5.2. Additional information and explanation

5.2.1. General Information

The Group operates in the information technology sector and, in particular, in software applications production, commerce, development and support for computer and computerization services provision intermediate systems in large enterprises and organizations. The Company is based in Greece, ***Al. Panagouli & Siniosoglou Str., N.Ionia*** and the web address is www.singularlogic.eu.

The Company shares are being traded at Athens Exchange. The interim consolidated financial statements for the period 01/01-30/09/2008 have been approved for publication by the Company Board of Directors on 24/11/2008.

5.2.2. Financial statements elaboration framework and accounting principles

The Group interim consolidated financial statements for the third quarter of 2008 covering the period January 1st - September 30th 2008, have been drawn up on the basis of the historical cost principle, as modified by assets and liabilities readjustment to current values, the going concern principle being in accordance with the International Accounting Standard 34 on 'interim financial statements'.

Interim financial statements preparation according to IFRS (International Financial Reporting Standards) requires significant accounting estimates and scrutiny on behalf of the management in the accounting principles application process. Important assumptions by the management on the Company's accounting methods application are highlighted when deemed necessary. Estimates and judgments by the management are being constantly evaluated and are underpinned on empirical data and other factors including reasonable expectations for future events.

The interim summary financial statements do not include all the information and notes required for the Group annual financial statements and should be read in correlation with the Group annual financial statements of December 31st 2007.

The accounting principles and the calculations based on which financial statements were drafted are consistent with those used to draft the annual financial statements of the financial year ended on 31/12/2007 and have been applied consistently for all periods.

5.2.3. New accounting principles and interpretations of IFRIC

Up to the date of the approval of the financial statements certain new Standards, Interpretations and Revised Standards have been published that are mandatory for accounting periods beginning on or after January 1, 2008. The Group's management estimate in relation to the effects of the adoption of the new standards and interpretations is as follows:

-IAS 1, Presentation of Financial Statements – Revised.

The standard was revised to require statement of changes in equity to include only transactions with shareholders. A new statement of comprehensive income is introduced and dividends to equity holders are shown only in the statement of changes of equity or notes to the financial statements. The Group is in the process of assessing the impact this revised standard will have on its financial statements. The revised IAS 1 becomes effective for financial years beginning on or after January 2009.

-IFRS 2, Share based payment: "vesting conditions and cancellations" – Amendment

The amendment clarifies two issues: The definition of 'vesting condition', introducing the term 'non-vesting condition' for conditions other than service conditions and performance conditions. It also clarifies that the same accounting treatment applies to awards that are effectively cancelled by either the entity or the counterparty. The Group expects that this Interpretation will have no impact on its financial statements. The amended IFRS 2 becomes effective for financial years beginning on or after January 2009.

-IFRS 3, 'Business Combinations' and IAS 27-28 & 31 'Consolidated and Separate Financial Statements' – Revised

As regards IFRS 3, this will apply to business combinations occurring in those periods and its scope has been revised to include combinations of mutual entities and combinations without consideration (dual listed shares). IFRS 3 and IAS 27, inter alia, require greater use of fair value through the income statement and cement the economic entity concept of the reporting entity. Furthermore, these standards also introduce the following requirements (i) to remeasure interests to fair value when control is obtained or lost, (ii) recognising directly in equity the impact of all transactions between controlling and non-controlling shareholders where loss of control is not lost and, (iii) focuses on what is given to the vendor as consideration rather than what is spent to achieve the acquisition. More specifically, items such as acquisition-related costs, changes in the value of the contingent consideration, share-based payments and the settlement of pre-existing contracts will generally be accounted for separately from the business combination and will often affect the income statement. The revisions to the Standards have not yet been endorsed by the EU. The revised IFRS 3 and IAS 27 become effective for financial years beginning on or after January 2009.

-IFRS 8, Operating Sectors

IFRS 8 replaces IAS 14 and sets different disclosure requirements regarding the information by activity sectors. IFRS 8 is effective from the 1st January 2009 and is expected to be adopted by the Group.

-IAS 23, (amendment) Borrowing Cost

In the revised standard, the previous benchmark treatment of recognising borrowing costs as an expense has been eliminated. Instead, borrowing costs that are directly attributable to the acquisition, construction or

production of qualifying assets form part of the costs of the asset. The revised version of IAS 23 Borrowing Cost needs to be applied for annual periods beginning on or after 1st January 2009.

-IAS 32 and IAS 1 Puttable Financial Instruments - Amendment

The amendment to IAS 32 requires certain puttable financial instruments and obligations arising on liquidation to be classified as equity if certain criteria are met. The amendment to IAS 1 requires disclosure of certain information relating to puttable instruments classified as equity. The Group does not expect these amendments to have an impact on its financial statements. The amendment to IAS 32 becomes effective for financial years beginning on or after January 2009.

-IAS 39, Financial Instruments: Recognition and Measurement: Eligible Hedged items - (amendment July 2008)

The amendment clarifies that an entity is permitted to designate a portion of the fair value changes or cash flow variability of a financial instrument as a hedged item. An entity can designate the changes in fair value or cash flows related to a one-sided risk as the hedged item in an effective hedge relationship. The Group does not expect this amendment to have an impact on its financial statements. The amendment to IAS 39 becomes effective for annual periods beginning on or after 1st July 2009.

-IAS 39 & IFRS 7 Financial Instruments: Recognition and Measurement & Disclosures: Reclassification of Financial Assets - (amendment October 2008)

The amendment permits an entity to reclassify non-derivative financial assets (other than those designated at fair value through profit or loss by the entity upon initial recognition) out of the fair value through profit or loss category in particular circumstances. It also permits an entity to transfer from the available-for-sale category to the loans and receivables category a financial asset that would have met the definition of loans and receivables (if the financial asset had not been designated as available for sale), if the entity has the intention and ability to hold that financial asset for the foreseeable future. The Group does not expect this amendment to have an impact on its financial statements. The amendment to IAS 39 becomes effective for annual periods beginning on or after 1st July 2008.

-IFRIC 12, Service Concession Agreements

IFRIC 12 handles the way with which the concession managers of a service concession must apply IFRS to account for the liabilities they undertake and the rights provided to them in the service concession agreements. IFRIC 12 is effective from the 1st January 2008 and is not expected to affect the Group's financial statements.

-IFRIC 13, Customer Loyalty Programmes

IFRIC 13 "Customer Loyalty Programmes" clarifies that where entities grant award credits as part of a sales transaction and customers can redeem those award credits in the future for free or discounted goods or services. The timing of the recognition of this element of revenue is deferred until the entity satisfies its obligations relating to the award credits, either by supplying the rewards directly or by transferring the obligation to a third party. IFRIC 13 needs to be applied for annual periods beginning on or after 1st July 2008 and is not expected to affect the Group's financial statements.

-IFRIC 14, The Limit on a Defined Benefit Asset, Minimum Funding Requirements and their Interaction

IFRIC 14 is effective for annual periods beginning on or after 1 January 2008. This Interpretation has not yet been endorsed by the EU.

-IFRIC 15, Agreements for the Construction of Real Estate

IFRIC 15 is effective for annual periods beginning on or after 1 January 2009 and must be applied retrospectively. IFRIC 15 provides guidance on how to determine whether an agreement for the construction of real estate is within the scope of IAS 11 'Construction Contracts' or IAS 18 'Revenue' and, accordingly, when revenue from such construction should be recognized. The Group is in the process of assessing the impact of this interpretation on its financial statements. This Interpretation has not yet been endorsed by the EU.

-IFRIC 16, Hedges of a Net Investment in a Foreign Operation

IFRIC 16 clarifies three main issues:

Whether risk arises from (a) the foreign currency exposure to the functional currencies of the foreign operation and the parent entity, or from (b) the foreign currency exposure to the functional currency of the foreign operation and the presentation currency of the parent entity's consolidated financial statements.

IFRIC 16 concludes that the presentation currency does not create an exposure to which an entity may apply hedge accounting. Consequently, a parent entity may designate as a hedged risk only the foreign exchange differences arising from a difference between its own functional currency and that of its foreign operation.

Which entity within a group can hold a hedging instrument in a hedge of a net investment in a foreign operation and in particular whether the parent entity holding the net investment in a foreign operation must also hold the hedging instrument.

IFRIC 16 concludes that the hedging instrument(s) may be held by any entity or entities within the group.

How an entity should determine the amounts to be reclassified from equity to profit or loss for both the hedging instrument and the hedged item when the entity disposes of the investment.

IFRIC 16 concludes that while IAS 39 must be applied to determine the amount that needs to be reclassified to profit or loss from the foreign currency translation reserve in respect of the hedging instrument, IAS 21 must be applied in respect of the hedged item.

IFRIC 16 is effective for annual periods beginning on or after October 1st 2008. An entity may choose to apply IFRIC 16 retrospectively or prospectively. Earlier application is permitted.

5.2.4. Significant accounting policies

Estimates and judgments by the management are being constantly scrutinized and are based on historical data and expectations for future events.

Following the finalization of the fair values stemming from the acquisition of SingularLogic Software and SingularLogic Integrator, the Group has adjusted the expected life duration of software and commercial name from 5 year to 8 and from 10 year to 15 respectively, determining that this adjustment reflects more objectively the expected inflows and outflows of the activities involved. The effect on the current period is estimated at approximately €861 thousand and for the current fiscal year at approximately €1.000 thousand. Future effects cannot be estimated, since future inflows from software depends on many parameters, such as market trends, continually changing customer needs, technology changes, etc. Furthermore, future software development expenses cannot be accurately determined.

The Company and Group business activity is seasonal with a higher turnover in the last quarter each year.

5.2.5. Group structure and companies consolidation method

On 30.09.2008 the Group's financial statements were consolidated by the equity method from MARFIN INVESTMENT GROUP HOLDINGS SA.

In the financial statements, investments in subsidiaries and associates have been assessed to impairment cost. The Group structure and the consolidation method thereof are analyzed herein.

5.2.17. Other significant changes

Other significant changes for the Group and the Company Balance Sheet and P&L statement on 30.09.2008, that are not analyzed above, are as follows:

The reduction of inventories for the group by €1 mil. is attributed to provisions for slow-moving goods of the Company and its subsidiary. This provision for the Company amount to €380.000.

The increase in other operating expenses for the Group is attributed to bad debt provisions for commercial receivables and other current assets (these amount to €700.000 for the Company), as well as inventories.

5.2.18. Earnings per share

a) Basic earnings

Basic earnings/loss per share is calculated by dividing profit/loss proportioned to parent company shareholders by the weighted average number of common shares in the period in question, excluding the common treasury shares purchased by the enterprise.
