

METLEN secures £34.8 million new UK EPC contracts for solar and storage projects

Athens, Greece – 23 July 2025 – [METLEN](#) (RIC: MYTr.AT, Bloomberg: MYTIL.GA, ADR: MYTHY US) has signed **two new contracts** for the Engineering, Procurement and Construction (EPC) of **renewable energy projects in the UK**, further strengthening its presence in the country.

The total value of the contracts amounts to **£34.8 million**.

On behalf of **Cero Generation**, METLEN will design and construct a co-located photovoltaic (PV) park and Battery Energy Storage System (BESS) in **Bramley, Hampshire**. The **Bramley PV and BESS** project will deliver a combined capacity of **115 MW**.

For the contract with **AMPYR Solar Europe**, METLEN will construct an 18 MW BESS project in **Scruton, North Yorkshire**, with a total storage capacity of **49 MWh**.

These projects underscore METLEN's role as a reliable partner in the UK's energy transition, bringing its technical expertise to a growing portfolio of solar and battery storage developments across the region.

METLEN currently has 93 renewable energy projects completed or at various stages of execution or development in the UK and Ireland. These are split between 65 solar projects, with 1.82 GW in installed power, and 28 BESS projects, with a total energy capacity of 1.31GWh.

METLEN:

METLEN Energy & Metals is a multinational industrial and energy company, a leader in the metallurgy and energy industries, focused on sustainability and circular economy. The Company is listed on the Athens Stock Exchange, with a consolidated turnover and EBITDA of €5.68 billion and €1.08 billion, respectively. METLEN is a reference point for competitive green metallurgy at the European and global level, whilst operating the only vertically integrated bauxite, alumina and primary aluminum production unit in the European Union (E.U.) with privately owned port facilities. In the energy sector, METLEN offers comprehensive solutions, covering thermal and renewable energy projects, electricity distribution and trading, alongside investments in grid infrastructure, battery storage, and other green technologies. The Company is active in the markets of all five continents, in more than 40 countries, adopting a full-scale synergetic model between the Metallurgy and Energy Sectors, while undertaking end-to-end development of major energy infrastructure projects.
