### DECLARATIONS BY THE MEMBERS OF THE BOARD OF DIRECTORS

Declarations from the Members of the Board of Directors (In accordance with article 4 par. 2c of L. 3556/2007)

It is hereby confirmed, to the best of our knowledge, that the annual financial statements of the Company "NIREUS AQUACULTURE S.A" for the year, 1<sup>st</sup> January to 31<sup>st</sup> December 2008, which have been compiled in accordance with the enforced Accounting Standards, give a true and fair view of the assets and liabilities, the net equity and the current year's results of the issuer and its entities which are included in the consolidation and are taken as a whole and the board of directors report reflects a true view of the development, the performance and the position of the issuer, including the entities which are included in the consolidation, taken as a whole, including the description of the major risks and uncertainties which they encounter.

Athens, 30 March 2009

The declarers

CHAIRMAN AND CEO

VICE CHAIRMAN AND MANAGING DIRECTOR

SUBSTITUTE MANAGING DIRECTOR

ARISTIDES ST. BELLES ID. No. AB 347823

NIKOLAOS EMM.CHAVIARAS ID. No. AA 499020 CHACHLAKIS G. ANTONIS ID. No. AE 083337

# ANNUAL BOARD OF DIRECTORS REPORT of the company

# "NIREUS AQUACULTURE S.A."

# On the consolidated and individual Financial Statements For the period from 1<sup>st</sup> January to 31<sup>st</sup> December 2008

Dear Shareholders.

We submit to you, based on legal requirements, the annual financial statements for the year 2008 (1/1/2008-31/12/2008) officially approved.

For your better notification, we display data and information with respect to the development of operations as well as to the financial position of the total of the entities which are included in the consolidation, the major risks and uncertainties which the Group of companies will potentially encounter and lastly the major transactions which have been incurred between the issuer and its, related to the Group, parties.

### Financial Data-Development of Procedures-Major Events

In the year 2008, the global economy, and in general, the world changed. The outbreak of the unprecedented crisis in the worldwide financial credit system in the global economy marked a change in time. The doctrine of more profits, increased development, today, has been replaced by greater liquidity as well as maintenance of the percentage of the total market share.

The segment of aquaculture in the year 2008, apart from the general financial problem, has also been characterized by the increased production of the product (sea bass –sea bream) by a larger percentage as compared to the increase in market demand (International and Domestic). This caused a pressure on the price of sea-bream to an extent, of its being sold at prices even below the cost of production. The total annual domestic sales in sea bream and sea bass during the period 2006-2008 has been increased by 30% and worldwide at 37%, although the corresponding annual demand has been increased by 5% to 8%. During the year 2008, despite the worldwide economic recession, the increase in demand for our product did not mark a significant change. This customer behavior reinforces the value of the produced product during periods of intense economic swings. The existing problem in the sales price has been transferred to the producers, who are called upon to face a more rational plan of the total production.

### Profit after taxes of the Group and the Company

The results of the Companies in the sector, due to the existing pressure on price, have resulted in marginal to negative net profit before taxes. In application of "International Financial Reporting Standards" on which the valuation of inventory is assessed, based on fair values (purchase prices), in essence of the result of sale of the product performed at a subsequent period is discounted. As a result, companies with a significant increase in inventory, caused by either the production

program or by a reduction in sales as compared to the anticipated, thus leading to an increase in biomass, present positive results attributed to this cause.

The Group of Companies "NIREUS AQUACULTURE SA" resulted in profit after taxes and minority interest of  $\in$  316 K as compared to  $\in$  10.355 K during the prior year.

This significant decrease is a result of:

- a) the reduction in the sales price of the product (sea-bream) by 17%
- b) the, harmonized with the circumstances, strategy of a reduction in the quantity supplied of sea-bream and sold during the following year. This strategy resulted in a reduction in the sales volume of the product and in the reinforcement of the sector's average sales price, taking into account that NIREUS SA, being a leader in the sector with respect to its policies should consider and initiate actions in order to regulate the problems presented in the market.
- c) the sale of the confectionary segment during the end of the prior year, for which the Group was deprived from the results which the segment provided, for the period which is it contributed to, and which amounted to € 8.300 K in sales and €365 K in profit before taxes.
- d) the basic reasons being the reduction in the price of sea-bream and the foreign exchange differences arising between the Norwegian Crone and the Euro, the subsidiary Norwegian company MARINE FARMS ASA contributed, to the Group, negative results of 1.597 K Euro as compared to the respective comparative prior year (loss of 2008: 870 K Euro, profit of 2007: 727 K Euro). Against all of the above which are referred to, the Management of the Company designed its plans in order that the effects be reduced for 2009, hence exhibiting that the Group can achieve significant results during periods of significant economic distress. Toward this:
- 1. It proceeded with mergers (absorptions) of subsidiary companies enhancing the size of the Group with the drastic restriction of minority interests both with respect to the results and equity of the Group. The company KEGO S.A was merged (absorbed) by NIREUS SA, simultaneously spinning-off the segment of aviculture and stockbreeding products, improving apart from the above, the efficiency as well through the restriction of operating expenses. In addition, the companies RED ANCHOR SA, ALPINO SA, and A-SEA SA, via their absorption, conduce to the Group's reduction of operating expenses.
- 2. Undertaking a more rational production strategy, with the planned concentration of units in large aqua production centers, the reduction of the consumables of fish feed and the restriction of management costs, we expect a benefit to the results (cost) 4.300 K Euro and to cash flows 21.500 K Euro, resulting from a restriction in the consumables of fish feed (it leaves unaffected the cost of production, restricting the plan of fish inventory).

3. It reduced operating costs as compared to the year 2008 by an amount of 4.500 K Euro.

#### Sales Revenue

The Group's sales for the year 2008 amounted to 170 million Euro, as compared to 214 million Euro during 2007.

The reduction in sales revenue was attributed to aquaculture sales 20.135 K (fresh, alteration, fry), to the sales of fishfeed 15.867 K Euro, to the sale of confectionary of 8.300 K Euro, to equipment of aquaculture 1.005 K Euro, although sales resulting from aviculture and stockbreeding products increased by 799 K Euro.

### **Total Expenses**

Expenses are shown to be reduced during the year 2008 by an amount of 15.952 K Euro (total of 205.140 K Euro) as compared to 2007 (total of 221.092 K Euro).

| EXPENSE CATEGORY              | 2007 In thds Euro | 2008 in thds Euro | Difference in thds<br>Euro |  |  |
|-------------------------------|-------------------|-------------------|----------------------------|--|--|
| Consumables                   | 124.588,00        | 104.673,00        | - 19.915,00                |  |  |
| Salaries & personnel expenses | 36.848,00         | 36.330,00         | - 518,00                   |  |  |
| Third party fees and benefits | 23.184,00         | 23.292,00         | 108,00                     |  |  |
| Other expenses                | 21.442,00         | 19.908,00         | - 1.534,00                 |  |  |
| Finance (costs)/Income        | 7.232,00          | 12.545,00         | 5.313,00                   |  |  |
| Depreciation                  | 7.798,00          | 8.392,00          | 594,00                     |  |  |
| TOTAL                         | 221.092,00        | 205.140,00        | - 15.952,00                |  |  |

### **Taxation**

The negative effect on net results after taxes, resulting from taxes charged during the current year as compared to the prior year, has been increased by 59,5 % (5.422 K Euro during 2007 as compared to 8.651 K Euro in 2008). The charge is attributed to the results of the tax audit which was carried out for the Parent company and its subsidiaries, the outcome of which was the imposition of additional taxes of a total amount of 2.321 K Euro. With the completion of the tax audits, the company's Value Added Tax receivable from the Greek State was settled for the year 2007 of a total amount of 10.247 K Euro and was collected by the Company thus improving its liquidity.

### **Borrowings**

Management's basic targets include the following: a) the reduction of bank borrowings which will lead to a reduction in finance costs and b) the maintenance of direct and high liquidity balances in order that it be able to encounter extraordinary events which result from the unstable global and domestic economic environment during the period which we are covering.

The structure of the Group's bank borrowings secures, without unexpectancies, the financing of its operations. Managements target is to maintain the ratio between the Group's net borrowing (borrowings less cash equivalents) and operating results at a satisfactory level. The level of net borrowings is increasingly affected by the investment in the Norwegian Group Marine Farms ASA of an amount of 34,9 Million Euro. The analysis of the Group's total borrowings of an amount of 252, 9 million Euros is as follows:

- 1. Bond loan of an amount of 90 million Euro of a seven year duration (was obtained during January 2008)
- 2. Convertible bond loan of 19,6 million Euro (was obtained during July 2007)
- 3. Long term convertible bond loan secured by the Greek State of an amount of 49,9 million Euro of a ten year duration (25 million Euro were obtained in December 2007 and 25 million Euro in April 2008). With respect to these loans, no interest is paid for 28 months and for the remaining period until the completion of the 10 year period a 50% of the accrued interest is paid.
- 4. Joint long-term loan of a 15-year duration of a total of 4,8 million Euro (was obtained in November 2006)
- 5. Regulated loans of a 15-year duration of the subsidiary company SEA FARM IONIAN SA, in accordance with article 44 of L. 1892 of an amount of 21,5 million Euro (the regulation commenced in year 2005).
- 6. The joint long-term loan of a 15 year duration of a balance of 3,6 million Euro (was obtained in year 2005).
- 7. Bond loans of 2-5 years of 3,7 million Euro
- 8. Short-term loans for working capital of 59,8 million Euro.

Against the above loans, the Management of the Company maintains a high level of cash of 29,6 million Euro. Therefore the net borrowings of the Group amount of 223, 3 million Euros.

### Liabilities

The Group's total liabilities during 2008 (except for borrowings) were decreased by 35 million Euro and at a percentage of 25,3%, as compared to the prior year 2007, from 124,5 million Euro in 2007 these decreased to 103,3 million Euro in year 2008. The reduction in liabilities was a result of the Company's policy to purchase its fishfeed, by a greater percentage, from its subsidiary company KEGO SA, which company was absorbed, instead of from third party suppliers. This policy led to an improvement in the cost of production of the final product, leading though to increased requirements for working capital, which is reflected in increased borrowings. The total liabilities of the Group including bank borrowing are shown increased as compared to the prior year 2007 by an amount of 2,6 million Euro. At this point, we would like to mention that, if we take into account that the total liabilities for the year 2008 were charged with deferred tax liabilities of an amount of 5,7 million Euro, which liabilities arose from the valuation of inventory at fair value, in addition to the increase of the fixed asset useful lives (reduced depreciation expenses) which will be fulfilled at a long term horizon, in essence there was a reduction in total liabilities during the year 2008.

### **Inventory**

Total biological inventory was increase as compared to the year 2007 by an amount of 50,1 million Euro (241,5 million Euro during the year 2008 as compared to 191 million Euro during 2007). The increase in inventory is attributed to reduced sales during 2008 as compared to the initial plans of the Company. With respect the reduction in the value, reference was made in the section on Sales. It should hereby be mentioned that the value of biological inventory which is referred to in the financial statement is that of fair value (market) and not of cost.

The remaining non-biological inventory is shown to be increased in the year 2007 by an amount of 2 million Euro (15,9 million Euro in 2008 as compared to 13,8 million Euro in 2007). This increase is totally justifiable taking into account the increase in biological inventory and the requirement of maintaining an increased volume of fishfeed in the production units.

### Receivables

The Management of the Company made a significant effort in restricting its receivables, in view of satisfying the increased working capital either from the increase in the volume of inventory or from the reduction in liabilities mentioned above. As a result in 2008, the total receivables amounted to 79,9 million Euro as compared to 119,2 million Euro during 2007. The average collectibility from trade receivables decreased from 160 days to 122 days in 2008.

### Cash and Cash Equivalents

The major concern of the Company is the maintenance of a high liquidity for the Group. Hence, despite the fact that cash and cash equivalents for the year 2008 are shown to be reduced by an amount of 22,2 million Euro as compared to the prior year, these are infact, significantly high given the present economic circumstances. Cash and cash equivalents as at 31/12/2008 amounted to 29,6 million Euro as compared to 51,9 million Euro during the respective prior year 2007.

### **Net Equity**

The Group's share capital as at 31/12/2008 amounted to 85,2 million Euro composed of 63.592.539 common shares, of a par value of 1,34 million Euro.

During the year 2008 the Share capital increased by an amount of 6.709.329, 12 million Euro each.

The increase resulted:

- a) From the contributed share capital of KEGO SA from the merger (absorption) by the Parent Company NIREUS SA of an amount of 6.597.346,66 million Euro.
- b) From the conversion of 38.551 debentures into shares of a total value of 111.982,46 Euro.

The total share capital of the company was decreased by 2,4 million Euro as a a result of a) dividends of 2007 during the year 2007 and during the year 2008 of -5,2 million Euro b) results (gain) for the year 2008 +3,2 million Euro and c) other equity movement of -0,4 million Euro.

The total net equity of the Group was reduced by an amount of 7, 9 million Euro as a result of a) dividends of Group's Companies in 2007 in the year 2008 -7, 1 million Euro b) the results (gains) of the year 2008 +1,1 million Euro and c) other movements of -1,9 million Euro, where the major proportional decrease in Net equity resulted from the affiliated Norwegian company Marine Farms ASA.

In addition, given the decision of the Extraordinary Shareholders Meeting of the Company dated 18/02/2008 and the decision of the Board of Directors dated 18/03/2008, the company proceeded during the period 14/04/2008 to 17/04/2008 in the purchase of 22.390 common shares of a total value of  $\ 47.270,70$ .

### Our position in the market

The Group NIREUS is in the leading position amongst companies that operate in Aquaculture Mediterranean fish in Greece and its goals include, the continuous improvement in the quality of its products either these be aimed towards the final consumer (fresh fish, altered or not) or to the producers of the segment (fry, fishfeed, equipment), the increase in new products in the sector and in the mass production of these, the continuous improvement and the modernization of the production installations, in addition to establishing procedures that aim at protecting the environment which are the major concerns of Management. The satisfaction of shareholders both on a short-term and long-term basis is the Company's responsibility, planning actions with caution, vision, knowledge, provision and dynamism.

Towards fulfilling the above, the operations of the research unit at the location of Pirgoulaki Psachna Evias, which are involved in the production of new aquaculture products, in addition to the genetically improved production of sea-bream fry and sea-bass are being continued.

Operations as regards the closed water system, pre-growing fry at overland installations at Castella Evias of a total capacity of 15 million units of fry have been completed. This operation will provide benefits to the Group with respect to the cost of production of fresh fish (if the fry is used in the same production) or in the sale to producers as a new item for high profitability.

The completion of work regarding the expansion of the existing fish genetic unit in Turkey from the subsidiary ILKNAK A.S will provide the capability to more than double the production of fry and the sales in Turkey.

The design of the expansion of operations abroad with the written contract in Spain, as regards the development of producers fresh fish (outsourcing), securing a) the improved operation of the pre-growing fry which is available in Spain through the subsidiary company Predomar SL and b) the production of the final product for the market in Spain which was not available until now. The produced products in Spain bear an advantage over other imports, so much as to the quality due to freshness as to costs due to reduced transportation expenses.

For the servicing of our customers in Europe the design of creating offices- commercial branches is materialized in view of the more efficient and effective servicing of the existing and new customers in the largest markets in the segments in Italy,

France and Spain. We consider that this manner of organization will have positive and direct results on both the volume and the price of our products. Our cooperation with the Group STEF, developing a Logistic Center of our products in Italy in the city of Milan nearby the large markets, will improve the operating conditions of the commercial network. This operation will lead to a reduction in the transportation costs and will provide the capability of servicing a larger number of point-of-sale areas without any problem.

During the year 2008 and despite the problem which the sector is facing due to the price of sea-bream, the company, aiming at differentiating itself from competitors, further developed the department of quality control placing specialized partners and sample testing equipment, such that the final products will justify an increased price as compared to competition.

During 2008, the information system on control in addition to the Company's management information system were completed, providing the company's management with the ability to proceed with corrective actions in view of achieving the best results under the present conditions. The Hyperion program was installed.

We consider that our contribution to our local communities significant, having developed activities from our actions. Despite that this provides no financial benefit the ethical satisfaction derived is considered for us a reward.

During October 2008 the merger (absorption) of KEGO SA from NIREUS SA was completed, given that the segment of aviculture and stockbreeding products was first spinned-off (30.09.2008) from KEGO SA and contributed to its 100% owned subsidiary KEGO AGRI SA. Through this action, the size of the parent company is exhibited without minority interests, thus achieving economies of scale on operations and, hence the production part which relates to a different market is separately distinguished.

#### **Investments**

With respect to the achievement of our targets and our plans, we preceded with the materialization of our investment program ranking priorities based on the requirements and the effectiveness of the investments taking into consideration a) the financial circumstances in Greece and abroad b) the final deadlines of the European programs of financing investments to which our company participates. Finally in 2008 the Group's investments amounted to 14,8 million Euro.

### **Major Risks and Uncertainties**

### **Suppliers –Inventory**

The Group does not encounter any issues with respect to slow moving or obsolete stock considering that the major volume of inventory relates to work-in-progress of fresh fish in addition to raw materials for the production of the final product either aquaculture or fishfeed-stock breeding products. Finished goods inventory is minimal. In view of servicing sales requirements, the company is obliged to maintain a high level of fresh fish until the stage where they reach market size which takes a period of 18-20 months. The entire inventory is insured against potential loss from any risk by Global

Insurance Companies which secure indemnity at cost in the event of a loss. A risk as regards the value of biological inventory can arise from a reduction in the market sales price. In such an event, given that the (biological) inventory is valued at fair values (market values) a loss will arise in the total value (loss) with a corresponding impact on the current year's results. If, however, during the same period the Company is in the phase of anticipating an increase in the volume of inventory, then the loss in valuation of inventory may be off-set by the valuation, at market prices, of the additional stock produced.

The basic purchases of raw materials have been secured against, until the first quarter of 2009 with forward purchase contracts. Therefore, the risk arising from a change in prices is insignificant. The market trends depict a reduction in prices until the end of 2009.

The remaining suppliers, the products of which affect below 10% of the total cost of production, a potential change in prices will have a minimal effect on the final product.

The major concern of the Group's Management is the reduction in the period of production in order that the cost and the size of production decrease thus improving results and releasing working capital which in turn will lead to a reduction in total borrowings.

#### **Customers-Customer Credits**

The company's receivables from its customers have a minimal exposure to the risk of bad debts which can result only from the stockbreeding sector, which risk however is significantly restricted due to the large diversification. The percentage participation of the remaining segments as a percentage of the total amounts to 19%.

The remaining amount is insured twice, either through customer credit insurance contracts which insure 80% of the owed amount in the event of default in payment or through the retention of the ownership of the sold product (fry) until the date of repayment. The repayment date precedes the production completion date (from fry to marketable size fish). Under this approach, bad debts which are historically noted on receivables do not reach 0,5% on sales revenue.

In the year in which we are currently advancing we note an extension in the credit terms which the customers of aquaculture are requesting in view of settling their liabilities. This is the result of a reduction in the price of the product sea-bream. This decrease in prices results in either a restriction in sales for waiting for an improvement in the prices, while others face difficulties in settling their liabilities due to reduced prices. The Company within the abovementioned scope of securing its receivables, negotiates its long-term receivables, when required, servicing its customers to the extent of its capabilities. This approach will in the short-term negatively affect the basic economic figures (collectibility of receivables ratio) but Management believes that in the long-term it will have positive results on the sale of its produced product. Due to the present unfavorable economic conditions, a difficulty in maintaining the customers' insurance limits is noted on behalf of the insurance companies. Management's aim is to maintain its customer's receivables insured either directly through insurance companies or indirectly through Factoring without recourse procedures.

### **Borrowings-Interest Rate Borrowings**

With respect to the financing sector, the Group cooperates with Greek Banks which operate both domestically as well as abroad. The approved credit limits and the projected repayment period of these provide the company with leisure in managing its bank debt and with a sufficient level of working capital. The satisfactory cooperative terms and charges from the different bank services in addition to the financing of 2,5 years of interest financing of 50 million Euro from the Greek State, aid in the restriction of the companies' finance cost. The level of the short-term borrowings of 59 million Euro as compared to the cash equivalents of the Group is considered satisfactory.

In order that the company be insured against the risk of a variation in the basic interest Euribor rate with which it is loaned, it has entered into derivative contracts for products of a total level of 101,5 million Euro, which secure funds of 9 million Euro against an increase in interest rates above 3,25 %, funds of 67,5 million Euro against the increase in the interest rates above 4,5% up to 5,25% and funds of 25 million Euro against an increase in interest rates above 3,95%. In addition, given that funds of 50 million Euro are not affected by finance costs until 31/12/2009 from the change in interest rates, we consider that there is a significant level of security against this risk.

### Foreign Exchange risk

The Group's exposure to foreign exchange risks arise mainly from the existing or projected cash flows in foreign currency (imports/exports) in addition to the investments in countries abroad. The Group operates on a Global level. The exposure to foreign exchange risk is minimal due to that the transactions in their majority and at a percentage of 90% are realized in Euro. This risk item is mainly attributed to trade transactions in foreign currency as well as from net investments in foreign entities.

The Group possesses investments in economic entities abroad, the net assets of which are exposed to foreign exchange risk. The risk attributed to foreign exchange rates of this type arise from the exchange of the Turkish Lire against the Euro.

The finance assets and the respective liabilities of foreign currency, converted into Euro with the closing exchange rates are analyzed as follows:

|                            |         |         |        | 2008    |        |           |         |         |         |        | 2007   |        |           |        |

The table below presents the sensitivity of the current year's result in addition to net equity in relation to finance assets and finance liabilities and the foreign exchange rates in Euro as compared to the above currencies.

In the event that the Euro fluctuates in relation to the foreign currency by the percentages set below, then the effect on the current year's results as compared to the net equity is as follows:

| Amounts in Euro              |        |         |        |         |        |         | 200   | 8      |       |        |         |          |       |        |
|------------------------------|--------|---------|--------|---------|--------|---------|-------|--------|-------|--------|---------|----------|-------|--------|
|                              | U      | SD      | G      | BP      | N      | IOK     | DK    | K      | CA    | ND.    | Т       | RL       | CH    | F      |
|                              | 10,09% | -10,09% | 5,06%  | -5,06%  | 51,51% | -51,51% | 0,46% | -0,46% | 6,54% | -6,54% | 13,18%  | -13,18%  | 5,35% | -5,35% |
| Post-tax profit for the year | 55.865 | -55.865 | 11.620 | -11.620 | -822   | 822     | -47   | 47     | 1.327 | -1.327 | 231.866 | -231.866 | 5.809 | -5.809 |

| Post-tax profit for the year | 20.429 | -20.429 | 6.704  | -6.704  | -973   | 973     | -40   | 40     | -55   | 55     | 56.599  | -56.599  | 1.434 | -1.434 |
| Equity                       | 20.429 | -20.429 | 6.704  | -6.704  | -973   | 973     | -40   | 40     | -55   | 55     | 56.599  | -56.599  | 1.434 | -1.434 |

The Group's exposure to the foreign exchange risk varies during the year depending on the volume of transactions in foreign currency. Thus, the above analysis is considered representative of the Group's exposure to foreign exchange risk.

### Subsequent Events following the Balance Sheet Date

A) The company "NIREUS AQUACULTURE S.A" purchased 52.662 ordinary shares of the company SEAFARM IONIAN.

B) On February 2009, the trading in the Stock Exchange commenced of the 133.327 new common shares, which resulted from the increase in the share capital by an amount of 178.658,18 Euro due to the conversion of 61.490 debentures into 133.327 shares, from the existing Company's Convertible Bond Loan, issued on 12/07/2997 of a nominal value of 9,77 Euro, with a conversion price of 4,50574 Euro per share.

### **Prospects 2009**

Prospects for 2009 are influenced by the storm of economic crisis marked in the global credit and financial sector. It is obvious that the crisis affects the performance of the (real) economy. The markets to which the Company is aiming at are to a large extent European, in which recession is expected. Within this unstable and transforming environment it is difficult to proceed with projections with respect to the formation of various figures for 2009.

The Group acknowledges that the world has changed and is adapting to new conditions. Priorities for 2009 are focused on the production of positive cash flows, in the reduction of the cost of production and operations and in the restriction of new capital expenditure.

### Significant Transactions between the Company and its related parties

The major transactions between the Company and its related parties in accordance with IAS 24, relate to transactions with its subsidiaries (related entities based on article 42S of L.2190/20) which are shown in the table below.

|  |                               |                            | SE   | LLING COMPA                                 | NY                   |                 |               |

# EXPLANATORY REPORT OF THE BOARD OF DIRECTORS

# OF NIREUS AQUACULTURE S.A (based on article 7 and 8 a of L. 3556/2007)

(a) The structure of the share capital, including the shares not listed for trading in an organized market in Greece or another member-state, reporting for each category of shares the rights and the obligations related to this category and the percentage of the total share capital that the shares of this category presented.

The share capital of the Company amounts to Euro 85.035.344,08 divided into 63.459.212 shares of par value Euro 1,34 each and is fully paid up. All the shares of the company are ordinary, registered, with voting rights, listed for trading on the Athens Exchange and have all the rights and the obligations prescribed by the Law.

(b) Restrictions in transfer of shares such as restrictions in holding of shares or the obligation in obtaining prior approval from the company or other shareholders or by a Public or Administrative Authority with the reserve of the article 4 par. 2 of L. 3371/2005.

The transfer of the company's shares is made as enacted by Law and do not exist out of its Articles of Association restrictions in their transfer.

(c) Significant direct or indirect participations as defined by articles 9 to 11 of the L. 3556/2007.

As at 31/12/2008 the individuals holding significant direct or indirect participations as defined by articles 9 to 11 of L. 3556/2007 are:

| Surname  | Name      | Father's Name | <b>Number of Shares</b> | % Percentage | Type of participation |
|----------|-----------|---------------|-------------------------|--------------|-----------------------|
| Belles * | Aristides | Stergios      | 13.410.101              | 21,16%       | direct & indirect     |
| Haviaras | Nikolaos  | Emmanuel      | 3.411.393               | 5,38%        | direct & indirect     |

- (d) Holders of any type of share granting special control rights and description of relevant rights. Shares of the company, which grant special control rights to their shareholder do not exist..
- (e) Restrictions in voting right such as restrictions in voting rights to holders of certain percentage of the share capital or to holders of certain number of voting rights, and the time terms for exercise of voting rights.

The Articles of Association do not provide for any restrictions in voting rights

(f) Shareholders Agreements, which are known to the company and entail restrictions in transfer of shares or restrictions in exercise of voting rights.

The company is not aware of the existence of shareholders agreements, which entail restrictions in the transfer of its shares or in the exercise of the voting rights arising from its shares.

(g) Rules for appointment and/or replacement of members of the Board of Directors and amendment of the Articles of Association, when these differ to that provided by the c.L. 2190/1920.

The rules provided by the company Articles of Association for appointment and/or replacement of members of its Board of Directors and amendment of its articles, do not differ to that provided by the provisions of c. L. 2190/1920.

- (h) Competence of the Board of Directors or certain members of the Board of Directors, for the issue of new shares or for the purchase of treasury shares according to the article 16 of c.L. 2190/1920.
- A. The Board of Directors of the Company is allowed to proceed in the issuance of new shares, following stipulated authorization on the basis of the General Assembly's decision in the following cases.
  - 1) In accordance with article 13 paragraph 9 of c.L2190/1920, as in force, and in execution of the decision taken at the Company's Shareholders General Meeting held on 05-06-2006, which was listed in the Register of Companies on 20-06-2006, protocol number K2-9377, the three-year Stock Option Plan granted to the Members of the Board of Directors and to the Company's Management was approved. Specifically, following the exercise of rights have been vested from the participants in the program, a decision is taken by the Board of Directors as regards the increase of the Company's share capital by an amount which corresponds to the rights that have been exercised and the issuance of the respective new shares, in execution of the assumed liabilities based on the Plan. Subsequent to this, the Board of Directors proceeds with the decision released, based on article 11 of cL.2190/1920 in respect of the certification of the paid-up share capital.
  - 2) In accordance with article 3a of c.L 2190/1920, as in force, and in execution of the decision of the A' Reiteration Extraordinary Shareholders Meeting of the Company, which was listed in the Companies Register of the Ministry of Development on 9-5-2007 with protocol number K2-6896, the issuance of the convertible bond loan into common with voting right shares with preference rights to old shareholders of an amount of 19.995.575,10 Euro was approved. Specifically, following the exercise of the right of conversion of debentures to shares, a Board of Directors decision is taken to increase the Company's share capital by an amount which corresponds to the conversion of debentures depending upon the conversion requests, and the conversion ratio, and the corresponding issuance of the company's new shares, in execution of the terms of the program of the convertible bond loan as these are in force. Subsequent to the above, the Board of Directors proceeds with the issuance of the decision, based on article 11 of c.L 2190/1920 in respect of the certified paid-up share capital.
- B. The Company's Board of Directors can proceed with the purchase of treasury shares, in virtue of the decision taken by the Extraordinary Shareholders Meeting on 18/2/2008 by which the purchase of the treasury shares by the Company up to 1/20 of the paid-up share capital of the company (5%), the lowest purchase price limit being the current par value of the

shares, that is 1,52 Euro and the highest purchase price limit being 6 Euro, with an approved duration of (24) months. The purchases are made with the Board of Directors responsibility and it is not permitted for them to exceed 1/20 of the paid-up share capital as referred to above, will not result in the reduction of net equity at an amount below the specified in paragraph 1 of article 440 of c.L 2190/1920 as this is valid, although transactions will relate only to shares which will have been fully repaid.

(h) Significant agreements of the company that are in force, amend or expire in case of a change in the company's control following public motion and the results of the agreement, except if, due to its nature, the publication of the agreement would cause serious loss in the company. The exemption of publication of the agreement is not effective when the obligation for publication arises from other provisions.

In the event of a change in the company's control following public proposal, there are no agreements, which are in force, are amended or expire.

(i) Agreements for indemnity compensation to members of the Board of Directors or personnel, in case of retirement of dismissal without basic reason or end of term or engagement due to public announcement.

There are no special agreements for indemnity compensation to the members of the Board of Directors or to personnel, specifically in case of retirement or dismissal without basic cause or termination of their service or their engagement due to public proposal.

### INDEPENDENT AUDITOR'S REPORT

### To the Shareholders of "NIREUS AQUACULTURE A.E."

### **Report on the Financial Statements**

We have audited the accompanying separate and consolidated financial statements of NIREUS AQUACULTURE AE, which comprise the separate and consolidated balance sheet as at 31 December 2008, and the income statement, statement of changes in equity and cash flow statement for the year then ended, and a summary of significant accounting policies and other explanatory notes.

### Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with International Financial Reporting Standards, as adopted by the European Union (EU). This responsibility includes: designing, implementing and maintaining internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error; selecting and applying appropriate accounting policies; and making accounting estimates that are reasonable in the circumstances.

### **Auditor's Responsibility**

Our responsibility is to express an opinion on these financial statements based on our audit. We conducted our audit in accordance with the Greek Auditing Standards, which are based on the International Standards on Auditing. Those standards require that we comply with ethical requirements and plan and perform the audit to obtain reasonable assurance whether the financial statements are free from material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risks of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

### **Opinion**

In our opinion, the accompanying corporate and consolidated financial statements present fairly, in all material respects, the financial position of the Company and of the Group as of 31 December 2008, and of their financial performance and their cash flows for the year then ended in accordance with International Financial Reporting Standards as adopted by the European Union (EU).

Without qualifying our opinion, we draw attention to the following matter: Due to that one of the Group's domestic subsidiaries, which have been consolidated with the method of full consolidation and which comprise a total percentage (prior to any eliminations) of 9,47% out of the Group's total assets, have a negative Net Equity position, the effects of articles 47 and 48 of C.L 2190/1920 are applicable. It is therefore, required that the abovementioned company take appropriate measures in order to revoke the conditions under which these articles come into effect.

### Report on Other Legal and Regulatory Requirements

We verified the consistency and the correspondence of the content of the Report of the Board of Directors with the accompanying financial statements, under the legal frame of the articles 43a and 37 of C.L. 2190/1920.

Athens, March 30 2009

### 1. Notes on the Annual Financial Statements

### 1.1 General Information

These group consolidated financial statements have been prepared in accordance with International Financial Reporting Standards (IFRS) as published by the International Accounting Standards Board (IASB).

The company "NIREUS AQUACULTURE AE" (hereinafter the "Company") is a company (societe anonyme) and a parent company of the group "NIREUS AQUACULTURE" (hereinafter the "Group"). The structure of the Group and the subsidiary companies are presented in Note 5 of the financial statements. The registered office of the company is situated at Koropi-Attica, Dimokritou Street, Portsi Place. The company's web site is <a href="www.nireus.gr">www.nireus.gr</a>. The company was established in 1988 in Chios and in 1995 was listed on the Athens Stock Exchange. Since then, it has marked a significant development aquaculture sector which has resulted in its being listed in the Main Market of the ATHEX, having the highest position in the sector. Based on the provisions of the ATHEX new regulations, the company has met the criteria required for the listing on the "large capitalization" category and the shares of the company have been classified under this category in accordance with article 339 from 09/10/2006.

The Financial Statements as at 31 December 2008, (prior year 31 December 2007 data included), have been approved by the company's Board of Directors on March 30, 2009. According to the provisions of the Capital Market Commission, amendments to the financial statements are not permitted following their approval. Authorized changes are made only by the Shareholders during the Ordinary Annual Shareholders Meeting.

### 1.2 Nature of operations

"NIREUS AQUACULTURE SA" (the Company) and the Group is involved in a range of activities in the aquaculture sector. In particular, the main activities of the Group includes the production of spawn, and fish as well as the trading and distribution of various products in domestic and international markets, the production of equipment such as nets, cages etc. for fish farming units, the production and trade of fish feed, the production and trade of processed fish as well as the production of dairy products and the processing, production and trade of related food stuffs. Following the merger with the company KEGO S.A. by the parent company, and the spin-off of the segment of stock feeding and aviculture and its absorption in the subsidiary company KEGO AGRI S.A, the activities of stock feeding and aviculture have been added to the Group's primary activity segments. Furthermore, the parent company, until the end of the prior year, had been involved in confectionary activities. Based on the Board of Directors decision taken on 28/09/2007, the company proceeded with the spin-off of the confectionary segment and its integration in the subsidiary company of the Group, subsequently proceeding with its sale to third party, external to the Group, entrepreneurs.

### 2. Basis of preparation of the financial statements

The annual financial statements of "NIREUS AQUACULTURE" AE and of the Group at 31 December 2008 covering the period from 1 January to 31 December 2008, have been prepared under the historical cost convention as amended with the adjustment of certain assets and liabilities items at current value, the going concern basis and are in accordance with the International Financial Reporting Standards (IFRS) as these have been published by the International Accounting Standards Board (IASB), as well as their interpretations, as published by the International Financial Reporting Interpretations Committee (I.F.R.I.C.) of the IASB and which have been adopted by the European Union and are in force as at December 31, 2008.

The preparation of financial statements in conformity with IFRS requires the use of certain critical accounting estimates. It also requires management to exercise its judgment in the process of applying the group's accounting policies. The areas involving a higher degree of judgment or complexity, or areas where assumptions and estimates are significant to the consolidated financial statements are stated in note 2.2. These policies have been consistently applied to all the years presented.

In 2003 and 2004, was issued by the International Accounting Standards Board (IASB) issued a series of new International Financial Reporting Standards (IFRS) and revised International Accounting standards (IAS), which in connection with the non revised International Accounting Standards (IAS) which were published by the International Accounting Standards Committee, preceding the International Accounting Standards Board (IASB), which is referred to as "IFRS Stable Platform 2005". The Group adopts the IFRS Stable Platform 2005 from 1 January 2005.

### 2.1 Changes in accounting policies

- 2.1.1 New pronouncements (new standards, amendments / revisions to standards or interpretations) effective for the financial year beginning 1 January 2008 for the Group.
- IAS 39 (Amendment) "Financial Instruments: Recognition and Measurement" and IFRS 7 (Amendment) "Financial instruments: Disclosures" Reclassification of Financial Assets (effective prospectively from 1 July 2008)
  - This amendment permits an entity to reclassify non-derivative financial assets (other than those designated at fair value through profit or loss by the entity upon initial recognition) out of the fair value through profit or loss category in particular circumstances. The amendment also permits an entity to transfer from the available-for-sale category to the loans and receivables category a financial asset that would have met the definition of loans and receivables (if the financial asset had not been designated as available for sale), if the entity has the intention and ability to hold that financial asset for the foreseeable future. This amendment will not have any impact on the Group's financial statements.
- IFRIC 11, "IFRS 2 Group and Treasury Share Transactions". IFRIC 11 requires arrangements whereby an employee is granted options to buy equity shares, to be accounted for as equity-settled schemes by an entity even if the entity chooses or is required to buy those equity shares from another party, or the shareholders of the entity provide the equity instruments granted. The interpretation also extends to the way in which subsidiaries, in their separate financial statements, account for such schemes when their employees receive rights to equity instruments of the parent. This Interpretation applies to the way the Group's subsidiaries account, in their individual financial statements, for options

granted to their employees to buy equity shares of the Company. The accounting treatment followed by the Group is in line with the relevant provisions of the Interpretation.

- IFRIC 12, "Service Concession Arrangements". This Interpretation outlines an approach to account for contractual (service concession) arrangements arising from entities providing public services. It provides that the operator should not account for the infrastructure as property, plant and equipment, but recognize a financial asset and/or an intangible asset. IFRIC 12 is not relevant to the Group.
- IFRIC 14, "IAS 19 The Limit on a Defined Benefit Asset, Minimum Funding Requirements and their Interaction". IFRIC 14 provides guidance on how to assess the limit on the amount of surplus in a defined benefit scheme that can be recognised as an asset under IAS 19 Employee Benefits. It also explains how this limit, also referred to as the "asset ceiling test", may be influenced by a minimum funding requirement and aims to standardize current practice. The Group expects that this Interpretation will have no impact on its financial position or performance as all defined benefit schemes are currently in deficit.
- 2.1.2 The following new standards, amendments to standards and interpretations have been issued but are not effective for the financial year beginning 1 January 2008:
- IFRIC 13, "Customer Loyalty Programmes", effective for financial years beginning on or after 1 July 2008. This Interpretation requires customer loyalty award credits to be accounted for as a separate component of the sales transaction in which they are granted and therefore part of the fair value of the consideration received is allocated to the award credits and deferred over the period that the award credits are fulfilled. This interpretation will have no impact on the Group's financial statements as no such schemes currently exist.
- IFRIC 15, "Agreements for the Construction of Real Estate", effective for financial years beginning on or after 1 January 2009 and is to be applied retrospectively. IFRIC 15 provides guidance on how to determine whether an agreement for the construction of real estate is within the scope of IAS 11 'Construction Contracts' or IAS 18 'Revenue' and, accordingly, when revenue from such construction should be recognised. This Interpretation has not yet been endorsed by the EU. IFRIC 15 will not have any impact on the financial statements because the group does not conduct real estate activity.
- IFRIC 16, "Hedges of a Net Investment in a foreign operation", effective for financial years beginning on or after 1 October 2008 and is to be applied prospectively.

  IFRIC 16 clarifies three main issues, namely:
  - A presentation currency does not create an exposure to which an entity may apply hedge accounting. Consequently, a parent entity may designate as a hedged risk only the foreign exchange differences arising from a difference between its own functional currency and that of its foreign operation.
  - Hedging instrument(s) may be held by any entity or entities within the group.

### NIREUS AQUACULTURE S.A

- While IAS 39, 'Financial Instruments: Recognition and Measurement', must be applied to determine the amount that needs to be reclassified to profit or loss from the foreign currency translation reserve in respect of the hedging instrument, IAS 21 'The Effects of Changes in Foreign Exchange Rates' must be applied in respect of the hedged item.

This Interpretation has not yet been endorsed by the EU. The Group is in the process of assessing the impact of this interpretation and which accounting policy to adopt for the recycling on the disposal of the net investment.

- *IFRIC 17*, "*Distributions of Non-cash Assets to Owners*", effective for annual periods beginning on or after 1 July, 2009. IFRIC 17 clarifies the following issues, namely:
  - a dividend payable should be recognised when the dividend is appropriately authorised and is no longer at the discretion of the entity;
  - an entity should measure the dividend payable at the fair value of the net assets to be distributed;
  - an entity should recognise the difference between the dividend paid and the carrying amount of the net assets distributed in profit or loss; and
  - an entity to provide additional disclosures if the net assets being held for distribution to owners meet the definition of a discontinued operation.

IFRIC 17 applies to pro rata distributions of non-cash assets except for common control transactions This Interpretation has not yet been endorsed by the EU. It is to be applied prospectively and earlier application is permitted. The Group is in the process of assessing the impact of this interpretation.

- IFRIC 18, "Transfers of Assets from Customers", effective for financial years beginning on or after 1 July 2009 and is to be applied prospectively. However, limited retrospective application is permitted. This Interpretation is of particular relevance for the utility sector as it clarifies the accounting for agreements where an entity receives an item of PP&E (or cash to construct such an item) from a customer and this equipment in turn is used to connect a customer to the network or to provide ongoing access to supply of goods/services. Group is in the process of assessing the impact of this interpretation.
- *IFRS 2*, "Share-based Payments" (Amended), effective for annual periods beginning on or after 1 January 2009. The amendment clarifies two issues. The definition of 'vesting condition', introducing the term 'non-vesting condition' for conditions other than service conditions and performance conditions. It also clarifies that the same accounting treatment applies to awards that are effectively cancelled by either the entity or the counterparty. The Group expects that this Interpretation will have no impact *or* no material impact on its financial statements
- IFRS 3, "Business Combinations" (Revised) and IAS 27, "Consolidated and Separate Financial Statements" (Amended), effective for annual periods beginning on or after 1 July 2009. A revised version of IFRS 3 Business Combinations and an amended version of IAS 27 Consolidated and Separate Financial Statements were issued by IASB on January 10, 2008. The revised IFRS 3 introduces a number of changes in the accounting for business combinations which will impact the amount of goodwill recognised, the reported results in the period that an acquisition occurs, and

### NIREUS AQUACULTURE S.A

future reported results. Such changes include the expensing of acquisition-related costs and recognising subsequent changes in fair value of contingent consideration in the profit or loss (rather than by adjusting goodwill). The amended IAS 27 requires that a change in ownership interest of a subsidiary is accounted for as an equity transaction. Therefore such a change will have no impact on goodwill, nor will it give raise to a gain or loss. Furthermore the amended standard changes the accounting for losses incurred by the subsidiary as well as the loss of control of a subsidiary. The changes introduced by IFRS 3 (Revised) and IAS 27 (Amendment) must be applied prospectively and will affect future acquisitions and transactions with minority interests. The revised IFRS 3 and amendments to IAS 27 have not yet been endorsed by the EU.

- *IFRS 8*, "*Operating Segments*", effective for annual periods beginning on or after 1 January 2009. IFRS 8 replaces IAS 14 'Segment reporting'. IFRS 8 adopts a management approach to segment reporting. The information reported would be that which management uses internally for evaluating the performance of operating segments and allocating resources to those segments. This information may be different from that reported in the balance sheet and income statement and entities will need to provide explanations and reconciliations of the differences. The Group will apply the above standard on its financial statements as of 2009.
- IAS 1, "Presentation of Financial Statements" (Revised), effective for annual periods beginning on or after 1 January 2009. IAS 1 has been revised to enhance the usefulness of information presented in the financial statements. Of the main revisions are the requirement that the statement of changes in equity includes only transactions with shareholders; the introduction of a new statement of comprehensive income that combines all items of income and expense recognised in profit or loss together with "other comprehensive income"; and the requirement to present restatements of financial statements or retrospective application of a new accounting policy as at the beginning of the earliest comparative period, i.e. a third column on the balance sheet. The Group will make the necessary changes to the presentation of its financial statements in 2009.
- IAS 32 and IAS 1, "Puttable Financial Instruments" (Amended), effective for annual periods beginning on or after 1 January 2009. The amendment to IAS 32 requires certain puttable financial instruments and obligations arising on liquidation to be classified as equity if certain criteria are met. The amendment to IAS 1 requires disclosure of certain information relating to puttable instruments classified as equity. The Group does not expect these amendments to impact the financial statements of the Group.
- IAS 23, "Borrowing Costs" (Revised), effective for annual periods beginning on or after 1 January 2009. The benchmark treatment in the existing standard of expensing all borrowing costs to the income statement is eliminated in the case of qualifying assets. All borrowing costs that are directly attributable to the acquisition or construction of a qualifying asset must be capitalised. A qualifying asset is an asset that necessarily takes a substantial period of time to get ready for its intended use or sale. In accordance with the transitional requirements of the Standard, the Group / Company will adopt this as a prospective change. Accordingly, borrowing costs will be capitalised on qualifying assets with a commencement date after 1 January 2009. No changes will be made for borrowing costs incurred to this date that have been expensed.

- IAS 39, "Financial Instruments: Recognition and Measurement" and IFRIC 9, "Reassessment of embedded derivatives" (Amended), effective for annual periods ending on or after 30 June 2009. This amendment clarifies the accounting treatment of embedded derivatives for entities that make use of the Reclassification Amendment issued by the IASB in October 2008. The reclassification amendment allows entities to reclassify particular financial instruments out of the 'fair value through profit or loss' category in specific circumstances. These amendments to IFRIC 9 and IAS 39 clarify that on reclassification of a financial asset out of the 'fair value through profit or loss' category, all embedded derivatives have to be assessed and, if necessary, separately accounted for in financial statements. The amendments apply retrospectively and are required to be applied. This amendment is not relevant to the Group. This amendment has not yet been endorsed by the EU.
- IFRS 1, "First-time Adoption of International Financial Reporting Standards" and IAS 27, "Consolidated and Separate Financial Statements" (Amended), effective for annual periods beginning on or after 1 January 2009. The amendments to IFRS 1 allows an entity to determine the 'cost' of investments in subsidiaries, jointly controlled entities or associates in its opening IFRS financial statements in accordance with IAS 27 or using a deemed cost. The amendment to IAS 27 requires all dividends from a subsidiary, jointly controlled entity or associate to be recognised in the income statement in the separate financial statement. The amendment to IAS 27 will have to be applied prospectively. The new requirements affect only the parent's separate financial statement and do not have an impact on the consolidated financial statements. The Group expects that this amendment will have no impact on its financial statements
- IFRS 7, "Financial Instruments: Disclosures" (Amended), effective for annual periods beginning on or after 1 January 2009. The amendment requires fair value measurements to be disclosed by the source of inputs, using the following three-level hierarchy: a) Quoted prices (unadjusted) in active markets for identical assets and liabilities (Level 1). (b) Inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (as prices) or indirectly (derived from prices) (Level 2) (c) Inputs for the asset or liability that are not based on observable market data (unobservable inputs) (level 3). This information must be given by class of financial instrument. The amendment also revises specified minimum liquidity risk disclosures. This amendment will not have a significant impact on the Group or the Company. This amendment has not yet been endorsed by the EU.
- IAS 39, "Financial Instruments: Recognition and Measurement" (Amended), effective for annual periods beginning on or after 1 July 2009. The amendment relates to eligible hedged items and addresses the designation of a one-sided risk in a hedged item, and the designation of inflation as a hedged risk or portion in particular situations. It clarifies that an entity is permitted to designate a portion of the fair value changes or cash flow variability of a financial instrument as hedged item. The amendment to IAS 39 has not yet been endorsed by the EU. The Company has concluded that the amendment will have no impact on the financial position or performance of the Company, as the Company has not entered into any such hedges.

In May 2008 the IASB issued its first omnibus of amendments to its standards, primarily with a view to removing inconsistencies and clarifying wording. These amendments are effective for periods beginning on or after 1 January 2009 and have not yet been endorsed by the EU.

- IFRS 5, "Non-current Assets Held for Sale and Discontinued Operations" (Amended), effective for annual periods beginning on or after 1 July 2009. The amendment clarifies that all of a subsidiary's assets and liabilities are classified as held for sale, under IFRS 5, even when the entity will retain a non-controlling interest in the subsidiary after the sale. To be applied prospectively from the date at which the company first applied IFRS 5. Therefore, any investments in subsidiaries classified as held for sale since IFRS 5 was applied will need to be re-evaluated. Early application is permitted. If early adopted, IAS 27 (as amended in January 2008) must also be adopted from that date.
- *IFRS 7*, "*Financial Instruments: Disclosures*" (*Amended*), effective for annual periods beginning on or after 1 January 2009. This amendment removes the reference to 'total interest income' as a component of finance costs.
- IAS 1, "Presentation of Financial Statements" (Amended), effective for annual periods beginning on or after 1 January 2009. This amendment clarifies that assets and liabilities classified as held for trading in accordance with IAS 39 Financial Instruments: Recognition and Measurement are not automatically classified as current in the balance sheet. To be applied retrospectively. Early application is permitted.
- IAS 8, "Accounting Policies, Changes in Accounting Estimates and Errors" (Amended), effective for annual periods beginning on or after 1 January 2009. This amendment clarifies that only implementation guidance that is an integral part of an IFRS is mandatory when selecting accounting policies.
- *IAS 10, "Events after the Reporting Period"* (*Amended*), effective for annual periods beginning on or after 1 January 2009. This amendment clarifies that dividends declared after the end of the reporting period are not obligations.
- IAS 16, "Property, Plant and Equipment" (Amended), effective for annual periods beginning on or after 1 January 2009.
  - Replaces the term 'net selling price' with 'fair value less costs to sell', regarding the recoverable amount, to be consistent with IFRS 5 and IAS 36 Impairment of Assets.
  - Items of property, plant & equipment held for rental that are routinely sold in the ordinary course of business after rental, are transferred to inventory when rental ceases and they are held for sale. Proceeds on sale are subsequently shown as revenue. IAS 7 Statement of cash flows is also revised, to require cash payments to manufacture or acquire such items to be classified as cash flows from operating activities. The cash receipts from rents and subsequent sales of such assets are also shown as cash flows from operating activities.

- *IAS 18*, "*Revenue*" (*Amended*), effective for annual periods beginning on or after 1 January 2009. This amendment replaces the term 'direct costs' with 'transaction costs' as defined in IAS 39.
- IAS 19, "Employee Benefits" (Amended), effective for annual periods beginning on or after 1 January 2009.
  - Revises the definition of 'past service costs' to include reductions in benefits related to past services ('negative past service costs') and to exclude reductions in benefits related to future services that arise from plan amendments.
     Amendments to plans that result in a reduction in benefits related to future services are accounted for as a curtailment. To be applied prospectively to changes to benefits occurring on or after 1 January 2009. Early application is permitted.
  - Revises the definition of 'return on plan assets' to exclude plan administration costs if they have already been included in the actuarial assumptions used to measure the defined benefit obligation. To be applied retrospectively.
     Early application is permitted.
  - Revises the definition of 'short-term' and 'other long term' employee benefits to focus on the point in time at which the liability is due to be settled. To be applied retrospectively. Early application is permitted.
  - Deletes the reference to the recognition of contingent liabilities to ensure consistency with IAS 37 Provisions, Contingent Liabilities and Contingent Assets. IAS 37 does not allow for the recognition of contingent liabilities.
     To be applied retrospectively. Early application is permitted.
- IAS 20, "Accounting for Government Grants and Disclosure of Government Assistance" (Amended), effective for annual periods beginning on or after 1 January 2009. Loans granted with no or low interest rates will not be exempt from the requirement to impute interest. Interest is to be imputed on loans granted with below-market interest rates, thereby being consistent with IAS 39. The difference between the amount received and the discounted amount is accounted for as a government grant. To be applied prospectively to government loans received on or after 1 January 2009. Early application is permitted. However, IFRS 1 First-time Adoption of IFRS has not been revised for first-time adoptees; hence they will be required to impute interest on all such loans outstanding at the date of transition.
- *IAS 23*, "*Borrowing Costs*" (*Amended*), effective for annual periods beginning on or after 1 January 2009. The amendment revises the definition of borrowing costs to consolidate the types of items that are considered components of 'borrowing costs' into one the interest expense calculated using the effective interest rate method as described in IAS 39. To be applied retrospectively. Early application is permitted.
- IAS 27 "Consolidated and Separate Financial Statements" (Amended), effective for annual periods beginning on or after 1 January 2009. When a parent entity accounts for a subsidiary at fair value in accordance with IAS 39 in its separate financial statements, this treatment continues when the subsidiary is subsequently classified as held for sale. To be applied prospectively from the date at which the company first applied IFRS 5. Therefore, any subsidiaries classified as held for sale since IFRS 5 was adopted will need to be re-evaluated. Early application is permitted.

- IAS 28, "Investment in Associates" (Amended), effective for annual periods beginning on or after 1 January 2009.
  - If an associate is accounted for at fair value in accordance with IAS 39 (as it is exempt from the requirements of IAS 28), only the requirement of IAS 28 to disclose the nature and extent of any significant restrictions on the ability of the associate to transfer funds to the entity in the form of cash or repayment of loans applies. To be applied retrospectively, although an entity is permitted to apply it prospectively. Early application is permitted. If early adopted, an entity must also adopt the amendment below, and the amendments to paragraph 3 of IFRS 7 Financial Instruments: Disclosures, paragraph 1 of IAS 31 Joint Ventures and paragraph 4 of IAS 32 Financial Instruments: Presentation at the same time.
  - An investment in an associate is a single asset for the purpose of conducting the impairment test including any reversal of impairment. Therefore, any impairment is not separately allocated to the goodwill included in the investment balance. Any impairment is reversed if the recoverable amount of the associate increases. If early adopted, an entity must also adopt the amendment above, and the amendments to paragraph 3 of IFRS 7 Financial Instruments: Disclosures, paragraph 1 of IAS 31 Joint Ventures and paragraph 4 of IAS 32 Financial Instruments: Presentation at the same time.
- IAS 29, "Financial Reporting in Hyperinflationary Economies" (Amended), effective for annual periods beginning on or after 1 January 2009. This amendment revises the reference to the exception to measure assets and liabilities at historical cost, such that it notes property, plant and equipment as being an example, rather than implying that it is a definitive list. No specific transition requirements have been stated as it is a clarification of the references rather than a change.
- IAS 31, "Interest in Joint ventures" (Amended), effective for annual periods beginning on or after 1 January 2009. This amendment clarifies that if a joint venture is accounted for at fair value, in accordance with IAS 39 (as it is exempt from the requirements of IAS 31), only the requirements of IAS 31 to disclose the commitments of the venturer and the joint venture, as well as summary financial information about the assets, liabilities, income and expenses will apply. Early application is permitted. If early adopted, an entity must also adopt the amendments to paragraph 3 of IFRS 7 Financial Instruments: Disclosures, IAS 28 Investments in Associates and paragraph 4 of IAS 32 Financial Instruments: Presentation at the same time.
- IAS 34, "Interim Financial Reporting" (Amended), effective for annual periods beginning on or after 1 January 2009. This amendment clarifies that earnings per share is disclosed in interim financial reports if an entity is within the scope of IAS 33.
- *IAS 36, "Impairment of assets"* (*Amended*), effective for annual periods beginning on or after 1 January 2009. This amendment clarifies that when discounted cash flows are used to estimate 'fair value less costs to sell', the same disclosure is required as when discounted cash flows are used to estimate 'value in use'. To be applied retrospectively. Early application is permitted.

- IAS 38, "Intangible Assets" (Amended), effective for annual periods beginning on or after 1 January 2009.
  - Expenditure on advertising and promotional activities is recognised as an expense when the entity either has the right to access the goods or has received the services. To be applied retrospectively. Early application is permitted.
  - Deletes references to there being rarely, if ever, persuasive evidence to support an amortisation method for finite life intangible assets that results in a lower amount of accumulated amortisation than under the straight-line method, thereby effectively allowing the use of the unit of production method. To be applied retrospectively. Early application is permitted.
  - A prepayment may only be recognised in the event that payment has been made in advance to obtaining right of access to goods or receipt of services.
- IAS 39, "Financial instruments recognition and measurement" (Amended), effective for annual periods beginning on or after 1 January 2009.
  - Clarifies that changes in circumstances relating to derivatives specifically derivatives designated or de-designated as hedging instruments after initial recognition are not reclassifications. Thus, a derivative may be either removed from, or included in, the 'fair value through profit or loss' classification after initial recognition. Similarly, when financial assets are reclassified as a result of an insurance company changing its accounting policy in accordance with paragraph 45 of IFRS 4 Insurance Contracts, this is a change in circumstance, not a reclassification. To be applied retrospectively. Early application is permitted.
  - Removes the reference in IAS 39 to a 'segment' when determining whether an instrument qualifies as a hedge. To be applied retrospectively. Early application is permitted.
  - Requires use of the revised effective interest rate (rather than the original effective interest rate) when remeasuring a debt instrument on the cessation of fair value hedge accounting. To be applied retrospectively. Early application is permitted.
- IAS 40, "Investment property" (Amended), effective for annual periods beginning on or after 1 January 2009.
  - Revises the scope (and the scope of IAS 16) such that property that is being constructed or developed for future use as an investment property is classified as investment property. If an entity is unable to determine the fair value of an investment property under construction, but expects to be able to determine its fair value on completion, the investment under construction will be measured at cost until such time as fair value can be determined or construction is complete. To be applied prospectively. Early application is permitted. An entity is permitted to apply the amendments to investment properties under construction from any date before 1 January 2009 provided that the fair values of investment properties under construction were determined at those dates.

- Revises the conditions for a voluntary change in accounting policy to be consistent with IAS 8.
- Clarifies that the carrying amount of investment property held under lease is the valuation obtained increased by any recognised liability.
- IAS 41, "Agriculture" (Amended), effective for annual periods beginning on or after 1 January 2009.
  - Replaces the term 'point-of-sale costs' with 'costs to sell'. Revises the example of produce from trees in a plantation forest from 'logs' to 'felled trees'.
  - Removes the reference to the use of a pre-tax discount rate to determine fair value, thereby allowing use of either a pre-tax or post-tax discount rate depending on the valuation methodology used.
  - Removes the prohibition to take into account cash flows resulting from any additional transformations when estimating fair value. Rather, cash flows that are expected to be generated in the 'most relevant market' are taken into account. To be applied prospectively. Early application is permitted.

### 2.2 Critical accounting estimates and assumptions

The preparation of financial statements in conformity with IFRS requires the use of certain critical accounting estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of preparation of the financial statements and the reported amounts of revenue and expenses during the reporting period. Actual results may differ from those, which have been estimated. Estimates and judgments are continually evaluated and are based on historical experience and other factors, including expectations of future events that are assessed to be reasonable under the present circumstances.

### **Judgments, Estimates and Assumptions**

The Management of the Group performs basic valuations in relation to specific amounts which are included or affect the financial statements, in addition to specific disclosures which are evaluated, requiring the establishment of assumptions as regards the values or conditions, those which cannot be assessed with certainty at the time of preparation of the financial statements. An accounting estimate is deemed important if it is significant for the presentation of the company's financial position and financial performance and requires management's most difficult, subjective or complex judgments, often as a result of the requirement of forming estimates in connection with the impact of assumptions which are uncertain. The Group continuously evaluates such estimates, based on past results and historical experience, consultations with experts, trends and other factors, which are considered reasonable under particular circumstances, including expectation of future events. Accounting policies which have been selected among accepted alternatives are presented in Note 3. The basic judgments and estimates used by the Group management (except those in connection with estimates, which are disclosed hereafter) that have the most significant impact on the accounts recognized in the financial statements, mainly relate to:

#### A. Classification of investments

Management uses its judgment with respect to the acquisition of an investment, in view of this being classified as held to maturity, held for trading, measured at fair value through profit or loss, or available-for-sale. For investments classified as held to maturity, management assesses whether the criteria of IAS 39 are met and in particular whether the Group has the positive intent and ability to hold to maturity. The company classifies the investments as financial asset or liability held for trading if these were acquired principally for the purpose of generating profit in the short term. When investments are not classified as held for trading, and when reliable fair values are available and the changes in fair values are included in the profit or loss of the management's accounts, these are classified as measured at fair value through profit or loss. All other investments are classified as available-for-sale.

#### **B.** Recovery of Receivables

Management annually reviews the recoverability of the carrying amounts of accounts receivable given external information (data base of customers credit ratings, legal advisors) in order to assess the recoverability of the carrying value of accounts receivable.

#### C. Impairment of non-financial assets

Management annually reviews future cash benefits which will inflow from equity shares of other companies in order that any potential provision for impairment is recognized. The impairment test for goodwill is based on values in use calculations that use a discounted cash flow model. The cash flows are derived from the companies' budget and do not include restructuring activities that the Group is not yet committed to or significant future investments that will enhance the asset base of the cash generating unit being tested. The recoverable amount is most sensitive to the discount rate used in the discounted cash flow model as well as to the expected future cash inflows and the growth rate used for extrapolation purposes.

#### **D.** Discontinued operations

Management examines the classification of a non-current asset (or disposal group) as held for sale if the carrying amount will be recovered principally through sale rather than through continuing use. In order for this to occur, the asset or (disposal group) should be immediately available for sale at its present state, based on terms which are common and standardized for the sale of such assets (or disposal group). For the sale to be highly probable, the appropriate level of management must be committed to a plan to sell the asset (or disposal group), and an active program to locate a buyer and complete the plan must have been initiated. Further, the asset (or disposal group) must be actively marketed for sale at a price that is reasonable in relation to its current fair value.

An entity shall not classify, as held for sale, a non-current asset (or disposal group) that is to be abandoned. This is because its carrying amount will be recovered principally through continuing use. Non-current assets (or disposal groups) to be abandoned include non-current assets (or disposal groups) that are to be used to the end of their economic life and non-current assets (or disposal groups) that are to be closed rather than sold.

#### E. Consolidation of an entity through the net equity method

The company applies the net equity method by using the most recent and available financial statements of the affiliated company. In the event that the accounting policies of the affiliated companies differ from those of the Group for common transactions and events under common conditions, appropriate adjustments are made in order that the net equity method is applied.

#### F. Estimated Impairment of Goodwill and Intangible assets

The Group annually tests goodwill for impairment and reviews events or conditions that provide evidence for the existence of impairment, as for example a significant unfavorable change in the corporate environment or a decision taken for a sale or disposal of a unit or an operating segment. The assessment of whether an impairment exists requires the valuation of the recoverable amount (which is the higher of fair value less costs to sell and value-in-use) of the respective cash generating unit to which goodwill has been allocated. The recoverable amount is assessed using the cash flows discounted method which effectively gives the Value in Use. The application of this methodology includes actual operating results, future business plans, economic extensions as well as market data (statistic and non-statistical) and is obtained by independent valuers. If a requirement for an impairment of goodwill results from this analysis, the assessment of impairment requires the measurement of fair value for each identifiable asset. In this event, the cash flows approach, referred to above is used by external independent valuers.

The group annually tests goodwill for impairment, in accordance with the accounting policy stated in Note 3.8. The recoverable amounts of cash-generating units have been determined on the basis of value-in-use calculations, which require the use of estimates.

Moreover, other recognizable intangible assets of infinite useful lives and not subject to amortization are tested for impairment by comparing the carrying amount with the Value In Use, namely the total of the non discounted cash flows that is expected to be generated from the asset. Intangible assets of infinite useful lives and tangible assets are annually tested for impairment whenever an impairment indicator exists, using a Value In Use, fair value method as the cash flows discounted.

#### G. Income taxes

The Group is subject to income taxes from numerous tax regulatory authorities. Significant judgments are required in determining the provision for income taxes. There are many transactions and calculations involved during the accurate assessment of tax liabilities which are uncertain during the ordinary course of business and therefore no recognition is made for relevant liabilities with respect to anticipated tax audit issues.

#### H. Fair value of derivatives and other financial instruments

Accounting for derivatives similar to hedge accounting requires, upon inception and according to contract terms, that the hedged asset and the relative derivative meet the criteria for hedging accounting. Accounting for derivatives is a complex issue. In the event whereby the accounting policies are accurately applied, changes in the fair value of the derivative are

presented in the profit and loss, while the net-off of changes in the fair value is presented in the profit and loss only upon their realization, irrespective of whether the hedging relationship is effective.

In assessing whether a hedging relationship qualifies for hedge accounting, the relationship is examined as to whether it meets the strict criteria for exception from the ongoing assessment of hedge effectiveness. For a hedging relationship which does not meet the criteria for exception, effectiveness is assessed at the inception and for each six-month period that follows, determining to the extent to which changes in the fair value of a derivative, within a specific range of prices, offsets changes in the fair value of a hedged item. This assessment is carried out cumulatively at each reporting period. In the event whereby hedging is deemed ineffective, hedge accounting in this hedging relationship is discontinued. The fair values of derivative instruments and hedging instruments are measured through the use of internal valuation models incorporating market assumptions that are confirmed by independent sources.

The Group uses derivatives in order to mitigate the risk which relates to the interest rate volatility, which though do not meet the criteria of hedge accounting.

At 31 December 2008, the derivative financial asset was  $\in$  0 for the company (2007:  $\in$  15.530) and  $\in$  0 for the Group (2007:  $\in$  265.859). Further information relating to the use of derivatives is presented in note 7.14.

#### I. Fair value of biological assets

Management classifies the inventory of biological assets in two basic categories. The first is that where due to their size these can be sold and are measured at market values (i.e. selling prices, which reflect the fair value less the point of sale costs) of the first week following the year-end date of preparation of the financial statements, or in the event of significant changes in the price arising until the date of preparation of the Financial Statements, the latter price is used as a measurement value. The second category is that where due to the size of the produce, these cannot be sold. This category is measured at cost as regards fish and at fair value as regards the number of spawn included in it (fish). Gain or loss arising from changes in the fair value of biological assets is disclosed in the income statement.

At 31/12/2008 the fair value of spawn and fish for the Group amounted to Euro 240.722.149 (31/12/2007: Euro 190.613.433) and of poultry-livestock to Euro 436.695 (31/12/2007: Euro 426.778). Further information relating to the fair value of biological assets is stated in note 7.9.

#### J. Provisions

Uncollectible accounts are disclosed at recoverable amounts. Estimations in connection with the recoverable amounts are based on relevant analysis and in accordance with Group experience regarding the probability of which customers may default in payments. On the basis of evidence that a particular account is subject to a higher than usual credit risk (i.e. low credit rating of the customer, litigation relating to existence or to the amount of the claim, etc.), the account is analysed and then recorded as an uncollectible receivable if circumstances indicate that the claim is unrecoverable.

## K. Contingencies

The Group has contingent liabilities in respect of legal claims arising from the ordinary course of business. Management deems that any outcome of these legal claims would not materially affect the financial position of the group as of 31 December 2008. Nevertheless, the determination of contingent liabilities relating to litigations and legal claims is a complex

procedure that includes judgments as regards probable consequences and interpretations relating to laws and regulations. Changes in judgments or interpretations are likely to result in an increase or a decrease of the Group's contingent liabilities in the future.

## 3. Summary of Significant accounting policies

The main accounting policies applied in the preparation of the consolidated financial statements and the standalone financial statements of the parent are set out below.

It is worth mentioning as referred to in detail in the preceding paragraph 2.2, that accounting estimates and assumptions are used in the preparation of the financial statements. Despite the fact that these estimates are based on management's best knowledge as regards current events and actions, actual results may differ from those which have initially been estimated. The consolidated financial statements are presented in Euro.

## 3.1 Segment Reporting

A business segment is a group of assets and operations engaged in providing products or services that are subject to risks and returns that are different from those of other business segments.

A geographical segment is defined as a geographical area providing products and services within a particular economic environment that is subject to risks and returns that are different from those of segments operating in other economic environments.

The primary activity segments of the Group are: aquaculture, the production and sale of fishfeed, aviculture and stockfeed products the production of foodstuffs & confectionery products (only for the year 2007) and their resale as well as the other related services. With respect to the geographical segments the Group is active in the Greek Territory, the Euro zone and in other countries.

#### 3.2 Consolidation

The significant accounting policies, which have been used in the preparation of these consolidated financial statements, are summarized as follows:

**Subsidiaries:** Are all entities that are managed or controlled, directly or indirectly, by another entity (parent company). Control exists when the parent company has (a) the power over more than half of the voting rights by virtue of an agreement with other investors; (b) power to govern the financial and operating policies of the entity under a statute or an agreement; (c) power to appoint or remove the majority of the members of the board of directors or equivalent governing body and control of the entity is by that board or body; or (d) power to cast the majority of votes at meetings of the board of directors or equivalent governing body and control of the entity is by that board or body.

Nireus AE gains and exercises control through voting rights in conjunction with control over the majority of the board of directors. The existence of potential voting rights that are exercisable during the preparation of the financial statements is considered in order to assess whether the parent company controls the subsidiaries. The subsidiaries are fully consolidated from the date on which control is transferred to the group and are de-consolidated from the date that control ceases.

The Group uses the purchase method of accounting for the acquisition of subsidiaries. The cost of an acquisition is measured, as the fair value of the assets given, equity instruments issued and liabilities incurred or assumed at the date of exchange, plus costs directly attributable to the acquisition. Identifiable assets acquired and liabilities and contingent liabilities assumed in a business combination are measured initially at their fair values at the acquisition date, irrespective of the extent of any minority interest. The excess of the cost of acquisition over the fair value of the Group's share of the identifiable net assets acquired is recorded as goodwill. If the cost of acquisition is less than the fair value of the identifiable assets acquired, the difference is recognized directly in the income statement.

Especially for the business combinations that took place before the date of transition of the Group to the IFRS (1st January 2004) the exemption of IFRS 1 was adopted while the purchase method was not retrospectively applied. Within the framework of the above exemption, the Company did not recalculate the cost of subsidiaries acquired before the date of transition to the IFRS, or the fair value of the assets and liabilities acquired on the date of the acquisition. Therefore, the goodwill recognized on the transition date was based on the exemption of the IFRS 1 and was calculated according to the previous accounting policies and was presented in the same way that it was presented in the last published financial statements of the group, before the transition to the IFRS. The examination of the impairment of goodwill resulted from the transition date to IFRS.

Subsidiaries' accounting policies have been changed where necessary to ensure consistency with the policies adopted by the Group.

Intercompany transactions, balances and unrealized gains on transactions between group companies are eliminated.

Unrealized losses are also eliminated unless the transaction provides evidence of an impairment of the asset transferred.

**Associates:** are entities over which the Group has significant influence but which do not meet the criteria of either a subsidiary or participation in a joint venture. The assumptions used by the group indicate that a shareholding of between 20% and 50% of the voting rights of a company implies a significant influence on this company. Investments in associates are accounted for by the equity method of accounting and are initially recognized at cost. At the end of each year, the cost is increased with the proportion of the contribution in the net equity of the invested company and is decreased with the dividends obtained from the associate company. As regards the goodwill of the investment in associates, this is included in the value of the investment and is tested for impairment when such indicators exist. Through the application of IFRS 3, the Group does not account for depreciation of goodwill.

The Group's share of its associates' post-acquisition profits or losses is recognized in the income statement under item "Profits or Losses from consolidation by the net equity method" in the consolidated income statement for the year and therefore have an impact on the net results of the group, while its share of post-acquisition movements in reserves is recognized in reserves. The cumulative post-acquisition movements are adjusted against the carrying amount of the investment in associates. When the Group's share of losses in an associate equals or exceeds its interest in the associate, including any other unsecured receivables, the Group does not recognize further losses, unless it has incurred obligations or has made payments on behalf of the associate and in general those arising from its capacity as owner.

Unrealized gains on transactions between the Group and its associates are eliminated to the extent of the Group's interest in the associates. Unrealized losses are also eliminated unless the transaction provides evidence of an impairment of the asset transferred. When the Financial Statements of an associate used for the equity method consolidation are prepared at reporting date that differs to that of the parent then adjustments in the financial statements of the associate are made that

reflect the impact of significant transactions or events occurred between that date and the date of the Financial Statements of the investing company. In any case, the difference between the reporting date of the associate and that of the investing company is more than 3 months.

Accounting policies of associates have been changed where necessary to ensure consistency with the policies adopted by the Group.

## 3.3 Biological Assets and Agricultural Activity

Agricultural activity refers to an enterprise's management of the biological transformation of biological assets for sale, into agricultural produce, or into additional biological assets. A biological asset is a living animal or plant under management by an enterprise, while agricultural produce is the harvested product of the enterprise's biological assets, which are intended for sale, process or consumption. The right of management of biological assets can arise from ownership or from another type of legal action.

With the definition "Agricultural Activity" we describe a diverse range of activities, which have certain common features such as:

- ✓ Capability of change, as for example, the living animals and plants that is capable of biological transformation.
- ✓ Management of change, creating, reinforcement or at least stabilizing conditions necessary in order for the living organism to develop.
- ✓ Measurement of change, that is the difference brought about by biological transformation so much in quality (ripeness, fat cover) as also in quantity (weight, progeny, etc.) of the enterprise's biological assets.

An enterprise should recognize a biological asset or agricultural produce when and only when:

- 1) The enterprise controls the asset as a result of past events.
- 2) It is probable that future economic benefits associated with the asset will flow to the enterprise.
- 3) The cost of the asset can be measured reliably.

A biological asset be measured upon initial recognition and at each balance sheet date at its fair value less estimated pointof-sale costs, except for the case where the fair value cannot be measured reliably.

If an active market exists for a biological asset or agricultural produce, the quoted price in that market is the appropriate basis for determining the fair value of that asset.

There is a presumption that fair value can be measured reliably for a biological asset. However, that presumption can be rebutted only on initial recognition for a biological asset for which market-determined prices or value are not available and for which alternative estimates of fair value are determined to be clearly unreliable. In such a case, that biological asset should be measured at its cost less any accumulated depreciation and any accumulated impairment losses. Once the fair value of such a biological asset becomes reliably measurable, an enterprise should measure it at fair value less estimated point-of-sale costs (in the event of such a case).

The company, following initial recognition of the biological assets measures these at each subsequent balance sheet date at fair value less the estimated until disposal cost.

A gain or loss that may arise on initial recognition of a biological asset and its subsequent measurement (less the estimated point-of-sale costs in both circumstances), are recognised in the results for the year in which it arises. Gain may also arise on initial recognition of biological assets, as for example, at the birth of a living organism.

The method applied in relation to stocktaking of biological inventories of the Company and the Group, is as follows:

Spawn is counted in pieces, which arise from expected quantity net of statistically arisen mortality. This quantity is physically verified with the quantity of sold spawn plus the quantity consumed for the production of fresh fish of the Company.

Fresh fish is monitored in pieces taking into account the initial number of spawn imported into production and the daily supervision of losses that is recorded.

The total fish arises:

- (a) From a special software programme measuring the biomass depending on the consumed food and the prevailing temperature and
- (b) The average weight per fish is calculated based on sampling testing of fish. The average weight multiplied by the number of fish, determines the total fish biomass.

The year-end inventory of fish is performed applying the (b) method, namely the sampling test verification of inventory weight recorded by categories of fish provided that each fish cage contains a specific category and size of fish. Biological assets are divided into subcategories depending on the maturity stage so that the reader of the financial statements is informed with respect to the timing of future cash flows, which the enterprise expects to generate from the exploitation of the biological assets.

## 3.4 Foreign currency translation

The financial statements of the Group and the Company are presented in Euros, which is the parent Company's functional and presentation currency.

Foreign currency transactions are translated into the functional currency using the exchange rates prevailing at the dates of the transaction dates.

Foreign exchange gains and losses resulting from the settlement of such transactions and from the translation at year-end exchange rates of monetary assets and liabilities denominated in foreign currencies are recognised in the income statement. Translation differences on non-monetary items measured at fair value through profit or loss are reported as part of their fair value gain or loss.

Foreign exchange gains and losses that relate to borrowings and cash and cash equivalents are presented in the income statement within "finance (costs)/ income". All other foreign exchange gains and losses are presented in the income statement within "other income/(expenses)".

The individual financial statements of the companies participating in the consolidation, and which are initially presented in a different currency from that of the presentation currency of the Group (none of which has currency in a hyperinflationary economy), are translated into Euro. The assets and liabilities have been translated into Euro at the exchange rate prevailing at the closing date of the balance sheet. The income and expenses have been translated into the Group's presentation currency at the average exchange rates of the referred period, although the net equity have been valued at historical rates apart from the currency translation differences. Any exchange differences arising from that procedure have been debited/(credited) to the reserve for translation of subsidiaries balance sheets in foreign currency of the equity.

## 3.5 Property, plant and equipment

All property, plant and equipment, apart from land and buildings, are presented in the financial statements at cost or at values of cost incurred as defined according to the fair values at the date of transition, less the accumulated depreciation and impairments of assets. Cost includes all directly attributable expenditure for the acquisition of the asset.

Subsequent costs are included in the asset's carrying amount or recognized as a separate asset, as appropriate, only when it is probable that future economic benefits associated with the asset will flow to the Group and the cost of the asset can be reliably measured. All repairs and maintenance costs are charged to the income statement during the financial period in which they are incurred.

Buildings are measured at fair value decreased by accumulated depreciation and any accumulated impairment loss.

Land used either for the production or managerial purpose is presented at its fair value. Given the indefinite useful life of land, the relevant carrying amounts of the assets are not subject to depreciation.

The fair value is assessed based on valuations by external independent valuers every five years, except if market conditions indicate an impairment in value, so as to assure that the carrying value does not significantly differ from the fair value.

Any revaluation surplus arising from revaluation of land and buildings is credited to the item "revaluation reserve" directly in equity, except if the carrying amount of the particular property asset has incurred an impairment loss as stated in Note 3.8. To the extent to which a devaluation has previously been recognized in other comprehensive income, a revaluation surplus is recorded in other comprehensive income, with the remaining being credited to equity. The decrease of the carrying amount of land and buildings arising from valuations or from impairment test is recognised with the decrease being debited directly to a revaluation surplus in equity relating to this asset and any remaining decrease being recognized in other comprehensive income.

The revaluation surplus is transferred directly to retained earnings upon the sale, write off or full obsolescence of the asset. Gains and losses on disposals of land and buildings are determined by comparing net proceeds from disposal, if any, against the asset's carrying amount and are recognised in the income statement. When revalued assets (land) are sold, the amounts included in revaluation reserve are transferred to retained earnings.

Depreciation on other assets (except for land which is not depreciated) is calculated using the straight-line method over its estimated useful lives, as follows:

| Buildings                   | 40 years    |
|-----------------------------|-------------|
| Plant and machinery         | 7 – 8 years |
| Vehicles                    | 5 – 7 years |
| Furniture & other equipment | 3-5 years   |

The assets' residual values and useful lives are reviewed, and adjusted if appropriate, at each balance sheet date. An asset's carrying amount is written down immediately to its recoverable amount and charged to the results, if the asset's carrying amount is greater than its estimated recoverable amount.

Gains and losses on disposals are assessed by comparing the proceeds against the carrying amount and are included in the income statement. All repairs and maintenance costs are charged to the income statement during the financial period in which they incur.

Self-constructed property, plant and equipment comprise additions to property plant and equipment and include direct payroll cost of staff who participates in the development (respective employer contributions), consumables and other general costs.

## 3.6 Investment Property

Investment property are investments that relate to all property (which includes land, buildings or part of a building or both) held by the owner (or by the lessee under a finance lease), with the purpose of earning rental income or for capital appreciation, or for both.

Investment property is initially recognized at cost, which is surcharged with all expenses which relate to the purchase transaction (e.g. notary fees, broker's fees, transfer taxes).

After initial recognition the investment property is measured at fair value, that is, the price at which the property can be exchanged between informed and willing parties in a usual trade transaction. The investment property is valued on an annual basis at fair value either through the company's internal study or by an independent, professionally qualified valuer.

The carrying amount recognized in the financial statements of the Group reflects market conditions at the Balance Sheet date.

Any gain or loss arising from a change in the fair value of the investment property constitutes a profit and loss item and is recognised in the income statement for the year in which it is incurred. For the current year's result recognised in the income statement, see Note 7.2.

Transfers to, or from, investment property should be made when, and only when, there is a change in use, that is evidenced by commencement or end of owner-occupation by the Group and by the end of construction or development of an operating lease to a third party.

For a transfer from investment property carried at fair value to owner-occupied property or inventories, the property's cost for subsequent accounting should be its fair value at the date of change in use. If an owner-occupied property becomes an investment property the Group applies the accounting defined by IAS 16 until the date of change in use. For a transfer from inventories to investment property that will be carried at fair value, any difference between the fair value of the property at that date and its pervious carrying amount should be recognised in net profit or loss for the period. When the Group completes the construction or development of a self-constructed investment property that will be carried at fair value, any difference between the fair value of the property at that date and its pervious carrying amount should be recognised in net profit or loss for the period.

An investment property is derecognised (eliminated from the balance sheet) on disposal or when the investment property is permanently withdrawn from use and no future economic benefits are expected from its disposal.

Gains or losses arising from the withdrawal or disposal of investment property is assessed the difference between the net disposal proceeds and the carrying amount of the asset and is recognised as income or expense in the income statement in the period of withdrawal or disposal.

## 3.7 Intangible assets

Intangible assets include goodwill, concessions and industrial property rights such as exploitation in fish farming, as well as computer software.

**Goodwill:** Goodwill represents the excess of the cost of acquisition over the fair value of the Group's share of the net identifiable assets of the acquired subsidiary/associate (goodwill of associates is included in the amount of investment in associate and is not identified as a separate asset) at the date of acquisition. The company at the date of acquisition recognizes goodwill arising from the acquisition, as an asset item, and discloses it at cost. This cost is equal to the amount by which the consolidation cost exceeds the enterprise's share in assets, liabilities and in the contingent liabilities of the acquired company which are valued at their fair values.

Following initial recognition, goodwill is measured at cost less accumulated losses due to impairment. Goodwill is not subject to amortisation, but is tested for impairment on an annual basis or more frequently, if events occur which provide an indication of loss in accordance with IAS 36.

In the event where the cost of acquisition is less than the company's share in assets, liabilities and in the contingent liabilities of the acquired enterprise, then the cost of the acquisition is recalculated, the fair values of the asset items, the liabilities and the contingent liabilities of the acquired enterprise are remeasured, and recognizing the difference directly in the income statement.

**Concessions and industrial property rights:** The concessions and the industrial property rights relate to licences for aquaculture and were measured at cost incurred as defined according to the fair values at the date of acquisition, less the accumulated depreciation and impairments of assets. Following the valuation at the date of transition, such assets are valued at cost less any impairment since they are of infinite useful lives and not subject to amortisation less any impairment.

**Computer and other software**. Acquired computer and other software licences are capitalized on the basis of cash costs incurred to acquire and bring the specific software to use. These costs are amortised using the straight-line method over their estimated useful lives, from 1 to 5 years.

#### 3.8 Impairment of non-financial assets

Goodwill, intangible and tangible assets of the Group are subject to impairment tests. For the purpose of assessing impairment, certain assets are grouped to the lowest separately identifiable group of assets that generates cash flows from their use (Cash-Generating Units). As a result, certain assets are separately tested for impairment while certain others are tested as Cash-Generating Units.

Goodwill is allocated to each Cash Generating Unit that is expected to benefit from the business combination in which the goodwill resulted. The C.G.U. represents the lowest level within the Group where goodwill is monitored for management purposes.

Impairment losses of a C.G.U. in which goodwill has been allocated, initially decrease the carrying amount of goodwill. Any remaining impairment loss is proportionally allocated to other assets of the C.G.U.

In the event where the Group sells an activity comprising part of a C.G.U. to which goodwill has earlier been allocated, then this goodwill is taken into account for the determination of profit or loss from the disposal and is proportionally allocated to the selling activity. Under this aspect, goodwill disposed is measured on the basis of the relative values of the disposed activity and the retained part of the C.G.U. Alternatively, when the group can reliably assess and prove that an alternative method can better reflect an assessment of goodwill in connection with the activity disposed, then the alternative method is applied.

Note 3.7 provide further details on initial recognition of goodwill.

Assets or C.G.U. that include part of the goodwill, other intangible assets that have an indefinite useful life and assets that are not yet available for use are tested for impairment at least on an annual basis. The other assets and C.G.U. are tested for impairment whenever there is an indication that the carrying amount may not be recoverable. Impairment loss is recognised to the amount by which the carrying amount of assets or C.G.U. exceeds the recoverable amount. Recoverable amount of an asset item or C.G.U., is the higher of the fair value and value in use (arises based on assessment of discounted future cash flows of the asset or the C.G.U.).

## 3.9 Financial Instruments (receivables/ liabilities)

The financial instruments of the Group, other than hedging instruments are classified into the following categories:

- Loans and receivables (receivables)
- Financial assets at fair value through profit or loss (receivables/liabilities)
- Available-for-sale financial assets (receivables)
- Held-to-maturity investments (receivables)
- Borrowings (liabilities)
- Other financial liabilities (liabilities)

Management determines the classification of its financial assets into the above categories at initial recognition, which differ in the manner of measurement and recognition of the result occurred, either through the income statement or directly through equity. Note 11 sets out a summarized presentation of all financial assets per category.

Financial assets are recognised using settlement date accounting.

Assessment of impairment is carried out at least at each balance sheet date or when there is an objective evidence that a financial asset or group of assets may be impaired.

The Group determines whether a host contract includes an embedded derivative in the agreement. An embedded derivative is separated from the host contract and accounted for as a derivative if a supporting analysis shows that the economic characteristics and risks of the embedded derivative are not closely related to the host contract.

## Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. These are established when the Group provides money, goods or services directly to a debtor without any intent of trading. Loans and receivables are measured at amortised cost using the effective interest method less any provision for impairment. Changes in the value of loans and receivables are recognised in profit or loss when the loans and receivables are written off, impaired or amortised.

Certain receivables are tested for impairment per each individual receivable (i.e. for each customer separately) in cases where the collection of the receivable has been considered overdue at the balance sheet date or in cases where there is objective evidence that indicates impairment. The remaining receivables are grouped and tested for impairment in total. Common characteristics of the Group include their geographical allocation, their sector of activity and, if applicable, other common indicators of credit risk.

Receivables and loans are included in current assets, with the exception of items with a maturity date exceed 12 months subsequent to the balance sheet date. These are classified as non-current assets in the balance sheet date and are presented as "Trade and other receivables", constituting the largest part of the Group's financial assets.

At each balance sheet date the company assesses whether objective indications exist which result in an impairment of the financial assets and liabilities.

## Financial assets or Financial liabilities at fair value through profit or loss

The financial assets or financial liabilities at fair value through profit or loss include financial assets that are classified either as held for trading or defined by the company as measured at fair value through profit or loss at their initial recognition. In addition, the derivative financial assets that do not qualify for hedge accounting (see note 3.10.) are classified as held for trading assets.

If a host contract includes one or more embedded derivatives, the Group assesses the entire combined contract as a financial asset at fair value through profit or loss except if the embedded derivative does not significantly modify the cash flows that otherwise the host contract itself would require, or separation of the embedded derivative(s) from the host contract is not permitted.

Following initial recognition the financial assets included in this category are measured at fair value through profit or loss. Financial assets that have initially been recognised as financial assets at fair value thought profit or loss cannot be reclassified under another category.

#### Available-for-sale financial assets

Available-for-sale financial assets are non-derivatives that are either designated in this category or not classified in any of the other categories. All financial assets designated in this category are measured at fair value, as long as this can be reliably determined, and gains or losses are recognised in equity following calculation of any tax effects.

When assets classified as available for sale are sold or impaired, the accumulated gains or losses recognised in equity are recognised in the income statement.

The fair value of financial instruments that are traded in active markets is determined based on their current bid prices. For financial instruments that are not traded in an active market their fair value is determined by the use valuation techniques

such as recent arm's length transactions, reference to other instruments that are substantially the same and discounted cash flow analysis. Equity securities that are not traded in an active market and are classified as Available-for-sale financial assets and for which their fair value cannot be reliably determined are measured at cost. At each balance sheet date the Group assesses whether there an indication that a financial asset or group of financial assets is impaired. For equity shares classified as financial assets available-for-sale, such evidence may entail a significant or prolonged decline in the fair value of the share below its cost. If such evidence exits, the cumulative loss in equity which is the difference between the acquisition cost and the current fair value of the asset is transferred to the profit or loss.

When assets are impaired the amount of accumulated impairment loss that is transferred from equity and recognised in profit or loss is the difference arising between the acquisition cost (after deduction of principal repayments and amortisation) and the fair value minus any impairment loss previously recognised.

Impairment losses recognised in profit or loss for an investment in an equity instrument classified as available-for-sale are not reversed through the profit or loss. Losses recognised in consolidated financial statements of previous periods arising from impairment of monetary securities are reversed through profit or loss, if the increase (impairment reverse) relates to events occurred subsequent to the recognition of impairment in the income statement.

## Held-to-maturity investments

Held-to-maturity investments are non-derivative financial assets with fixed or determinable payments and fixed maturities. The Financial assets are classified as held-to-maturity investments provided that the Group's Management has the positive intent and ability to hold until maturity. The Group has no held-to-maturity investments.

## **Borrowings**

Bank borrowings provide long-term financing to operations of the Group. All borrowings are recognised initially at cost, which is the fair value of the consideration received net of transaction costs incurred. Borrowings are classified as current and non-current depending on the effective contracts, whether their redemption is anticipated in the following twelve months or later, respectively.

After initial recognition, borrowings are subsequently stated at amortised cost and any difference between the proceeds and the redemption value is recognised in the income statement over the period of the borrowings using the effective interest method.

The amortised cost is calculated taking into account any transaction cost and any discount or above par amount at settlement.

The convertible bond loan comprises two components: a financial liability (a contractual arrangement to deliver cash or another financial asset) and an equity instrument (a call option granting the holder the right, for a specified period of time, to convert it into a fixed number of ordinary shares of the entity). The economic effect of issuing such an instrument is substantially the same as issuing simultaneously a debt instrument with an early settlement provision and warrants to purchase ordinary shares, or issuing a debt instrument with detachable share purchase warrants. Accordingly, the company presents the liability and equity (net of proportional tax) components separately on its balance sheet.

#### Other financial liabilities

The financial liabilities of the Group (except for loans) are disclosed in the Balance Sheet item "Other Non-current liabilities" as well as in the items "Trade and Other Payables" and "Other Current Liabilities".

The financial liabilities are recognised when the Group takes part in a contractual agreement of the financial instrument and derecognised when the Group is exempted from the liability or this is annulled or expires.

Interest is recognised as an expense in the item "Finance costs" in the income statement.

Trade liabilities are recognised initially at their nominal value and then measured at amortised cost less the settlement payments.

Gains or losses are recognised in the income statement when liabilities are written off or amortised.

When an existing financial liability is exchanged with another liability of a different type with the same lender but substantially at different terms or the terms of an existing liability are amended significantly, such as an exchange or as an amendment, this transaction is treated as a repayment of the initial liability and recognition of a new liability. Any difference in the respective carrying amounts is recognised in profit or loss.

## 3.10 Derivatives and Hedging Accounting

Derivative financial assets such as futures and forwards, swaps and option contracts are used for financial risk management from the Group's business activities and the financing of these activities.

All derivatives are initially recognised at fair value on the date of settlement and are subsequently re-measured at their fair value. Derivatives are reported in assets when the fair value is positive and in liabilities when the fair value is negative. The fair value is determined from the price they have in an active market or by using measurement techniques in cases where there is no active market for these instruments.

The method of recognition of profit or loss depends on whether a derivative has been designated as a hedging instrument and whether it is used for hedging by the nature of the asset it offsets.

Gains or losses from changes during the year, in the fair value of derivatives that are not recognised as hedging instruments, is recognised in the income statement.

During the current period the Group has recognised specific contracts cap with knock out barrier as derivative financial assets. These agreements have been realized with the intent to reduce the interest risk resulting from part of borrowing liabilities of the Group.

Furthermore, during the current year the company entered into an interest rate swap agreement with a three year term for a capital of €25.000.000. The above contracts, which do not meet the criteria set for hedge accounting have as an objective the mitigation of the interest rate risks and as a result part of the company's loan liabilities.

#### 3.11 Inventories

Inventories include raw materials, consumables and goods purchased.

The cost of inventories includes all costs of purchase, conversion and other costs realized in order for the inventories to reach their present state and position.

The cost of purchase of inventories comprises the purchase price, import duties and other taxes (other than those subsequently recoverable by the entity from the tax authorities), and transport, handling and other directly attributable costs. Trade discounts, rebates and other similar items are deducted in determining the costs of purchase.

The costs of conversion of inventories include costs directly related to the units of production, such as direct labor. They also include a systematic allocation of fixed and variable production overheads that are incurred in converting materials into finished goods. Fixed production overheads comprise indirect costs of production that remain relatively constant irrespective of the volume of production, such as depreciation and maintenance of factory buildings and equipment, and the cost of factory management and administration. Variable production overheads are those indirect costs of production that vary directly, or nearly directly, with the volume of production, such as indirect materials and indirect labor. The allocation of fixed production overheads to the costs of conversion is based on the normal capacity of the production facilities. Normal capacity is the production expected to be achieved on average over a number of periods or seasons under normal circumstances, taking into account the loss of capacity resulting from planned maintenance. The actual level of production may be used if it approximates normal capacity.

Other costs are included in the cost of inventories only to the extent that they are incurred in bringing the inventories to their present location and condition. For example, it may be appropriate to include non-production overheads or the costs of designing products for specific customers in the cost of inventories. Cost of inventories does not include finance expenses.

At the balance sheet date, inventories are stated at the lower of cost and net realizable value. Net realizable value is the estimated selling price in the ordinary course of business, less applicable variable selling expenses. Cost is determined using the average weighted cost method.

## 3.12 Share capital

Share capital is determined according to the nominal value of shares issued. Ordinary shares are classified as equity. Expenses realized for the issue of shares are shown in equity as a deduction, net of tax, from the proceeds.

Where any Group company purchases the Company's equity share capital (treasury shares), the consideration paid, including any directly attributable incremental costs, is deducted from equity attributable to the Company's equity holders until the time at which the shares are cancelled, reissued or disposed of. Gains or losses from arising from sale of treasury shares, of directly attributable other expenses & taxes, are shown as a reserve in equity.

#### 3.13 Current and deferred income tax

Taxes charged to the period's results consist of current and deferred taxes, i.e. taxes and tax relieves related to the financial benefits which incur during the period but have been charged or are going to be charged by the tax authorities in different periods. The income tax is recognised in the income statement of the period, except for taxes relating to transactions which have been directly classified in equity, in which case the respective tax is similarly charged to equity.

Current income taxes include short-term liabilities or receivables attributable to the tax authorities which relate to taxes payable on the period's taxable income in addition to any taxes relating to prior years.

Current taxes are calculated according to effective tax rates and tax laws prevailing in the relevant periods, based on taxable profits for the year. All changes in short-term tax assets or liabilities are recognised as tax expenses in the income statement.

Deferred taxes are calculated with the liability method on all temporary tax differences between the tax base and the book value of the assets and liabilities existing as at balance sheet date. The deferred income tax is not accounted for if it has resulted from initial recognition of an asset or liability in a transaction, other than business combination, which had not affected either the accounting nor taxable profit or loss.

Deferred tax assets and liabilities are determined using tax rates that (and laws) that have been enacted or substantially enacted by the balance sheet date and are expected to apply when the related deferred income tax asset is realized or the deferred income tax liability is settled. In case it is not possible to determine the time of reversal of the temporary tax differences, the tax rate used is that of the fiscal year following that of the balance sheet.

Deferred tax assets are recognised only to the extent that it is likely that future taxable profit will be generated, and which will result in a deferred tax asset.

The deferred income tax is recognised for the temporary tax differences arising from investments in subsidiaries and related parties, except where the Group controls the timing of reversal of the temporary tax differences and it is probable that the temporary differences will not reverse in the foreseeable future.

Most of the changes in the deferred assets or liabilities are recognised as part of the tax expenses in the income statement for the year. Changes in the assets or liabilities affecting temporary tax differences and directly recorded in equity, such as the revaluation of the value of property, for which the respective change in the deferred tax receivables or liabilities is debited against the equity account.

## 3.14 Employee benefits

**Short-term benefits**: Short-term benefits to employees in money or in kind are recognised as an expense when they are accrued. Any outstanding amounts are classified as a liability, while in case the amount already paid exceeds the amount of the benefits, the company recognizes the excessive amount as an asset (prepaid expense) only to the extent that the prepayment will lead to a reduction of future or in return payments.

**Benefits on retirement:** The benefits on retirement include a lump sum pension indemnity or other benefits (social security or medical coverage) paid to employees upon retirement in exchange for their service. Therefore, they include both defined contribution plans and defined benefit plans. The accrued cost of the defined contribution plans is recorded as an expense in the period to which it refers.

## Defined contribution plan

According to the defined contribution plan, the company's obligation (legal or inferred) is limited to the amount agreed to for contribution to the entity (e.g. social security entity), which manages the contributions and grants the benefits. Therefore, the amount of benefits received by the employee is defined by the amount contributed by the company (or the employee as well) and the paid investments of these contributions.

The contribution paid by the company in a defined contribution plan is recognized either as a liability following the deduction of the contribution paid or as an expense.

#### Defined benefit plan

The liability recorded in the balance sheet for the defined benefit plan is the current value of the liability for the defined benefit less the fair value of the assets of the plan (if any) and the changes occurring from any other actuarial profit or loss and the past service cost. Contributions to defined contribution plans are recognised in profit or loss as they accrue.

The cost of providing defined benefits is determined using the projected unit credit method from an independent valuer. Valuations are conducted annually. For prepayment thereof, the interest rate of the long-term Greek Government bonds is used

Actuarial gains and losses that exceed 10% of the greater of the present value of the group's pension obligations or the fair value of plan assets are recognized immediately in profit or loss. Gains or losses on the curtailment or settlement of a defined benefit plan are recognized in profit or loss when the group is demonstrably committed to the curtailment or settlement.

Past service costs are recognized immediately in profit or loss to the extent that the benefits are already vested. Otherwise they are amortized on a straight-line basis over the average period until the amended benefits become vested.

**Employee termination benefits:** The benefits due to termination of the employment relationship are paid when employees leave before their normal retirement date. The Group records such benefits when it is committed, either when it actually terminates the employment of current employees based upon a detailed formal plan without possibility of withdrawal, or when it provides the said benefits as an incentive for voluntary redundancy. When these benefits are due for payment in a period, which exceeds twelve months from the balance sheet date, they must be prepaid according to the returns of high quality company bonds or government bonds.

In case of an offer made to encourage voluntary redundancy, the valuation of employment termination benefits should is based on the number of employees expected to accept the proposal.

In case of an employment termination where the number of employees that will be consuming those benefits cannot be determined, this is not recorded but is instead presented as a contingent liability.

**Share-based compensation**: Share options are granted to specific officers of key management. Options are exercised at preference price, which is the average existing price of the parent company's share over the period 1/10-1/11 of each year decreased by 40%. Options may be exercised within the first fifteen days of the month of November of each year of effect of the plan. The plan has a contractual duration of three years. The fair value of the officers' services received in exchange for the grant of the options is recognized as an expense. The proceeds received net of any directly attributable transaction costs are credited to Share Capital (nominal value) and share premium when the options are exercised.

Based on the company's announcement on 03/11/2008 the implementation of the third annual series of its stock option plan is suspended for a maximum period of up to one year because of the current market price of the stock. The Company's BoD reserves the right to re-activate the plan if the conditions permit.

#### 3.15 Government grants

The Group recognizes government grants, which satisfy the following criteria: a) There is reasonable assurance that the enterprise will comply with all attached conditions and b) the grants will be received. Grants are recognized at fair value and recognized on a systematic basis in income, based on the correlation principle of the grants with the respective cost, which will be granted.

Government grants related to assets are included in the long-term liabilities as deferred income and are recognized on a systematic basis and correctly in income over the useful lives of the asset.

## 3.16 Provisions, Contingent Liabilities and Contingent Assets

Provisions are recognised when a present obligation is probable that will result in an outflow of resources for the Group while this can be reliably estimated. The timing or the amount of the outflow may be uncertain.

A present obligation arises from a present legal or constructive obligation as a result of past events, for example warranties on products, litigations or onerous contracts.

Restructuring provisions are recognised only when a detailed formal plan has been developed and implemented or Management has at least announced the main features of the plan to those that are likely to be affected by it. Provisions are not recognised for future operating losses.

Where a part or all of the expenditure required to settle a provision is expected to be reimbursed by another party, the reimbursement is recognised when, and only when, it is virtually certain that reimbursement will be received if the entity settles the obligation. The reimbursement is recognized as a separate asset. The amount recognized for the reimbursement should not exceed the amount of the provision.

The expense relating to a provision may be presented in the income statement, net of the amount recognized for a reimbursement.

A provision is used only for expenditures for which the provision was originally recognized. Provisions are reviewed at each balance sheet date and adjusted to reflect the current best estimate.

Provisions are measured at expected value that is required to determine the present obligation, using the most reliable evidence that is available as at balance sheet date, including the risks and uncertainties specific to the present obligation.

Where the effect of the time value of money is material, the amount of a provision is the present value of the expenditures, expected that will be required, to settle the obligation.

The discount rate is a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability. The discount rate does not reflect risks for which future cash flow estimates have been adjusted.

Where the discounting method is used, the carrying amount of a provision increases in each period to reflect the flow of time. This increase is recognized as a borrowing cost in the income statement. Where there are a number of similar obligations, the probability that an outflow will be required for settlement is assessed by considering the class of obligations as a whole. A provision is recognized even if the probability of an outflow with respect to any one item included in the same class of obligations is minimal.

If the probability that an outflow of resources embodying economic benefits required to settle the obligation ceases to exist, the provision is reversed.

In the event where the probable outflow of economic resources as a result of present obligations is regarded as not probable or the amount of the provision cannot be reliably estimated, no liability is recognized in the consolidated Balance Sheet, except if it is considered being within the scope of business combinations.

These contingent liabilities are recognized according to the allocation of cost of acquisition to the assets and liabilities in a business combination. They are subsequently remeasured at the higher of a comparable provision as described above and at the amount they were recognized initially, less any amortization.

Probable inflows from economic benefits for the Group that do not yet meet the criteria of an asset are regarded as contingent assets.

## 3.17 Revenue and Expense Recognition

**Revenue**: Revenue comprises the fair value of the produced Fish and Other Biological assets, sales of goods and services, net of value added tax rebates and discounts. Inter-company revenue within the Group is fully eliminated. Revenue is recognized as follows:

- **Sales of biological assets**: It is recognized after their gathering. Products are delivered to the customer; the customer has accepted the products and collectibility of the related receivables is reasonably assured.
- **Sales of goods**: Sales of goods are recognized when a Group entity has delivered products to the customer; the customer has accepted the products and collectibility of the receivables is reasonably assured.
- Gain/Loss attributed to changes in Fair Value of Biological Assets: A gain or loss is recognized during the year/period and results from changes both in price and in the quantity and development of the Biological assets.
- Sales of services: Sales of services are recognized in the accounting period in which the services are rendered, by reference to completion of the specific transaction assessed on the basis of the actual service provided as a proportion to the total services which are to be provided.
- **Interest income**: Interest income is recognized on a time-proportion basis using the effective interest method. When a receivable is impaired, the Group reduces the carrying amount to its recoverable amount, being the estimated future cash flow discounted at original effective interest rate of the instrument, and continues unwinding the discount as interest income. Interest income on impaired (new carrying) value is recognized using the original effective interest.
- **Dividend income**: Dividend income is recognized when the right to receive payment is established.

**Expenses:** Expenses are recognized in the income statement on an accrual basis. Payments realized for operating leases are transferred to the income statement as expenses, during the time of use of the leased asset. Interest expenses are recognized on an accrual basis.

## 3.18 Leases

Liabilities from finance leases are measured at initial value net of the amount of principal repayments.

**Group Company as a lessee**: Leases of property, plant and equipment where the Group has substantially maintained all the risks and rewards of ownership are classified as finance leases. Finance leases are capitalized at the lease's inception at the lower of the fair value of the leased property and the present value of the minimum lease payments. Each lease payment is

allocated between the liability and finance charges so as to achieve a constant rate on the finance balance outstanding. The corresponding rental obligations, net of finance charges, are included in other long-term payables. The interest element of the finance cost is charged to the income statement over the lease period. The property, plant and equipment acquired under finance leases is depreciated over the shorter of the asset's useful life and the lease term.

Leases where the lessor retains substantially all the risks and rewards of ownership are classified as operating leases. Payments made under operating leases (net of any incentives received from the lessor) are charged to the income statement on a straight-line basis over the period of the lease.

**Group Company as a lessor**: When assets are leased out under a finance lease, the present value of the minimum lease payments is recognized as a receivable. The difference between the gross receivable and the present value of the receivable is recognized as unearned finance income. Lease income is recognized over the term of the lease using the net investment method, which reflects a constant periodic rate of return.

#### 3.19 Dividend distribution

Dividend distribution to the parent Company's shareholders is recognized as a liability in the interim financial statements in the period in which the General Meeting of Shareholders approves the dividends.

Dividends to shareholders are included in item "Other Current Liabilities" when the General Meeting of Shareholders approves dividends.

#### 3.20 Related parties

The transactions and inter-company balances between the related parties and Group are disclosed according to IAS 24 "Related Party Disclosures". These transactions relate to the transactions between the management, the principal shareholders and the subsidiaries of a group with the parent company and other subsidiaries that comprise the Group.

#### 3.21 Cash and cash equivalents

Cash and cash equivalents include cash on hand, deposits held at call with banks and other short-term highly liquid investments with original maturities of three months, such as products of the financial market and the bank deposits as well as the overdraft bank accounts. The products of the financial market are financial assets measured at fair value through the income statement.

#### 3.22 Post balance Sheet events

Recognized amounts in the financial statements are adjusted to reflect events arising after the balance sheet date that provide evidence of conditions that existed at the balance sheet date. Events after the balance sheet that are indicative of conditions that arose after the balance sheet date are dealt with by way of a note.

## 3.23 Comparative figures

Comparative figures are restated in the event of a change in accounting policy or prior period error.

#### 3.24 Borrowing Costs

Borrowing costs are expensed in the period in which they are incurred. Borrowing costs directly attributable to the acquisition, construction or production of assets that necessarily take a substantial period of time to get ready for their intended use or sale, are added to the cost of those assets, until such time as the assets are substantially ready for their intended use or sale. All other borrowing costs are expensed in the period in which they are incurred.

## 3.25 Non-current assets held for sale

Non-current assets (or disposal group) are classified as held for sale if the carrying amount will be recovered principally through sale rather than through continuing use.

Immediately prior to being classified as held for sale the carrying amount of the item is measured in accordance with the applicable standard.

After classification as held for sale it is measured at the lower of the carrying amount and fair value less costs to sell. An impairment loss is recognized in profit or loss for any initial and subsequent write-down of the asset and disposal group to fair value less costs to sell. A gain for any subsequent increase in fair value less costs to sell is recognized in profit or loss to the extent that it is not in excess of the cumulative impairment loss previously recognized either in accordance with IFRS 5 or in accordance with IAS 36 Impairment of Assets.

Non-current assets or disposal groups that are classified as held for sale are not depreciated.

#### 3.26 Discontinued Operations

The results of discontinued operations are presented separately in the income statement and the assets associated with these operations are included with non-current assets held for sale in the balance sheet.

## 4. Objectives and risk management policies

#### 4.1 Market risk

#### Foreign exchange risk

The Group operates internationally. The exposure to foreign exchange risk is zero because the transactions over a percentage of 90% are realized in Euro. Foreign exchange risk arises from future commercial transactions, as well as from net investments in foreign operations.

The Group has certain investments in foreign operations, whose net assets are exposed to foreign currency transaction risk. Foreign exchange risk arises from the rate of the Turkish Lira against the Euro.

The financial assets and the respective liabilities in foreign currency, translated into Euro at the fixing rate, are analyzed as follows:

|                            |         |         |        | 2008    |        |           |         |         |         |        | 2007   |        |           |        |
|----------------------------|---------|---------|--------|---------|--------|-----------|---------|---------|---------|--------|--------|--------|-----------|--------|
| Amounts in Euro            |         |         |        |         |        |           |         |         |         |        |        |        |           |        |
| Notional amounts           | USD     | GBP     | NOK    | DKK     | CAD    | TRL       | CHF     | USD     | GBP     | NOK    | DKK    | CAD    | TRL       | CHF    |
| Financial assets           | 627.904 | 344.604 | -      | -       | 20.301 | 2.478.573 | 108.581 | 508.370 | 450.745 | -      | -      | 4.369  | 2.649.666 | 73.373 |
| Financial liabilities      | 74.255  | 114.751 | 1.596  | 10.208  | 0      | 719.683   |         | 151.823 | 95.479  | 6.723  | 7.784  | 5.418  | 2.178.338 | -      |
| Total current exposure     | 553.649 | 229.853 | -1.596 | -10.208 | 20.301 | 1.758.891 | 108.581 | 356.547 | 355.266 | -6.723 | -7.784 | -1.049 | 471.328   | 73.373 |
|                            |         |         |        |         |        |           |         |         |         |        |        |        |           |        |
| Financial assets           | -       | -       | -      | -       | -      |           |         | -       | -       | -      | -      | -      | 472.813   | -      |
| Financial liabilities      | -       | -       | -      | -       | -      |           | -       | -       | -       | -      | -      | -      | 0         | -      |
| •                          |         |         |        |         |        |           |         |         |         |        |        |        |           |        |
| Total non-current exposure | 0       | 0       | 0      | 0       | 0      | 0         | 0       | 0       | 0       | 0      | 0      | 0      | 472.813   | 0      |

The table below presents the sensitivity of the post-tax profit for the year as well as of the equity in relation to financial assets and financial liabilities and the Euro exchange rate against the above currencies.

Assuming that a change occurs on 31 December 2008 in the exchange rate Euro/Foreign Currency. This percentage is based on a typical variance of the foreign currency, as this arises from the monthly observation of Euro against any foreign currency, for a period of 12 months.

In the event where the Euro changes in relation to the Foreign Currency by the following percentages then the impact on the post-tax profit for the year and on equity is as follows:

| Amounts in Euro              |        |         |        |         |        |         | 200   | 8      |       |        |         |          |       |        |
|------------------------------|--------|---------|--------|---------|--------|---------|-------|--------|-------|--------|---------|----------|-------|--------|
|                              | U      | SD      | G      | ВР      | I.     | ЮK      | DK    | K      | CA    | \D     | Т       | RL       | СН    | F      |
|                              | 10,09% | -10,09% | 5,06%  | -5,06%  | 51,51% | -51,51% | 0,46% | -0,46% | 6,54% | -6,54% | 13,18%  | -13,18%  | 5,35% | -5,35% |
| Post-tax profit for the year | 55.865 | -55.865 | 11.620 | -11.620 | -822   | 822     | -47   | 47     | 1.327 | -1.327 | 231.866 | -231.866 | 5.809 | -5.809 |
| Equity                       | 55.865 | -55.865 | 11.620 | -11.620 | -822   | 822     | -47   | 47     | 1.327 | -1.327 | 231.866 | -231.866 | 5.809 | -5.809 |
| Amounts in Euro              |        |         |        |         |        |         | 200   | 7      |       |        |         |          |       |        |
|                              | U      | SD      | G      | BP      | N      | IOK     | DK    | K      | CA    | ND.    | Т       | RL       | СН    | F      |
|                              | 5,73%  | -5,73%  | 1,89%  | -1,89%  | 14,47% | -14,47% | 0,51% | -0,51% | 5,24% | -5,24% | 5,99%   | -5,99%   | 1,96% | -1,96% |
| Post-tax profit for the year | 20.429 | -20.429 | 6.704  | -6.704  | -973   | 973     | -40   | 40     | -55   | 55     | 56.599  | -56.599  | 1.434 | -1.434 |
| Equity                       | 20.429 | -20.429 | 6.704  | -6.704  | -973   | 973     | -40   | 40     | -55   | 55     | 56.599  | -56.599  | 1.434 | -1.434 |

The Group's exposure in foreign exchange risk varies over the year in proportion to the volume of transactions in foreign currency. However, the above analysis is deemed representative of the Group's exposure to foreign exchange risk.

#### Interest rate risk

The Group's income and operating cash flows are substantially independent of changes in market interest rates. The Group has significant interest-bearing assets. Group policy, estimating the present economic junctures and in general the fluctuation of the Euro interest rates, is to maintain part of borrowings in products with floating interest rates EURIBOR and SPREAD. At the end of the accounting period, the total borrowings were loans with floating interest rates.

The risk of change in the interest rates mainly arises from the long-term borrowings, the largest balance of which has duration until the year 2012. The Company's expectation is that there can be an issue from fluctuations in interest rates for this period and therefore has proceeded in derivative forward contracts so as to mitigate this risk.

On 31 December 2008, the Group NIREUS AQUACULTURE AE was not exposed to changes in market interest rate to its total bank borrowings, but a significant balance of it (Euro 97.750.000) had the interest ceiling agreements protection (CAP) with knock out barrier or without knock out barrier.

The table below presents the sensitivity of the post-tax profit for the year as well as of the equity at a reasonable change in the interest rate of +0.5% or -0.5% (2006: +/-0.6%). The changes in interest rates are deemed to fluctuate on a reasonable basis in relation to current market conditions.

| Amounts in Euro              | 20        | 800        | 20      | 007      |
|------------------------------|-----------|------------|---------|----------|
|                              | 0,50%     | -0,50%     | 0,50%   | -0,50%   |
| Post-tax profit for the year | 1.192.981 | -1.192.981 | 896.184 | -896.184 |
| Equity                       | 1.192.981 | -1.192.981 | 896.184 | -896.184 |

#### Price risk

The Group is exposed to equity securities price risk because of investments held either for trading or as available-for-sale financial assets. The changes in the value of the assets are not expected to result in a significant risk to the Group due to non-maturity dates. Investments in equity securities of publicly traded companies (MAFA) are considered long-term strategic movements. According to the Group policy, no particular hedging policy is applied for these investments, which are incorporated in the consolidated financial statements either by the method of net equity (MAFA).

The Group is exposed to changes in the value of its biological assets. There is no significant risk from changes in issue prices of the biological assets, which have a fixed and forecasted within the year small fluctuation. The Group assesses price risk changes of biological assets regularly and examines the need for actions in order to anticipate the financial risk. The financial analysis department operates towards meeting this purpose, which collects information in order to offer the

product, from the domestic and international production, in addition to changes in demand from the existing Traditional International market and the New markets introduced in Eastern Europe and America. This information is examined the parameters regardless of the inventories of the product and the expected prices to be set for the following two (2) years are thereby determined.

#### 4.2 Credit risk

The Group exposure to credit risk is limited to financial assets, which at the Balance Sheet date are analyzed as follows:

| Total                          | 107.253.278 | 169.261.455 |
|--------------------------------|-------------|-------------|
| Other receivables              | 20.542.828  | 23.650.100  |
| Trade and other receivables    | 57.070.480  | 93.706.828  |
| Cash and cash equivalents      | 29.639.970  | 51.904.527  |
| Categories of financial assets | 2000        | 2007        |
| Amounts in Euro                | 2008        | 2007        |

The Group management deems that all the above financial assets, which have not been impaired in prior dates of preparation of financial statements are of high credit quality.

For trade and other receivables, the Group is not exposed to significant credit risks. The wholesales of fresh fish and poultry-livestock are mainly made to customers, who are insured for the payment of their debt. Moreover, the sale of spawn

is realized to its total with the term of retention of ownership of the product up until its payment. Therefore due to that the time required for the completion of the production cycle of fresh fish is greater than the credit time granted for the sale, the receivable is fully secured.

## 4.3 Liquidity risk

The Group "NIREUS AQUACULTURE AE" manages its liquidity needs by careful monitoring its debts, long-term financial liabilities as well as of the payments that are effected daily. The liquidity needs are monitored on a daily and weekly basis as well as on a rolling period of 30 days. The Long-term liquidity needs for the next 6 months and the following year are monthly assessed.

The Group "NIREUS AQUACULTURE AE" maintains cash for covering liquidity needs for periods of 30 days. The funds for the long-term liquidity requirements are additionally maintained by an adequate amount of committed credit facilities and the ability to be sold long-term financial assets.

The maturity of the financial liabilities at 31 December 2008 for the Group "NIREUS AQUACULTURE AE" is analyzed as follows:

| Amounts in Euro              | 2008            |                           |                          |              |  |  |  |  |  |
|------------------------------|-----------------|---------------------------|--------------------------|--------------|--|--|--|--|--|
|                              | Sho             | rt-term                   | Long-                    | term         |  |  |  |  |  |
|                              | within 6 months | between 6 and<br>12 moths | between 1 and<br>5 years | over 5 years |  |  |  |  |  |
| Long-term borrowings         | 2.864.473       | 2.824.495                 | 130.970.523              | 110.262.009  |  |  |  |  |  |
| Short-term borrowings        | 10.789.262      | 52.302.092                | =                        | -            |  |  |  |  |  |
| Other Long-term borrowings   |                 |                           | -                        | 4.308.017    |  |  |  |  |  |

There are no sale transactions between the business segments. Segment assets consist primarily of property, plant and equipment, intangible assets, investments in associates and biological assets. Unallocated assets comprise deferred taxation, non-current receivables, goodwill, available-for-sale financial assets, inventories, receivables, cash and cash equivalents and derivatives.

A part of segment expenses was allocated to business segments in proportion to the segment revenue of these business segments.

# 6.2 Secondary reporting format - Geographical segments for the Group of "Nireus Aquaculture AE" for the year ended 31 December 2008 and 2007, respectively

The registered office of the Group is in Greece and its main activity is developed in countries within the euro zone.

The Group's sales per geographical segment are analysed as follows:

| Amounts in Euro     | GROUP                    |                           |  |  |  |

## 7. Notes to the Financial Statements

## 7.1 Property Plant and Equipment

Land utilised for the purpose of either production or administration is stated at their fair value, as well as buildings, which are presented at their fair value less accumulated depreciation reduced by any other impairment losses. All other remaining assets are valued at historical cost less accumulated depreciation and any other impairment losses. Depreciation expense of tangible assets (except for land which is a non-depreciable asset) is calculated on a straight-line basis over the useful life of the asset.

Property, plant and equipment is analysed as follows:

|  | Land                       | Buildings                    | Machinery &<br>Equipment     | Vehicles                   | Furniture and other equipment | Work in progress           | Total                   |

Investment property is annually measured, at year-end either by a study carried out by the Company or by the use of an independent qualified valuer.

The following amounts have been recognised in the income statement:

|  | GR         | OUP        | СОМ        |
|--|------------|------------|------------|
| Amounts in Euro  | 31/12/2008 | 31/12/2007 | 31/12/2008 |
| Direct operating expenses non-generating income from rentals | (325.487)  | (257.719)  | (325.487)  |

#### 7.3 Goodwill

Goodwill is analysed as follows:

| GROUP   |  | COMPANY   |  |
|---|--|---|--|
| Amounts in Euro   |  | Amounts in Euro   |  |
| Carrying value at 1 January 2007 Additions Revaluation of goodwill Carrying value at 31 December 2007 | 15.137.782<br>11.404.981<br>112.900<br>26.655.662      | Carrying value at 1 January 2007 Additions Revaluation of goodwill Carrying value at 31 December 2007 | 9.719.551<br>8.443.279<br>-<br>18.162.830              |
| Carrying value at 1 January 2008 Additions Impairment losses Carrying value at 31 December 2008       | <b>26.655.662</b> 2.979.515 (50.199) <b>29.584.979</b> | Carrying value at 1 January 2008 Additions Impairment losses Carrying value at 31 December 2008       | <b>18.162.830</b><br>887.002<br>-<br><b>19.049.833</b> |

#### **Analysis of Additions**

The measurement of "Goodwill" following the above additions has been determined based on the net fair value of the investment and has been calculated for the year ending 31/12/2008, per company as follows:

## For The Group SEAFARM IONIAN S.A

| Acquisition date   | 29/1/2008  |
|--|------------|
| Acquired percentage  | 0,3047%    |
| Total Consideration of Acquisition Less: Fair value of company assets and  | 206.938    |
| liabilities  | 19.694     |
| Goodwill on purchase   | 187.244    |
| The assets acquired and the liabilities undertaken by the Group at the acquisition of the new participation percentage in the Company were as follows: |            |
|  | Fair Value |
| Assets   | 85.817.300 |
| Liabilities  | 79.353.862 |
| Contingent liabilities   | 0          |

The "Aquaculture licences" on a Group level relate to the value of the aquaculture licenses of the companies of the Group "SEAFARM IONIAN SA", The Group "KEGO", "PREENGORDE DE DORADAS PARA MARICULTARA S.L (PREDOMAR)", "NIREUS AQUACULTURE SA" and "CARBON DIS TICARET YATIRIM INSAAT VE SANAYI A.S. (CARBON)", that which resulted following the appraisal of the independent appraisers, and was assessed at a value of € 14.057.000. The resulting goodwill is not depreciated, but is tested for impairment loss, shall events occur that indicate a potential loss, in accordance with IAS 36.

In the standalone Financial Statements, the presented value of Aquaculture licenses relates to the value of aquaculture licenses based on IAS 38, of the absorbed subsidiary companies KEGO S.A and RED ANCHOR.

Transfer of work in progress of other programs, during the year, of an amount € 1.231.332 relates to costs incurred in relation to the research station, which concerns the production of new aquaculture items in addition to the genetically improvement of the production of sea-bream and sea-bass fry.

The above mentioned costs are amortised on a straight-line basis, within a 5-year period beginning from their development.

#### 7.5 Investments in subsidiaries

In the individual financial statements, the investments in subsidiary companies have been measured at impaired acquisition cost.

| Amounts in Euro                                      | GROUP<br>31/12/2008 | COMPANY<br>31/12/2008 |
|--|---------------------|-----------------------|
| Beginning of 2007                                    | 401.920             | 33.302.064            |
| Reduction due to merger                              | -                   | (19.199.491)          |
| Additions<br>Beginning of the year 2007 of after the |                     | 576.877               |
| merger   | 401.920             | 14.679.450            |
| Liquidations   | (39.414)            | (39.414)              |
| Additions  | -                   | 12.985.671            |
| Total  | 362.506             | 27.625.707            |

The amount of  $\epsilon$  362.506 which appears in the annual financial statements as at 31/12/2008 relates to the cost of the subsidiary company of the Group SEAFARM IONIAN S.A "Diatrofiki S.A", which was not consolidated due to that it has been under liquidation. We consider that it be mentioned that the subsidiary company "Thetis SA" is in the final stage of being liquidated and its cost of an amount of  $\epsilon$  39.414 has been charged to the current year's 2008 results.

The company's percentage participation in investments which are not listed on the Athens Stock Exchange Market is analysed as follows:

| Company   | <u>Cost</u> | Amount as<br>per Balance<br>sheet | Country of incorporation | Percentage Shareholding |
|---|-------------|-----------------------------------|--------------------------|-------------------------|

There are no major restrictions in the ability of the subsidiaries to transfer capital to the parent company in the form of cash dividends, repayment of loans or advance payments. Investment in the associate company "MARINE FARMS ASA" includes goodwill of an amount of  $\in 17.937.740$ .

#### 7.7 Non Current Assets classified as held for sale

The change in available-for-sale financial assets is analysed as follows:

| Amounts in Euro            | GRO        | GROUP      |            | PANY       |
|----------------------------|------------|------------|------------|------------|
|                            | 31/12/2008 | 31/12/2007 | 31/12/2008 | 31/12/2007 |
| Beginning of the year      | 1.929.831  | 2.054.485  | 48.955     | 123.229    |
| Write-offs                 | (32.282)   | (124.654)  | (32.282)   | (74.274)   |
| Balance at end of the year | 1.897.549  | 1.929.831  | 16.674     | 48.955     |

Assets held for investment relate to investments in non-listed in an organised market, companies. All assets held for investment, are stated at historical cost given that their fair value cannot be accurately measured.

During the year of 2008, the liquidation procedures of the company "NIREUS FISHERIES & AQUACULTURE CONSULTANTS S.A" were finalised whereby the liquidation effect amounts to  $\in$  338.782,58 and the amount of the investment written-off totals  $\in$  32.281,73. The total effect in favour of the year's results 2008 amounts to  $\in$  306.500,85 (Financial income/costs).

#### 7.8 Other non-current receivables

Other non-current receivables of the Group and the Company relate to receivables, which are to be collected subsequent to the following year-end, and are analysed in the table here below:

|                               | GRO        | OUP        | COMPANY    |            |  |
|-------------------------------|------------|------------|------------|------------|--|
| Amounts in Euro               | 31/12/2008 | 31/12/2007 | 31/12/2008 | 31/12/2007 |  |
|                               |            |            |            |            |  |
| Other non-current receivables | 2.935      | 12.260     | 4.049      | 12.260     |  |
| Guarantees provided           | 237.755    | 232.121    | 163.092    | 174.903    |  |
| Total                         | 240.690    | 244.382    | 167.141    | 187.163    |  |

#### 7.9 Biological assets

The biological assets of the Group were measured at their fair value, according to IAS 41.

The fair value was determined based on market prices at the Balance Sheet date. Biological assets are the reserves of spawn-generating adult fish, fish spawn and stock breeding products at a specific point in time and are measured at fair value (i.e. selling price) based on IAS 41. During periods of substantial increases in inventory, this methodology applied results in significant gains arising from the difference between the production cost and the sales value.

Fair value reconciliation of biological assets is presented in the following table:

| Amounts in Euro   | GRO                          | OUP                          | COM                       | PANY               |

#### 7.10 Inventories

The inventories of the Group and the Company are as follows:

| Amounts in Euro                               | GROUP      |            | COMPANY    |            |
|---|------------|------------|------------|------------|
|   | 31/12/2008 | 31/12/2007 | 31/12/2008 | 31/12/2007 |
| Merchandise                                   | 2.575.069  | 3.255.739  | 1.324.499  | 3.012.791  |
| Finished and semi-finished goods              | 6.957.670  | 5.315.722  | 6.259.896  | 5.212.303  |
| Work in progress                              | 155.028    | 8.449      | 155.028    | 8.449      |
| Raw and auxiliary materials-Package materials | 6.075.361  | 5.123.406  | 3.612.675  | 3.460.810  |
| Consumables                                   | 141.128    | 128.750    | 134.354    | 117.141    |
| Packing items                                 | 12.147     | 8.263      | 9.562      | 7.293      |
| Total   | 15.916.403 | 13.840.329 | 11.496.014 | 11.818.785 |

The amount of inventories recognised as an expense during the year and included in consumables, amounts to € 104.672.779 for the Group and € 115.804.428 for the Company (2007: € 133.258.974 Group and € 124.588.303 for the Company).

The Group has no pledged inventories.

For the assessment of the inventories net sale value Management takes into consideration the most reliable data available at the date of measurement.

#### 7.11 Trade and other receivables

The trade and other receivables of the Group and the Company are as follows:

|  | GRO                               | DUP                               | COMPANY                          |                                   |  |
|--|-----------------------------------|-----------------------------------|----------------------------------|-----------------------------------|--|
| Amounts in Euro  | 31/12/2008                        | 31/12/2007                        | 31/12/2008                       | 31/12/2007                        |  |
| Trade receivables from third parties (Trade debtors)                               | 36.453.660                        | 51.714.891                        | 49.280.109                       | 61.238.765                        |  |
| Trade receivables from third parties (Notes)                                       | 1.585.126                         | 1.401.962                         | 1.200.464                        | 1.230.546                         |  |
| Trade receivables from third parties (Cheques receivable)                          | 31.606.292                        | 56.164.992                        | 26.026.575                       | 53.740.763                        |  |
| Less: Provision for uncollectible receivables  Total trade & other receivables-net | (12.574.598)<br><b>57.070.480</b> | (15.575.017)<br><b>93.706.828</b> | (6.753.974)<br><b>69.753.174</b> | (8.937.483)<br><b>107.272.591</b> |  |

All the above receivables are current and of a short-term maturity. The fair value of these current financial assets is not independently assessed given that their carrying value approximates their fair value.

The carrying value of a receivable (measured at amortised cost) is considered to approximate its fair value given that its collectibles is expected to occur within a time period where the effect of the time value of money is considered insignificant. With respect to the Group's receivables, an assessment of the impairment indicators has been performed. Receivables that have been impaired mainly relate to customers of the Group, which encounter financial difficulties.

#### 7.12 Other receivables

The other receivables of the Group and the Company are as follows:

|                            | GROUP      |            | COMI       | PANY       |
|----------------------------|------------|------------|------------|------------|
| Amounts in Euro            | 31/12/2008 | 31/12/2007 | 31/12/2008 | 31/12/2007 |
|                            |            |            |            |            |
| Sundry debtors             | 8.807.502  | 7.823.461  | 9.519.096  | 5.211.120  |
| Claims from Greek State    | 10.830.221 | 15.517.686 | 7.803.167  | 12.535.834 |
| Other receivables          | 534.450    | 109.760    | -          | 107.793    |
| Disputed debtors           | 111.269    | 30.000     | 30.000     | 30.000     |
| Cash advances to personnel | 259.385    | 169.194    | 196.963    | 108.176    |
| Total                      | 20.542.828 | 23.650.100 | 17.549.226 | 17.992.923 |

All the above receivables are current (short-term maturity). The fair value of these current financial assets is not determined independently as the carrying value is considered that approximates their fair value.

The carrying value of a receivable (measured at amortised cost) is considered to approximate its fair value given that its collectibility is expected to occur within a time period where the effect of the time value of money is considered insignificant.

All of the Group's receivables have been valued with respect to the impairment indicators. Certain of the receivables have been impaired and have been provided for. The established provision for impairment amounts to € 9.359.869 (2007: € 9.359.869) for the Group and € 626.348 (2007: € 597.509) for the Company.

#### 7.13 Other current assets

The other current assets of the Group and the Company are as follows:

|                       | GROUP      |            | COMPANY    |            |
|-----------------------|------------|------------|------------|------------|
| Amounts in Euro       | 31/12/2008 | 31/12/2007 | 31/12/2008 | 31/12/2007 |
|                       |            |            |            |            |
| Deferred expenses     | 373.931    | 423.643    | 323.797    | 399.100    |
| Accrued income-year   | 1.792.733  | 643.039    | 1.427.344  | 194.869    |
| Inventory-in-transit  | 34.161     | 488.736    | -          | 488.736    |
| Other prepayments and |            |            |            |            |
| accrued income        | 57.750     | 53.661     | 53.555     | 53.661     |
| Total                 | 2.258.574  | 1.609.079  | 1.804.695  | 1.136.366  |

#### 7.14 Derivative Financial Instruments

The derivative financial instruments refer to the following:

| Amounts in Euro   | GRO                   | OUP     | COMPANY    |            |  |
|---|-----------------------|---------|------------|------------|--|
|   | 31/12/2008 31/12/2007 |         | 31/12/2008 | 31/12/2007 |  |
| Derivative financial instruments                          |                       |         |            |            |  |
| CAP contracts with or without knock out barrier-Cash flow |                       |         |            |            |  |
| hedging   | (152.933)             | 265.859 | (107.736)  | 237.076    |  |
| Interest rate swap  | (637.795)             | -       | (637.795)  | -          |  |
| Derivative financial instruments (assets)                 | (790.728)             | 265.859 | (745.531)  | 237.076    |  |

The fair value of the contracts has been measured by the use of the relative interest rates and exchange rates prevailing in the market.

The total of fair value of derivative financial instrument is classified either as an asset or as a liability. The movement in the derivative financial instruments is analysed as follows:

| Amounts in Euro                     | GROUP                 |         | COMPANY       |            |  |

| Total loans   | 252.872.488                     | 229.119.112                      | 222.314.298                     | 201.953.308                     |  |  |

Maturities of non-current borrowings are analysed below:

| Amounts in Euro       | GRO         | OUP         | COMPANY     |             |  |
|-----------------------|-------------|-------------|-------------|-------------|--|
|                       | 31/12/2008  | 31/12/2007  | 31/12/2008  | 31/12/2007  |  |
| Between 1 and 2 years | 13.824.389  | 18.925.873  | 11.521.127  | 17.107.584  |  |
| Between 2 and 5 years | 77.112.375  | 75.016.900  | 70.303.090  | 69.558.294  |  |
| Over 5 years          | 98.784.707  | 35.414.548  | 84.744.445  | 17.505.644  |  |
|                       | 189.721.472 | 129.357.321 | 166.568.663 | 104.171.521 |  |

The actual weighted average borrowing rate of the Group is as follows:

Bank borrowings (current)
Bank borrowings (non-current)

| 31/12/2008 | 31/12/2007 |
|------------|------------|
| €          | €          |
| 5,20%      | 5,96%      |
| 4,75%      | 5,90%      |

On 28/01/2008 a 7 year bond loan contract was signed of an amount of  $\in$  90.000.000 for the purpose of refinancing existing loan borrowings.

#### 7.19 Deferred Income Taxes

Deferred income tax assets and liabilities as arise from relative temporary tax differences, are as follows:

|                                | GROUP             |                   |                   |                   |  |  |
|--------------------------------|-------------------|-------------------|-------------------|-------------------|--|--|
| Amounts in Euro                | 31/12/2008        |                   | 31/12/2007        |                   |  |  |

Deferred income tax assets are recognised for tax loss carry-forwards to the extent that the realisation of the related tax benefit through the future taxable profits is probable. The offsetting of deferred income tax assets and liabilities occurs when there is, on behalf of the company, a legally enforceable right to offset current tax assets against current tax liabilities and when the deferred income taxes relate to the same fiscal authority.

31/12/2007

The deferred tax liabilities of the Group as at 31/12/2008 relate to the subsidiaries located in Turkey by an amount of  $\epsilon$  266.811 (tax rate 20%), to subsidiaries located in Spain by an amount of  $\epsilon$  163.037 (tax rate 30%) and by an amount of  $\epsilon$ 

13.439.939 for companies that are located in Greece (tax rate 20%-25%). The respective amounts as at 31/12/2007 were for the companies which are located in Turkey  $\in$  159.879 and for the companies which are located in Greece  $\in$  8.030.175.

The deferred tax receivables for the Group as at 31/12/2008 relate to, an amount of € 20.683 for the companies which are located in Turkey (tax rate of 20%), and an amount of € 5.499 to the companies which are located in Greece (tax rate 20%-25%). The respective amounts as at 31/12/2007 were for the companies located in Spain € 10.873 (tax rate 30%) and for the companies which are located in Greece € 64.686 (tax rate 20%-25%).

The effect of the change in the tax rate from 25% to 20% on the income statement amounts to  $\in$  (215.555) for the Group and  $\in$  (222.971) for the Company and on net equity the effect amounts to  $\in$  1.173 for both the Group and for the company.

#### 7.20 Employee Benefits

#### **Retirement benefit obligations**

The Group and the company assesses the retirement benefit obligation as the present value of the legal commitment assumed for assumed for the lump sum compensation to retired personnel. The relative obligation was determined based on actuarial calculations.

The respective obligation of the Group and the Company is as follows:

|  | GROUP      |            | COMI       | PANY                 |
|--|------------|------------|------------|----------------------|
| Amounts in Euro  | 31/12/2008 | 31/12/2007 | 31/12/2008 | 31/12/2007           |
| Deleves listility at heginning of the year   | 2.655.038  | 2 155 054  | 2 202 500  | 1 076 440            |
| Balance liability at beginning of the year Balance of merged companies during the year | 2.055.038  | 2.155.854  | 2.283.580  | 1.876.440<br>271.121 |
| Transfer of pension obligation to the spined-off                                       |            |            |            |                      |
| segment  | -          | -          | (140.560)  | -                    |
| Liabilities acquired in a business combination   | -          | 271.121    | -          | -                    |
| Current service cost   | 271.177    | 259.761    | 202.506    | 210.128              |
| Finance cost   | 120.097    | 107.641    | 96.436     | 91.413               |
| Compensation paid  | (184.356)  | (153.360)  | (156.693)  | (140.855)            |
| Exchange differences arising from foreign plans  | (11.576)   | 1.971      | -          |                      |
| Net actuarial (profit)/losses recognised in the income statement                       | (10.361)   | 12.050     | 1.643      | (24.667)             |
| Total liability at end of the year   | 2.840.019  | 2.655.038  | 2.286.913  | 2.283.580            |

The main actuarial assumptions used were as follows:

|                           | 31/12/2008 |      |
|---------------------------|------------|------|
| Discount rate             | 4,5%       | 4,5% |
| Future salary increases   | 3,5%       | 3,5% |
| Inflation rate            | 2,5%       | 2,5% |
| Percentage of retirements | 0,5%       | 0,5% |

Interest expenses are included in the item "Finance cost" in the Income Statement (see Note 7.29.).

#### **Employee benefit expense**

The expenses recognised for benefits to employees are analysed as follows:

#### Number of employed personnel

The number of employed personnel on December 31, 2008 amounted to 962 (absorbed company 92) for the Company, and 1.918 for the Group (for the Company: 962, for the Subsidiaries: 345, for the Associates 611) while on December 31, 2007 this amounted to 1.109 (from absorbed companies 24) for the Company, and 1.976 for the Group (for the Company: 1.109 Subsidiaries: 343 and Associates: 524 respectively).

#### Personnel compensation based on equity instruments

On 05/06/2006 the Company approved an equity - settled, share-based compensation plan granting share options up to 1.400.000 ordinary shares with voting right, over the years 2006, 2007 and 2008 to Members of the B. of D., General Directors, Managers and Head of Departments of the Company and of its related companies, conditional on the employee completing at least three year's service in the company or in a related company. In case of termination of the employment relationship with the company, either due to retirement or due to notice of termination, the right ceases to be in force. The exercise price of each granted option will be preferential and it will be the prevailing average price of the parent Company's share over the period 1/10 - 1/11 of each year reduced by 40%. The options will be exercised within the first fifteen days of the month of November of each year of the plan in force. Options may be exercised proportionally commencing three years from the grant date, namely at a rate 40% in November 2006, at a rate 30% in November 2007 and at a rate 30% in November 2008, always though within the first fifteen days of November of each year of effect of the plan. Should this time limit elapse with no action taken the option is amortised. The options granted by the plan were accounted for according to IFRS 2 - "Group and Treasury Share Transactions". In 2006 were exercised 494.350 options and in 2007 were exercised 364.500 options. The fair value of the options exercised in 2007 amounts to Euro 1.218 per option and arises as the difference between the fair value of the share at the exercise date (average price of period 1/1 to 15/11/07 = Euro 3,6182) and the exercise price of the option (Euro 2,40). Due to uncertainty prevailing as regards both the number and the fair value of the options that will be exercised, in addition as to whether the options will be exercised in 2008, no provision has been established in prior and current years for the options relating to 2007 and 2008.

All compensation to employees based on equity instruments is settled net. The Group has no legal or constructive obligation to repurchase or settle the options.

The implementation of the third annual series of the company's stock option plan is suspended for a maximum period of up to one year due to the current market price of the stock. The plan has been approved by the General Assembly held on 5/6/2006 and its terms have been decided upon by the Board of Directors on 31/10/2006. The Company's Board of directors reserves the right to re-activate the plan under the condition that circumstances permit so.

#### 7.21 Government Grants

The analysis of Grants of the Group and the Company is as follows:

| Amounts in Euro   | GROUP                                 | COMPANY                               |
|---|---------------------------------------|---------------------------------------|
| Balance at 1 January 2007   | 6.057.942                             | 5.039.770                             |
| Balance at date of acquisition of new companies   | 1.035.418                             | -                                     |
| Balance of merged companies during the year   |                                       | 1.442.427                             |

| Recognised in the income statement  Balance at 31 December 2008   | (1.425.427)<br><b>6.560.240</b>       | (1.217.987)<br><b>6.250.473</b>       |

#### 7.22 Other non-current liabilities

The analysis of other non-current liabilities, of the Group and the Company, is as follows:

| Amounts in Euro   | GRO        | OUP        |
|---|------------|------------|
|   | 31/12/2008 | 31/12/2007 |
| Non-current liabilities based on article 44 L.1892/90<br>Liability for purchase of PPE assets | 4.308.017  | 4.676.605  |
| Total   | 4.308.017  | 4.676.605  |

Other non-current liabilities at 31/12/2008 relating to the Group result from liabilities of the Group "SEAFARM IONIAN AE" owing to its subject to article 44 of L. 1892/90.

#### 7.23 Provisions

During the current year a provision for unaudited tax years was established of an amount of  $\in$  170.000 for the Group and  $\in$ 150.000 for the Company

#### 7.24 Trade and other payables

The analysis of the balances of trade and other payables of the Group and the Company, are as follows:

|                  | GRO        | GROUP      |            | PANY       |
|------------------|------------|------------|------------|------------|
| Amounts in Euro  | 31/12/2008 | 31/12/2007 | 31/12/2008 | 31/12/2007 |
|                  |            |            |            |            |
| Trade payables   | 27.936.387 | 30.904.104 | 22.282.919 | 28.260.460 |
| Cheques payable  | 33.925.832 | 53.772.144 | 30.469.052 | 50.281.969 |
| Promissory notes | 1.027.517  | 1.004.936  | 537.910    | 1.004.936  |
| Notes payable    | 978.809    | 10.094     |            | -          |
| Total            | 63.868.544 | 85.691.278 | 53.289.881 | 79.547.365 |

The fair values of trade and other payables are not separately presented since, due to their short-term duration, management considers that the carrying values that are recognised in the balance sheet constitute a reasonable approach to the fair values.

#### 7.25 Other current liabilities

The analysis of other current liabilities is as follows:

|                                | GROUP      |            | COMI       | PANY       |
|--------------------------------|------------|------------|------------|------------|
| Amounts in Euro                | 31/12/2008 | 31/12/2007 | 31/12/2008 | 31/12/2007 |
|                                |            |            |            |            |
| Wages and salaries payable     | 1.685.898  | 1.636.538  | 1.339.262  | 1.280.591  |
| Dividends                      | 167.488    | 136.973    | 128464,13  | 97.949     |
| Social security                | 1.958.732  | 2.015.522  | 1.455.143  | 1.438.602  |
| Taxes - duties                 | 887.339    | 3.888.478  | 248.631    | 3.152.863  |
| Accrued expenses               | 2.048.282  | 1.838.239  | 1.690.833  | 880.249    |
| Sundry creditors - Prepayments | 4.133.844  | 7.053.724  | 5.637.819  | 7.093.543  |

Other operating income mainly relates to income incurred from services rendered to third parties as well as from rental income.

Other income mainly comprises of deferred income from grants.

#### 7.31 Income tax expense

The income tax expense of the Group and the Company is as follows:

|  | GROUP   |  | COMI  | COMPANY   |  |  |
|--|---|--|---|---|--|--|
| Amounts in Euro  | 31/12/2008  | 31/12/2007   | 31/12/2008  | 31/12/2007  |  |  |
| Current tax Prior years' tax audit differences Other non-incorporated in the operating cost taxes Deferred tax <b>Total</b>  | (468.959)<br>(2.321.267)<br>-<br>(5.861.876)<br>(8.652.102) | (1.564.213)<br>(546.055)<br>-<br>(3.311.765)<br><b>(5.422.033)</b> | (286.533)<br>(2.228.889)<br>-<br>(4.774.676)<br>(7.290.098)   | (2.270.214)<br>(546.055)<br>-<br>(3.146.073)<br>(5.962.342) |  |  |
| Profit before tax Tax rate Estimated tax charge  | <b>9.782.341</b> 25% (2.445.585)                            | 20.351.818<br>25%<br>(5.087.955)                                   | 10.494.448<br>25%<br>(2.623.612)                              | 19.344.626<br>25%<br>(4.836.157)                            |  |  |
| Deferred income tax asset Other adjustments (tax-free reserves, other tax relieves, expenses that are not deductible) - Prior years' tax audit differences Actual Tax Charge | (5.861.876)<br>1.976.626<br>(2.321.267)<br>(8.652.102)      | (3.311.765)<br>3.523.742<br>(546.055)<br><b>(5.422.033)</b>        | (4.774.676)<br>2.337.079<br>(2.228.889)<br><b>(7.290.098)</b> | (3.146.073)<br>2.565.943<br>(546.055)<br><b>(5.962.342)</b> |  |  |

For the year 2008 the tax charge has been calculated applying a tax rate of 25% on taxable profit.

#### 7.32 Earnings per share

Analysis of earnings per share of the Group and the Company is as follows:

#### Basic earnings per share

| Amounts in Euro  | GROUP                 |                          |  |
|--|-----------------------|--------------------------|--|
|  | 31/12/2008            | 31/12/2007               |  |
| Profit attributable to equity<br>holders of the Company<br>Weighted average number of<br>ordinary shares | 316.161<br>54.492.340 | 10.355.646<br>46.103.238 |  |
| Basic earnings per share<br>(€ per share)  | 0,0058                | 0,2246                   |  |

Basic earnings per share is calculated as profit attributable to equity holders of the parent Company divided by the weighted average number of ordinary shares in issue during the year.

#### Diluted earnings per share

| Amounts in Euro  | GROUP<br>31/12/2007      |
|--|--------------------------|
| Profit attributable to equity holders of<br>the Company<br>Weighted average number of ordinary<br>shares | 10.808.305<br>48.794.364 |
| Diluted earnings per share (€ per share)   | 0,2215                   |

The diluted earnings per share during the prior year related to the convertible bond loan which was issued on 12-7-2007, for which no similar event has occurred during the current year.

## 8. Contingent Assets, Contingent Liabilities and un-audited fiscal years by the tax authorities-Commitments

Any claims or litigations to the national or arbitration courts are not expected to have a material effect on the financial position or operation of the Group.

#### Information in respect of contingent assets and liabilities

The Company and the Group have contingent liabilities and assets in respect to Banks, other guarantees and other matters arising in the ordinary course of business, as following:

Contingent liabilities of the Group for the year 2008 amounted to  $\in$  4.568.850 and for the Company to  $\in$  3.207.754. The contingent assets for the year 2008 amount to  $\in$  4.168.309 for the Group and to the amount of  $\in$  3.717.003 for the Company. No significant charges are expected to occur as a result of the contingent liabilities. No additional payments are expected to be made, following the compilation of these financial statements.

#### Information in respect of unaudited, by the tax authorities, financial years

The unaudited, by the tax authorities, financial years for the group companies are as follows

| GROUP COMPANIES OF "NIREUS AQUACULTURE AE"                          | UNAUDITED TAX YEARS |

| AQUA TERRAIR S.A  | 1999-2008           |

#### Information in respect of contingent liabilities from sea-area operating leases.

At 31 December 2008, the certain companies of the Group have lease sea-spaces under operating lease agreement. The future minimum lease payments payable under the lease terms are as follows:

#### Sea Area

| Amounts in Euro                             | GROUP      |            | COMPANY    |            |
|---|------------|------------|------------|------------|
|   | 31/12/2008 | 31/12/2007 | 31/12/2008 | 31/12/2007 |
| No later than 1 year                        | 43.067     | 40.987     | 15.535     | 4.622      |
| Later than 1 year and no later than 5 years | 336.315    | 407.787    | 174.488    | 270.967    |
| Later than 5 years                          | 498.739    | 189.490    | 133.962    | 125.487    |
|   | 878.120    | 638.264    | 323.984    | 401.076    |

The sea leases recognized in the profit and loss for the year are analysed as follows:

| Amounts in Euro | GROUP      |            | GROUP COMPANY |            | PANY |
|-----------------|------------|------------|---------------|------------|------|
|                 | 31/12/2008 | 31/12/2007 | 31/12/2008    | 31/12/2007 |      |
|                 | 317.931    | 269.513    | 192.273       | 189.770    |      |

The acquisition by "NIREUS AQUACULTURE AE" of 3.144.907 registered shares of "SEAFARM IONIAN AE" for a total purchase consideration Euro 7.731.000,00 was agreed upon, in accordance with No. 18402/28.06.2006 and No. 18433/07.07.2006 preliminary agreements and the Private Agreement dated 04/07/2006. The payment of the consideration and the respective delivery of shares have been arranged to be made by instalments starting from 06/07/2006 until 30/06/2010 (expiry date). Hereon we state that until 31/12/2008 in performance of the above, 2.203.929 registered shares of "S.F.I." have been purchased by the company against a total purchase consideration Euro 5.565.834 with a participation percentage amounting to 23,11% on the total voting rights of the company and to an equal in amount percentage on its share capital.

Moreover, the company is at a stage of negotiations for the elimination of the relevant binding terms and amendment of the special agreement of "NIREUS AQUACULTURE AE" as Strategic Investor of "SEAFARM IONIAN AE" with the Banks - Creditors that participate in the equity structure of the Enterprise "SEAFARM IONIAN AE".

The Board of Directors of NIREUS AQUACULTURE AE at its meeting held on 28/09/2007 approved the merger by absorption of the subsidiary companies SEAFARM IONIAN AE by the parent NIREUS AQUACULTURE AE with Transformation Balance Sheets at 31/12/2007. The procedure of absorption for SEAFARM IONIAN will be delayed because the absorption of SEAFARM IONIAN depends on the results of the aforementioned negotiations.

#### 9. Assets pledged as Security

- 1. The following mortgages have been registered for the fixed assets of the parent company "NIREUS AQUACULTURE SA":
- ( $\alpha$ ) First class mortgages, have been registered of an amount of  $\in$  10.000.000 in favour of the Greek State, to secure the issuance of a loan an amount of  $\in$  25.000.000 from the Bank of Piraeus, under the framework of the favourable regulations for the fire victims, the balance of which amounted as at 31/12/2008 to  $\in$  25.000.000,00.
- (b) First class mortgages, of an amount of  $\in$  15.000.000, have been registered in favour of the Commercial Bank, to secure the bond loan of an amount of  $\in$  90.000.000, the balance of which amounted as at 31/12/2008 to  $\in$  89.054.898.
- (c) A mortgage of an amount of  $\in$  4.225.000 has been registered in favour of ALPHA BANK S.A which is subject to elimination given that the bond loan of an equivalent amount for which the mortgage had been registered, has been repaid as at 19/12/2008.
- (d) A second class mortgage has been registered of an amount of  $\in$  6.240.000 in favour of the Commercial Bank to secure the bond loan of an amount of  $\in$  90.000.000, the balance of which as at 31/12/2008 amounted to  $\in$  89.054.898, which will be converted to a first class mortgage given that the abovementioned bond loan referred to in paragraph (c) has been paid and Alpha Bank S.A will proceed in the remission of the mortgage referred to paragraph (c).
- (e) An underwriting of a mortgage of an amount of  $\in$  264.123,25 in favour of EUROBANK has been registered.
- 2. An underwriting of a mortgage from the National Bank of Greece of an amount of  $\in$  1.100.000 has been registered on the land of the consolidated subsidiary company "KEGO AGRI S.A" to secure the long-term loan of the parent company "NIREUS AQUACULTURE S.A", the balance of which as at 31/12/2008 amounted to  $\in$  300.855,07 and has been repaid as at 22/01/2009.
- 3. On the land of the consolidated subsidiary "SEAFARM IONIAN S.A", the following mortgages have been registered:

#### NIREUS AQUACULTURE S.A

- (a) An underwriting of a mortgage of an amount of  $\in$  200.000, to secure the loan from Attikis Bank S.A, the balance of which as at 31/12/2008 amounted to  $\in$  144.637,34.
- (b) Mortgages have been registered of an amount of € 250.000 in favour of "AGROINVEST S.A".
- (c) An underwriting of a mortgage of an amount of  $\in$  381.511,37 to secure a loan from the Bank of Cyprus, the balance of which amounted as at 31/12/2008 to  $\in$  691.795,62.
- (d) An underwriting of a mortgage of an amount of € 296.404,98 has been registered to secure the loan from the National Bank of Greece, the balance of which as at 31/12/2008 amounted to € 1.636.720,70
- (e) Mortgages have been registered of an amount of  $\in$  3.283.364,38 to secure the loan from the Agrotiki Bank of Greece, the balance of which as at 31/12/2008 amounted to  $\in$  394.793,77. It should be mentioned that the referred to balance will be paid in 15 years (since 2005) in 25 equivalent semi-annual interest and capital instalments of an amount of  $\in$  16.449,74 each, in accordance with the regulation of article 44 by which the company has guaranteed the payment of the abovementioned amount.
- 4. In addition the following pledges have been underwritten for certain loans:
  - On the loan referred to in (1a) Contracts related to fish population of an amount of € 6.450.000, in addition to customer cheques of an amount of € 4.000.000 have been pledged in favor of the Piraeus Bank
  - On the loan referred to in (1b) Contracts related to fish population and floating installations owed by "NIREUS AQUACULTURE S.A" of an amount of € 68.500.000 have been secured.
  - On the loan referred to in (1e) Insurance contracts which cover products, raw materials and loss of income of a total amount of € 3.000.000 in addition to customer chaques of an amount of € 10.000.000 have been secured.

#### 10. Related parties

#### Related party transactions

#### 11. Merged (by absorption) companies - Spinned-off segment

During the current year and based on the decision taken by the Extraordinary Shareholders meeting of the Company "NIREUS AQUACULATURE SA", approval was obtained with respect to the merger of the of the company "KEGO S.A" (Decision of the Ministry of Development K2-12329/31.10.2008) which has been incorporated in the standalone financial statements with the purchase method. In addition during the current year and based on the Extraordinary Shareholder's General Meeting held on 28/08/2008, the spin-off of the agricultural, aviculture and stockbreeding segment and contribution in the 100% subsidiary company "KEGO AGRI S.A" which is located in Nea-Artaki-Evia (Approval by the Prefecture of Evia No. 3771/1.10.2008) was approved. The spin-off of the segment of agricultural, aviculture and stockbreeding includes the sale of agricultural, aviculture and stockbreeding products and the segment of hogbreeding. The operations of agricultural, aviculture and stockbreeding includes the production of equilibrists, premixture, highterm vegeterial raw material, the sale of animal food production substitutes, the sale of high quality products in the hellenic stockbreeding and the production of animal feed, in addition to the rendering of services, via special intellectual and consulting services on matters of nutrition, reproduction, veterinary and on the general management of the aviculture and hogbreeding unit.

As a result of the above merger and spin-off, the standalone financial statements of NIREUS AQUACULTURE for the year 2008 includes the Balance Sheet figures for the year 2008 of the above merged company in addition to the results for the year 2008 of the company "NIREUS AQUACULATURE SA" which includes the results of the above mentioned merged company and the results of the spinned-off segment for the period 1/1-30/09/2008.

The Balance Sheet data which was spinned-off as at 30/09/2008 amount to a total of Assets  $\in$  14.457 thds, a total of Liabilities  $\in$  5.819 thds, a total of Equity  $\in$  8.637 thds and the Profit and Loss data for the period 1/1-30/09/2008 amount to Sales  $\in$  12.219 thds, Profit before taxes  $\in$  1.238 thds, and Profit after taxes  $\in$  928 thds which is analysed as follows: a) profit before taxes attributable to the shareholders of the parent company of an amount of  $\in$  261 thds b) profit after taxes attributable to the minority interests of an amount of  $\in$  667 thds which is presented in the results after taxes attributable to the shareholders of the parent company. It is worthy of being mentioned that the results after taxes attributable to minority

interests of the merged company which exclude the results of the spinned-off segment from 1/1-30/09/2008 of an amount of € (92 thds) are presented in the profit after tax attributable to the shareholders of the parent company. Subsequently the abovementioned amounts have been transferred to the special reserves which was established in the year 2007 and which included the total minority interests until that date and the total amount has been eliminated with the amount of the investment which resulted from the exchange relation and the difference of an amount of € 887 thds has been transferred as goodwill in the account "Goodwill". The residual amount of € 34 thds affected the investment of the subsidiary company "KEGO AGRI S.A". The comparative figures of the standalone Financial Statements of "NIREUS AQUACULTURE S.A" for the year 2007 and for the results of the year 2007 are those of "KEGO S.A". It is worthy of being mentioned that: The Minority interests of the Profit and Loss for the year 2007 of the merged subsidiary company "KEGO S.A" (from the date of the first purchase 28/02/2007 to 31/12/2007) of an amount of € 3.832 thds is included in the net results of the year which are apportioned to the shareholders of the parent company, which in turn have been transferred to the special reserve of net equity, along with the existing minority interests that have resulted from the initial purchase. ii) The capital of NIREUS AQUACULTURE S.A after the merger has been established as follows: a) has been increased by the amount of the contributed share capital of "KEGO S.A" of an amount of € 8.670.000 following the decrease of the write-off of shares which NIREUS AQUACULTURE holds of an amount of € 2.435.595, namely is increased by an amount of € 6.234.405.b) has been increased with the capitalization of reserves of "NIREUS AQUACULTURE" for the purpose of rounding differences from the account "Share Premium" by an amount of € 362.941,66.Following the above: 1) The share capital of "NIREUS AQUACULTURE S.A" amounts to the total of € 84.923.361,62 which is divided into 63.375.643 common voting rights shares, with a new nominal value of € 1,34 each. 2) The "Share premium" account is increased by an amount of € 10.230.659 which is analysed as 11.845.370 number of shares \* 1,39 (stock exchange market price of "NIREUS AQUACULTURE" at 19/09/2008) less the contributed share capital of KEGO A.E of an amount of €6.234.405.

During the current year 2008, and based on the decision taken during the Board of Directors Meeting of "NIREUS AQUACULTURE S.A" held on 28/11/2008, the merger, via 100%, of the subsidiaries "ALPINO S.A", "A-SEA S.A" and "RED ANCHOR S.A" was approved, based on the stipulations of L. 2166/93, by the Parent Company "NIREUS AQUACULTURE S.A" with transformation financial statements dated 30/11/2008. The merger was approved based on Protocol Number K2-2218 3/3/2009 of the Ministry of Development.

The comparative figures of the individual balance sheet for the year 2007 and the results for the year 01/01 to 31/12/2007 are those of the consolidated Group .We consider that the following hereby be noted:(a) The Minority Interest of the Income Statement for the year 2007 of the merged subsidiaries "ALPINO S.A", "A-SEA S.A" (up until the date of acquisition of the minority interest's percentage) of an amount of  $\in$  (37.251) have been included in the net results for the year which are distributed to the companies' shareholders and (b) the results of the year of "RED ANCHOR S.A" have been incorporated in the Parent company from the date of acquisition on 26/11/2007 to 31/12/2007 and (c) from the mentioned merger no increase in the parent company share capital has resulted.
