II. IMPORTANT EVENTS OF CURRENT FINANCIAL YEAR

OUR POSITION IN THE MARKET

In the domestic market, in the ice cream sector, we dynamically promoted the growth of our arithmetic distribution. We added more than 950 new points of sale to our network. Also, new ice cream products, which were launched this year, have been a major success. However, sales were strongly adversely affected by bad weather conditions from mid-March, till mid-May, and were down -5,6% compared to the first half of 2018. This was reversed over the coming months, June to August, and the domestic ice cream sales are now higher about +6% year on year.

In yogurt, we continue focusing on the large category of strained yogurt. With intense advertising and targeted promotions, we managed to strengthen our market share, with a significant increase in our sales. At the same time, we are expanding our product range to address wider consumer base. In this context, we have recently entered the category of infant yogurt.

Overseas, yogurt sales are increased significantly. This result comes from expanding current collaborations, but also from the utilization of the Greek yogurt dynamics in the large markets of western Europe where we have a presence.

INVESTMENTS

Investment in fixed assets and buildings amounted to € 3.8 million in the first half of 2019. They aim primarily at enhancing the yogurt plant's production capacity. These projects are eligible for state subsidy of 35%, as a tax deduction.

DIVIDEND

The Annual General Meeting decided the distribution of dividend for the financial year 2018 of gross value €0.15 per share (2017: €0.115).

SAFETY, ENVIRONMENT, CORPORATE SOCIAL RESPONSIBILITY

Safety in the workplace, environmental protection, harmonious co-existence with the local community and ongoing staff training continue to be non-negotiable goals, linked to the operation of the company. Also, specific actions are carried out within the framework of the Corporate Social Responsibility program.

III. MAJOR RISKS & UNCERTAINTIES

Due to the nature of its operations, the Company is exposed to various financial risks such as, market risk (fluctuations of exchange rates, interest rates and of production costs), credit risk and liquidity risk. The Company's overall risk management program focuses on financial market unpredictability and aims to minimize the potential negative impact on the Company's financial performance.

Risk management is carried out by the Company's financial department, which operates under certain rules approved by the Board. The Board of Directors provides instructions and guidelines on general risk management and special instructions on managing specific risks such as currency risk, interest rate risk and credit risk.

MARKET RISK

Foreign currency risk

The main bulk of the Company's operations are conducted within the Euro zone. Company exposure to exchange rate (FX) risk derives from existing or expected cash flows in foreign currency (GBP). Part of the exposure to exchange rate risk is hedged using futures and options.

Interest rate risk

The Company has not capitalized significant interest-related assets, therefore operating income and operating cash flows are substantially independent of changes in market interest rates.

The loans of the Company are related to either floating rates or fixed rates. The company does not use financial derivatives. The interest rate risk relates primarily to long-term loans. Loans with variable interest rates expose the Company to cash flow risk. Loans issued at fixed rates expose the Company to risk of changes in fair value.

A policy of retaining loans with variable interest rate is beneficial in cases of declining interest rates. On the other hand, a liquidity risk appears when the interest rates rise.

From the total loans of the Company at 30.6.2019, the amount of € 5.000.000 is related to a fixed interest rate and the amount of €7.819.630 is related to a floating rate.

Banking system's financing products are being systematically considered to minimize financing costs.

Risk of fluctuation of raw material prices

The Company is exposed to risk of loss of income in case of sudden changes in prices of raw materials. This is a result of the inability to roll these costs to sales prices in a timely manner.

CREDIT RISK

The Company has established and applies credit control procedures in order to minimize credit risk. Generally, sales are distributed to a large number of customers, resulting in an efficient dispersion of the commercial risk, except maybe the large super market chains in Greece.

Wholesale sales are made to customers with appropriate credit history. The credit control department defines credit limit per customer that is continuously monitored and reviewed. Also, where possible, the Company is ensured by collateral or other security. Thus, for example from the company domestic customers-distributors, the Company receives personal guarantees amounting the double of two months turnover, hence steadily applying its credit policy.

For commercial credits of foreign customers, the Company follows a credit insurance covering that returns any customer losses due to insolvency of up to 80% of their total debts. Limits per customer are established by the insurance company. Therefore, if there is any credit risk, the risk to the company from any doubtful receivables is limited to 20% of the coverage of the insurance company.

The company's management emphasizes on reducing working capital needs. It promotes the reduction of credit limits and reduce the credit period to its customers, to enhance free cash flow.

LIQUIDITY RISK

The Company manages liquidity risk by maintaining adequate cash reserves and credit lines from banks. At present, available overdraft can adequately cover any immediate cash requirement.

OPERATING RISKS

Suppliers - stock

The Company has no significant dependence on certain suppliers given that no supplier holds more than 10% of total purchases.

The company's management promotes the management of total stock so as to meet the needs of the market and the production process, without the need for excessive liquidity reservation.

Staff

The company's management is based on a team of experienced and qualified personnel, who have full knowledge of their subject and industry market conditions. This contributes significantly to the proper functioning of the company's processes and the further development of its activities.

Company executives are working harmoniously with each other and with the company's management. Potential disruption of this relationship may affect, temporarily, its proper functioning. However, the existing staffing infrastructure company enabling the direct replenishment executives, with no significant impact on the progress of its work.

IV. Macroeconomic risks in Greece

The macroeconomic and financial environment in the country remains fragile, although it is now showing stabilization. The Management has identified the areas affected by developments in the macroeconomic environment in Greece and has taken the necessary measures to minimize the effects of the risks and uncertainties faced by the Company from its exposure in Greece.

In June 2016, the United Kingdom decided to leave the European Union ("Brexit") after a referendum. The negotiations of the two sides have not yet reached an agreement on their relationship, after Brexit. Possible customs controls or import duties after Brexit would worsen our competitive position in the United Kingdom market, negatively impacting on our sales and profitability. Brexit's final effects will depend on the specific terms that will apply if an agreement is reached between the United Kingdom and the European Union. It is noted that sales to the United Kingdom for the current period amount to approximately €11.300k, ie 19% of the Company's total turnover.

V. Prospects for the second half of financial Year 2019

In the third quarter 2019, the downward trend of ice cream sales on the domestic market was reversed. Thus, the domestic sales of ice cream year to date are up by about +6%. In other segments, sales follow a trend similar to this of the first half. Operating profit margins show improvement.

A similar trend is expected to be presented in the fourth quarter of 2019, subject to any unexpected economic or political developments.

VI. Related party transactions

The Company maintains an obligation to related parties (its key shareholders) arising from the coverage of a bond loan of € 5.000.000. This loan is for 5 years, without collaterals and according to the usual terms of the banking market.

Related party transactions are analyzed as follows:

REVIEW REPORT ON INTERIM FINANCIAL INFORMATION

To the Shareholders of the Company "KRI – KRI MILK INDUSTRY AE"

Introduction

We have reviewed the accompanying condensed statement of financial position of KRI-KRI MILK INDUSTRY S.A. as at 30 June 2019 and the relative condensed statements of comprehensive income, changes in equity and cash flows for the six-month period then ended, as well as the selected explanatory notes, that constitute the condensed interim financial information, which is an integral part of the six-month financial report under the L. 3556/2007.

Management is responsible for the preparation and presentation of this condensed interim financial information, in accordance with International Financial Reporting Standards, as adopted by the European Union (EU) and which apply to Interim Financial Reporting (International Accounting Standard "IAS 34"). Our responsibility is to express a conclusion on this condensed interim financial information based on our review.

Scope of Review

We conducted our review in accordance with International Standard on Review Engagements 2410, "Review of Interim Financial Information Performed by the Independent Auditor of the Entity". A review of interim financial information consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with International Standards on Auditing that have been incorporated into the Greek Legislation and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Conclusion

Based on our review, nothing has come to our attention that causes us to believe that the accompanying condensed interim financial information is not prepared, in all material respects, in accordance with International Accounting Standard "IAS 34".

Report on other Legal and Regulatory Requirements

Our review did not identify material inconsistency or error in the statements of the members of the Board of Directors and the information of the six-month Financial Report of the Board of Directors as these are defined in article 5 and 5a of L. 3556/2007, with respect to the condensed interim financial information.

The accompanying notes are an integral part of these financial statements.

A. General information

KRI-KRI MILK INDUSTRY S.A. operates in the dairy industry. Its main business activities are the production of ice-cream, yogurt and milk.

The headquarters are located in 3rd km Serres-Drama, 62125, Serres, Greece, its website is www.krikri.gr and its shares are listed on Athens Stock Exchange (Food sector).

These financial statements have been approved by the Board of Directors at 10 September 2019.

The interim condensed financial statements have not been audited but reviewed.

B. Significant accounting policies

B.1 Basis of preparation

These financial statements covering the period from 1.1.2019 to 30.6.2019 and have been prepared according to IAS 34.

The interim financial statements for the six-month period have been prepared on the basis of the same accounting principles followed for the preparation and presentation of the financial statements for the year 2018, except for the new standards and interpretations adopted, the implementation of which was compulsory for periods after 1 January 2019.

Any differences that arise between the amounts in these interim financial statements and the corresponding amounts in the selected explanatory notes as well as in sums are due to rounding.

The interim financial statements should be read in conjunction with the audited financial statements for the year ended December 31, 2018, which have been posted on the Company's website and have been prepared in accordance with IFRSs.

The earnings tax in the interim financial statements is calculated using the tax rate applicable to annual profits.

New standards, amendments to standards and interpretations:

Certain new standards, amendments to standards and interpretations have been issued that are mandatory for periods beginning on or after 1.1.2019. The Company's evaluation of the effect of these new standards, amendments to standards and interpretations is as follows:

Standards and Interpretations effective for the current financial year

IFRS 9 (Amendments) "Prepayment Features with Negative Compensation"

The amendments allow companies to measure particular prepayable financial assets with so-called negative compensation at amortized cost or at fair value through other comprehensive income if a specified condition is met instead of at fair value through profit or loss.

IFRS 16 "Leases"

IFRS 16 has been issued in January 2016 and supersedes IAS 17. The objective of the standard is to ensure the lessees and lessors provide relevant information in a manner that faithfully represents those transactions. IFRS 16 introduces a single lessee accounting model and requires a lessee to recognise assets and liabilities for all leases with a term of more than 12 months, unless the underlying asset is of low value. IFRS 16 substantially carries forward the lessor accounting requirements in IAS 17. Accordingly, a lessor continues to classify its leases as operating leases or finance leases, and to account for those two types of leases differently.

In summary, the estimated impact on the financial statements of the company, since the adoption of IFRS 16 are:

Statement of Financial Position	31.12.2018
Non-current assets	
Tangible assets	767.767
Liabilities	
Liabilities from leases	767.767

Statement of Comprehensive Income	1.1-31.12.2019
Operating leases	(139.284)
Depreciation	129.154
Financial expenses	17.823
Profit before tax	7.693
Net Profit	5.539
EBITDA (see note C24)	139.284

IFRIC 23 "Uncertainty over income tax treatments"

The interpretation explains how to recognise and measure deferred and current income tax assets and liabilities where there is uncertainty over a tax treatment. IFRIC 23 applies to all aspects of income tax accounting where there is such uncertainty, including taxable profit or loss, the tax bases of assets and liabilities, tax losses and credits and tax rates.

Annual Improvements to IFRS (2015 – 2017 Cycle)

The amendments set out below include changes to four IFRSs.

IFRS 3 "Business combinations"

The amendments clarify that a company remeasures its previously held interest in a joint operation when it obtains control of the business.

IFRS 11 "Joint arrangements"

The amendments clarify that a company does not remeasure its previously held interest in a joint operation when it obtains joint control of the business.

IAS 12 "Income taxes"

The amendments clarify that a company accounts for all income tax consequences of dividend payments in the same way.

IAS 23 "Borrowing costs"

The amendments clarify that a company treats as part of general borrowings any borrowing originally made to develop an asset when the asset is ready for its intended use or sale.

Standards and Interpretations effective for subsequent periods

IAS 1 and IAS 8 (Amendments) "Definition of a material" (effective for annual periods beginning on or after 1 January 2020)

The amendments clarify the definition of material and how it should be applied by including in the definition guidance which until now was featured elsewhere in IFRS. In addition, the explanations accompanying the definition have been improved. Finally, the amendments ensure that the definition of material is consistent across all IFRS. The amendments have not yet been endorsed by the EU.

B.2 Financial risk management

The interim financial statements do not include disclosure of all risks required in the preparation of the annual financial statements and should be read in conjunction with the annual financial statements of the Company for the year ended 31 December 2018.

Due to the nature of its operations, the Company is exposed to various financial risks such as, market risk (fluctuations of exchange rates, interest rates and of production costs), credit risk and liquidity risk. The Company's overall risk management program focuses on financial market unpredictability and aims to minimize the potential negative impact on the Company's financial performance.

Risk management is carried out by the Company's main financial department, which operates under certain rules approved by the Board. The Board of Directors provides instructions and guidelines on general risk management and special instructions on managing specific risks such as currency risk, interest rate risk and credit risk.

(a) Market risk

Foreign currency risk

The main bulk of the Company's operations are conducted within the Euro zone. Company exposure to exchange rate (FX) risk derives from existing or expected cash flows in foreign currency (GBP). Part of the exposure to exchange rate risk is hedged using futures and options.

Cash flow sensitivity analysis to EUR/GBP changes

	GBP/EUR	Profit before Taxes effect
1/1-30/6/2019	+5%	85.175
	-5%	(85.175)
1/1-30/6/2018	+5%	36.727
	-5%	36.727

Interest rate risk

The Company has not capitalized significant interest-related assets, therefore operating income and operating cash flows are substantially independent of changes in market interest rates.

The loans of the Company are related to either floating rates or fixed rates. The company does not use financial derivatives. The interest rate risk relates primarily to long-term loans. Loans with variable interest rates expose the Company to cash flow risk. Loans issued at fixed rates expose the Company to risk of changes in fair value.

A policy of retaining loans with variable interest rate is beneficial in cases of declining interest rates. On the other hand a liquidity risk appears when the interest rates rise.

From the total loans of the Company at 30.6.2019, the amount of €5.000.000 is related to a fixed interest rate and the amount of €7.819.630 is related to a floating rate.

Banking system's financing products are being systematically considered to minimize financing costs.

Loans sensitivity analysis on interest change

	Interest variability	Profit before taxes effect
1.1-30.6.2019	+1%	(52.575)
	-1%	52.575
1.1-30.6.2018	+1%	(48.000)
	-1%	48.000

Note: The above table does not include the positive effect of interest received from bank deposits.

The Management estimates that there is no material risk related to interest rates on bank deposits.

Risk of fluctuation of raw material prices

The Company is exposed to risk of loss of income in case of sudden changes in prices of raw materials. This is a result of the inability to roll these costs to sales prices in a timely manner.

(b) Credit risk

Also, insurance contracts are made to cover sales per customer, while collateral is not required on the assets of customers. During the preparation date of the financial statements, provisions were made for doubtful debts and the Management considers that there is no other substantial credit risk that is not covered by insurance coverage or provisions, unless maybe the big Greek supermarket chains.

Wholesale sales are made to customers with appropriate credit history. The credit control department defines credit limit per customer that is continuously monitored and reviewed. Also, where possible, the Company is ensured by collateral or other security. Thus, for example from the company domestic customers-distributors, the Company receives personal guarantees amounting the double of two months turnover, hence steadily applying its credit policy.

For commercial credits of foreign customers, the Company follows a credit insurance covering that returns any customer losses due to insolvency of up to 80% of their total debts. Limits per customer are established by the insurance company. Therefore, if there is any credit risk, the risk to the company from any doubtful receivables is limited to 20% of the coverage of the insurance company.

The company's management emphasizes on reducing working capital needs. It promotes the reduction of credit limits and reduce the credit period to its customers, to enhance free cash flow.

(c) Liquidity risk

The Company manages liquidity risk by maintaining adequate cash reserves and credit lines from banks. At present, available overdraft can adequately cover any immediate cash requirement.

(d) Operating risks

Suppliers - stock

The Company has no significant dependence on certain suppliers given that no supplier holds more than 10% of total purchases.

The company's management promotes the management of total stock so as to meet the needs of the market and the production process, without the need for excessive liquidity reservation.

Staff

The company's management is based on a team of experienced and qualified personnel, who have full knowledge of their subject and industry market conditions. This contributes significantly to the proper functioning of the company's processes and the further development of its activities.

Company executives are working harmoniously with each other and with the company's management. Potential disruption of this relationship may affect, temporarily, its proper functioning. However, the existing staffing infrastructure company enabling the direct replenishment executives, with no significant impact on the progress of its work.

B.3 Fair value measurement

The Company acknowledges fair value measurement through a 3 levels hierarchy.

1) Quoted prices in active markets for identical assets or liabilities that the entity can access at the measurement date. («Level 1»).

2) Other than quoted market prices included within Level 1 that are observable for the asset or liability, either directly or indirectly. («Level 2»).

3) Unobservable inputs for the asset or liability. An entity develops unobservable inputs using the best information available in the circumstances, which might include the entity's own data, taking into account all information about market participant assumptions that is reasonably available. («Level 3»).

Fair value of financial assets and liabilities

	Level 3
Long-term loans	11.150.675

The fair value of long-term loans was measured based on discounted cashflows.

The carrying value of loans approximates fair value as the impact of discounting is not significant.

The fair value of the following financial assets and liabilities approximate their carrying amounts:

- Trade and other receivables
- Cash and cash equivalents
- Trade and other payables

Fair value of investment property

	Level 3
Investment property	10.000

The fair value of investment property is based on Management's estimations ("Level 3"), after examining the value of the properties in the area

B.4 Significant accounting estimations and judgments of the management

The preparation of the interim financial statements requires the Company's management to make estimations, judgments and assumptions that affect the application of the accounting principles and the asset/liability income/expense accounting values. The results are maybe different that these estimations.

For the preparation of the interim financial statements the significant judgments and estimates of the Management regarding the application of the Company's accounting principles are the same as those used for the preparation and presentation of the Company's annual financial statements for the year 2018.

Also, the main sources of uncertainty that existed in the preparation of the annual financial statements of 31 December 2018 remained the same for the interim financial statements as at 30 June 2019.

B.5 Comparative information

Comparative information is disclosed in respect of the previous period for all amounts reported in the financial statements, both face of financial statements and notes. Differences may arise between the amounts stated in the financial statements and the amounts stated in the notes, as a result of numbers rounding.

EBITDA serves as an additional indicator of our operating performance and not as a replacement for measures such as cash flows from operating activities and operating income. We believe that EBITDA is useful to investors as a measure of operating performance because it eliminates variances caused by the amounts and types of capital employed and amortization policies and helps investors evaluate the performance of our underlying business. In addition, we believe that EBITDA is a measure commonly used by analysts and investors in our industry. Accordingly, we have disclosed this information to permit a more complete analysis of our operating performance. Other companies may calculate EBITDA in a different way. EBITDA is not a measurement of financial performance under IFRS and should not be considered an alternative to net profit/(loss), as an indicator of our operating performance or any other measure of performance derived in accordance with IFRS.

C18. Operating segment information

The chief operating decision maker, in the case of KRI-KRI the CEO, receives internal financial reports to measure the performance of the operating segments and to distribute the resources between them.

Under the operating distinction the Company's reportable segments are identified as follows:

◇ ***Ice-cream– Greece and other Countries.*** The segment refers to the production and distribution of ice-cream. There is distinctive performance measurement for Greece and other countries.
