CEO Statement

"Piraeus has delivered another strong set of results. We continued to grow, posting strong net credit expansion, deposit inflows, and higher assets under management, while asset quality remains robust. In the first nine months of 2025, we generated 15% return over tangible equity with €6.09 tangible book value per share, up 7% in the past 12 months. Our top line exhibited resilience, as our loan portfolio increased by 15% year on year, reaching €37bn, meeting our end-2025 target ahead of schedule. We continued to create value for clients, who entrust us with the largest client asset base in Greece: €64bn deposits, increased 5% year on year, and €14bn assets under management; the latter already surpassed the updated full-year target of above €13.5bn.

Net interest income has stabilized close to Q2 levels, while fee income tracked towards our full-year objective. Net interest margin stood at 2.3%, while net fee margin remained at the market-leading 0.8%. Costs and organic cost of risk were essentially flat compared with the prior quarter. We recorded a one-off charge related to the charitable donation for schools' renovation programme as part of our CSR actions, which does not alter our full-year outlook.

Our lending activity remains well diversified, with disciplined growth across corporate, SME, and green segments. Notably, mortgage lending turned net positive for the first time in over a decade, driven by renewed demand. Our targeted and innovative mortgage product "Spiti25" has attracted more than 930 applications in a couple months.

We are disciplined stewards of capital and remain focused on shareholder value. In October, we commenced our €100mn share buyback program under our 2025 interim distribution. Our capital ratios remain comfortably above requirements, supporting growth, distributions, and continued investment. Our total capital ratio increased to 20.6% in September 2025, incorporating 50% distribution reserve out of 2025 profit and digesting our strong loan growth.

Looking ahead, we are navigating a normalising interest rate environment from a position of strength. Our revenue-diversifying efforts are clearly reflected on our fees over net revenue of 25%. Our disciplined approach to balance sheet management and hedging, supports sustainable growth.

Strategically, we are progressing with the Ethniki Insurance transaction. We have received clearance from the Hellenic Competition Commission, and we are working towards the remaining approvals; subject to closing, we plan to consolidate Ethniki Insurance in the FY2025 results and present a refreshed business plan with

expanded fee and insurance capabilities.

Importantly, Snappi neobank made its debut in the Greek market in Q3 with promising early traction of more than 30,000 existing application users in less than a month. Snappi's value proposition is tailored to tech savvy users, promoting a branchless service model. At the same time, we continue to invest in digital transformation and ESG initiatives at Piraeus, launching new fintech partnerships and green financing products that drive innovation, operational efficiency, and customer value.

In 2025, GDP is projected to grow above the EU average, driven mainly by investment, consumer spending, and support from EU structural funds. Public finances continue to strengthen, with high primary surpluses, and a steady decline of the debt-to-GDP ratio, leading to further sovereign upgrades and reduced funding costs for banks.

The Greek banking sector overall, and Piraeus in particular, is delivering strong profitability, improved asset quality, and robust capital buffers. Piraeus is therefore well-positioned to act as a key enabler of Greece's economic resilience and future growth. The recent upgrade of Piraeus by Fitch to investment grade status has been one of the key achievements of this year for us.

We enter the final quarter of the year confident in our ability to deliver a strong finish to 2025, thus upgrading our net credit expansion target to $> \le 3.5$ bn from $> \le 3.0$ bn and RoaTBV target to 15% from 14% previously."

NII bottoming on growing loan book, 2025 target of €1.9bn confirmed

^{*} Non maturing deposit hedging cost corresponds to €9bn IRSs in Sep.25

Net interest income (NII) in Q3.25 stood at €471mn, almost flat compared to the previous quarter, despite the drop in ECB base rates, owed to the solid growth of loan volumes that partly offset the rates' impact, while lower time deposit pricing is driving funding costs lower. Forward-looking statements and financial projections

Certain information or statements contained in this presentation or made in any meetings that are not statements of historical fact, including, without limitation, any statements preceded by, followed by or including words or phrases such as "targets," "believes," "expects," "aims," "intends," "may," "anticipates," "would," "could", "will", "might", "potential", "plan", "is designed to" or similar expressions or the negative thereof, constitute forward-looking statements, notwithstanding that such statements are not specifically identified.

Examples of forward-looking statements include may include, among other things, statements relating to the Company/Group's strategies, plans, objectives, initiatives and targets, its businesses, outlook, political, economic or other conditions in Greece or elsewhere, the Company/Group's financial condition, results of operations, liquidity, capital resources and capital expenditures and development of markets and anticipated cost savings and synergies, as well as the intention and beliefs of the Company/Group and/or its management or directors concerning the foregoing. Forward-looking statements and financial projections are not guarantees of future performance and involve numerous known and unknown risks, uncertainties, both generic and specific, and assumptions which are difficult to predict and outside of the control of the Company/Group.

We have based these assumptions on information currently available to us at the date the statements are made, and if any one or more of these assumptions turn out to be incorrect, actual outcomes and results may differ materially from what is expressed in such forward-looking statements. While we do not know what impact any such differences may have on our business, if there are such differences, our future results of operations and financial condition, could be materially adversely affected. Therefore, you should not place undue reliance on these forward-looking statements and financial projections.

This presentation also includes certain forward-looking business and financial targets. The targets have been prepared by management in good faith, on the basis of certain assumptions which management believes are reasonable. However, there can be no assurance that the facts on which the assumptions are based will not change and, consequently, our ability to achieve these targets may be affected by a number of changes and risks, which are beyond our control and some of which could have an immediate impact on our earnings and/or financial position. No representation is made as to the reasonableness of the assumptions made in this presentation or the accuracy or completeness of any modelling, scenario analysis or back-testing. We do not undertake any obligation to update these targets and we reserve the right to change our targets from time to time as we respond to real operating, financial and other macro-economic conditions.

The Company/Group has included certain non-IFRS financial measures in this presentation. These measurements may not be comparable to those of other companies. Reference to these non-IFRS financial measures should be considered in addition to IFRS financial measures, but should not be considered a substitute for results that are presented in accordance with IFRS.
