

## Press Release

Athens, June 5, 2025

### **Space Hellas: Implementation of Information Security and Continuity Management Systems in the 4th Health Region of Macedonia and Thrace**

Following a competitive tendering process, Space Hellas undertook the development and implementation of an Information Security Management System (ISMS) and a Business Continuity Management System (BCMS) of the IT Directorate of the 4th Health Region of Macedonia and Thrace, making a decisive contribution to the successful certification of the organisation in accordance with the international standards ISO 27001 (Information Security Management System) and ISO 22301 (Business Continuity Management System).

At the same time, the company assumed the crucial role of Chief Information Security Officer (CISO) in order to ensure the Health Region's full compliance with the European NIS2 Directive and the new Greek law on cybersecurity, which determine the modern institutional framework for the protection of critical infrastructures and digital public sector services.

The adoption of the ISMS & BCMS systems and the successful certification demonstrate the operational maturity and technological readiness of the 4th Health Region to effectively respond to the increasing digital security and governance requirements. This significant achievement makes the 4th HR the first Health Region in Greece and one of the few public bodies in the country to have achieved these critical certifications.

ISO 22301 certification ensures that the IT Directorate of the 4thHR has established and is implementing a robust and operationally efficient framework for prevention, responding to and recovering from sudden incidents that may disrupt business continuity and the provision of essential services. This feature guarantees the uninterrupted operation of information systems, even under adverse conditions, ensuring the continuation of the provision of quality and reliable health services to citizens.

Accordingly, ISO 27001 certification confirms the strategic commitment of the Health Region to information management and security, ensuring the effective protection of citizens' and employees' sensitive data from risks, breaches and unauthorised access. This compliance further enhances the sense of trust, credibility and transparency in the Administration's relations with citizens and collaborating bodies.

Classification ISO27001: Public

## Press Release

The Commander of the 4th Health Region, Dr. Panagiotis Bogiatzidis stated: "The acquisition of these certifications is not only an important milestone, but reflects our constant commitment to creating a safe, functional and quality digital environment to support public health."

The IT Director, Mr Theodosios Lozos, stressed: : "This double certification is the result of a collective effort and an exemplary organisation. We are proud that our Directorate is leading the way in cybersecurity and business continuity."

The 4th Health Region of Macedonia and Thrace continues to strategically invest in technology, innovation and institutional compliance, with the aim of continuously upgrading the health services provided and shielding its information ecosystem, for the benefit of all citizens.

Space Hellas, through its know-how and many years of experience, is emerging as a strategic ally of the health sector, consistently and professionally guiding public bodies on the road to cybersecurity, business continuity and compliance with the European and national regulatory framework, contributing substantially to the shaping of a safe and sustainable digital future for the Public Administration.
