

Profile Software strengthens its UK investment management offering with the acquisition of Contemi Solutions

Athens - London, 7 April 2026 - Following the completion of the acquisition of 100% of the shares of **Contemi Solutions (London) UK Ltd** on 2 February 2026, [Profile \(ATHEX: PROF\)](#), an international technology group, announces the **integration** of **Contemi's** clients, products, technology and teams into **Profile's investment management business**, further strengthening its presence in the United Kingdom - a strategic market for the Group.

At the core of the acquisition is **Contemi's WIN** solution, which brings more than two decades of experience serving Tier I and Tier II financial institutions in Europe. Integrated into **Profile's investment management platform, AXIA**, the expanded offering delivers a **powerful, future-ready solution** for **wealth managers, investment firms, fund managers and custodians across the UK**, addressing front-to-back operational, regulatory and digital requirements.

The WIN solution enriches Profile's **AXIA** with extensive functionality, including local regulatory alignment, operational workflows and market practices, as well as support for key industry developments such as the transition to T+1 settlement in line with upcoming UK regulatory changes and heightened operational scrutiny under the Consumer Duty framework. All capabilities have been developed for **renowned investment firms** in the UK. Built on **AXIA's modern cloud-native architecture and AI-embedded foundations**, this expanded solution now delivers stronger localisation, faster time to value and enhanced flexibility for clients operating in one of the world's most demanding financial markets.

Contemi's WIN solution will **continue to be supported for its existing clients** at the highest standards throughout the transition.

The **UK investment management** sector continues to face **mounting complexity**, driven by evolving FCA requirements, while firms are simultaneously under pressure to modernise legacy infrastructures and deliver transparent, client-centric digital experiences. By deepening its local expertise while leveraging the scale, innovation and stability of an **international technology group, Profile** is well positioned to support UK wealth and investment managers with a **single, modern, cloud-based and AI-enabled solution** designed for long-term growth and resilience.

Stefanos Athanasiadis, Managing Director of Investment Solutions at Profile, commented: "This acquisition reinforces the UK as a strategic market for Profile and is fully aligned with our long-term growth strategy in investment management technology. Contemi Solutions brings more than 20 years of hands-on experience in the UK investment management market. By bringing the associated UK expertise and team into Profile's investment management offering, we significantly enhance our ability to serve UK clients with solutions that are both technologically advanced and deeply aligned with local market realities. We are committed to continuity for existing clients while building an offering that sets a new standard for what UK wealth managers can expect from their technology partner."
