F. Notes to the Interim Financial Statements

1. General Information

The Limited Corporation H. BENRUBI and SON, is a company specializing in Household and Institutional products (and hereinafter referred to as "The Company" or the "Parent") and its subsidiaries (hereinafter referred to as "The Group") are active in the field of home and professional equipment. The Company and the Group's registered offices are at Paradissos Maroussi, at 27 Agiou Thomas Street and the Company's url is: [http:// www.benrubi.gr](http://www.benrubi.gr).

The Company's shares - common and registered - are listed on the Main Market of the Athens's Stock Exchange.

The Company's scope includes the following:

The provision, by any means, of distribution, transportation and storage services concerning all sorts of goods, products or other relevant commercial services, or the organization and provision of services in general.

- The import, export and trade of home equipment goods and the establishment of a production unit of such goods.
- The purchase, sale, utilization and exploitation in any way of any sort of real property, found within national territory or even abroad.
- The management and exploitation of real property belonging to the company or third parties.
- The construction of multi or one storied buildings, built on privately owned land or on land owned by third parties, with the objective to either proceed with the sale of the property devolving to the company or hold such buildings as real property belonging to the company, that shall be properly exploited.
- The participation of the company to other companies, of any legal form that are active in relevant business activities.
- As well as to conduct any task, or any sort of relevant work or activity that is deemed directly or directly necessary, or considered suitable or advisable for the attainment of the above mentioned objectives.

In realizing its objective the company may:

- A.** Participate to invitations to tender or public sales pertaining to the Public Sector or any sort of public, municipal or communal enterprises, organizations or banking institutions as well as any sort of legal entities pertaining to both public or private law.
- B.** Participate in any company that has the same or relevant objective, of any business form.
- C.** To create branches, annexes or offices anywhere.
- D.** To cooperate with any natural or legal entity, in any way and
- E.** To represent any other third company, of Greek or foreign interests pursuing the same or relevant business activity.

Also, the Company may move forward with any further relevant activity in order to pursue its scope, within the framework of the present Articles of Incorporation and the provisions in force”.

Responsible for the compilation and the accuracy of the data included in the interim financial statements prepared on 17 November 2009 are Mrs Benrubi Alikı, Vice President & Managing Director, Executive Director of the BOD and Mr Giannakopoulos Dimitris, General Manager, Executive Member of the BOD.

The Interim Financial Statements for the period ended 30 September 2009 have been approved by the Board of Directors of the Company on 17 November 2009

Composition of the Board of Directors

Benrubi Sam	President, Executive Member
Benrubi Alikı	Vice President & Managing Director, Executive Member
Giannakopoulos Dimitris	Executive Member
Benrubi Nora	Non-Executive Member
Papathanasiou Maria	Non-Executive Member
Kritsotakis Emmanouil	Independent Non-Executive Member
Olympios Ioannis	Independent Non-Executive Member

2. Accounting principles used by the Group

The Interim Financial Statements of the Parent and the Group as of 30.09.2009 and 30.09.2008 have been prepared in accordance with the same accounting principles deriving from the application of I.A.S / I.F.R.S. These accounting principles are listed below.

2.1. Basis of preparation of Interim financial statements

The interim financial statements of the Company and Group for the 01.01.2009 to 30.09.2009 period have been drawn up according to International Accounting Standard (IAS) 34 “Interim Financial Statements”.

The accounting principles and methods used to prepare and present the interim financial statements of 30.09.2009 are the same as the ones used to draw up the annual financial statements of the Company and Group on 31.12.2008.

The financial statements have been drawn up based on the historical cost principle, as amended by re-evaluating the real estate, the investments in real estate and the financial assets available for sale.

The drawing up of financial statements according to the IFRSs requires the use of evaluations and judgement in applying the accounting principles.

Despite the fact that the evaluations are based on the best possible knowledge of the Group's Management, the actual results may after all turn out to be different from these evaluations.

2.2. Consolidation of subsidiaries and accounting principles applied in the drawing up of the financial statements after the merger of “H. Benrubi & Son S.A.” and “Electrolink S.A.”

Consolidation of subsidiaries

Subsidiaries are the companies upon which control is exerted by the Parent company. The subsidiaries are fully consolidated (full consolidation method) from the date when control is assumed on them and cease to be consolidated from the date when the control ceases to exist.

The buy-out of subsidiaries by the Group is recorded on the basis of the buy-out method. The acquisition cost of a subsidiary is the reasonable value of the assets provided, of the shares issued in exchange of the control of the subsidiaries, and of the liabilities undertaken on the date of the transaction, plus any cost directly linked to the transaction.

The buy-out cost, except for the net reasonable value of the distinct assets and liabilities acquired, is recorded as consolidation surplus. After its initial recording, the consolidation surplus is measured at cost minus any cumulative deduction liability. If the overall cost of the buy-out was lower than the reasonable value of the individual assets acquired, the difference is recorded straight to the results. Minority interest is recorded in the own funds, separately from the own funds of the Parent company's shareholders, to their proportion in the reasonable value. Minority interest in the Group results is also entered separately.

The results of the subsidiaries being bought-out or sold within the financial year, are included in the consolidated profit and loss statement from or up to the buy-out or sale date respectively. The consolidated financial statements include all the subsidiaries of the Parent company. An exemption from the consolidation may be possible in the cases where there are indications that : a) the control

is intended to be temporary, i.e. the subsidiary has been acquired with the purpose of later reselling it within 12 months from its acquisition and b) the management is actively seeking a buyer.

All intercompany transactions, intra-company transfers and expense, intra-company balances and the floating profit and loss from transactions between Group companies are to be left out. The financial statements of the subsidiaries are drawn up having the same reference date as the Parent company and they have been suitably adjusted so as to be drawn up in a uniform manner on the basis of the Group's accounting principles.

Accounting principles followed in the drawing up of the financial statements after the merger of "H. Benrubi & Son S.A." and "Electrolink S.A."

The Boards of Directors of "H. BENRUBI & SON S.A." and "ELECTROLINK S.A.", at their meeting of 29.12.2008, unanimously decided the merger by absorption by the first company, according to the provisions of Regulatory Law 2190/20 and of L.2166/93, of its subsidiary at 100% "ANONYMOUS COMMERCIAL COMPANY OF ELECTRICAL & HOME APPLIANCES – ELECTROLINK S.A." under service mark "ELECTROLINK S.A."

The date of issue of the Transformation Balance Sheet of the merged company has been set to be the 31st.12.2008.

By decision of the Boards of Directors of the two companies, it has been decided to approve the 02.02.2009 Draft Merger Contract, as follows:

The Absorber's share capital amounts to 8,430,420.18 Euros and it is divided into 9,264,198 registered ordinary voting shares with a nominal value of 0.91 Euros each.

The share capital of the Company Absorbed amounts to 297.500 Euros, divided into 170,000 ordinary bearer shares with a nominal value of 1.75 Euros each.

The Absorber, "H. BENRUBI & SON S.A.", holds 100% of the shares of the Company Absorbed, "ELECTROLINK S.A.", which it lists in its books as an asset under "Investments in subsidiaries" with an acquisition value of 2,579,604.20 Euros.

There is going to be no increase of the share capital of Absorber "BENRUBI"; instead, the shares of the Company Absorbed, "ELECTROLINK S.A.", will be cancelled to prevent confusion, as the Absorber holds 100% of the shares of the Company Absorbed and their acquisition value is greater than the share capital of the Company Absorbed. The assets of the Company Absorbed shall, after the completion of the merger, take their place among the Absorber's assets.

Ministry of Development Decision no. K2-4508/07.05.2009, which approved the merger by absorption of "Electrolink S.A." by "H. Benrubi & Son S.A.", was listed in the S.A. Registry on 07.05.2009.

From the date of merger completion cited above, Absorber "BENRUBI" assumes by right and without any other formality all the rights and obligations of the company absorbed, and this transfer

has the same status as a full succession. Any pending trials involving the Company Absorbed shall proceed by right by the Absorber or against it, without a more specific phrasing as to their continuation.

There are no Company Absorbed shareholders with special rights, or any shareholders holding titles other than ordinary shares.

No special advantages to Board of Directors members or to the regular auditors of the companies merged are stipulated by the Articles of association of the said companies, or by decisions of their General Shareholders Meetings, nor are there such advantages provided by this merger.

On the basis of the above, in order to proceed to draw up the financial statements dated 01.01.2008, we point out the following as concerns the accounting principles followed:

a) The mergers of companies under joint control are not included in the application of IFRS 3 (on the basis of exceptions in paragraph 3 of IFRS 3) and no instructions concerning such transactions are stipulated in the International Financial Reporting Standards. The Management, according to paragraphs 10 to 12 of IAS 8 "Accounting Policies, Changes in accounting estimates and Errors" (which, among other things, stipulate that "In the absence of a standard or interpretation that specifically applies to a transaction, other event or condition, the management shall use its judgement in developing and applying an accounting policy that results in information that is relevant to the economic decision-making needs of users and reliable"), has used its judgement and implemented the accounting policies accepted by the Financial Accounting Standards Board (FAS 141R Business combinations § D8-D14) regarding company mergers (merger accounting method or pooling of interests method).

b) According to the pooling of interests method, the assets and liabilities of the merged companies are recorded in their book value before the absorption, acknowledging absolutely no consolidation surplus from the absorption.

c) The financial statements of "H. Benrubi & Son S.A." after the absorption include the profits and losses for the 01.01.2009 – 30.09.2009 period, including the results of the same period for the company absorbed, "Electrolink S.A.". The transfer of the net position of the company absorbed was carried out on 31.12.2008. All the intracompany transactions in the assets, liabilities, revenue and expenses for the 01.01.2009-30.09.2009 period have been crossed out.

The Company's Financial Statements present the assets and liabilities on 31.12.2008, also including the financial figures and information of the company absorbed, "Electrolink S.A.", as these figures stood on that date. Given that the company absorbed was being consolidated before the merger as well, the companies being merged were already following the same accounting principles and methods, and thus no adjustment was required to the sums transferred in terms of the assets and liabilities from the company absorbed to the absorber.

d) The pooling of interests method requires the rephrasing of the financial statements for the reference period, so as to render them comparable to those of the current period. This is the reason why the company proceeded to rephrase the financial statements of the 01.01.2008 to 30.09.2008 period.

The analyses and financial information regarding the previous period of 01.01.2008-30.09.2008 have been adjusted retrospectively to provide comparative information. All those of the financial statements of the reference period which have been rephrased show that the financial information of the company absorbed have been consolidated. More specifically, in the results referring to the Company for the 01.01.2008-30.09.2008 period, the results of "Electrolink S.A." are also included. All the intracompany transactions of revenue and expenses have been crossed out.

e) One of the most important principles adopted by the International Financial Reporting Standards is that of substance over form, which leads to the depiction of the economic substance of the facts and transactions, and not just of the legal form thereof. Therefore, in any case, the Group's Financial Statements must not be affected by the merger of companies within the Group, except by the percent at which the overall share composition changes (change in the Minority Interest in case the proportions of parent company shareholders and of the minority on the subsidiaries change after the merger as opposed to the proportions before the merger). There is no such issue in this case, since the company absorbed used to be the Company's subsidiary at 100%.

Let it however be pointed out that both the Own Funds (Net Position) of the Group and the Own Funds of the individual Financial Statements have, indeed, changed due to the merger in terms of the deferred taxation of the cumulative valuation of the company absorbed, "Electrolink S.A.", up to and including financial year 2008, a fact which also appears in the net value of the Company's Own Funds.

2.3. Operating Segments

An operating segment is a component of an entity :

- that engages in business activities from which it may earn revenues and incur expenses (including revenues and expenses relating to transactions with other components of the same entity)
- whose operating results are reviewed regularly by the entity's chief operating decision maker to make decisions about resources to be allocated to the segment and assess its performance and
- for which discrete financial information is available

An operating segment may undertake business activities for which revenues have not occurred yet.

For an example the start up activities may be operating segments before revenue obtention.

Data and information with regard to the segments where both the Company and the Group take part in business activities are mentioned further on, under note No. 3.

2.4. Foreign exchange conversions

Functional currency and reporting currency

The Group's financial statement's data are denominated and reported in €

Transactions and balances

Foreign currency transactions are translated in euro, using the exchange rates prevailing at the dates of the transactions. Gains and losses from currency differences resulting from the conversion of monetary figures that are expressed in foreign currency and up to the date of the balance sheet with the existing currency rates, are registered in the income statement.

Exchange differences from non-monetary figures valued at fair value are considered part of the fair value and are therefore posted under the same accounts with the fair value differences.

2.5. Tangible Fixed Assets

Property is appreciated at fair value, which is determined by independent evaluators with the deduction of future accumulated depreciation and impairment losses. Asset values are revaluated frequently, in order for the undepreciated values not to show any differences with regard to the fair value of the assets up to the balance sheet dates.

Any increases of the book value of the Company's assets resulting from the revaluation of fair value are directly stated in equity as a reserve bearing the title "revaluation surplus" unless they consist of an inverse depreciative revaluation (impairment) of the said asset, that had initially been stated to expenses. In such case, an equal part of the depreciation is included in the statement of income.

Any depreciation of the asset's net book value, due to its revaluation is stated under expenses after removing any accumulated revaluation reserve for the related asset. The book value of a tangible asset is removed from the accounts at the time of sale or when no future financial gains resulting from the use or the sale of the asset in question are to be expected. The gain or loss resulting from the elimination of a tangible asset is immediately included in the income statement.

a) Property Plant and Equipment: The alternative method, as described under IAS 16 has been used and thus the cost of the assets was measured based on their fair value, as appreciated by the evaluation report of the independent company CB Richard Ellies - Axies as at 31.12.2008.

b) The cost of Plants built in real property belonging to third parties, equipment, means of transportation, furniture and other equipment was measured in compliance with the revaluation model described under IAS 16, which determines their cost at their purchase value, while any significant improvements are capitalized to the said cost minus any foreseen by IAS depreciation of the said assets.

Any expenses incurred on future periods are recognized and measured (thus increasing the net book value of tangible assets) only if it is speculated that they will result to improvements that may produce financial gains to the Group and their cost may be measured reliably. Any tangible fixed

asset fulfilling the requirements in order to be recognized as asset is evaluated at cost. In case any repair or maintenance works take place, those are expressed in the income statement.

Land is not depreciated. The depreciation of other tangible fixed assets is measured by using the straight-line method within the duration of their expected useful life that prescribes the following:

- Buildings	33 years
- Facilities situated in buildings owned by third parties	within the duration of the lease agreement
- Technical equipment	6 - 10 years
- Means of transportation	5 years
- Furniture and other equipment	3 - 5 years

The depreciation expenses incurred for each period are included in the income statement.

The assets that have been acquired through leasing are depreciated within the minimum time resulting between their estimated useful life and the duration of the relevant leasing agreements.

Residual values and useful lives of tangible assets are subject to revision on each balance sheet date.

When the book values of tangible fixed assets exceed their recoverable value, the difference (impairment) is expressed immediately in the income statement as expense.

Financial expenses for the construction of assets are capitalized for the period that is necessary for the construction to follow through. All other financial expenses are included in the financial statement of the relevant period.

2.6. Investment Property

Investment property is intended for providing income from rent or profit from resale. Property that is used for the Group's operating needs is not considered as investment property but as operational. This constitutes the segregation point between investment property and property used for the company's own operational needs. Investment property, constituting non current assets, is evaluated at fair value by independent evaluators (CB Richard Ellies- Axies as at 31.12.2008). Any modifications on the fair value, resulting from the free market value of the property are stated in the income financial statement for the specific period (evaluation based on the measurement method of the real "fair" value of the property, as foreseen by IAS 40).

2.7. Asset impairment outside goodwill

Depreciated assets are subject to impairment audit when there are indications that their book value shall not be recovered.

The recovered value is determined as being the greatest value between the fair value less the sale cost and the value in the present use of the relevant asset. The value of use is determined by discounting future flows by using the appropriate discount rate.

If the recovered value is less than the undepreciated value, it is lessened up to the amount of the undepreciated value . If within a cash flow unit, goodwill is included, then its value is left out of the book value of the relevant unit and no recoverable amount shall be computed for the said goodwill.

The impairment losses are stated as expenses within the financial statements for the relevant period, unless the asset involved has been revaluated, in which case the impairment loss shall lessen the relevant revaluation reserve. The depreciation loss shall first lower the goodwill corresponding to the cash flow generating unit and then shall lower the remaining assets in proportion to their net book value.

When, during a future period the impairment loss should be reversed, then the undepreciated value of the asset is increased in order to reach the revaluated recovered value, in the degree where the new undepreciated value does not overcome the undepreciated value that would have been computed if the impairment loss had not been stated in previous financial periods.

The reversal of the impairment loss is stated in the income statement, unless the asset has been revaluated, in which case the reversal of the impairment loss increases the relevant revaluation reserve.

In order to better evaluate the impairment losses, assets are categorized in the smaller possible cash flow generating units.

2.8. Taxation

a) Income tax

The sum corresponding to the income tax payable is constituted by the current tax payable, which results from the income tax statement plus any deferred tax. Any discount due to the payment of the income tax in the form of a lump sum can reduce the overall income tax payable.

The current tax payable is based on the taxable profit for the current year, which is different from net book profit by the sum over which the deferred tax claim or tax obligation is calculated.

The tax is calculated in accordance with the tax rules in force during the closing of the balance sheet and amounts to 25%.

According to the provisions of L.3697/200, the later tax rate is being gradually reduced by one percentage point from fiscal year 2010 until fiscal year 2014. In year 2014 the income tax rate will be reading 20%. The Company following the above, calculated the real estate's deferred tax liability at the rate of 20%.

b) Deferred Income Tax

Deferred income tax is calculated using the liability method on all temporary tax differences existing up to the balance sheet date between the tax base and the net book value of the assets and liabilities. The expected tax burdens resulting by the temporary tax differences are measured and stated either as deferred tax liabilities or as deferred tax claims.

Deferred tax is determined according to the tax rates in force at the balance sheet date. In case those tax rates differ from year to year, the deferred tax, as it was calculated at past year is corrected.

No deferred income tax is recognized for temporary differences arising from investments in subsidiaries and associates, except for the case where the reversal of temporary differences is controlled by the Group and it is likely that temporary differences will not be reversed in the near future.

The net book value from deferred tax claims is examined at every date the financial statements are drafted and is reduced to the extent that it is no longer probable that sufficient taxable profit will allow all or part of the income tax asset to be utilized in whole or in part.

Also, when the temporary tax differences, arising from various causes become definite, then they are no longer being considered as deferred tax and any tax claim is reduced accordingly.

The deferred tax encumbers the results of the period unless it concerns cases that directly influence net equity, therefore the corresponding tax effect is directly stated in net equity.

2.9. Financial Instruments

The investments of the Group are classified as follows:

a) Financial assets valued at fair value with changes registered in results

Here can be found the financial assets that are acquired in order to convey profit.

b) Receivables

Include non-derivative financial assets with fixed or specified proceeds, not negotiable on active markets. They are created when the Group gives money or provides goods and services and there is no intention of selling those assets. The evaluation of short term claims is realised at net book value, while for all long term receivables (less any provisions for bad debt) by applying the real interest rate method.

c) Securities operating like financial assets

These are securities that have been obtained and maintained as holdings without providing any rights with regard to exercising any substantial influence or control over the issuing company. For those cases the relevant securities are treated along the lines of what is prescribed under IAS 32 and 39 as medium and long term investment in financial assets.

The evaluation of the securities in question should always amount to their fair value, unless such value cannot be measured reliably, in which case the value of the relevant securities is recognized at acquisition cost, providing the information required by IAS 32.

Any differences at fair value level (valuation differences) are calculated according to the classification of the financial asset in question.

If the securities are classified under "available for sale" then the valuation differences are directly stated under equity.

If the relevant securities have been classified under "financial assets at fair value through profit or loss", then any evaluation differences is reflected in the income statement of the given period.

2.10. Inventories

Inventories are stated, in compliance with IAS 2 at the lower of cost, that is the price between the purchase cost and their net liquidation value. The purchase cost of all inventories was determined using the weighted average method, which is consistently used. The net liquidation value is estimated on the basis of the inventory's current selling prices in the ordinary course of business minus the cost of sales, where applicable.

2.11. Trade receivables

Trade accounts receivable, are recognized at fair value and are subsequently valued at undepreciated cost using the real interest rate method minus any impairment losses (loss from bad debt). The impairment losses are recognized where there is objective evidence that the Group is unable to collect all the amounts owed based on the contractual terms. The amount corresponding to impairment loss is the difference between the net book value of any claims and the present value of the estimated cash flows, discounted by the real interest rate. The sum of the impairment loss is registered as an expense in the income statement.

2.12. Cash and cash equivalents

Cash and cash equivalents include time cash, sight deposits and other short-term highly liquid but low risk investments with original maturity of three months or less.

2.13. Accounting principles used for derivative financial assets and hedging

All derivative financial instruments are recognized at fair value. The method used for recognizing gains and losses depends on whether those are stated as hedging instruments or for commercial purposes. The Group, while drafting the contracts involving the derivatives, determines the relation between the hedging instruments as well as any hedging elements or transactions, as well as the nature of the hedged risk. During the drafting of the contract as well as on a continuous basis, further on, there is an evaluation of the high hedging efficiency, with regards to book value hedging as well as cash flow hedging.

α) Fair value hedge

Changes in fair value of a derivative asset which is intended for hedging exposures to changes in fair value of a recognized asset or liability, are recorded in the income statement.

b) Cash flow hedge

The effective proportion of the change of the book value of the derivatives, which are determined as hedging instruments against cash flow changes, is registered under equity reserve. The hedging is considered efficient, in compliance with IAS 39, when it reaches 80% to 125% of effectiveness. The most common and the easiest way to measure its efficiency is to use the indicator that results from the following relation: Gains or losses resulting from the hedging instrument divided by gains or losses of the hedged item. The gain or loss of a non effective proportion is recorded in earnings. The sums that are registered as reserves under equity, are transferred to the income statement during the period when the hedged item influences the gains or losses. With regard to hedging of forecasted transactions, which end up in the recognition of one non financial asset, gains or losses that had been registered under equity are transferred to the acquisition cost of the resulting non financial asset.

When a hedging instrument expires or is sold, or when a hedging relationship does not fulfill one of the characteristics of hedging accounting, the reserve accumulated under equity, remains as such and is carried over to the income statement, when the hedged item influences gains or losses. When a forecasted transaction is hedged, which moreover is not expected to take place, the reserve accumulated under equity is transferred in the income statement.

c) Net investment Hedge

The net investment hedge in a foreign entity is treated exactly like a cash flow hedge. Gains or losses of the hedging instrument which are considered effective are stated under the equity reserve. Gains or losses of the hedging instrument that are not considered effective are stated in the income statement.

The equity reserve for such hedges is transferred to the income statement, when the financial unit is sold.

d) Derivatives not considered as hedging instruments.

Any changes in such derivatives are recorded in the income statement.

2.14. Share Capital

The registered shares of the Company are classified under equity.

The acquisition cost of own shares is presented with a negative sign in the equity of the Company and the Group, until those are sold or cancelled. Every gain or loss resulting from the sale of own shares, net from any transaction expenses and except for tax, if so, appears as a reserve under net equity.

2.15. Leases

Leasings where materially all risks and benefits of ownership are maintained by the lessors, are classified as operating leasings.

All other leasings are classified as finance lease.

Any revenues resulting from operating leaseings appear under revenues, in compliance with the straight-line method, for the leasing period.

Any lease payments, under operating leases are stated under expenses, based on the straight-line method for the leasing period.

Any assets that are owned based on finance leases can be found under the assets of the Group, and are evaluated during the conclusion of the leasing agreement, at fair value, or if such value appears to be inferior, at present value of the minimum lease obligation payable. The relevant liability to the lessor is recorded in the balance sheet as a liability from a financial lease. All lease payments are registered as a financial expense and a financial obligation, in a way that may produce a stable interest rate to the occasional remaining sum for the relevant obligation. The financial expense is recorded under expense unless it is directly relevant to an asset.

2.16. Long-term Liabilities

Long-term liabilities include all obligations whose due date or payment period exceeds twelve months from the date of the financial statements.

2.17. Bank Borrowings

Loans are recognized as short-term liabilities at fair value, minus any expenses that are directly effected for the transaction in question, while any bank liabilities whose due date exceeds the end of the following year are recognized as long-term liabilities.

2.18. Financial Risks

The Group is exposed to a limited amount of financial risks.

The Board of Directors provides all the necessary guidelines and directions for the general risk management of the Group as well as any special instructions necessary in order to manage certain risks.

The main risks are analysed as follows:

Foreign exchange risk – Cash flow risk

The Group is exposed to exchange risk with regards to the exchange rate of the US Dollar to Euro because part of its transactions with its suppliers is made in US dollars. In order to be best protected against such risk, the Group, when deemed necessary, is entering in to contractual agreements with regard to the purchase of US dollars (Flexible FX Forward EUR/USD).

Valuation of securities

The Group is exposed to the risk of a significant change in the price of the securities, which the Parent company is holding. The securities (listed in detail in the attached Interim Financial

Statements for the period ended 30 September 2009) are shares of companies listed in the Athens Stock Exchange.

Interest rate risk

The interest rate risk is a result of the change that may overcome the interest rate market. In order to reduce the risks that may arise from such increase, the revaluation dates for interest rates are limited to periods that vary from one week to one month maximum.

The Group's management is constantly monitoring the developments in the interest rate market and is kept up to date of any changes with the help of the collaborating banks ; thus, it has the alternative to contract at any time an interest rate exchange agreement in order to immediately respond to an interest rate risk.

Liquidity risk

Liquidity risk is low by maintaining sufficient reserves and liquid securities. Also, the alternative of demanding the collection of claims through financial institutions armours even more the Group against any liquidity risk.

2.19. Personnel retirement compensation provisions

The Companies of the Group maintain provisions regarding personnel retirement independent to the time they are expected to retire.

In accordance with the provisions of Law 2112/20, the Group must pay compensation to retiring or dismissed employees, while the amount of such compensation depends on the years of service, the amount of remuneration and the reason for leaving (dismissal or retirement). In case of retirement, the amount of compensation to be paid is equal to 40% of the relevant amount which would be payable in case of dismissal. Programs involving benefits to employees regarding compensation during their retirement from service fall through the lines of defined contribution plans in compliance with IAS 19 "Employee benefits".

The obligation that is registered in the balance sheet with regard to defined contribution plans reflect the present value of such commitment for the defined benefit, plus any change resulting from non registered actuarial gains or losses and the cost corresponding to the relevant years of service of the employee. These obligations are calculated on an annual basis by an independent actuary using the projected unit credit method.

Short-term benefits to employees in cash and in kind are registered as an expense in arrears.

2.20. Revenue recognition

Revenue is recognized at fair sales value with regards to goods and services provided, before any value added tax and remaining taxes and after any discounts or returns. Inter-company revenue in the Group is fully written off.

Revenue recognition is made as follows:

Sales of goods

Sales of goods sold are recognized when the Group delivers the goods to customers, the goods are accepted by them and the collection of the receivable is reasonably ensured. Retail trade usual involves cash or credit card transactions. Revenue recognized in such cases is the gross amount collected with the credit card fees included. All credit card expenses are consecutively expressed under other financial expenses.

Provision of Services

Revenue from provision of services is calculated with regards to the stage of completion of the service render, for as long as the result of the transaction may be reliably measured in relation with the estimated total cost of services provided.

Interest income

Interest income is recognized based on the time proportion and using the effective interest rate.

Dividends

Dividends are booked as revenue when the right to receive payment is established.

2.21. Distribution of dividends

Distribution of dividends to the equity holders of the parent is recorded as an obligation in the financial statements when the distribution is approved by the Shareholders' General Meeting.

3. Operating Segments

Primary form of information– business segments

The activities of the Group are divided in the following operating segments :

- § Electrical appliances
- § Non Electrical appliances
- § Others

The results per segment for the period starting from 01.01.2009 until 30.09.2009 and the period starting from 01.01.2008 to 30.09.2008 for the Group and the Parent company are as follows:

CONSOLIDATED DATA 30.09.2009				
<i>Amounts in €</i>	Electrical appliances	Non Electrical appliances	Others	Total
Gross Sales per segment	17.579.581,08	11.964.139,32	0,00	29.543.720,40
Intercompany Sales	-327,63	-205.947,18	0,00	-206.274,81

7. Financial assets recognized at fair value through equity

Those are shares of companies listed in the Athens Stock Exchange. The purchase expense has been added to their acquisition value. Their valuation is at fair value. As fair value was recognized their value at the closing of the Athens Exchange as of 30th September 2009.

According to the amendments of IAS 39, the company reclassified originally on 01.07.2008 from the category <<Financial Assets recognized at fair value through profit and loss>> to the category <<Financial Assets recognized at fair value through equity>> shares of companies listed in the Athens Stock Exchange purchased at 7.784.186,40 euro. The company assessed that the prices of those shares are not reflecting the real value of the companies because of the particular global financial market conditions in the current period. Therefore, the company has the intention to hold these shares and not to dispose those in the near term.

During the third quarter 2009 the company sold the Geniki Bank and the Coca Cola shares , where the revaluation difference of these shares for the period from 01.07.2008 to 31.12.2008 of 716.010,00 euros, which reduced directly the equity as at 31.12.2008, burdened the results at the current period in alignment with the accounting treatment determined in I.A.S.39. It is noted that the relative revaluation difference of these shares for the period from 01.01.2008 to 30.06.2008 amounting to 330.600,00 euros had burdened the results of the fiscal year 2008.

The fair value revaluation as at 30.09.2009 led to a positive revaluation difference of 936.598,15 euro, out of which an amount of 41.325,15 euro increased the results as at 30.09.2009 and an amount of 895.273,00 euro was posted in <<Other reserves>>.

Securities held as at 30.09.2009 are analysed, as follows:

Amounts in €

Securities	Units	Acquisition value (current period)	Current Value as at 30.09.2009	Revaluation Difference resulting to increase of equity from 01.01.2009 to 30.09.2009	Revaluation Difference resulting to increase of result from 01.01.2009 to 30.09.2009

The Parent's sight deposits as of 30.09.2009 include a deposit in USD of 28.542,46 and as of 31.12.2008 a deposit amounting to USD 23.545,19. On a Group level, the sight deposits as of 30.09.2009 include a deposit amounting to USD 28.542,46 and 222.156,46 BGN and as of 31.12.2008 amounting to USD 23.545,19 and 659.475,25 BGN. The conversion of the said amounts to Euro took place based on the currency prices valid on the particular dates.

14. Share Capital

The Share Capital of the company is constituted from 9.264.198 common registered shares of par value 0,91 per share and total value amounting to 8.430.420,18 € (fully paid in).

During 2005 the company purchased 500.000 own shares at a value of 2.595.871,40 Euro, which corresponds to a participation percentage of 5,2553% to the Share Capital of the Mother Company and is deducted from the equity.

On 28.02.2008 the company H. BENRUBI AND SON S.A., following a relevant decision of the Board of Directors on 26.02.2008, proceeded with the sale of 250.000 shares in the form of a pre-agreed package through PROTON Bank S.A. The sale's price amounted 4,81 € per share and the total value of the transaction amounted 1.202.500 €.

On 19.05.2008 the Extraordinary General Meeting of the Shareholders of "H. BENRUBI & SON S.A." resolved the decrease of the company's share capital by forty five thousand five hundred (45.500,00) Euro by decreasing of the total number of shares from 9.514.198 to 9.464.198 ordinary registered shares, due to the cancellation of 50.000 own shares in accordance with the Article 16, Law 2190/1920. The decision of the Minister of Development reading K2-6247/21.05.2008 by which the respective amendment of the Articles of Association was approved, has been filed in the Societe Anonymes Companies' Registrar on 19.05.2008. Following this, by virtue of the decision of the Board of Directors, the trade of the cancelled 50.000 own shares in the Athens Stock Exchange ceased as of 12.06.2008. As from the same date, the total number of the company's shares trading in the Athens

Stock Exchange amounts to 9.464.198 common registered shares. Last, the << Share Premium> account was created by 49.000 Euro alias by the portion of the cancelled own shares in the said account.

On 25.07.2008 the Extraordinary General Meeting of the Shareholders of “H. BENRUBI & SON S.A.” resolved the decrease of the company’s share capital by one hundred eighty two thousand (182.000,00) Euro by decreasing of the total number of shares from 9.464.198 to 9.264.198 ordinary registered shares, due to the cancellation of 200.000 own shares in accordance with the Article 16, Law 2190/1920 as in force on 17.01.2005 when the Company’s Extraordinary Shareholder’s Meeting was held and was decided to acquire the above mentioned own shares. The decision of the Minister of Development reading K2-10261/14.08.2008 by which the respective amendment of the Articles of Association was approved, has been filed in the Societe Anonymes Companies’ Registrar on 14.08.2008. The Board of Directors of the Athens Stock Exchange was informed on the relevant decrease of the Share Capital of the Company due to the cancellation of shares on its meeting held on 04.09.2008. Following this, by virtue of the decision of the Board of Directors, the trade of the cancelled 200.000 own shares in the Athens Stock Exchange ceased as of 10.09.2008. As from the same date, the total number of the company’s shares trading in the Athens Stock Exchange amounts to 9.264.198 common registered shares. Last, the << Share Premium> account was created by 196.400 Euro alias by the portion of the cancelled own shares in the said account.

The subsidiaries of the Group do not hold any shares of the Company.

27. Participation in other consolidated financial statements

The interim financial statements of the Mother Company and its subsidiaries for the period ended 30 September 2009 have been incorporated only in the consolidated financial statements of the Group prepared by the Parent Company. The consolidated financial statements of the Company have not been included in other consolidated financial statements prepared by other companies (outside the Group).

28. Unaudited fiscal years

The unaudited fiscal years of the Group's companies are as follows: a) H. BENRUBI AND SON S.A. year 2008 and ELECTROLINK S.A from 2006 to 2008, b) IMAPRO S.A. from 2004 to 2008, and c) BENRUBI BULGARIA LTD from 2007 to 2008.

During the third quarter 2009 the company's tax audit concerning the fiscal years 2006 and 2007 has been concluded. The audit resulted to EUR 271.276,13 due taxes (EUR 136.581,13 attributed to year 2006 and EUR 134.695,00 attributed to year 2007). These amounts will not burden the 2009 profit and loss statement since they remain below the relative provision formed for this purpose. More specific, the provision amounts EUR 404.000 for the Company and EUR 424.000,00 for the Group.

The tax liabilities of the Group's companies are not definite since the companies have not been audited for the fiscal years following those mentioned above. In this regard the Company and the Group formed contingent tax liability provisions for additional taxes and superadditions amounting 200.000,00 euros and 374.000,00 euros respectively. The latter provision determination for the unaudited fiscal years (including year 2008) has derived from assumptions and calculations which are based in the Group's management best knowledge of the current conditions. If the tax audit's final outcome is different than the one originally recognized, this difference will affect the tax income expense and the period's deferred tax provision.

29. Charges upon the undertaking

There are no charges upon the undertaking within the Group.

30. Disputes and litigations

The subsidiary IMAPRO SA was audited during 2007 by the tax authorities for the fiscal years 2001, 2002 and 2003 and an income tax difference of a total amount of € 1.599.840,72 emerged. Appeals were lodged against the relevant audit sheets in schedule.

The anticipated in favour of the company outcome of these appeals is based on our perception that the determination of the results for all three years as performed by the audit with the addition of the relevant book differences is arbitrary, since the audit rejected the tax deductibility of the related expenses due to the misapplication of the law and bad estimation of the situation. Therefore, the Company did not form a provision for tax liabilities pending the final outcome of the appeals. Moreover, applications for the suspension of the reinforcement of the acts for the certification of 10% of the disputed taxes have been submitted to the First Instance Administrative Arbitration Tribunal of Athens. Meanwhile, an Interim Order (4805, 4806 and 4807/2008) of the Suspension of the Reinforcement was issued by the President of the First Instance Administrative Arbitration Tribunal of Athens, according to which, the reinforcement of the aforementioned acts is suspended, until the issue of a judgement on the respective suspension applications.

Except for the above case, there are no other differences in disputes or under arbitration, neither judgement of a court nor other administrative body, which may have any material impact on the financial position or operation of the Company or the Group.

31. Personnel

The Mother company employs 128 persons as at 30.09.2009 and the Group 131, while the Mother company employed 203 as at 30.09.2008 and the Group 206.

Below an analysis of the Group's and the Company's payroll expenditure :

35. Letters of Guarantee Received and Issued

The Group has issued letters of guarantee in favor of third parties for the amount of 17.393,05 Euro while it holds collaterals in the form of guarantees for the settlement of the obligations of its customers amounting to 124.800,00 Euros. The Mother Company has issued letters of guarantee in favor of third parties for an amount of 17.393,05 Euro.

36. Post balance sheet events

The First Iterative Annual Shareholders Meeting held on 13.07.2009 decided unanimously and by a full majority the extension of the company's duration for another forty years starting on 1st January 2010 and ending on 31st December 2049.

The Company proceed on 07.10.2009 with the sale of the accounts receivables from a part of its clients to a third party, a factor, in the context of the full service factoring (non recourse factoring). Thus, the debtor is notified to pay the factor (notification), who also takes responsibility for collection of payments from the debtor and the risk of the debtor not paying in the event the debtor becomes insolvent.

Apart from the already mentioned facts, there are no other events following the balance sheet date of the interim financial statements which concern the Group or the Company, that need to be mentioned, in accordance to the International Accounting Standards (IAS).
