed as defined above and reflects the amount added to the economic value of the firm. In order to calculate the Cost of Capital the group uses the WACC formula.

The above indicators for 2010 as compare with 2009 are as follows:

	2010	2009
EBITDA	192,8	118,9
ROIC	14,5%	8%
ROE	7,2%	2%
EVA	34,93	7
	0 1,00	

#### II. Significant information

During the reporting period, the Group proceed to the following:

On 8 January 2010 the Management of METKA S.A. announced the sale to TERNA S.A. of 100% of the shares of ETADE S.A., a wholly-owned subsidiary of METKA S.A., for a price of € 42.515.000. The suspension for more than two years of the activities for the Aliveri V CCGT and the consequences from postponement of its implementation for a time coinciding with the implementation of the Megalopolis V CCGT project, led to the sale of ETADE being considered as the most appropriate course of action in order to protect the interests of METKA and establish the conditions for further expansion of its activities abroad. The sale effected the Group's turnover, EBITDA and Profit after tax and minorities as illustrated in the table below:

(in mil. €)	1/1 - 31/12/2010				
	TOTAL FINANCIALS	EFFECT OF ETADE SALE	NET FINANCIALS		
SALES	1.001,4	32,4	969,0		
		3%			
EBITDA	192,7	32,4	160,3		
		17%			
EARNINGS AFTER TAX & AFTER MINORITIES	60,9	14,6	46,3		
		24%			

In addition, the above sale resulted to a decrease of Group goodwill by € 6 mil.

The METKA Group undertook the following actions in the recognition of the result of the sale of the subsidiary company in the Financial Statements of the presented period:

- -on the one hand, valuation of the traditional activity of the subsidiary company, as it pre-existed at its original acquisition (Amfikleia plant);
- -on the other hand, discounting of future cash flows from its participation in integrated energy projects concerning combined cycle Natural Gas power plants, which pertains to an activity that the subsidiary company was engaged with after its acquisition by METKA.

The difference between the valuation of the traditional activity of the subsidiary company and its original acquisition cost was recognized as a financial result (€2.27m income before taxes – 1.73m after taxes) in the consolidated profit and loss account of the period. Correspondingly, the

difference between the acquisition value of the company ( $\in 8m$ ) and the sale price (42.5m) discounted for the period until the collection of the price, which will be realized in three installments in July, August and September 2011 (discounting cost recognized as a future interest of  $\in 2m$ ) was recognized as sale

of construction contracts for integrated energy projects incrementing respectively the Turnover and the profit before taxes of the company and of the Group by  $\in 32.4$ m.

On 4 February 2010, Following extensive negotiations in Istanbul, Turkey, the companies "BORASCO", "METKA S.A." and "POWER PROJECTS" reached an agreement for construction works as well as supply of most of the equipment for a thermal power plant in Samsun, Turkey. The contract comprises of the supply of the majority of equipment and construction works for a 870 MW natural gas fired power plant, consisting of two (2) single shaft units provided by GENERAL ELECTRIC. The share of METKA S.A. in the contract value of the project is €199.9 million plus US\$172.3 million.

Since the  $2^{nd}$  of June, MYTILINEOS HOLDINGS S.A. has become the sole shareholder of ENDESA HELLAS PRODUCTION AND TRADE OF ELECTRICAL POWER S.A., which is now renamed into PROTERGIA PRODUCTION AND TRADE OF ELECTRICAL POWER S.A. The acquisition of the full control of ENDESA HELLAS marks MYTILINEOS HOLDINGS S.A. establishment as the country's largest independent energy producer with a portfolio of 1.2 GW of installed capacity from thermal plants in operation by 2011 and over 1,000 MW RES in different stages of development. The total price of the acquisition, as it has been determined, amounts to €140 million and is being paid in instalments as follows: € 60 mil on 1.7.2010 and € 40 mil for each 2011 and 2012. On a Group level, a negative goodwill of € 51,5mil. was recognized.

In addition, the above acquisition resulted to an increase of Group goodwill by  $\leqslant$  62 mil. and Intangible assets for  $\leqslant$  150 mil.

At the same time, ENEL GREEN POWER, subsidiary of ENDESA S.A. acquired by ENDESA HELLAS RES with a total installed power generation capacity of 15 MW for a price of €20 million. The companies sold were "POUGAKIA S.A.", "KASTANIOTIKO S.A.", "AIOLIKI MARTINOU S.A." and "ARGYRI S.A.". From the sale of the aforementioned companies no gain was recognized.

On 28.09.2009, the B.o.D of the 100% subsidiary "MOVAL S.A." resolved to the merger with its 100% subsidiaries "ENERGI E2 AIOLIKI S.A." and "ENERGI E2 KARYSTIA S.A.". The merger was approved by the Prefecture on 26 February 2010. On 26.03.2010, the B.o.D of the company approved the de-merger of the electricity trade and production division and its contribution to the company "Renewable Energy Sources Karystia S.A.".

In May, MYTILINEOS HOLDINS S.A. and MOTOR OIL announced arrival of the first private LNG cargo for the two companies, scheduled for unloading at the Revithousa LNG Terminal. of LNG From this shipment of 140,000m3 of LNG, 20,000m3 will be collected by MOTOR OIL, 70,000m3 by the MYTILINEOS Group subsidiary Aluminium of Greece, and 50,000m3 will be made available to the Public Gas Corporation (DEPA) on the same privileged terms as those applicable for the initial buyers, after a decision of the two Groups following a proposal by the DEPA.

In August. MYTILINEOS S.A. – GROUP OF COMPANIES jointly with the MOTOR OIL (HELLAS) CORINTH REFINERIES S.A. established a company under the legal name "M and M NATURAL GAS S.A.", trade name "M & M GAS Co S.A." and the commencement of its operations. The two partners will participate with a 50% stake each in the initial share capital of two million (2,000,000) Euros of the newly established company which will engage in the supply and trading of natural gas (in liquefied or other form).

As at 25/6/2010, the Company announced, its decision on withdrawal from ELVO's management, which was completed on September 2010. Since then the Board of Directors of ELVO is comprised exclusively of representatives of the Hellenic State. In addition, to facilitate Mytilineos S.A. efforts to assist the State in consolidation and / or privatization of ELVO, it was disclosed that Mytilineos S.A., following its letter to the responsible Ministers of the State in September 2010 as well as in early February 2011, expressed its intention to place its shares under the negotiating control of the Hellenic State, promising to transfer it to the buyer that will be selected under the same terms as those applied for the shares of the Hellenic State, while empowering those responsible representatives of the State to make its blank representation in the negotiations in question. Alternatively, and to facilitate the Hellenic State to complete these procedures, it has indicated its intention to transfer all the shares it holds in ELVO against a token consideration, displaying its sincere disposition and confidence in the State efforts to provide the final solution that will ensure the best possible future for ELVO. It is to be noted that Mytilineos Group acquired its 43% stake in ELVO on August 2000 for €12,2m. Subsequently and through ELVO's capital increases on 2001 and 2003, the Group has invested €7m more, making a total amount of the investment of €19,2m, of which €15,9m have been invested from the Parent company and the rest €3,3m from

a related company. From its initial investment in ELVO up to date, the Group has recognized based on its share in ELVO's results, a total loss of €6,3m, deducting this amount from the carrying amount of the investment, which as of 31/12/2010 had a carrying amount of €13m. The Group, after its withdrawal from the management of ELVO and since from 1/20/2010 has no significant influence on ELVO, it has reclassified this investment from "investments in associates" to "financial assets available for sale". According to the accounting principles, applied by the Group, when a company has no longer significant influence on an investment, it shall be measured at its fair value and shall be reclassified at this value. Upon reclassification, Mytilineos S.A. regarded as the company's fair value, its carrying amount on the time of reclassification, since it is a company whose operations depend heavily on the projects it undertakes from the Hellenic State and up to that date there was no specific plan, positive or negative, in respect of undertaking projects.

However, after the announcement of 25/2/2011 and bearing in mind that Mytilineos SA has declared its intention, if needed, to transfer its share in ELVO "for a token price", the carrying amount of the investment was fully impaired. The impairment was recognized in other comprehensive income. In case new developments occur regarding the finding of a buyer from the Hellenic State or the final transfer of the shares in ELVO to the Hellenic State, Mytilineos Group will recognize the respective difference between the consideration of the transfer and the cost of the investment, in profit and loss of the period in which it will occur.

Finally, the Group at 31/12/2010 executed an impairment test on the fair value of its "Non-current assets held for sale" and "Liabilities related to non-current assets held for sale" which refer to the discontinued activity of its subsidiary Sometra. This test indicated an overall impairment of  $\leqslant$  45,7mil that affected accordingly the results of the reported period. The Group continuous to advantage from the process of disposal of the remaining materials which, up to 31/12/2010, has positively affected its cash flows by  $\leqslant$  31,6mil, while at the same time assesses alternative scenarios for the future utilization of its subsidiary assets.

#### III Prospects for the forthcoming year (2011)

Although the global economy is showing signs of recovery, the situation for Greece will remain critical in 2011. The significant globalisation of its activities helps MYTILINEOS Group offset to a large extent the risks associated with the current conditions in the Greek economy and market.

The Group is in a very good position in terms of financial robustness, liquidity and prospects, and is fully capable of realising its investment plans, whose primary focus is the Energy Sector.

#### Metallurgy and Mining Sector

The favourable impact on the commodities market, which results from the inflationary environment fuelled by the recovery of the economies and from the policy of sustained low interest rates, particularly so by the US Federal Bank, is expected to continue into 2011.

As regards Aluminium, the sector's analysts forecast that consumption will continue to rise at twodigit rates. The sustained high growth rates in China and the continuation of the recovery in the US mortgage market favour this prospect.

On the other hand, the level of total supply is also expected to play a significant part together with the evolution of production costs, which are adversely impacted by the rise in oil prices.

The trend of blocking reserves under long-term financial agreements, thus creating shortages in the spot market, is expected to continue into 2011 and to support the prices of the metal.

#### **Energy Sector**

The reforms in the Greek electricity market are picking up speed in 2011, as implementation of the EU's 3rd Energy Package, aimed at ensuring the gradual transition to a fully competitive market with an important role in SE Europe, is already under way.

The full liberalisation of the market for electrical power creates a favourable environment for MYTILINEOS Group, as the entry into operation of its three thermal stations, with a total capacity of 1.2 GW, is expected soon. The Energy Sector is expected to make a significant contribution to the turnover and results for 2011.

#### **EPC Sector**

#### The Strategy for the Group

Relying on its highly-trained human resources, on its financial robustness and on its strong export orientation, the Group aims to remain firmly on a course of growth. At the same time, the Group is focusing on revealing the significant synergies between its key activity sectors and on seeking to develop them in a balanced way – an approach also served by the recent relocation of all Group subsidiaries in new premises in Maroussi.

The continuation of the investments in the energy sector and the consolidation of the Group's position as the largest independent producer of electrical power in Greece are the two core choices for business growth.

#### **IV Business Risk Management**

The Group's activities expose it to a variety of financial risks: market risk (including foreign exchange risk and price risk), credit risk, liquidity risk, cash flow risk and fair value interest-rate risk. The Group's overall risk management programme focuses on the unpredictability of commodity and financial markets and seeks to minimise potential adverse effects on the Group's financial performance. The Group uses derivative financial instruments to hedge the exposure to certain financial risks.

Risk management is carried out by a central treasury department (Group Treasury) under policies approved by the Board of Directors. Group Treasury operates as a cost and service centre and provides services to all business units within the Group, co-ordinates access to both domestic and international financial markets and manages the financial risks relating to the Group's operations.

#### **Credit Risk**

The Group has no significant concentrations of credit risk with any single counter party. Credit risk arises from cash and cash equivalents, derivative financial instruments and deposits with banks and financial institutions, as well as credit exposures to wholesale customers, including outstanding receivables and committed transactions.

The tables below summarize the maturity profile of the Group's financial assets as at 31.12.2010 and 31.12.2009 respectively:

	MYTILINEOS GROUP

2010	4,272	-	-	-	2	4,
2009		3.43	-	-	12,999	12,

#### **Liquidity Risk**

Liquidity risk is related with the Group's need for the sufficient financing of its operations and development. The policy of the Group is to minimise interest rate cash flow risk exposures on long-term financing. Liquidity risk is managed by retaining sufficient cash and immediately liquidated financial assets as well as sufficient credit lines with Banks and Suppliers in relation to the required financing of operations and investments.

The tables below summarize the maturity profile of the Group's liabilities as at 31.12.2010 and 31.12.2009 respectively:

#### **Market Risk**

#### **Price Risk**

The Group's earnings are exposed to movements in the prices of the commodities it produces, which are determined by the international markets and the global demand and supply.

The Group is price risk from fluctuations in the prices of variables that determine either the sales and/or the cost of sales of the group entities (i.e. products' prices (LME), raw materials, other cost elements etc.). The Group's activities expose it to the fluctuations of the prices of Aluminium (AL), Zinc (Zn), Lead (Pb) as well as to Fuel Oil as a production cost.

#### Foreign Exchange Risk

The Group is activated in a global level and consequently is exposed to foreign exchange risk emanating mainly from the US dollar. This kind of risk mainly results from commercial transactions in foreign currency as well as net investments in foreign entities. For managing this type of risk, the Group Treasury Department enters into derivative or non derivative financial instruments with financial institutions on behalf and in the name of group companies.

#### **Interest rate risk**

Group's interest bearing assets comprises only of cash and cash equivalents. Additionally, the Group maintains its total bank debt in products of floating interest rate. In respect of its exposure to floating interest payments, the Group evaluates the respective risks and where deemed necessary considers the use of appropriate interest rate derivatives. The policy of the Group is to minimise interest rate cash flow risk exposures on long-term financing.

#### Effect from risk factors and sensitivities analysis

The effect from the above mentioned factors to Group's operating results, equity and net results presented in the following table:

			2010			2009		
		Sensitivity	Effect on EBITDA	Effect on Profit after Tax	Effect on Equity	Effect on EBITDA	Effect on Profit after Tax	Effect on Equity
LME AL (Aluminium)	\$/tn	+ - 50\$/tn	+ - 4,44mio €	+ - 4,44mio €	+ - 2,44mio €	+ - 2mio €	+ - 2mio €	+ - 0mio €
LME Zn (Zinc)	\$/tn	+ - 50\$/tn						
LME Pb (Lead)	\$/tn	+ - 50\$/tn						
Oil	\$/tn	+ - 50\$/tn	- + 3,4mio €	- + 3,4mio €	- + 3,4mio €	- + 6.6mio €	- + 6.6mio €	- + 6.6mio €
Parity €/\$		+ - 0.05	- + 9,23mio €	- + 10,17mio €	- + 10,85mio €	- + 6,54mio €	- + 6,46mio €	- + 6,46mio €

It is noted that an increase of five (5) basis points presume a decrease of 45,8 mil. € on net results and Equity.

The Group's exposure in price risk and therefore sensitivity may vary according to the transaction volume and the price level. However the above sensitivity analysis is representative for the Group exposure in 2009.

# V Other Information for the Group and the Company Group Structure

Companies included in the consolidated financial statements and the method of consolidation are presented in the following table:

#### ividend Policy

Regarding the distribution of dividends, the Board of Directors proposes that no dividend is to be distributed due to the losses recorded in 2010. This proposal is subject to the approval of the General Assembly.

#### **Post Balance Sheet events**

There are no other significant subsequent events, apart from the abovementioned, which should be announced for the purposes of I.F.R.S.

**Evangelos Mytilineos Chairman & Chief Executive Officer** 

**MYTILINEOS S.A. - HOLDING** 

# Information regarding the issues of article 4 paragraph 7-8 of L.3356/2007 of MYTILINEOS Holdings S.A.

This explanatory report of the Board of Directors is submitted to the Ordinary General Shareholders' Meeting and contains detailed information regarding the issues of paragraph 7 and 8 of article 4 L.3356/2007.

#### I. Company's Share Capital Structure

The share capital of Mytilineos Holding S.A amounts to 125.173.241,66 euro, divided into 116.984.338 common registered shares with voting right and a par value of 1,07 euro each. Each share provides one voting right. The share capital of the company did not alter within 2010.

The shares of Mytilineos Holding S.A are listed on the Securities Market of the Athens Exchange. The rights of the Company's shareholders with respect to their shares are proportional to the share capital stake to which the paid-in share value corresponds. Each share incorporates all the rights and obligations that are stipulated by the Law and Company's Articles of Association, and more specifically:

• The right to dividends from the annual profits or liquidation profits of the Company. A percentage of 35% of the net profits following deduction only of the statutory reserves or 6% of the paid in capital (and in particular the larger of the two amounts) is distributed from the profits of each year to the shareholders as an initial dividend while the distribution of an additional dividend is resolved upon by the General Meeting. The General Meeting determines the added dividend. Dividends are entitled to each shareholder who is registered in the Shareholders' Register held by the Company on the date of approval of the financial statements by the Ordinary General Shareholders' Meeting. The payment date and the payment method of the dividend are available through the media appointed by L. 3556/07. The right to receive payment of the dividend is subject to a time limitation and the respective unclaimed amount goes to the State upon the lapse of five years from the end of the year during which the General Meeting approved the distribution of the said dividend.

- The right to reclaim the amount of one's contribution during the liquidation or, similarly, the writing off of the capital representing the share, provided that this is resolved upon by the General Meeting,
- The right of pre-emption at every share capital increase of the Company via cash payment or the issuance of new shares.
- Each shareholder is entitled to request the annual financial statements along with the relevant reports of the Board of Directors and the Auditors of the Company.
- Shareholders participate in the Company's General Meeting which constitute the following rights: legitimacy, presence, participation in discussions, submission of proposals on the items of the agenda, entry of one's opinion on the minutes of the Meeting and finally the right to vote.
- The General Meeting of Company's Shareholders retain all its rights and obligations during the winding up (according to paragraph 4 of article 33 of the Articles of Association).

  The shareholders' responsibility is limited to the nominal value of the shares held.

#### II. Restrictions for transferring Company shares

The transfer of Company shares takes place based on procedures stipulated by the law while there are no restrictions set by the Articles of Association for transfer of shares.

#### III. Important Indirect/Direct participations according to articles 9-10 of L.3556/07

The Shareholders (natural or legal entity) that hold direct or indirect a more than 5% of Company's Shares and their respective voting rights are presented in the following table.

	Number of		% of Voting
Shareholders	Shares	% of Shares	Rights
Evangelos Mytilineos	17.036.837	14,56%	15,98%
Ioannis Mytilineos	18.286.876	15,63%	17,15%
MYTILINEOS Holding S.A (own shares)	10.371.501	8,87%	0,00%
Total	45.695.214	39,06%	33,13%

#### IV. Shares with special control rights

There are no Company shares that provide special control rights to their holders.

#### V. Restrictions on voting rights

No restrictions on voting rights emanate from the Company shares according to the Articles of Association.

#### VI. Agreements between Company shareholders

The Company is not aware of any agreements among its shareholders, which would result in restrictions on the assignment of its shares or exercise of the voting rights stemming from such shares.

# VII. Regulations regarding the assignment and replacement of BoD members and amendments of the Articles of Association

For the assignment and replacement of BoD members as well as for amendments of its Articles of Association, the Company follows the provisions of C.L. 2190/1920

# VIII. Responsibility of the BoD for the issuance of new shares or acquisition of own shares according to C.L. 2190/1920

A) According to the provisions of article 13 par. 1 item b) of C.L. 2190/1920 and the article 5 of the Articles of Association, the Company's Board of Directors has the right, following a relevant decision by the General Shareholder's Meeting to increase the Company's share capital with the issuance of new shares, through a decision by the Board of Directors that is made with a majority of at lease two thirds (2/3) of its total members.

In this case, Company's share capital may be increased by no more than the share capital amount paid up on the date when the Board of Directors was granted such power by the General Meeting, This power of the Board of Directors may be renewed by the General Meeting for a period that may not exceed five year per instance of renewal.

B) In accordance with the decisions of the General Meeting of shareholders of the Company on 14.6.2006 and 3.9.2007 the Board of Directors of the Company: (a) On 5.12.2007 resolved on the specification of the terms and table of allocation of the stock option plan of the Company pursuant to the provisions of article 13 para. 13 of codified law 2190/1920 as in force, in favour of members of the Board and executive members of the Company and its affiliates. According to the

above decision, there are 28 beneficiaries with up to 171.715 corresponding call options for the current year. It is noted that the beneficiaries of the program did not exercise their rights in 2008.

- C) According to the provisions of the paragraphs 5-13 of article 16 par. 9 item b) of C.L. 2190/1920, the listed companies may acquire own shares through the Athens Stock Exchange, according to decision of the General Meeting until the 10% of total shares, in order to support the stock exchange price. In the Meeting held on 14.6.2006 the General Meeting of Shareholders, making use of the above possibility provided by the Law, decide that the Company should acquire, during the period 14.6.2006 - 13.6.2007 no more than 4.054.034 shares, equivalent to 10% of total existing shares, in order to support the stock exchange price of its share, in a price range between € 5 (minimum) and € 35 (maximum). In the Meeting held on 16.2.2006 the General Meeting of Shareholders amended the initial decision in a price range between € 5 (minimum) and € 50 (maximum). In the context of implementing the aforementioned General Meeting decision, the Company's BoD defines by resolution, prior to the start of the individual trading period, the principal trading terms, in particular the maximum number of own shares to be acquired, maximum and minimum price and time period that shares shall be acquired. The company on 6.6.007 completed the 3rd phase of its Share Buyback Program through the acquisition of 1.096.293 treasury shares at an average price of 35,27 euro on the context of the 16.2.2007 decision of the Board of Directors. During that period the company had acquired a total of 5.695.898 (adjusted after split) treasury shares which represented 4,82% of share capital
- D) On 7.12.2007, the Board of Directors of the Company resolved on the commencement of the plan regarding the acquisition of owned shares, on the purpose of realizing strategic goals and business targets, pursuant to article 16 para. 1 of codified law 2190/1920, in implementation of the decision of the Extraordinary General Meeting of the Company's shareholders of 7.12.2007, and all acquisitions will be made pursuant to the provisions of Regulation 2273/2003 of the EU Committee. In the period from 13.12.2007 until 6.12.2009, the Company will acquire up to six million fifty three thousand nine hundred and seven (6.053.907) owned shares, at a minimum acquisition price of  $\bigcirc$  2,08 euros per share and a maximum acquisition price of  $\bigcirc$  25 euros per share. Since initiation of the plan up to 31.12.2009 the company has acquired a total of 4.735.603 treasury shares. Up to 31.12.2010 the Company has totally acquired 10.371.501 treasury shares which represents 8,87% of its share capital.

# IX. Important agreement which is amended / terminated in case a change arises in the company's control following a public offer

There are no agreements which enter into force, are amended or terminated in the event of change in the control of the Company following a public offer.

# X. Agreement between the Company and BoD members or employees regarding the termination of their terms / employment

There is no agreement between the Company and the BoD members or staff providing for the payment of any compensation specifically in the event of resignation or dismissal without cause, or termination of their mandate or employment as a result of a Public Acquisition Offer

Evangelos Mytilineos

Chairman & Managing Director

MYTILINEOS Holdings S.A.

#### **D. Statement of Corporate Governance**

This Statement of Corporate Governance (the "Statement") is made in the context of the conformation of Mytilineos S.A. (the "company") to the provisions of article 2 of Law 3873/2010, and regards:

#### 1. a) Conformation of the company with the code for Corporate Governance

The company conforms to the policies and practices adopted by the "Code for Corporate Governance" of Hellenic Federation of Enterprises (SEV) for listed companies ("the Code"). The full document of the Code can be found in SEV's web address <a href="https://www.sev.org.gr">www.sev.org.gr</a>.

#### 1. b) Gaps from the Code's special practices

The company's practices, as applied according to its Article of Association, Rules of Operation and Code of Ethics, have specific gaps from the Code's special practices in each of the following points:

- i. According to the company's Article of Association the BOD consists of three to nine members instead of seven to ten suggested by the Code (article 2.1.). The company, reassessing its BOD operation, expresses its intention to adopt the special practice of the Code, after applying all necessary changes in its Article of Association.
- ii. According to the company's Article of Association and Rule of Operation (a) No independent member of the BOD can become its Vice-President (article 3.3.), (b) The Vice-President cannot add a subject in the BOD agenda, when and if this BOD has been called by the President (article 3.4.), (c) There is no process according to which the Vice-President facilitates the communication between the non executive and the executive members of the BOD (article 3.4.), (d) there are no provisions for separate sessions of the Non Executive members of the BOD after the Vice -President, in which the latter performs also an evaluation of the President of the BOD (article 3.4.). The company reassessing its BOD operation expresses its intention to adopt the special practice of the Code, after applying all necessary changes in its Article of Association and Rule of Operation.
- iii. The company has not disclosed to its BOD members any of their professional commitments (including important non executive commitments even deriving from their involvement in

non-profit organizations). Furthermore, the company's Article of Association and Rule of Operation does not provide inhibits regarding the participation of its BOD members in the BOD of more than five other listed companies (article 4.2.). The company reassessing its BOD operation expresses its intention to adopt the special practice of the Code, after applying all necessary changes in its Article of Association and Rule of Operation.

- iv. The appointment of an executive member of the BOD as non executive in a company that is not either a Subsidiary or an Associate of the parent company is not approved by the BOD (article 4.3.). The company reassessing its BOD operation expresses its intention to adopt the special practice of the Code, after applying all necessary changes in its Article of Association and Rule of Operation.
- v. According to the company's Article of Association the members of the BOD are elected by the General Assembly of the Shareholders with a maximum service of five years instead of four that is suggested by the Code (article 5.1.). The company expresses its intention to adopt the special practice of the Code, after applying all necessary changes in its Article of Association.
- vi. The company has no nomination committee for the appointment of BOD members (article 5.5.). However the company, considering the lack of legal obligation for the formation of such committee and the very demanding criteria that has already set for the nomination of future BOD members, reserves its intentions on this issue, while at the same time reviews and assess all possible available practices.
- vii. There is no evaluation process for the BOD members and its committees (article 7.1.) The company expresses its intention to adopt the special practice of the Code, after applying a relevant procedure.
- viii. The company's Article of Association has no provision for the electronic voting or mail voting of its Shareholders in the General Assembly (Part II. Article 1.2.). The company awaits the relevant presidential decrees in order to incorporate the procedure.

#### 2. BOD and Committees

**A.** (i) The BOD does not hold the management of the company. The BOD is empowered with the responsibility of representing the company, aiming in the increase of its economic value, the improvement of its performance and the general protection of its interests.

The BOD convenes on a regular basis at least once every month. There may be more sessions in one month according to the existence of important issues pending for immediate

decisions. In all regular sessions, usually all BOD members are present. Until this Statement, there was no BOD failed to decide because of a member's absence. More specifically, during 2010 there were (50) sessions of the BOD. The presence of each BOD member during the aforementioned year has as follows:

BOD Member	Number of sessions during the member's service	Number of sessions that participated in person	Number of sessions that participated through a representative
Evangelos Mytilineos, President of the Board & CEO	51	51	0
Ioannis Mytilineos, Vice-President of the Board	51	49	0
Georgios Kontouzoglou, Executive Director	51	51	0
Nikolaos Moussas, Member of the Board	51	51	0
Christos Diamantopoulos, Member of the Board	51	51	0
Apostolos Georgiades, Member of the Board	51	49	0
Dimitrios Daskalopoulos, Member of the Board	51	44	0
Christos Zerefos, Member of the Board	51	51	0
Michail Chandris, Member of the Board	51	44	0

(ii) The **Audit Committee** convenes on a regular basis at least once every trimester. There may be more sessions according to the existence of important issues pending the decision of the members. The presence of each member of the Audit Committee during 2010 has as follows:

Member	Number of sessions during the member's service	Number of sessions that participated in person	Number of sessions that participated through a representative
Christos	4	4	-
Diamantopoulos			
President			
Ioannis Mytilineos	4	4	-
Member			
Nikolaos Moussas,	4	4	-
Member			

- (iii) The Remuneration Committee consists of the following members:
- 1. Evangelos Mytilineos,
- 2. Dimitrios Daskalopoulos snd
- 3. Christos Diamantopoulos.

Until this Statement, said committee has not convened,

- (iv) The **Communication and Social Responsibility Committee** (CSR) consists of the following members:
- 1. Christos Zerefos
- 2. Christos Diamantopoulos
- 3. Sofi Daskalaki
- 4. Spyros Kasdas
- 5. Vivian Bouzali

Until this Statement, said committee has not convened,

# (v) The basic responsibilities of the BOD according to the company's Article of Association and Rule of Operation are the following:

- Setting of the strategic guidance, including the sale or other form of disposing of the company's shares and the involvement of the company in mergers and acquisitions pending the final approval of the General Assembly,
- adoption and application of the company's general policies based on the proposals of the company's General Managers and Managers,
- management and disposal of the company's Net Assets and representation of the company either in court or to its Stakeholders and authorities,
- preparation of the annual budget and business plan of the company, setting and achieving the company's goals, monitoring the company's general performance and approve - control the company's capital expenditure,
- the effectiveness and integrity of an internal audit system in all the activities of the company,
- monitoring the effectiveness of the corporate governance principles, based on which the company operates and applying of all necessary changes,
- defining the enterprise risk management (ERM) strategy,
- recruiting, and development of the company's General Managers and defining their remuneration policies,
- appointment of the internal auditor and setting of its remuneration,
- defining the accounting principles followed and estimates made by the company,
- presentation of business reviews to the General Assembly,
- preparation of the annual reports where the company presents its transactions with all related parties as per the provisions of the article 42e paragraph 5 of the Codified Law 2190/1920.

The rules regarding the company's representation and commitments are set by the BOD with specific decisions.

The remuneration committee, although already established, has not yet commenced its operation. It consists of three BOD members, one of which should always be an executive

member. It convenes on a regular basis, or ad hoc especially when it should decide in the context of a hire or dismissal of managers with direct report line to the CEO or to a General Manager or Manager or in any other case that this is deemed to be necessary. It submits, as the case may be, relevant recommendations to the BOD for any subject lying in its area of responsibility.

The Audit Committee is assigned to monitor the process of the financial reporting, the effective operation of the internal audit and risk management systems, the operation of the Internal Audit department, the process of the statutory audits of the financial statements, the issues referring to the assurance of the integrity, independence and objectiveness of the external auditor or audit firm especially when it comes to issues related to the delivery of other services by the external audit firm to the company, as well as to review any issues that come to its attention by the external auditors regarding the progress or the outcome of their audit and receive any special reports of the external auditors regarding a weakness in the internal audit systems, especially when it comes to the procedures related to the presentation of financial information or the preparation of the financial statements.

All the issues discussed by the Audit Committee in 2010 are shown at the table below:

Date of	Agenda
Session	
17.03.2010	Approval of the Rules of Operation for the Internal  Audit department
	Audit department.  2. Submission from the Internal Audit department of the annual report regarding all internal audits
	executed within 2009.  3. Approval of the annual internal audit program for 2010.
18.05.2010	Submission of the Internal Audit Report and discussion for
	all internal audits executed within the first trimester of
	2010
03.08.2010	Submission of the Internal Audit Report and discussion for
	all internal audits executed within the second trimester of
	2010
16.11.2010	Submission of the Internal Audit Report and discussion for all internal audits executed within the third trimester of

2010

The CSR committee is responsible for the review and the assurance of proper application of Social Responsibility policies, targets, actions and results in environmental, social and ethical issues in connection with the internal and external corporate environment. Additionally, it acts as consultant to the company's management and relevant committees of the BOD for all the above mentioned issues.

**(B)** (i) According to the article of association, the BOD consists of three (3) to nine (9) members. The members of the BOD, the majority of which are independent and non executive, are the following:

ΟΝΟΜΑΤΕΠΩΝΥΜΟ	ΙΔΙΟΤΗΤΑ
Evangelos Mytilineos	President of the Board & CEO -
	Executive
Ioannis Mytilineos,	Vice-President of the Board – Non
	Executive
Georgios Kontouzoglou,	Executive Director - Executive
Nikolaos Moussas	Member of the Board – Non Executive
Christos Diamantopoulos	Member of the Board – Independent -
	Non Executive
Apostolos Georgiades	Member of the Board – Independent -
	Non Executive
Dimitrios Daskalopoulos	Member of the Board – Independent -
	Non Executive
Christos Zerefos	Member of the Board – Independent -
	Non Executive
Michail Chandris	Member of the Board – Independent -
	Non Executive

- (ii) The executive members are involved with day to day management issues and the monitoring of execution of the BOD decisions, while the non-executive members are entitled to audit and ensure the execution of the BOD decisions and monitor any other area of responsibility assigned to them by the BOD. Independent - Non Executive members are those that do not hold any business or commercial activity or cooperation of any kind with the company that could affect their independency of judgment. In this context a BOD member cannot be perceived as independent if and whether: (a) it holds any business, commercial or other kind of relationship with the company as defined in the article 42e, paragraph 5 of the C.L. 2190/1920, that could substantially affect its business activity and especially when this member is a critical supplier or a significant customer of the company, (b) this member is the President or General Manager of the company or an executive member of the BOD of an affiliate company as per the article 42e par.5 of C.L.2190/1920, or is an employee of the company or any other affiliate, (c) it has an up to 2<sup>nd</sup> grade relationship or is married to an executive member of the BOD or a Manager or a majority Shareholder of the company or one of its affiliates as per the article 42e par.5 of the C.L.2190/1920, (d) this member has been appointed according the article 18 par.3 of the C.L.2190/1920. The independent non executive members are entitled to submit separate reports to the General Assembly. Their presence in a BOD session is not obligatory when there are other members representing and acting on behalf of the minority Shareholders.
- (iii) The C.V.'s of the BOD members can be found in the company's web site www.mytilineos.gr
- (iv) The BOD in force has been elected by the General Assembly of 30.05.2008 and its service ends in 31.12.2013. It consists of two executive, two non executive and five independent members.
- (v) The non executive and the independent members of the BOD are all professionally active in their specific areas of expertise.
- (C). Risk Management and Internal Audit

Information regarding the Risk Management and the Internal Audit:

i. Description of the basic elements of risk management and internal audit systems

#### a. Risk Factors

Mytilineos Group (the "Group") being active in three main business areas such as Metallurgy & Mining, Energy and EPC, faces a number of diversified risk factors. Therefore, its business, financial condition or results of operations may be impacted by such risk factors.

In addition to any other factors presented and discussed elsewhere in this report, the following are the main important factors that could cause the Group's actual results to differ materially from those expected in any projection.

#### Market risk.

The global economic conditions remain generally highly cyclical. The Group is subject to cyclical fluctuations in LME prices, €/\$ parity, general economic, financial and credit conditions, and aluminium end-use markets.

During 2009 and 2010 the Group implemented a number of actions to hedge its exposure to market risk, improve its cost structure and secure liquidity.

Such actions mainly include:

- Forward selling of Aluminium by use of several financial instruments.
- Mitigation of its €/\$ parity exposure by use of derivative products.
- Assessment and/or restructuring of its energy cost items.
- Asset optimization and cost reduction programs.
- Production process improvements.
- Re-assessment of its credit policy and customer credit worthiness procedures.

<u>Increase in the cost of raw materials or significant lag effects.</u>

The Group results of operations are affected by increases in the cost of raw materials, such as metallurgical Coke, caustic Soda and other key inputs, as well as freight costs associated with the transportation of raw materials.

In 2009 and 2010, the Group achieved to negotiate and lock its main freight contracts in competitive terms. It also established a new rating system for its raw materials procurement and applied a continuous cost saving and improvement program.

The Group's results may be affected also by significant lag effects for declines in key input costs that are LME or US dollar – linked as for example such declines may not be adequate to offset sharp declines in metal price during the same period.

#### Availability of Greek Bauxites and market concentration

The Group for its Alumina operations is highly dependent on the availability of Greek Bauxites. By the operation of its own mines through its 100% subsidiary Delfoi Distomon S.A., the Group covers almost the 38-40% of its requirements in Greek Bauxites. However, in the years to come there might be difficulties in the licensing of new sites and the exploration of new bauxite mines in Greece. Furthermore, the Greek bauxite market is already quite concentrated; therefore this fact along with a possibility of a further concentration could have a negative impact on the Group's input cost for Greek bauxite in the future.

For these reasons the Group is continuously trying to negotiate long term bauxite contracts as well as joint ventures or strategic alliances with Greek miners.

Health, safety and environmental laws and regulations and cost / liabilities associated with such laws and regulations.

The Group's operations are subject to laws and regulations regarding health, safety and environmental issues.

The cost for complying with such regulations involves either investments or recurring expenses for actions regarding the safe handling of industrial wastes and the rehabilitation of old sites.

Environmental matters for which we may be liable may arise in the future at our present sites, where no problem is currently known, at previously owned sites, or sites previously operated by us.

Climate change, climate change legislation or regulations and greenhouse effects.

Energy is a significant input, and is foreseen to become also a significant output for the Group's operations. In addition, the Group is also active in the general perimeter of the Energy sector through its EPC activity. There is growing recognition that consumption of energy derived from fossil fuels is a contributor to global warming. A number of governments or governmental bodies have introduced or are contemplating legislative and regulatory change in response to the

potential impacts of climate change. The Group will likely see changes in the margins of greenhouse gas-intensive assets and energy-intensive assets as a result of regulatory impacts mainly in the E.U., where the Group operates. Assessments of the potential impact of future climate change legislation, regulation and European or International treaties and accords are uncertain, given the wide scope of potential regulatory change. The Group may realize increased capital expenditures resulting from required compliance with revised or new legislation or regulations, as well as costs to purchase or profits from sales of Co2 allowances or credits. On the other hand the Group may also recognise opportunities in the EPC side of operations due to any of said, revised or new, rules, regulations and legislation associated to the climate change.

Non realization of expected long-term benefits from productivity and cost-reduction initiatives.

The Group has undertaken, and may continue to undertake, productivity and cost-reduction initiatives to improve performance and reduce its overall production cost. There are always possibilities that these initiatives cannot all be completed or that estimated cost savings from such initiatives will not be realized in total and in time for reasons that may not entirely lie on the Group's control.

#### Political and regulatory issues

The Group's activities that are associated with energy remain significantly regulated in Greece and exposed to political, legal and regulatory framework issues. Developments in this environment that could indicate delays in the substantial deregulation of the energy market can be expected to have an impact on the Group's operations, forward - looking results and fair value of Energy Assets or Assets for the operation of which significant amount of Energy is required.

In addition to that, the Group may also be affected by unfavourable developments regarding political and regulatory issues associated to its EPC activity held in countries outside the Greek territory.

#### IT Security

Our business processes are supported by several software packages and data processing systems. Nevertheless, we cannot fully rule out a lack of availability of IT infrastructure or a breach in the security of our data.

We mitigate these risks by applying high security standards as well as taking measures in order to achieve and assure disponibility, integrity, confidentiality and traceability. In addition and in order to mitigate security related risks, we regularly invest in hardware and software upgrades, execute periodic internal and external IT audits by international consultant groups, and generally apply a continuous improvement approach.

#### EPC related risks

The Group through its subsidiary METKA, is contractually exposed to risks related to the design, engineering, procurement, construction and deliver of ready-to-operate energy facilities for an agreed price. Said risks involve mainly cost overruns associated with:

- unanticipated increases in the costs of raw materials and equipment,
- equipment or mechanical failures,
- unforeseen construction conditions,
- delays caused by adverse weather conditions
- performance failure or defaults by suppliers or subcontractors
- additional works required as the customer changes its instructions or is unable to provide on time and on schedule the required information relating to the design or engineering of the project

In circumstances, where additional time or money is spent by METKA group as a consequence of the customer's failure, METKA group negotiates monetary compensation from the customer.

METKA group's main asset is its personnel. Therefore, failure to retain its key personnel or to attract and maintain new qualified personnel in order to develop its know-how might have a significant impact on its current or future performance.

METKA group success in this area highly depends on its ability to recruit, train and retain a sufficient number of employees including managers, engineers and technicians, who have the required skills and expertise.

#### Unexpected events

Unexpected events, including natural disasters, war or terrorist activities, unplanned outages, supply disruptions, or failure of equipment or processes to meet specifications may increase the cost of doing business or otherwise impact the Group's financial performance. Further, existing insurance arrangements may not provide protection for all of the costs that may arise from such events.

#### b. Risk Management organization and execution

The Group has defined risk as an occurrence of uncertain or unplanned conditions that may affect its overall operations, business activity, financial performance as well as its strategy execution and goals achievement.

A specific Risk Management approach is held in all areas of activity where certain risks have been identified as follows:

- (i) assessment of risk factors
- (ii) design of the risk management policy
- (iii) execution and evaluation of the risk policy

The Group has not established yet a concrete Risk Management Organizational structure. However, its line management is engaged in a continuous process of identifying and primary assessing risks in order to facilitate the Executive Committees of each business sector and the BOD of each legal entity in the design and approval of specific risk management procedures and policies.

The Group is executing periodic internal audits to ensure the proper and effective application of risk identification and assessment processes and risk management policies.

#### C. Internal Audit System

In addition to the points discussed elsewhere in this Statement including those discussed for the responsibilities of the Audit Committee, the Internal Audit of the company is an independent organizational structure with direct report line to the BOD. As part of its responsibilities it evaluates and improves the risk management and internal audit systems and verifies the conformation of the company with the policies and procedures either suggested by the Rule of Operations or imposed by the legal and regulatory framework.

On a constant basis the internal audit system provides for the monitoring of:

- the effectiveness of the accounting and financial systems of the company, the audit mechanisms, the quality assurance, the health and safety, the environmental treatments and the management of enterprise risks,
- the preparation of the financial statements and any other documents containing important disclosures of the company,
- the reliability, the credentials and the independency of Statutory External Auditors.
- · Cases of conflict of interest between the company and its BOD members or Managers,
- the transactions and corporate affairs of the company with its affiliates and other entities in which the company's BOD members hold more that 10% interest or in which there is a holding interest by shareholders of the company representing more than 10% of its share capital.
- the remuneration of the BOD members and the managers of the company.
- ii. The BOD reviews on a constant basis the Corporate Strategy and the main Enterprise Risks associated to this Strategy, especially being active in a cyclical and dynamic environment. Additionally, it regularly reviews the reports of the Audit Committee, therefore being able to shape a concrete opinion on the effectiveness of the corporate systems, procedures and policies.
- iii. The company's statutory external auditors do not offer other non auditing services to the company.

#### (D) BOD Remunerations

According to the company's article of association the BOD member's remuneration is set by the BOD and submitted to the General Assembly for approval. None of the existing BOD members has an employee relationship to the company.

The BOD members apart form their approved remuneration do not receive any other compensation or benefits.

For the year 2010 no share options were granted and no share benefit plans were in force.

#### **E. Annual Financial Statements**

We confirm that the attached Financial Statements are those approved by the Board of Directors of "MYTILINEOS S.A." at 31.12.2010 and have been published to the electronic address <a href="https://www.mytilineos.gr">www.mytilineos.gr</a>, were they will remain posted for a minimum period of five (5) years. It is noted that the published, in the press, brief financial data aim to provide the user with general information but do not present a full picture of the Company's and Group's financial results and position, according to International Accounting Standards. It is also noted that, for simplification purposes, the published, in the press, brief financial data contain summarizations or reclassifications of certain figures.

#### 1. Information about MYTILINEOS HOLDINGS S.A.

#### 1.1 General Information

Mytilineos Holdings S.A. is today one of the biggest industrial Groups internationally, activated in the sectors of Metallurgy, EPC, Energy, and Defence. The Company, which was founded in 1990 as a metallurgical company of international trade and participations, is an evolution of an old metallurgical family business which began its activity in 1908.

Devoted to continuous growth and progress and aiming to be a leader in all its activities, the Group promotes through its long presence its vision to be a powerful and competitive European Group of "Heavy Industry".

The group's headquarters is located in Athens – Maroussi (8 Artemidos Str., P.C. 151 25) and its shares were listed in the Athens Stock Exchange in 1995.

The financial statements for the year ended 31.12.2010 (along with the respective comparative information for the previous year 2009), were approved by the Board of directors on 22 March 2011.

#### 1.2 Nature of activities

During the last ten years the Group's activities have expanded from the traditional sector of international metal's trading to those of construction and energy. The group aims in the development of synergies between the three different areas of activities, by delegating the role of management and strategy formation in Mytilineos Holdings S.A.

The group monitors its performance on Metallurgy & Mining Sector through the subsidiaries "Aluminium S.A." (Alumina–Aluminium) and "Sometra S.A." (Zinc–Lead). Zinc – Lead Sector was the first which effected from the negative economic environment mainly due to the decrease on demand, the increasing prices of coke and the difficulty to find appropriate Raw Materials. All the above mentioned reasons lead the General Assembly of the company on 26.01.2009 to suspend temporary the production activity.

The Group through its subsidiary METKA is the leading and most specialized EPC Constructor in Greece and expanded in competitive markets abroad with value of pending construction contracts amounting to  $\{0.2, 2.5\}$  bil.

Since June 2010, "MYTILINEOS HOLDINGS S.A." has become the sole shareholder of "ENDESA HELLAS PRODUCTION AND TRADE OF ELECTRICAL POWER S.A.", which is now renamed into "PROTERGIA PRODUCTION AND TRADE OF ELECTRICAL POWER S.A.". The acquisition of the full control of "ENDESA HELLAS" marks "MYTILINEOS HOLDINGS S.A." establishment as the country's largest independent energy producer with a portfolio of 1.2 GW of installed capacity from thermal plants in operation by 2011 and over 1,000 MW RES in different stages of development.

#### 2. Basis for preparation of the financial statements

The consolidated financial statements of MYTILINEOS S.A. as of December 31st 2010 covering the entire 2010 fiscal year, have been compiled based on the historic cost principle as is amended by the readjustment of specific asset and liability items into market values, the going concern principle and are in accordance with the International Financial Reporting Standards (IFRS) that have been issued by the International Accounting Standards Board (IASB) and their interpretations that have been issued by the International Financial Reporting Interpretations Committee (IFRIC) of the IASB. The accompanying standalone financial statements are compiled buy demand of the statutory law 2190/1920.

According to the IFRS, the preparation of the Financial Statements requires estimations during the application of the company's accounting principles. Important admissions are presented wherever it has been judged appropriate.

The reporting currency is Euro (currency of the country of the domicile of the parent Company) and all amounts are reported in thousands unless stated otherwise.

#### 3. Basic accounting principles

The accounting principles, applied by the Group for the reporting period are consistent with the accounting principles applied for the fiscal year 2009, apart from the following:

- A) The Company applied the revised IFRS 3 "Business Combinations" and the amended IAS 27 "Consolidated Financial Statements" (note 3.1).
- B) The treasury shares acquired by the Company, are reclassified from the "Share Capital" and "Share Premium" to a separate reserve included in "Other Reserves". The change of the aforementioned accounting practice consists according to IAS 8 "Accounting Policies, Changes in Accounting Estimates and Errors" a change of accounting policy. Consequently, the Company applied the change retrospectively according to § 19 of IAS 8.
- C) Reclassification in Equity of a net amount of 94 € from the consolidated "Share Capital" to the "Minority Interest" (96 €) and "Translation Reserve" (-2) respectively. The correction of the aforementioned accounting error requires according to § 43 of IAS 8 "Accounting Policies, Changes in Accounting Estimates and Errors" the retrospective restatement of the prior period.

Consequently, according to IAS 1 the above re-presentation requires a third comparative Statement of Financial Position.

#### 3.1 New and amended accounting standards and interpretations of IFRIC

New and amended standards and interpretations applicable to December 2010 yearends

IAS 32 (Amendment) "Financial Instruments: Presentation" (effective for annual periods beginning on or after 1 February 2010). This amendment clarifies how certain rights issues should be classified. In particular, based on this amendment, rights, options or warrants to acquire a fixed number of the entity's own equity instruments for a fixed amount of any currency are equity instruments if the entity offers the rights, options or warrants pro rata to all of its existing owners of the same class of its own non-derivative equity instruments. This amendment has no impact to the Group's financial statements.

IAS 39 (Amendment) "Financial Instruments": Recognition and Measurement" (effective for annual periods beginning on or after 1 July 2009). This amendment clarifies how the principles that determine whether a hedged risk or portion of cash flows is eligible for designation should be applied in particular situations. The Group will apply the amendment from the effective date.

IFRS 1 (Amendment) "First-time adoption of International Financial Reporting Standards" (effective for annual periods beginning on or after 1 January 2010). This amendment provides additional clarifications for first-time adopters of IFRS in respect of the use of deemed cost for oil and gas assets, the determination of whether an arrangement contains a lease and the decommissioning liabilities included in the cost of property, plant and equipment. This amendment has no impact to the Group's financial statements since it has already adopted IFRS. This amendment has not yet been endorsed by the EU.

IFRS 2 (Amendment) "Share Based Payment" (effective for annual periods beginning on or after 1 January 2010). The purpose of the amendment is to clarify the scope of IFRS 2 and the accounting for group cash-settled share-based payment transactions in the separate or individual financial statements of the entity receiving the goods or services, when that entity has no obligation to settle the share-based payment transaction. This amendment has no impact to the Group's financial statements. This amendment has not yet been endorsed by the EU.

IFRS 3 (Revised) "Business Combinations" and IAS 27 (Amended) "Consolidated and Separate Financial Statements" (effective for annual periods beginning on or after 1 July 2009). The revised IFRS 3 introduces a number of changes in the accounting for business combinations which will impact the amount of goodwill recognized, the reported results in the period that an acquisition occurs, and future reported results. Such changes include the expensing of acquisition-related costs and recognizing subsequent changes in fair value of contingent consideration in the profit or loss. The amended IAS 27 requires a change in ownership interest of a subsidiary is accounted for as an equity transaction. Furthermore the amended standard changes the accounting for losses incurred by the subsidiary as well as the loss of control of a subsidiary. The changes introduced by these standards must be applied prospectively and will affect future acquisitions and transactions with non-controlling interests. The Group applied these changes from their effective date.

IFRIC 12 – Service Concession Arrangements (EU endorsed for periods beginning 30 March 2009). This interpretation applies to companies that participate in service concession arrangements. The Group adopted this interpretation on 1 January 2010.

IFRIC 14 (Amendment) "The Limit on a Defined Benefit Asset, Minimum Funding Requirements and their Interaction" (effective for annual periods beginning on or after 1 January 2011). The amendments apply in limited circumstances: when an entity is subject to minimum funding requirements and makes an early payment of contributions to cover those requirements. The amendments permit such an entity to treat the benefit of such an early payment as an asset. This interpretation is not relevant to the Group. This amendment has not yet been endorsed by the EU.

**IFRIC 17, "Distributions of non-cash assets to owners" (effective for annual periods beginning on or after 1 July 2009).** This interpretation provides guidance on accounting for the following types of non-reciprocal distributions of assets by an entity to its owners acting in their capacity as owners: (a) distributions of non-cash assets and (b) distributions that give owners a choice of receiving either noncash assets or a cash alternative. The Group adopted this interpretation on 1 January 2010.

IFRIC 19 "Extinguishing Financial Liabilities with Equity Instruments" (effective for annual periods beginning on or after 1 July 2010). This interpretation addresses the accounting by the entity that issues equity instruments to a creditor in order to settle, in full or in part, a financial liability. This interpretation is not relevant to the Group. This amendment has not yet been endorsed by the EU.

#### Annual Improvements 2010 (effective from 1 July 2010 and later)

The IASB has issued Improvements to IFRS 2010 (2010 Improvements). Most of these amendments become effective in annual periods beginning on or after 1 July 2010 or 1 January 2011. The 2010 Improvements amend certain provisions of IFRS 3R, clarify presentation of the reconciliation of each of the components of other comprehensive income and clarify certain disclosure requirements for financial instruments. The Group's preliminary assessments

indicate that the 2010 Improvements will not have a material impact on the Group's financial statements.

#### 3.2 Consolidation

**Subsidiaries:** All the companies that are managed or controlled, directly or indirectly, by another company (parent) either through the majority of voting rights or through its dependence on the know-how provided from the Group. Therefore, subsidiaries are companies in which control is exercised by the parent. Mytilineos S.A. acquires and exercises control through voting rights.

The existence of potential voting rights that are exercisable at the time the financial statements are prepared, is taken into account in order to determine whether the parent exercises control over the subsidiaries. Subsidiaries are consolidated completely (full consolidation) using the purchase method from the date that control over them is acquired and cease to be consolidated from the date that control no longer exists.

MYTILINEOS S.A. exercises control over, the listed on the ATHENS STOCK EXCHANGE, METKA. Due to the large dissemination of these stocks, "control" over this Firm can be determined even in cases that the Group holds stakes lower than 50% of the total voting rights. In such cases, "control" is determined through the representation of the majority of the chairs of the BoD.

The acquisition of a subsidiary by the Group is accounted for using the purchase method. The acquisition cost of a subsidiary is the fair value of the assets given as consideration, the shares issued and the liabilities undertaken on the date of the acquisition plus any costs directly associated with the transaction. The individual assets, liabilities and contingent liabilities that are acquired during a business combination are valued during the acquisition at their fair values regardless of the participation percentage. The acquisition cost over and above the fair value of the individual assets acquired is booked as goodwill. If the total cost of the acquisition is lower than the fair value of the individual assets acquired, the difference is immediately transferred to the income statement.

Inter-company transactions, balances and unrealized profits from transactions between Group companies are eliminated in consolidation. Unrealized losses are also eliminated except if the transaction provides indication of impairment of the transferred asset. The accounting principles of the subsidiaries have been amended so as to be in conformity to the ones adopted by the Group.

For the accounting of transactions with minority, the Group applies the accounting principle based on which such transactions are handled as transactions with third parties beyond the Group. The sales towards the minority create profit and losses for the Group, which are booked in the results. The purchases by the minority create goodwill, which is the difference between the price paid and the percentage of the book value of the equity of the subsidiary acquired.

**Associates:** Associates are companies on which the Group can exercise significant influence but not "control" and which do not fulfill the conditions to be classified as subsidiaries or joint ventures. The assumptions used by the group imply that holding a percentage between 20% and 50% of a company's voting rights suggests significant influence on the company. Investments in associates are initially recognized at cost and are subsequently valued using the Equity method. At the end of each period, the cost of acquisition is increased by the Group's share in the associates' net assets change and is decreased by the dividends received from the associates.

Any goodwill arising from acquiring associates is contained in the cost of acquisition. Whether any impairment of this goodwill occurs, this impairment decreases the cost of acquisition by equal charge in the income statement of the period.

After the acquisition, the Group's share in the profits or losses of associates is recognized in the income statement, while the share of changes in reserves is recognized in Equity. The cumulated changes affect the book value of the investments in associated companies. When the Group's share in the losses of an associate is equal or larger than the carrying amount of the investment, including any other doubtful debts, the Group does not recognize any further losses, unless it has guaranteed for liabilities or made payments on behalf of the associate or those that emerge from ownership.

Unrealized profits from transactions between the Group and its associates are eliminated according to the Group's percentage ownership in the associates. Unrealized losses are eliminated, except if the transaction provides indications of impairment of the transferred

asset. The accounting principles of the associates have been adjusted to be in conformity to the ones adopted by the Group.

#### 3.3 Segment reporting

MYTILINEOS Group is active in three main operating business segments: Metallurgy, Constructions and Energy. In identifying its operating segments, management generally follows the Group's service lines, which represent the main products and services provided by the Group. Each of these operating segments is managed separately as each of these service lines requires different technologies and other resources as well as marketing approaches. The adoption of IFRS 8 has not affected the identified operating segments for the Group compared to the recent annual financial statement.

#### 3.4 Foreign currency translation

The measurement of the items in the financial statements of the Group's companies is based on the currency of the primary economic environment in which the Group operates (operating currency). The consolidated financial statements are reported in euros, which is the operating currency and the reporting currency of the parent Company and all its subsidiaries.

Transactions in foreign currencies are converted to the operating currency using the rates in effect at the date of the transactions.

Profits and losses from foreign exchange differences that result from the settlement of such transactions during the period and from the conversion of monetary items denominated in foreign currency using the rate in effect at the balance sheet date are posted to the results. Foreign exchange differences from non-monetary items that are valued at their fair value are considered as part of their fair value and are thus treated similarly to fair value differences.

The Group's foreign activities in foreign currency (which constitute an inseparable part of the parent's activities), are converted to the operating currency using the rates in effect at the date of the transaction, while the asset and liability items of foreign activities, including surplus

value and fair value adjustments, that arise during the consolidation, are converted to euro using the exchange rates that are in effect as at the balance sheet date.

The individual financial statements of companies included in the consolidation, which initially are presented in a currency different than the Group's reporting currency, have been converted to euros. The asset and liability items have been converted to euros using the exchange rate prevailing at the balance sheet date. The income and expenses have been converted to the Group's reporting currency using the average rates during the aforementioned period. Any differences that arise from this process, have been debited / (credited) to the Equity under the "Translation Reserves" account.

#### 3.5 Tangible assets

Fixed assets are reported in the financial statements at acquisition cost or deemed cost, as determined based on fair values as at the transition dates, less accumulated depreciations and any impairment suffered by the assets. The acquisition cost includes all the directly attributable expenses for the acquisition of the assets.

Subsequent expenditure is added to the carrying value of the tangible fixed assets or is booked as a separate fixed asset only if it is probable that future economic benefits will flow to the Group and their cost can be accurately and reliably measured. The repair and maintenance cost is booked in the results when such is realized.

Depreciation of tangible fixed assets (other than Land which are not depreciated) is calculated using the straight line method over their useful life, as follows:

Land 25-35 years

Mechanical equipment 4-20 years

Vehicles 4-10 years

Other equipment 4-7 years

The residual values and useful economic life of tangible fixed assets are subject to reassessment at each balance sheet date. When the book value of tangible fixed assets

exceeds their recoverable amount, the difference (impairment) is immediately booked as an expense in the income statement.

Upon sale of the tangible fixed assets, any difference between the proceeds and the book value are booked as profit or loss to the results. Expenditure on repairs and maintenance is booked as an expense in the period they occur.

Self-constructed tangible fixed assets constitute an addition to the acquisition cost of tangible assets at a value that includes the direct cost of employee's salaries (including the relevant employer's contributions), the cost of materials used and other general costs.

Regarding borrowing costs, the amendment of IAS 23 "Borrowing Costs" will not have any effect on the Group.

#### 3.6 Intangible assets

The intangible assets include Goodwill, the rights of use of Property, plant and equipment, software licenses, licenses for the production, installation and operation of renewable energy assets and thermal energy assets, the environment rehabilitation expenditure and borrowing costs.

**Goodwill on Acquisition:** is the difference between the asset's acquisition cost and fair value and the net assets of the subsidiary / associate company as at the acquisition date. During the acquisition date, the company recognizes this surplus value, emerged from acquisition, as an asset and presents it in cost. This cost is equal to the amount by which the acquisition cost exceeds the company's share in the net assets of the acquired company.

After the initial recognition, the surplus value is valued at cost less any accumulated impairment losses. The surplus value is not depreciated, but is reviewed on an annual basis for possible decrease in its value (impairment), if there are events that indicate such a loss according to IAS 36.

Goodwill is allocated to cash-generating units for the purpose of impairment testing. A cash generated unit is the smallest identifiable group of assets generating cash inflows independently and represents the level used by the Group to organise and present each

activities and results in its internal reporting. Impairment is determined for goodwill by assessing the recoverable amount of the cash-generating units, to which the goodwill relates. Where the recoverable amount (typically the value in use) of the cash-generating units is less than their carrying amount an impairment loss is recognised. Impairment losses relating to goodwill cannot be reversed in future periods. The Group performs its annual impairment test of goodwill as at 31 December.

In the case where acquisition cost is less than the company's stake in the acquired company's net assets, the former recalculates the acquisition cost and valuates the assets, liabilities and contingent liabilities of the acquired company. Any difference prevailing after the recalculation is recognized directly in the income statement as a profit.

**Software:** Software licenses are valued in cost of acquisition less accumulated depreciation. Depreciation is calculated using the straight line method during the assets' useful life that range from 1 to 3 years.

**Production, Installation and Operation Licenses of Renewable Energy Assets and Thermal Energy Assets:** The different types of licenses entitles the group either with the right to construct an energy asset or the right to produce and sell energy. Current market conditions provide adequate evidence about the recoverable amount of such licenses. Therefore the Group has recognized licenses as intangible assets at fair value less depreciation and less any provision for impairment. The Group runs impairment tests on a yearly basis using the following methodology:

- i) Attach possibility factors according to management estimation regarding the construction of assets under license
- ii) Runs Discounted Cash Flows (DCF) methodology using assumptions prevailing at the energy market. The period regarded by the management for provisions exceeds the five years encouraged by IAS 36 as, especially for the renewable energy assets, there is satisfactory visibility for a substantially longer period.
- iii) The final recoverable amount is calculated for a total portfolio of either renewable or thermal energy assets by multiplying the overall possibility factor with the outcome of the DCF valuation.

iv) Finally, the Group compares the recoverable value calculated to be the value-in-use of the assets with their carrying amounts. When the recoverable value is less than the carrying amount an equal impairment provision is charged to the income statement.

For the reported period, the recoverable value of the licenses acquired by the group exceeds their carrying amount.

**Legal rights to explore mines:** The legal rights to explore mines concern rights that the group has acquired mining mineral reserves in several geographical areas. In cost of the mining rights, apart from nominal value of the rights, any cost that relates to the initial evaluation of the rehabilitation cost of the area where work has been done, the commitment of the Group either during the acquirement of the right or as a result of its use for a certain time period. The depreciation time period that is adopted by the Group does not exceed 10 years.

**Right of Use of Tangible Assets:** Rights of exploitation of tangible assets that are granted in the frames of conventions of manufacture of work (compensative profits) are valued in cost of acquisition, which equals their fair value at the date of their concession, less accumulated depreciation. Depreciation is calculated using the "production units method".

Research and Development Expenses: Research and Development expenditures are recognized as expenses when they are realized. The expenses which arise from the developing programs (related to the design and the test of new or improved products) are capitalized if it is possible to produced future economic benefit. The other development expenditures are booked as an expense in the results when they are realized. Previous years' development expenditures recognized as expenses, can not be capitalized in the future fiscal years. The capitalized development expenses are depreciated from the beginning of the product's economic life using the straight line method during the period of the product's future economic benefits. The Group's depreciation period doesn't exceed the 5 years.

**Land Stripping & Restoration expenses :** Land Stripping & Restoration expenses are capitalized and amortized using the unit of production method.

**Borrowing costs:** Borrowing costs that are directly attributable to the acquisition, construction or production of a qualifying asset shall be capitalized as part of the cost of that

asset. The amount of borrowing costs eligible for capitalization shall be determined in accordance with IAS 23.

#### 3.7 Impairment of Assets

Assets with an indefinite useful life are not depreciated and are subject to an impairment review annually and when some events suggest that the book value may not be recoverable any resulting difference is charged to the period's results. Assets that are depreciated are subject to an impairment review when there is evidence that their value will not be recoverable. The recoverable value is the greater between the net sales value and the value in use. An impairment loss is recognized by the company when the book value of these assets (or cash generating unit- CGU) is greater than its recoverable amount.

Net sales value is the amount received from the sale of an asset at an arm's length transaction in which participating parties have full knowledge and participate voluntarily, after deducting any additional direct cost for the sale of the asset, while value in use is the present value of estimated future cash flows that are expected to flow into the company from the use of the asset and from its disposal at the end of its estimated useful life.

#### 3.8 Important accounting decisions, estimations and assumptions

The compilation of financial statements according to IFRS requires the management to make decisions, perform estimations and use assumptions that affect the amounts presented in the financial statements, the assets, liabilities, income and expenses. The actual results may differ due to such estimations. Estimations are continuously enhanced and are based on historical data and other factors, such as expectations for future events expected to realize under current conditions.

#### 3.8.1 Accounting decisions

During the implementation procedure for accounting policies, decisions are made by the management, which relate to the following:

#### Classification of investments

Management classifies Financial assets in the scope of IAS 39 based on their nature and their characteristics at the following four categories:

- financial assets at fair value through profit and loss,
- loans and receivables,
- held-to-maturity investments, and
- available-for-sale investments.

Financial assets are recognized initially at cost, which represents their fair value (plus, in certain cases, directly attributable transaction costs). The Group determines the classification of its financial assets after initial recognition and, where allowed and appropriate, re-evaluates this designation at each financial year-end.

- (i) Financial assets at fair value through profit and loss: Financial assets are classified as held for trading if they are acquired for the purpose of selling in the near term. Gains or losses on investments held for trading are recognized in income.
- (ii) Loans and receivables: Loans and receivables which are generated form the Group's operations (and are beyond the Group's normal credit terms) are carried at amortized cost using the effective interest method. Gains and losses are recognized in the income statement when the loans and receivables are derecognized or impaired, as well as through the amortization process.
- (iii) Held-to-maturity investments: Financial assets with fixed or determinable payments and fixed maturity are classified as held-to-maturity when the Group has the positive intention and ability to hold to maturity. Investments intended to be held for an undefined period are not included in this classification. Held-to-maturity investments are carried at amortized cost using the effective interest method. For investments carried at amortized cost, gains and losses are recognized in income when the investments are derecognized or impaired, as well as through the amortization process.

#### Recoverability of receivables accounts

Short term receivables are presented in their nominal value, net of provisions for potential non collectible accounts, while long-term receivables (balances that deviate from the normal credit terms) are measured at amortized cost based on the effective interest rate method. At each balance sheet date all potentially uncollectible accounts are assessed individually for purposes of determining the appropriate allowance for doubtful accounts. The balance of such allowance

for doubtful accounts is appropriately adjusted at each balance sheet date in order to reflect the possible risks. Any amount written-off with respect to customer account balances is charged against the existing allowance for doubtful accounts. Any amount provided for in respect to customer account balances is charged in the profit and loss statement.

#### • Impairment of inventories

Provision for slow moving, damaged or obsolete inventories is made when necessary. The impairments at the net realizable value of inventories are charged in the profit and loss statement in the period the occur.

#### • Classification of a lease as operating or financial.

Leases where all the risks and rewards of ownership are retained by the lessor are classified as operating leases. Payments made under operating leases (net of any incentives received from the lessor) are charged to the income statement on a straight-line basis over the period of the lease. Leases of property, plant and equipment where the Group has substantially all the risks and rewards of ownership are classified as finance leases.

#### 3.8.2 Assumptions and estimations

The presentation of the value of specific assets and liabilities in the financial statements requires the use of estimations that are based on assumptions relating to the values and conditions not known with certainty during the compilation date of the financial statements. The Group continuously evaluates the estimations it makes based on historical data, the research of specialized consultants, the trends and methods considered appropriate for the estimation of specific conditions as well as estimations regarding how the assumptions made may change in the future.

Assumptions and estimations are required for the presentation of:

- Possible reductions in goodwill
- Provisions for future payable income tax and deferred taxes.
- The fair value of derivatives and other financial instruments
- Provisions amounts
- Contingent receivables and liabilities

#### Possible reductions in Goodwill

The Group test goodwill for impairment annually and whenever events or circumstances make it more likely than not that an impairment may have occurred, such as a significant adverse change in the business climate or a decision to sell or dispose of a reporting unit. Determining whether an impairment has occurred requires valuation of the respective reporting unit, which we estimate using a discounted cash flow method. When available and as appropriate, we use comparative market multiples to corroborate discounted cash flow results. In applying this methodology, we rely on a number of factors, including actual operating results, future business plans, economic projections and market data.

If this analysis indicates goodwill s impaired, measuring the impairment requires a fair value estimate of each identified tangible and intangible asset. In this case we supplement the cash flow approach discussed above with independent appraisals, as appropriate.

We test other identified intangible assets with defined useful lives and subject to amortization by comparing the carrying amount to the sum of undiscounted cash flows expected to be generated by the asset. We test intangible assets with indefinite lives annually for impairment using a fair value method such as discounted cash flows.

The Group tests annually whether goodwill has suffered any impairment, in accordance with the accounting policy stated in Note 6. The recoverable amounts of cash-generating units have been determined based on value-in-use calculations.

#### Budget of construction contracts

The treatment for income and expenses of a construction contract, depends on whether the final result of the contract can be reliably estimated. When the result of a construction contract can be estimated reliably then all income and expenses related to the contract are recognized as such during the time period of the contract. The Group uses the percentage of completion method to determine the appropriate amount of income and expense to be recognized in each period. The percentage of completion is calculated as the contracted cost realized over the total budgeted cost of construction for each project.

#### Income Tax

Group and company is subject to income taxes in numerous jurisdictions. Significant estimates are required in determining the provision for income taxes. There are many transactions and calculations for which the ultimate tax determination is uncertain during the ordinary course of business. Group and company recognises liabilities for anticipated tax audit issues based on estimates of whether additional taxes will be due. Where the final tax outcome of these matters is different from the amounts that were initially recorded, such differences will impact the income tax and deferred tax provisions in the period in which such determination is made.

#### Provisions

**Doubtful accounts** are reported at the amounts likely to be recoverable based on historical experience of customer default. As soon as it is learned that a particular account is subject to a risk over and above the normal credit risk (e.g., low creditworthiness of customer, dispute as to the existence or the amount of the claim, etc.), the account is analyzed and written down if circumstances indicate the receivable is uncollectible.

**Provisions for environmental rehabilitation** are reported at the amounts that are likely to be claimed against the Group in order to settle the liability

#### Contingencies

The Group is involved in litigation and claims in the normal course of operations. Management is of the opinion that any resulting settlements would not materially affect the financial position of the Group as at December 31, 2006. However, the determination of contingent liabilities relating to the litigation and claims is a complex process that involves judgments as to the outcomes and interpretation of laws and regulations. Changes in the judgments or interpretations may result in an increase or decrease in the Company's contingent liabilities in the future.

### 3.9 Group Structure

Group companies, included in the consolidated financial statements are:

### 3.10 Significant information

During the reporting period, the Group proceed to the following:

On 8 January 2010 the Management of METKA S.A. announced the sale to TERNA S.A. of 100% of the shares of ETADE S.A., a wholly-owned subsidiary of METKA S.A., for a price of € 42.515.000. The suspension for more than two years of the activities for the Aliveri V CCGT and the consequences from postponement of its implementation for a time coinciding with the implementation of the Megalopolis V CCGT project, led to the sale of ETADE being considered as the most appropriate course of action in order to protect the interests of METKA and establish the conditions for further expansion of its activities abroad. The sale effected the Group's turnover, EBITDA and Profit after tax and minorities as illustrated in the table below:

(in mil. €)	1/1 - 31/12/2010					
	TOTAL FINANCIALS	EFFECT OF ETADE SALE	NET FINANCIALS			
SALES	1.001,4	32,4 3%	969,0			
EBITDA	192,7	32,4 17%	160,3			
EARNINGS AFTER TAX & AFTER MINORITIES	60,9	14,6	46,3			
		24%				

In addition, the above sale resulted to a decrease of Group goodwill by € 6 mil.

The METKA Group undertook the following actions in the recognition of the result of the sale of the subsidiary company in the Financial Statements of the presented period:

-on the one hand, valuation of the traditional activity of the subsidiary company, as it preexisted at its original acquisition (Amfikleia plant);

-on the other hand, discounting of future cash flows from its participation in integrated energy projects concerning combined cycle Natural Gas power plants, which pertains to an activity that the subsidiary company was engaged with after its acquisition by METKA.

The difference between the valuation of the traditional activity of the subsidiary company and its original acquisition cost was recognized as a financial result (€2.27m income before taxes – 1.73m

after taxes) in the consolidated profit and loss account of the period. Correspondingly, the

difference between the acquisition value of the company ( $\in$ 8m) and the sale price (42.5m) discounted for the period until the collection of the price, which will be realized in three installments in July, August and September 2011 (discounting cost recognized as a future interest of  $\in$ 2m) was recognized as sale

of construction contracts for integrated energy projects incrementing respectively the Turnover and the profit before taxes of the company and of the Group by €32.4m.

On 4 February 2010, Following extensive negotiations in Istanbul, Turkey, the companies "BORASCO", "METKA S.A." and "POWER PROJECTS" reached an agreement for construction works as well as supply of most of the equipment for a thermal power plant in Samsun, Turkey. The contract comprises of the supply of the majority of equipment and construction works for a 870 MW natural gas fired power plant, consisting of two (2) single shaft units provided by GENERAL ELECTRIC. The share of METKA S.A. in the contract value of the project is €199.9 million plus US\$172.3 million.

Since the 2<sup>nd</sup> of June, MYTILINEOS HOLDINGS S.A. has become the sole shareholder of ENDESA HELLAS PRODUCTION AND TRADE OF ELECTRICAL POWER S.A., which is now renamed into PROTERGIA PRODUCTION AND TRADE OF ELECTRICAL POWER S.A. The acquisition of the full control of ENDESA HELLAS marks MYTILINEOS HOLDINGS S.A. establishment as the country's largest independent energy producer with a portfolio of 1.2 GW of installed capacity from thermal plants in operation by 2011 and over 1,000 MW RES in different stages of development. The total price of the acquisition, as it has been determined, amounts to €140 million and is being paid in instalments as follows: € 60 mil on 1.7.2010 and

€ 40 mil for each 2011 and 2012. On a Group level, a negative goodwill of  $\,$  € 51,5mil. was recognized.

In addition, the above acquisition resulted to an increase of Group goodwill by  $\in$  62 mil. and Intangible assets for  $\in$  150 mil.

At the same time, ENEL GREEN POWER, subsidiary of ENDESA S.A. acquired by ENDESA HELLAS RES with a total installed power generation capacity of 15 MW for a price of €20 million. The companies sold were "POUGAKIA S.A.", "KASTANIOTIKO S.A.", "AIOLIKI MARTINOU S.A." and "ARGYRI S.A.". From the sale of the aforementioned companies no gain was recognized.

On 28.09.2009, the B.o.D of the 100% subsidiary "MOVAL S.A." resolved to the merger with its 100% subsidiaries "ENERGI E2 AIOLIKI S.A." and "ENERGI E2 KARYSTIA S.A.". The merger was approved by the Prefecture on 26 February 2010. On 26.03.2010, the B.o.D of the company approved the de-merger of the electricity trade and production division and its contribution to the company "Renewable Energy Sources Karystia S.A.".

In May, MYTILINEOS HOLDINS S.A. and MOTOR OIL announced arrival of the first private LNG cargo for the two companies, scheduled for unloading at the Revithousa LNG Terminal. of LNG From this shipment of 140,000m3 of LNG, 20,000m3 will be collected by MOTOR OIL, 70,000m3 by the MYTILINEOS Group subsidiary Aluminium of Greece, and 50,000m3 will be made available to the Public Gas Corporation (DEPA) on the same privileged terms as those applicable for the initial buyers, after a decision of the two Groups following a proposal by the DEPA.

In August. MYTILINEOS S.A. – GROUP OF COMPANIES jointly with the MOTOR OIL (HELLAS) CORINTH REFINERIES S.A. established a company under the legal name "M and M NATURAL GAS S.A.", trade name "M & M GAS Co S.A." and the commencement of its operations. The two partners will participate with a 50% stake each in the initial share capital of two million (2,000,000) Euros of the newly established company which will engage in the supply and trading of natural gas (in liquefied or other form).

As at 25/6/2010, the Company announced, its decision on withdrawal from ELVO's management, which was completed on September 2010. Since then the Board of Directors of

ELVO is comprised exclusively of representatives of the Hellenic State. In addition, to facilitate Mytilineos S.A. efforts to assist the State in consolidation and / or privatization of ELVO, it was disclosed that Mytilineos S.A., following its letter to the responsible Ministers of the State in September 2010 as well as in early February 2011, expressed its intention to place its shares under the negotiating control of the Hellenic State, promising to transfer it to the buyer that will be selected under the same terms as those applied for the shares of the Hellenic State, while empowering those responsible representatives of the State to make its blank representation in the negotiations in question. Alternatively, and to facilitate the Hellenic State to complete these procedures, it has indicated its intention to transfer all the shares it holds in ELVO against a token consideration, displaying its sincere disposition and confidence in the State efforts to provide the final solution that will ensure the best possible future for ELVO. It is to be noted that Mytilineos Group acquired its 43% stake in ELVO on August 2000 for €12,2m. Subsequently and through ELVO's capital increases on 2001 and 2003, the Group has invested €7m more, making a total amount of the investment of €19,2m, of which €15,9m have been invested from the Parent company and the rest €3,3m from a related company. From its initial investment in ELVO up to date, the Group has recognized based on its share in ELVO's results, a total loss of €6,3m, deducting this amount from the carrying amount of the investment, which as of 31/12/2010 had a carrying amount of €13m. The Group, after its withdrawal from the management of ELVO and since from 1/20/2010 has no significant influence on ELVO, it has reclassified this investment from "investments in associates" to "financial assets available for sale". According to the accounting principles, applied by the Group, when a company has no longer significant influence on an investment, it shall be measured at its fair value and shall be reclassified at this value. Upon reclassification, Mytilineos S.A. regarded as the company's fair value, its carrying amount on the time of reclassification, since it is a company whose operations depend heavily on the projects it undertakes from the Hellenic State and up to that date there was no specific plan, positive or negative, in respect of undertaking projects.

However, after the announcement of 25/2/2011 and bearing in mind that Mytilineos SA has declared its intention, if needed, to transfer its share in ELVO "for a token price", the carrying amount of the investment was fully impaired. The impairment was recognized in other comprehensive income. In case new developments occur regarding the finding of a buyer from the Hellenic State or the final transfer of the shares in ELVO to the Hellenic State, Mytilineos Group will recognize the respective difference between the consideration of the transfer and the cost of the investment, in profit and loss of the period in which it will occur.

Finally, the Group at 31/12/2010 executed an impairment test on the fair value of its "Non-current assets held for sale" and "Liabilities related to non-current assets held for sale" which

refer to the discontinued activity of its subsidiary Sometra. This test indicated an overall impairment of  $\leqslant$  45,7mil that affected accordingly the results of the reported period. The Group continuous to advantage from the process of disposal of the remaining materials which, up to 31/12/2010, has positively affected its cash flows by  $\leqslant$  31,6mil, while at the same time assesses alternative scenarios for the future utilization of its subsidiary assets.

#### 3.11 Financial instruments

Financial instrument is any contract that creates a financial asset in an enterprise and a financial liability or Equity instrument in another.

The financial instruments of the Group are classified in the following categories according to the substance of the contract and the purpose for which they were purchased.

#### i) Financial instruments valued at fair value through the income statement

These comprise assets that satisfy any of the following conditions:

- Financial assets that are held for trading purposes (including derivatives, except those that
  are designated and effective hedging instruments, those that are acquired or incurred for
  the purpose of sale or repurchase and, finally, those that are part of a portfolio of
  designated financial instruments).
- Upon initial recognition it is designated by the company as an instrument valued at fair value, with any changes recognized through the Income Statement.

In the Balance-sheet of the Group the exchanges and the assessment at fair value of derivatives they are portrayed in separate items of Asset and Liabilities with titled « Derivatives Financial Assets ». The changes at fair value of derivatives are registered in income statement.

#### ii) Loans and receivables

They include non-derivative financial assets with fixed or predefined payments which are not traded in active markets. The following are not included in this category (loans and receivables):

a) Receivables from down payments for the purchase of goods or services,

- b) Receivables relating to tax transactions, which have been legislatively imposed by the state,
- c) Any receivable not covered by a contract which gives the company the right to receive cash or other financial fixed assets.

Loans and receivables are included in current assets, except those with a maturity date exceeding 12 months from the balance sheet date. The latter are included in the non-current assets.

#### iii) Investments held to maturity

These include non derivative financial assets with fixed or defined payments and specific maturity and which the Group intends to hold until their maturity.

The Group did not hold investments of this category.

#### iv) Financial assets available for sale

These include non derivative financial assets that are either designated as such or cannot be included in any of the previous categories.

Financial assets available for sale are valued at fair value and the relevant profit or loss is booked in Equity reserves until such assets are sold or characterized as impaired.

During the sale, or when they are characterized as impaired, the profit or loss is transferred to the results. Impairment losses that have been booked to the results are not reversed through the results. The purchases and sales of investments are recognized during the transaction date, which is also the date the Group commits to purchase or sell the item. Investments are initially recognized at fair value plus costs directly related to the transaction. Costs directly related to the transaction are not added for items valued at fair value through the income statement. Investments are written-off when the right on cash flows from investments mature or is transferred and the Group has essentially transferred all the risks and rewards implied by the ownership.

The loans and receivables are recognized in amortized cost using the effective interest method.

The realized and unrealized profits or losses arising from changes in the fair value of financial assets valued at fair value through the income statement, are recognized in the profit and loss of the period they occur.

The fair values of financial assets that are traded in active markets, are defined by their prices. For non-traded assets, fair values are defined with the use of valuation techniques such as analysis of recent transactions, comparative items that are traded and discounted cash flows. The securities that are not traded in an active market that have been classified in the category Financial assets available for sale, and whose fair value cannot be determined in an accurate and reliable way, are valued at their acquisition cost.

At each balance sheet date the Group assess whether there are objective indications that lead to the conclusion that financial assets have been impaired. For company shares that have been classified as financial assets available for sale, such an indication consists of a significant or extended decline in the fair value compared to the acquisition cost. If impairment is established, any accumulated loss in Equity, which is the difference between acquisition cost and fair value, is transferred to the results.

#### 3.12 Inventories

At the balance sheet date, inventories are valued at the lower of acquisition cost and net realizable value. Net realizable value is the estimated sales price during the normal course of the company's business less any relevant sales expenses. The cost of inventories does not include financial expenses.

#### 3.13 Trade receivables

Receivables from customers are initially booked at their fair value and are subsequently valued at their amortized cost using the method of the effective interest rate, less the provision for impairment. In the event that the amortized cost or the cost of a financial asset exceeds the present value, then this asset is valued at its recoverable amount, i.e. at the present value of the future cash flows of the asset, which is calculated using the real initial interest rate.

The relevant loss is immediately transferred to the period's profit and loss. The impairment losses, i.e. when there is objective evidence that the Group is unable to collect all the amounts owed based on the contractual terms, are recognized in the income statement.

#### 3.14 Cash and cash equivalents

Cash and cash equivalents include cash in the bank and in hand as well as short term highly liquid investments such as money market products and bank deposits. Money market products are financial assets which are valued at fair value through the profit and loss account.

#### 3.15 Non-current assets classified as Held for sale

The assets available for sale also include other assets (including Goodwill) and tangible fixed assets that the Group intends to sell within one year from the date they are classified as "Held for sale".

The assets classified as "Held for sale" are valued at the lowest value between their book value immediately prior to their classification as available for sale, and their fair value less the sale cost. Assets classified as "Held for sale" are not subject to depreciation. The profit or loss that results from the sale and reassessment of assets "Held for sale" is included in "other income" and "other expenses" respectively, in the income statement.

#### 3.16 Share capital

Expenses incurred for the issuance of shares reduce, after deducting the relevant income tax, the proceeds from the issue. Expenses related to the issuance of shares for the purchase of companies are included in the acquisition cost of the company acquired.

Where any Group company purchases the Company's equity share capital (Treasury shares), the consideration paid, including any directly attributable incremental costs is deducted from equity attributable to the Company's equity holders until the shares are cancelled, reissued or disposed of. Where such shares are subsequently sold or reissued, any consideration received,

net of any directly attributable incremental transaction costs, is included in equity attributable to the Company's equity holders. Treasury stock does not hold any voting rights.

#### 3.17 Income tax & deferred tax

The tax for the period comprises current income tax and deferred tax, i.e. the tax charges or tax credits that are associated with economic benefits accruing in the period but have been assessed by the tax authorities in different periods. Income tax is recognized in the income statement of the period, except for the tax relating to transactions that have been booked directly to Equity. In such case the related tax is, accordingly, booked directly to Equity.

Current income taxes include the short-term liabilities or receivables from the fiscal authorities that relate to taxes payable on the taxable income of the period and any additional income taxes from previous periods (tax audit differences).

Current taxes are measured according to the tax rates and tax laws prevailing during the financial years to which they relate, based on the taxable profit for the year. All changes to the short-term tax assets or liabilities are recognized as part of the tax expense in the income statement.

Deferred income tax is determined according to the liability method which results from the temporary differences between the book value and the tax base of assets or liabilities. Deferred tax is not booked if it results from the initial recognition of an asset or liability in a transaction, except for a business combination, which when it occurred did not affect neither the accounting nor the tax profit or loss.

Deferred tax assets and liabilities are valued based on the tax rates that are expected to be in effect during the period in which the asset or liability will be settled, taking into consideration the tax rates (and tax laws) that have been put into effect or are essentially in effect up until the balance sheet date. In the event where it is impossible to identify the timing of the reversal of the temporary differences, the tax rate in effect on the day after the balance sheet date is used.

Deferred tax assets are recognized to the extent that there will be a future tax profit to be set against the temporary difference that creates the deferred tax asset.

Deferred income tax is recognized for the temporary differences that result from investments in subsidiaries and associates, except for the case where the reversal of the temporary differences is controlled by the Group and it is possible that the temporary differences will not be reversed in the foreseeable future.

Most changes in the deferred tax assets or liabilities are recognized as part of the tax expense in the income statement. Only changes in assets or liabilities that affect the temporary differences are recognized directly in the Equity of the Group, such as the revaluation of property value, that results in the relevant change in deferred tax assets or liabilities being charged against the relevant Equity account.

#### 3.18 Employee benefits

**Short-term benefits:** Short-term employee benefits (except post-employment benefits) monetary and in kind are recognized as an expense when they accrue. Any unpaid amount is booked as a liability, while in the case where the amount paid exceeds the amount of services rendered, the company recognizes the excess amount as an asset (prepaid expense) only to the extent that the prepayment will lead to a reduction of future payments or to reimbursement.

**Post-employment benefits:** Post-employment benefits comprise pensions or other benefits (life insurance and medical insurance) the company provides after retirement as an exchange for the employees' service with the company. Thus, such benefits include defined contribution schemes as well as defined benefits schemes. The accrued cost of defined contribution schemes is booked as an expense in the period it refers to.

#### Defined contribution scheme

According to the defined contributions scheme, the (legal or implied) obligation of the company is limited to the amount that it has been agreed that it will contribute to the entity (i.e. pension fund) that manages the contributions and provides the benefits. Thus the

amount of benefits the employee will receive depends on the amount the company will pay (or even the employee) and from the paid investments of such contributions.

The payable contribution from the company to a defined contribution scheme, is either recognized as a liability after the deduction of the paid contribution, or as an expense.

#### Defined benefits scheme

The liability that is reported in the balance sheet with respect to this scheme is the present value of the liability for the defined benefit less the fair value of the scheme's assets (if there are such) and the changes that arise from any actuarial profit or loss and the service cost. The commitment of the defined benefit is calculated annually by an independent actuary with the use of the projected unit credit method. The yield of long-term Greek Government Bonds is used as a discount rate.

The actuarial profit and losses are liability items for the company's benefits and for the expense that will be recognized in the results. Such that emerge from adjustments based on historical data and are over or under the 10% margin of the accumulated liability, are booked in the results in the expected average service time of the scheme's participants. The cost for the service time is directly recognized in the results except for the case where the scheme's changes depend on the employees' remaining service with the company. In such a case the service cost is booked in the results using the straight line method within the maturity period.

Benefits for employment termination: Termination benefits are payable when employment is terminated before the normal retirement date, or whenever an employee accepts voluntary redundancy in exchange for these benefits. The Group books these benefits when it is committed, either when it terminates the employment of existing employees according to a detailed formal plan for which there is no withdrawal possibility, or when it provides such benefits as an incentive for voluntary redundancy. When such benefits are deemed payable in periods that exceed twelve months from the Balance Sheet date, then they must be discounted based on the yields of investment grade corporate or government bonds.

In the case of an offer that is made to encourage voluntary redundancy, the valuation of benefits for employment termination must be based on the number of employees that are expected to accept the offer.

In case of an employment termination where there is inability to asses the number of employees to use such benefits, a disclosure for a contingent liability is made but no accounting treatment is followed.

#### **3.19 Grants**

The Group recognizes Government Grants that cumulatively satisfy the following criteria:

- a) There is reasonable certainty that the company has complied or will comply to the conditions of the grant and
- b) it is probable that the amount of the grant will be received.

Government Grants are booked at fair value and are systematically recognized as revenues according to the principle of matching the grants with the corresponding costs that they are subsidizing.

Government Grants that relate to assets are included in long-term liabilities as deferred income and are recognized systematically and rationally as revenues over the useful life of the fixed asset.

#### 3.20 Provisions

Provisions are recognized when the Group has present obligations (legal or constructive) as a result of past events, their settlement through an outflow of resources is probable and the exact amount of the obligation can be reliably estimated. Provisions are reviewed during the date when each balance sheet is compiled so that they may reflect the present value of the outflow that is expected to be required for the settlement of the obligation. Contingent liabilities are not recognized in the financial statements but are disclosed, except if the probability that there will be an outflow of resources that embody economic benefits is very

small. Contingent claims are not recognized in the financial statements but are disclosed provided that the inflow of economic benefits is probable.

#### 3.21 Recognition of income and expenses

**Income:** Income includes the fair value of goods and services sold, net of Value Added Tax, discounts and returns. Intercompany revenue within the Group is eliminated completely. The recognition of revenue is done as follows:

- **Construction Projects Contracts:** The income from the execution of construction contracts is accounted for in the period the project is constructed, based on its completion stage.
- **Sale of goods**: Sales of goods are recognized when the Group transfers goods to customers, the goods are accepted by them and the collection of the resulting claim is reasonably assured.
- **Provision of services**: Income from the provision of services is accounted for in the period during which the services are rendered, based on the stage of completion of the service in relation to the total services to be rendered.
- Income from assigned rights for use of tangible assets (Compensative benefits): The fair value of the assigned rights is recognized as deferred income and are amortized through the income statement according to the completion of the contracts for which these rights have been assigned.
- **Income Interest**: Interest income is recognized on a time proportion basis using the effective interest rate. When there is impairment of assets, their book value is reduced to their recoverable amount which is the present value of the expected future cash flows discounted using the initial real interest rate. Interest is then booked using the same interest rate calculated on the impaired (new book) value.
- **Dividends**: Dividends are accounted for as revenue when the right to receive payment is established.

**Expenses:** Expenses are recognized in the results on an accrued basis. The payments made for operating leases are transferred to the results as an expense, during the time the lease is used. Interest expenses are recognized on an accrued basis.

#### 3.22 Leases

**Group company as Lessee:** Leases of fixed assets with which all the risks and benefits related with ownership of an asset are transferred to the Group, regardless of whether the title of ownership of the asset is eventually transferred or not, are finance leases.

These leases are capitalized at the inception of the lease at the lower of the fair value of the asset and the present value of the minimum lease payments. Each lease payment is apportioned between the reduction of the liability and the finance charge so that a fixed interest rate on the remaining financial liability is achieved. The relevant liabilities from leases, net of financial expenses, are reported as liabilities. The part of the financial expense that relates to finance leases is recognized in the income statement during the term of the lease. Fixed assets acquired through finance leases are depreciated over the shorter of their useful life and the lease term.

Lease agreements where the lessor transfers the right of use of an asset for an agreed period of time, without transferring, however, the risks and rewards of ownership of the fixed asset are classified as operating leases. Payments made with respect to operating leases (net of any incentives offered by the lessor) are recognised in the income statement proportionately throughout the term of the lease.

**Group Company as lessor:** When fixed assets are leased through financial leasing, the present value of the lease is recognized as a receivable. The difference between the gross amount of the receivable and its present value is registered as a deferred financial income. The income from the lease is recognized in the period's results during the lease using the net investment method, which represents a constant periodic return.

Fixed assets that are leased through operating leases are included in the balance sheet's tangible assets. They are depreciated during their expected useful life on a basis consistent with similar self-owned tangible assets. The income from the lease (net of possible incentives given to the lessees) is recognized using the constant method during the period of the lease.

#### 3.23 Construction contracts

Construction contracts refer to the construction of assets or a group of affiliated assets specifically for customers according to the terms provided for in the relevant contracts and whose execution usually lasts for a period of over one fiscal year.

The expenses that refer to the contract are recognized when occur.

In the case where the result of one construction contract may not by reliably valuated, and especially in the case where the project is at a premature state, then:

- The income must be recognized only to the extent that the contractual cost may be recovered, and
- The contractual cost must be recognized in the expenses of the period in which it was undertaken.

Thus, for such contracts income is recognized in order for the profit from the specific project to equal zero.

When the result of a construction contract can be valuated reliably, the contract's income and expenses are recognized during the contract's duration, respectively as income and expense.

The Group uses the "percentage of completion" method to define the appropriate income and expense amount that will be recognized in a specific period.

The completion stage is measured based on the contractual cost that has been realized up to the balance sheet date compared to the total estimated construction cost of each project. When it is likely for the total contract cost to exceed the total income, then the expected loss is

directly recognized in the period's results as an expense.

For the calculation of the cost realized until the end of the period, any expenses related to future activities regarding the contract are excluded and appear as a project under

construction. The total cost that was realized and the profit/loss that was recognized for each contract is compared with the progressive invoices until the end of the period.

When the realized expenses plus the net profit (less the losses) that have been recognized, exceed the progressive invoices, the difference appears as a receivable from construction contract customers in the account "Customers and other receivables". When the progressive invoices exceed the realized expenses plus the net profit (less the losses) that have been recognized, the balance appears as a liability towards construction contract customers in the account "Suppliers and other liabilities".

#### 3.24 Dividend distribution

The distribution of dividends to the shareholders of the parent company is recognized as a liability in the consolidated financial statements at the date on which the distribution is approved by the General Meeting of the shareholders.

# 3.25 Proforma figure "Operating Earnings before Financial & Investment results, Tax, Depreciation & Amortization" (Group EBITDA)

Pro forma figures (EBITDA, EBITDA margin, free cash flow, net debt) are not governed by the International Financial Reporting Standards (IFRS). Thus, these figures are calculated and presented by the Group in a way that provides a more fair view of the financial performance of its Business Sectors. The Group defines "Group EBITDA" as the Operating earning before any interest income and expenses, investment results, depreciation, amortization and before the effects of any special factors. "Group EBITDA" is an important indicator used by Mytilineos Group to manage the Group's operating activities and to measure the performance of the individual segments.

The special factors that affect the Group's net profit / (losses) and EBITDA are the following:

• The Group's share in the EBITDA of associates when these are active in one of its reported Business Segments.

 The Group's share on the profit from the construction of fixed assets on account of subsidiaries and associates when these are active in one of its reported Business Segments.

It is noted that the Group financial statements, prepared according to IAS 21 and IAS 28, include:

- 1. The Group's share in the net results of associates. The amount of € -94 thousands presented in the "Income Statement" represents the Group's share in the EBITDA of ENDESA HELLAS S.A. which is active Energy Segments.
- 2. The Group's profit realized in connection with the construction of fixed assets on account of subsidiaries and associates, when these are active in one of its reported Business Segments. Such profits are deducted from the Group's equity and fixed assets and released in the Group accounts over the same period as depreciation is charged. Consequently, for the calculation of EBITDA (operational results before depreciation), the Group does not eliminate the profit from the construction of fixed assets as its recovery through their use will effect only the profit after depreciation. The amount of  $\in$  31,39 mil. presented in the "Income Statement" represents the gain from the construction of power plants on the account of ENDESA HELLAS S.A. and KORINTHOS POWER S.A.

The Group states that the calculation of "Group EBITDA" may differ from the calculation method used by other companies/groups. However, "Group EBITDA" is calculated with consistency in each financial reporting period and any other financial analysis presented by the Group. Specifically financial results contain interest income/expense, while investment results contain gains/loss of financial assets at fair value through profit and loss, share of results in associates companies and gains/losses from the disposal of financial assets (such as subsidiaries and associates).

Finally, the proforma figure "Group EBITDA" should not be confused with the figure "Earnings before income tax, financial results, depreciation and amortization" calculated for the purposes of 6/448/11.10.2007 resolution of the Hellenic Capital Committee, according to Circular No. 34, as the purpose of the latter is not to define proforma figures like EBITDA despite the familiar terminology used.

#### 4. Business Risk Management

#### 4.1 Financial Risk Factors

The Group's activities expose it to a variety of financial risks: market risk (including foreign exchange risk and price risk), credit risk, liquidity risk, cash flow risk and fair value interestrate risk. The Group's overall risk management program focuses on the unpredictability of commodity and financial markets and seeks to minimize potential adverse effects on the Group's financial performance. The Group uses derivative financial instruments to hedge the exposure to certain financial risks.

Risk management is carried out by a central treasury department (Group Treasury) under policies approved by the Board of Directors. Group Treasury operates as a cost and service centre and provides services to all business units within the Group, co-ordinates access to both domestic and international financial markets and manages the financial risks relating to the Group's operations. This includes identifying, evaluating and if necessary, hedging financial risks in close co-operation with the various business units within the Group.

#### 4.2 Financial Instruments

The Group's financial instruments consist mainly of deposits with banks, bank overdrafts, FX spot and forwards, trade accounts receivable and payable, loans to and from subsidiaries, associates, joint ventures, investments in bonds, dividends payable and lease obligations.

The financial instruments presented in the financial statements are categorized in the tables below:

	MYTILINEOS GROUP			MYTILINEOS S.A.

	766,123	505,830	505,830	80,728	95,050	95,050

The following table presents financial assets and liabilities measured at fair value in the statement of financial position in accordance with the fair value hierarchy. This hierarchy groups financial assets and liabilities into three levels based on the significance of inputs used in measuring the fair value of the financial assets and liabilities. The fair value hierarchy has the following levels:

- Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities;
- Level 2: inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices); and
- Level 3: inputs for the asset or liability that are not based on observable market data (unobservable inputs).

The level within which the financial asset or liability is classified is determined based on the lowest level of significant input to the fair value measurement.

The financial assets and liabilities measured at fair value in the statement of financial position are grouped into the fair value hierarchy as follows:

		MYTILINEOS	GROUP

**Capital Management:** The primary objective of the Group's capital management is to ensure the continuous smooth operation of its business activities and the achievement of its growth plans combined with an acceptable credit rating. For the purpose of capital management, the Group monitors the ratios "Net Debt to EBITDA" and "Net Debt to Equity". As net debt, the Group defines interest bearing borrowings minus cash and cash equivalents, plus the Group's share in the net debt of ENDESA Group. The ratios are managed in such a way in order to ensure the Group a credit rating compatible with its strategic growth.

The table bellow presents ratio results for the years December 31, 2010 and 2009 respectively:

	MYTILINEOS	GROUP
	2010	2009
(Amounts in thousands €)		
Long-term debt Short-term debt Cash and cash equivalents	562,053 132,846 (208,587)	522,046 128,035 (219,161)

group uer gent / corr i	0.50	0.56

The Company does not manage its capital on Company level but only on a Group level.

#### 4.3 Market Risk

#### (i) Foreign Exchange Risk

The Group is activated in a global level and consequently is exposed to foreign exchange risk emanating mainly from the US dollar. This kind of risk mainly results from commercial transactions in foreign currency as well as net investments in foreign entities. For managing this type of risk, the Group Treasury Department enters into derivative or non derivative financial instruments with financial institutions on behalf and in the name of group companies. In Group level these financial instruments are characterized as exchange rate risk hedges for certain assets, liabilities or foreseen commercial transactions.

#### (ii) Price Risk

The Group's earnings are exposed to movements in the prices of the commodities it produces, which are determined by the international markets and the global demand and supply.

The Group is price risk from fluctuations in the prices of variables that determine either the sales and/or the cost of sales of the group entities (i.e. products' prices (LME), raw materials, other cost elements etc.). The Group's activities expose it to the fluctuations of the prices of Aluminium (AL), Zinc (Zn), Lead (Pb) as well as to Fuel Oil as a production cost.

Commodity price risk can be reduced through the negotiation of long term contracts or through the use of financial derivatives.

#### (iii) Interest rate risk.

Group's interest bearing assets comprises only of cash and cash equivalents. Additionally, the Group maintains its total bank debt in products of floating interest rate. In respect of its exposure to floating interest payments, the Group evaluates the respective risks and where deemed necessary considers the use of appropriate interest rate derivatives. The policy of the Group is to minimize interest rate cash flow risk exposures on long-term financing.

#### **Effects and Sensitivity Analysis**

The effects of the above risks at the Group's operating results, equity, and net profitability are presented in the table below:

				2010 2009				
		Sensitivity	Effect on EBITDA	Effect on Profit after Tax	Effect on Equity	Effect on EBITDA	Effect on Profit after Tax	Effect on Equity
LME AL (Aluminium)	\$/tn	+ - 50\$/tn	+ - 4,44mio €	+ - 4,44mio €	+ - 2,44mio €	+ - 2mio €	+ - 2mio €	+ - 0mio €
LME Zn (Zinc)	\$/tn	+ - 50\$/tn						
LME Pb (Lead)	\$/tn	+ - 50\$/tn						
Oil	\$/tn	+ - 50\$/tn	- + 3,4mio €	- + 3,4mio €	- + 3,4mio €	- + 6.6mio €	- + 6.6mio €	- + 6.6mio €
Parity €/\$		+ - 0.05	- + 9,23mio €	- + 10,17mio €	- + 10,85mio €	- + 6,54mio €	- + 6,46mio €	- + 6,46mio €

It is noted that an increase of five (5) basis points presume a decrease of 45,8 mil. € on net results and Equity.

The Group's exposure in price risk and therefore sensitivity may vary according to the transaction volume and the price level. However the above sensitivity analysis is representative for the Group exposure in 2010.

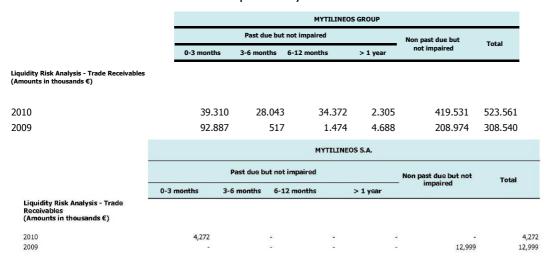

#### 4.4 Credit Risk

The Group has no significant concentrations of credit risk with any single counter party. Credit risk arises from cash and cash equivalents, derivative financial instruments and deposits with banks and financial institutions, as well as credit exposures to wholesale customers, including outstanding receivables and committed transactions. Concerning trade accounts receivables, the Group is not exposed to significant credit risks as they mainly consist of a large, widespread customer base. All Group companies monitor the financial position of their debtors on an ongoing basis.

The Group also has potential credit risk exposure arising from cash and cash equivalents, investments and derivative contracts. To minimize this credit risk, the Group operates within an established counterparty policy approved by the Board of Directors, which limits the amount of credit exposure to any one financial institution. Also, as regards money market instruments, the Group only deals with well-established financial institutions of high credit standing.

The tables below summarize the maturity profile of the Group's financial assets as at 31.12.2010 and 31.12.2009 respectively:

#### 4.5 Liquidity Risk

Liquidity risk is related with the Group's need for the sufficient financing of its operations and development. The policy of the Group is to minimize interest rate cash flow risk exposures on long-term financing. Liquidity risk is managed by retaining sufficient cash and immediately

liquidated financial assets as well as sufficient credit lines with Banks and Suppliers in relation to the required financing of operations and investments.

The tables below summarize the maturity profile of the Group's financial liabilities as at 31.12.2010 and 31.12.2009 respectively:

#### 4.6 Hedging Accounting

The Group uses Derivative financial instruments such as Commodity Futures and Currency Forwards in order to mitigate the risk related to its business activities along with the risk related to the funding of such activities.

At inception of the hedging transaction, the Group validates the hedging relationship between the underlying and the hedging instrument as far as its risk management strategy is concerned. The Group also verifies the hedging efficiency from the beginning of the hedging relationship and on a continuing basis.

All derivative financial instruments are initially recognized at fair value as at the date of settlement and are valued on a mark - to - market basis on each balance sheet date. The result of this valuation is recognized as an asset when positive and as a liability when negative. When a derivative financial instrument is no longer regarded as hedging instrument any difference in its fair value is recognized in profit and loss.

#### There are three kinds of hedges:

#### Fair Value Hedging

Fair value hedging is regarded when hedging the exposure in the fluctuations of the fair value of a recognized asset, liability, contingent liability or part of them that could have a negative impact on results.

When hedging accounting, concerning fair value hedge, is followed then any profit or loss from revaluation is recognized in profit and loss.

#### **Cash Flow Hedging**

The Group enters into Cash Flow Hedging transactions in order to cover the risks that cause fluctuations in its cash flows and arise either from an asset or a liability or a forecasted transaction.

On revaluation of open positions, the effective part of the hedging instrument is recognized directly in Equity as "Hedging Reserve" while the ineffective part is recognized in Profit & Loss. The amounts recognized in Equity are transferred in profit and loss at the same time as the underlying.

When a hedging instrument has expired, sold, settled or does not qualify for hedging accounting all accumulated profit or loss recognized in Equity, stays in Equity until the final settlement of the underlying. If the underlying is not expected to be settled then any profit or loss recognized in Equity is transferred to profit and loss account.

#### **Hedging of a Net Investment**

Hedging of a foreign investment is regarded for accounting purposes in a way similar to cash flow hedging.

The effective part of the hedging result is recognized directly in Equity while any ineffective part is recognized in profit and loss. Accumulated profit or loss recognized in Equity is transferred in profit and loss account at the time of disposal of the investment.

#### **Determination of Fair Value**

The fair value of financial instruments trading in an active market is defined by the published prices as of the date of the financial statements.

The fair value of financial instruments not traded in active market is defined through the use of valuation techniques and assumptions based on relevant market information as of the date of the financial statements.

#### 5. Segment reporting

MYTILINEOS Group is active in three main operating business segments: Metallurgy, Constructions and Energy. In identifying its operating segments, management generally follows the Group's service lines, which represent the main products and services provided by the Group. Each of these operating segments is managed separately as each of these service lines requires different technologies and other resources as well as marketing approaches. The adoption of IFRS 8 has not affected the identified operating segments for the Group compared to the recent annual financial statement.

#### Segment's results are as follows:

Amounts in thousands €)	Metallurgy	Constructions	Energy	Others	Discontinuing Operations	Total
1/1-31/12/2010						
otal Gross Sales	528,790	613,704	16,779	-	(9,421)	1,149,85

The Group performs impairment tests for goodwill on an annual basis. The recoverable amount of the recognized goodwill, was assessed using their value in use. The "value in use"

was determined based on management estimates that were verified by an independent valuator. For the calculation of the value in use the discounted cash flows method was used.

Other	2	-	-	<u>-</u>	E	-
Total	2,329	-	56,978	2,279	129,205	-

All derivatives open positions have been mark to market. Fair values of the "interest rate swaps", are confirmed by the financial institutions that the Group has as counterparties.

The Group manages the exposure to currency risk through the use of currency forwards and options and thus by "locking" at exchange rates that provide sufficient cash flows and profit margins. Furthermore, the Group manages the exposure to commodity risk through the use of:
a) commodity futures that hedge the risk from the change at fair value of commodities and b) commodity swaps that hedge fluctuations in cash flows from the volatility in aluminum prices

#### 6.11 Financial Assets at fair value through profit & loss

The weighted average interest rate is as:	an acceptance	100.000.000.000				
Deposits EUR	1.60%	2.23%	3.20%			
Deposits USD	0.76%	1.67%	2.50%			

Group's cash management involves deposits in Euro or foreigner currency and in overnight Libor-Euribor interest rates. Interest received underlies a 10% taxation.

## 6.13 Total Equity

### i) Share capital

The total amount of the Company's share capital amounts to 125.173.241,66 Euro divided into 116.984.338 intangible, common registered voting shares of a new nominal value 1,07 Euro each. The share capital of the Company did not alter within the current (2010) or previous year (2009).

At a Group level, a Share Capital increase of 2.209.559 € is recorded, which is due to the full consolidation of the newly established company "DESFINA SHIPPING COMPANY" which has common management with "MYTILINEOS S.A."

### ii) Share Based Payments to Members of the Board of Directors and Executives

By the General Meetings resolutions of 14.6.2006 and 14.9.2007, the Shareholders of the Company approved a stock option plan for the members of the Board of Directors and certain executives of the Mytilineos Group. The main provisions of the stock option plan are as follows:

- The Board of Directors issues stock option certificates within the period of the next 3 to five years.
- The maximum strike price is equal to the 80% of the average share price of six trading months preceding the relevant Shareholders' Annual General Meeting.
- Eligible individuals are members of the Board of Directors, certain executives and other employees that have a minimum of service in the Company.
- The maximum number of stocks issued by options vested is 3% of the total number of stocks.
- Options vest at 20% in 2007, 30% in 2008 and 50% in 2009.
- Options are not tradable or transferable.
- Options vested can be exercised within the first twenty days of December of the year they vest.

The stock option plan is realized by cash payments from the beneficiaries.

The following table illustrates the stock options vested in 2009 and 2008:

	31/12/2009	31/12/2008
Stock Options vested - outstanding at the beginning of the year	171.715	16.915
Stock Options vested	258.000	154.800
Stock Options exercised		
Stock Options vested - outstanding at the end of the year	429.715	171.715
Stock Options to be vested in forthcoming years		258.000
Total stock options outstanding at the end of the year	429.715	429.715

The amount of stock options that will vest within the forthcoming years per year of vesting and per exercise price has as follows:

Number of share ontions

		INU	illiber of share option	113
<b>Vesting Date</b>	<b>Exercise price</b>	Group	Mytilineos S.A.	Subsidiaries
2007	12,70	16,915.00	9,258.60	7,656.40
2008	12,70	154,800.10	83,763.10	71,037.00
2009	12,70	258,000.10	139,605.10	118,395.00
		429,715.20	232,626.80	197,088.40

The fair value of the stock options is estimated at the award date using the Black-Scholes option pricing model. The inputs to the model used for the valuation of stock options awarded in 2007 are as follows:

# MYTILINEOS

- a) Share Price at award date Euro 13,92
- b) Risk-free interest rate 4,48%
- c) Dividend yield 1,97%
- d) Stock Volatility 28%
- e) Expected life of option 3 years

Based on these inputs the model produced a value of Euro 3,0088 per each stock option awarded in 2009.

The plan lapsed on 31.12.2009. The outstanding options were not exercised by the beneficiaries.

According to IFRS 2 par.23, having recognised the goods or services received and a corresponding increase in equity, the entity shall make no subsequent adjustment to total equity after vesting date. Therefore, even though the stock options were not exercised, the Company shall not subsequently reverse the amount recognised for services received from the beneficiaries of the plan.

### 6.14 Reserves

Reserves in the financial statements are analyzed as follows:

	MYTILINEOS GROUP							
(Amounts in thousands €)	Regular Reserve	Special & Extraordinary Reserves	Tax-free and Specially taxed Reserves	Revaluation reserves	Stock Option Plan Reserve	Total		
Opening Balance 1st January 2009,acc								
ording to IFRS -as published-	19.310	36.680	91.462	221	508	148.181

Closing Balance 31/12/2010	55,572	25,177	13,052	172		1,225	95,198

The majority of the above reserves relates to Parent Company and Greek subsidiaries. Under Greek corporate law, corporations are required to transfer a minimum of 5% of their annual net profit as reflected in their statutory books to a legal reserve, until such reserve equals one-third of the outstanding share capital. The above reserve cannot be distributed throughout the life of the company.

Tax free reserves represent non distributed profits that are exempt from income tax based on special provisions of development laws (under the condition that adequate profits exist for their allowance). These reserves mainly relate to investments and are not distributed.

Specially taxed reserves represent interest income and income from disposal of listed in the Stock Exchange and non listed companies and are tax free or tax has been withheld at source. Except for any tax prepayments, these reserves are exempted from taxes, provided they are not distributed to shareholders.

## 6.15 Loan liabilities

(Amounts in thousands €)	31/12/2010	31/12/2009	31/12/2008	31/12/2010	31/12/2009	31/12/2008

### **6.18 Provisions**

Provisions referring to Group and Company are recognized if the following are met: (a) legal or implied liabilities exist as a consequence of past events, (b) there is a possibility of settlement that will require the outflow if economic benefits and (c) the amount of the liability can be measured reliably. More specifically, the Group recognizes provisions for environmental restorations as a result of exploitation of mineral resources processed mainly for the production of Alumina and Aluminum. All provisions are reviewed at each balance-sheet date and are adjusted accordingly so that they reflect the present value of expenses that will be required for the restoration of the environment. Contingent receivables are not recognized in the financial statements but are disclosed if there is a possibility of an inflow of economic benefits.

## **6.27 Consolidations of companies**

Since the  $2^{nd}$  of June, MYTILINEOS HOLDINGS S.A. has become the sole shareholder of ENDESA HELLAS PRODUCTION AND TRADE OF ELECTRICAL POWER S.A., which is now renamed into PROTERGIA PRODUCTION AND TRADE OF ELECTRICAL POWER S.A. The acquisition of the full control of ENDESA HELLAS marks MYTILINEOS HOLDINGS S.A. establishment as the country's largest independent energy producer with a portfolio of 1.2 GW of installed capacity from thermal plants in operation by 2011 and over 1,000 MW RES in different stages of development. The total price of the acquisition, as it has been determined, amounts to €140 million and is being paid in instalments as follows: € 60 mil on 1.7.2010 and € 40 mil for each 2011 and 2012. On a Group level, a negative goodwill of € 51,5mil. was recognized.

The fair values of identifiable assets and liabilities related to the Group, the total consideration (cost) of acquisition and the resulting goodwill recognized are summarized as follows:

(Amounts in thousands €)

	Fair Value at Acquisition Date (1 July 2010)

## Income Tax (Extraordinary) L. 3845/2010

According to Law 3845/2010, an extraordinary income tax was charged to profitable Greek companies based on the total net profit of financial year 2009.

## **6.29 Earnings per share**

Basic earnings per share are calculated by dividing net profit for the year attributable to shareholders by the weighted average number of ordinary shares in issue during the year, excluding ordinary shares purchased by the Company and held as treasury shares.

	MYTILINEOS (	GROUP	MYTILINEO	S S.A.
Amounts in thousands €)	1/1-31/12/2010 1/1	-31/12/2009 1/:	1-31/12/2010 1/:	L-31/12/2009
Equity holders of the parent	60,863	13,726	(13,886)	(941

## **6.31 Discontinued Operations**

As a consequence of the 31 December 2009 resolution of the Extraordinary General Meeting of the shareholders of "ALUMINION S.A." for the recalling of the plan for the de-merger of "ALUMINION S.A." by the merger of its assets and liabilities with the companies "ALUMINION OF GREECE S.A." and "ENDESA HELLAS S.A.", the energy assets and licenses of the company are not presented anymore separately as Non-current Assets and Liabilities held for sale (see note 3.10).

The Group applies IFRS 5 "Non-current assets held for sale & discontinues operations", and presents separately the assets and liabilities of the subsidiary company SOMETRA S.A., following the suspension of the production activity of the Zinc-Lead production plant in Romania, and presents also the amounts recognized in the income statement separately from continuing operations. The Group re-presents the income statement and cash flow for the prior period presented in the financial statements so that the disclosures relate to all operations that have been discontinued by the end of the reporting period for the latest period presented.

Following is presented the analysis of the relevant assets and liabilities as well as the profit and loss of the discontinued operations.

<sup>(\*)</sup> Companies founded in 2010
(\*\*) Tax settlement till 2009 according to L. 3888/2010

MYTILINEOS

The subsidiary EKME was tax audited by the authorities for the financial years 2005 to 2008. The additional tax charge amounted to  $\leq$ 160 thousands.

In July 2009, tax authorities' inspection assessed tax differences for the subsidiary company ALOUMINIO S.A. for the fiscal years 2006 to 30.06.2008, amounting to  $\in$  3 mil. The accumulated provision of the company as at 30.09.2009 amounts to  $\in$  2,1 mil.

In November 2009, tax authorities commenced the inspection of the subsidiary company THORIKI for the fiscal years 2006 to 200 which was completed in March 2011. The additional tax charge amounted to  $\leq 1,5$  mil. The company had already recognized in 2009 a provision for tax differences of an amount of  $\leq 890$  thousands.

In September 2010 commenced the tax audit for the subsidiary ALUMINIO SA for the financial years 2005 to 2009. The additional tax charge will amount to  $\[ \in \] 2,4$  mil. The company had already formed a provision for tax differences of an amount of  $\[ \in \] 2,15$  mil. The total tax effect on 2010 results amounted to  $\[ \in \] 1,6$  mil.

For the fiscal years that have not been inspected by the tax authorities (as reported in the above table), there is a possibility of additional tax imposition. Therefore the Group assesses, on an annual basis, the contingent liabilities regarding additional taxes from tax inspections in respect of prior years and makes relevant provisions where this is deemed necessary. The Management assesses that apart from the recorded provisions which as at 31.12.2010 amount to  $\le 4,3$  mil., any tax differences that may arise in the future will not have a material impact on the financial position, results and cash flows of the Group.

### **Other Contingent Assets & Liabilities**

The subsidiary company "ALUMINION S.A" (hereinafter called the "Subsidiary") has filed a lawsuit against the Public Power Company (PPC) (hereinafter called the "Supplier") regarding the validity of the termination of the initial electricity supply contract by the latter. In addition, "ALUMINION S.A." disputes the validity of the increase of electricity supply prices enforced by the Supplier in July 2008 by virtue of the relevant Ministerial decree (Ministry of Development) regarding the abolishment of regulated invoices for the high voltage customers and the

obligation of the Supplier to negotiate with said customers subject to a ceiling of a 10% increase on the effective up to 30/6/2008 invoice.

More specifically the Subsidiary disputes the electricity pricing from the Supplier in total as it has not resulted from any negotiations, as provided by the Ministerial decree, while in effect it is a variation of the already revoked former industrial tariff with a flat 10% increase. Moreover, the position of the Subsidiary is as such:

- it disputed from the very beginning the unilaterally imposed 10% increase, requesting the issuance of a credit note form the Supplier. Following the Supplier's reluctance to issue such an invoice the Subsidiary proceeded with the issuance of such credit note itself.
- it accepted with reservations the rest of the invoiced amount acting in good faith and for a transitional period until the final conclusion of the negotiations that the two parties should have entered into. However, as the reasonable time for the two parties to enter in negotiations had elapsed, the Subsidiary disputes actively the total of the invoice.

Moreover, the Subsidiary and the Supplier, following respective BOD decisions, referred the resolution of the above-mentioned dispute to Arbitration before the President of the Supreme Court of Greece to resolve on the interpretation of the relevant Ministerial Decree. More specifically, whether the 10% increase over the former tariff, has been legally imposed, without prior negotiations of the parties involved, as well as whether the Supplier had the right and/or the obligation to enter into negotiations with the Subsidiary regarding the terms of their power supply contract, especially referring to the pricing mechanism, with the cap of a price equal to the former tariff increased by 10% and without any floor.

In compliance with the contents of the Arbitration Court Ruling issued on 25.02.2010 - between the Greek "Public Power Corporation (PPC) S.A." and "ALUMINIUM S.A."-, the 100% subsidiary "ALUMINIUM S.A." will enter into negotiations with the PPC S.A. under the principles of good faith and commercial values. The aim of the negotiations which commenced on the 23<sup>rd</sup> March 2010 will be to reach an agreement of the terms under which PPC will supply electricity power to ALUMINIUM S.A. to cover fully or partly the needs of our subsidiary and to settle the transactions between the two parties for the period from 01.07.2008 to the date of the final agreement.

MYTILINEOS

Considering the aforementioned Ministerial decree and the above Court Ruling, the Management of ALUMINIUM S.A. estimated the maximum contingent liability towards PPC for the period 01.07.2008 – 31.12.2009 and was posted as a provision in the results of the period.

On 4.8.2010, the negotiations between the PPC and our ALUMINIUM S.A. have established a framework for agreement, based on which the two companies will proceed to sign a new agreement regarding the supply of electrical power between ALUMINIUM S.A. and the PPC. However, until today the two parties have not entered into a final agreement. The agreement provides for the supply by PPC to ALUMINIUM S.A. of a total of 4,710 hours of electrical power at a tariff of  $\leq$ 40.7/MWh. For the remaining period of time, ALUMINIUM S.A. will supply itself the electrical power needed to cover its requirements. The duration of the agreement is set to 25 years, however a provision is also included for renegotiation of its terms after 31/12/2013, depending on the conditions that will prevail in the energy market at that time and on the respective  $CO_2$  emission rights. Finally, having this framework into force since 1.7.2010, a mutually beneficial solution is established for the settlement of the obligations between the two companies.

Finally, this frame agreement may be effected retrospectively, from 1/7/2010, while also it established the mechanism for the repayment of the balance of ALUMINIUM SA to PPC as of 30/6/2010, amount to 82,6 m $\in$ . Specifically, the agreement between the two parties provides for a down payment, of 20 m $\in$ , from ALUMINIUM SA to PPC, while at the same time PPC will return to ALUMINUM the amount of 9,1 mil  $\in$  corresponding to the open balance of the advances held according the old contract. Thereafter, the agreement provides monthly payments, amount to:

€ 1m if the average monthly LME price is up to \$ 2,500 / tn,

€ 1,5 m if the average monthly LME price is between 2,500 and \$ 3,000 / tn

€ 2m if the average monthly LME price is above \$ 3,000 / tn

The above instalments bear interest equal to the average monthly Euribor plus 1% and have duration until December 2013.

The finalization of the above agreement and sign of a new power supply contract is subject to the regulatory control and approval of the Energy Regulatory Authority, to which the BOD's of the two parties have submitted their draft agreement. Furthermore, the enforcement of this agreement has as a prerequisite the final settlement of various regulatory issues associated either with the process of electricity purchasing directly from Aluminium or the relevant

ministerial decisions to validate the codes that will allow the issuance of the commercial operation license of the cogeneration plant.

Pending the above, both parties agreed on 16/12/2010 to apply retrospectively from 1/7/2010 the new pricing agreement as follows:

- 40,7 € / MWh for the monthly equivalent of a total of 4,710 hours per year

The System Marginal Price for the monthly equivalent of the remaining 4050 hours per year. Additionally, the two parties agreed on the enforcement of the repayment mechanism for the balance of 82,6 mil € through the down payment of € 20mil from ALUMINIUM to PPC as well as the repayment of the monthly instalments, amount to 1 m€ from 1/7/2010 until 30/11/2010. In the context of the above mentioned agreement of the two parties for the retrospective enforcement of the new agreement, ALUMINIUM has charged its income statement, for the period 1/7 - 31/12/2010 and regarding its electricity consumption cost, the amount of € 63mil. As for the year 2009 and the period 1/1 - 30/6/2010, the total amount charged for electricity cost is on the basis of the same price in € / MWh with the one agreed between the parties for the balance of 30/6/2010.

Therefore, up to 31/12/2010, there are no contingent liabilities that may arise for ALUMINUM exceeding the amounts already recognised in its financial statements. Finally, after the enforcement of the repayment mechanism for the balance of 30/6/2010 and the regular monthly payments of the agreed instalments as well as the amount corresponding to the monthly electricity consumption, there are no overdue amounts from ALUMINIUM to PPC.

## 6.36 Dividend Proposed and Payable

Regarding the distribution of dividends, the Board of Directors proposes that no dividend is to be distributed due to losses recorded in 2010. This proposal is subject to the approval of the General Assembly.

### **6.39 Post Balance Sheet events**

In February 2011 "M and M Natural Gas S.A.", the company established jointly with MOTOR OIL CORINTH REFINERIES S.A. and operating under the trade name "M & M Gas Co S.A.", has obtained from the Ministry of Environment, Energy and Climate Change a licence for the supply of natural gas. This licence grants to "M&M GAS" the right to sell natural gas to eligible customers, in accordance with the provisions of Law 3428/2005. The licence has been issued for a term of 20 years.

In February 2001 MYTILINEOS HOLDINGS and the subsidiaries METKA SA and PROTERGIA SA moved to new offices at 8 ARTEMIDOS St in Maroussi, in order to enhance the synergies between the Group companies.

There are no other significant subsequent events, apart from the abovementioned, which should be announced for the purposes of I.F.R.S.
